PAINTLESS DENT REPAIR

PARSCERTIFIED.COM

What is PDR?

Paintless dent repair (PDR) is a repair process that involves the removal of hail damage, minor dents and dings from your vehicle's exterior surface without disturbing the existing paint finish.

How Does it Work?

The PDR procedure involves the use of specialized tools to access the damaged area relieving the stress and bringing the panel back to its original form. Our highly-skilled technicians utilize these repair methods to restore your vehicle back to pre-loss condition eliminating the need for conventional repairs.
