**Comments from Patrick Waddell, Senior Portfolio Manager of the Geode Capital Management, LLC, investment management team:** For the year, the fund's share classes produced a gain in the low single digits, a result that was roughly in line with the benchmark S&P 500®. In the consumer discretionary sector, the strongest-performing category in the index this period, online retail giant Amazon.com made a particularly large performance contribution. Amazon's shares more than doubled, due in part to stronger-than-expected financial results. Also in consumer discretionary, home products superstore retailer Home Depot and coffee retailer Starbucks added value, gaining about 28% and 48%, respectively. Several technology stocks also lifted results, most notably software manufacturer Microsoft; social networking company Facebook; and Alphabet, the parent company of Internet search leader Google. On the negative side, various energy companies detracted, an unsurprising development in light of the plummeting price of oil. In this sector, integrated energy producers such as Exxon Mobil (-13%), Chevron (-16%) and ConocoPhillips (-29%) hampered results, as did energy transportation company Kinder Morgan (-63%). Another detractor was QUALCOMM, whose proprietary technology is found in most of the world's smartphones. Concerns about the company's ability to collect royalty payments in China was partly behind the stock's roughly -31% return for the year.

*The views expressed above reflect those of the portfolio manager(s) only through the end of the period as stated on the cover of this report and do not necessarily represent the views of Fidelity or any other person in the Fidelity organization. ## Futures Contracts

| | Expiration Date | Underlying Face Amount at Value | Unrealized Appreciation/ (Depreciation) |
|---|---|---|---|
| **Purchased** | | | |
| **Equity Index Contracts** | | | |
| 123 CME E-mini S&P 500 Index Contracts (United States) | March 2016 | $ 12,517,710 | $ 32,026 |
| 82 CME S&P 500 Index Contracts (United States) | March 2016 | 41,725,700 | (29,119) |
| **TOTAL FUTURES CONTRACTS** | | | $ 2,907 |

The face value of futures purchased as a percentage of Net Assets is 1.1%

*See accompanying notes which are an integral part of the financial statements.*

## Legend

(a) Security or a portion of the security is on loan at period end.

(b) Non-income producing

(c) Security or a portion of the security was pledged to cover margin requirements for futures contracts. At period end, the value of securities pledged amounted to $2,421,723.

(d) Affiliated fund that is generally available only to investment companies and other accounts managed by Fidelity Investments. The rate quoted is the annualized seven-day yield of the fund at period end. A complete unaudited listing of the fund's holdings as of its most recent quarter end is available upon request. In addition, each Fidelity Central Fund's financial statements, which are not covered by the Fund's Report of Independent Registered Public Accounting Firm, are available on the SEC's website or upon request.

(e) Investment made with cash collateral received from securities on loan.

## Affiliated Central Funds

Information regarding fiscal year to date income earned by the Fund from investments in Fidelity Central Funds is as follows:

| Fund | Income earned |
|---|---|
| Fidelity Cash Central Fund | $ 90,061 |
| Fidelity Securities Lending Cash Central Fund | 371,854 |
| Total | $ 461,915 |

## Investment Valuation

The following is a summary of the inputs used, as of December 31, 2015, involving the Fund's assets and liabilities carried at fair value. The inputs or methodology used for valuing securities may not be an indication of the risk associated with investing in those securities. For more information on valuation inputs, and their aggregation into the levels used below, please refer to the Investment Valuation section in the accompanying Notes to Financial Statements.

**Valuation Inputs at Reporting Date:**

| Description | Total | Level 1 | Level 2 | Level 3 |
|---|---|---|---|---|
| **Investments in Securities:** | | | | |
| **Equities:** | | | | |
| Consumer Discretionary | $ 604,154,126 | $ 604,154,126 | $ — | $ — |
| Consumer Staples | 471,470,046 | 471,470,046 | — | — |

### Statement of Changes in Net Assets

| | Year ended December 31, 2015 | Year ended December 31, 2014 |
|---|---|---|
| **Increase (Decrease) in Net Assets** | | |
| Operations | | |
| Net investment income (loss) | $ 88,948,271 | $ 73,306,066 |
| Net realized gain (loss) | 1,501,492 | 10,964,072 |
| Change in net unrealized appreciation (depreciation) | (53,235,474) | 419,365,494 |
| **Net increase (decrease) in net assets resulting from operations** | 37,214,289 | 503,635,632 |
| Distributions to shareholders from net investment income | (94,599,871) | (67,240,648) |
| Distributions to shareholders from net realized gain | (2,817,105) | (3,785,052) |
| **Total distributions** | (97,416,976) | (71,025,700) |
| Share transactions – net increase (decrease) | 449,403,160 | 335,970,800 |
| **Total increase (decrease) in net assets** | 389,200,473 | 768,580,732 |
| **Net Assets** | | |
| Beginning of period | 4,354,441,148 | 3,585,860,416 |
| End of period (including undistributed net investment income of $151,183 and undistributed net investment income of $5,759,036, respectively) | $ 4,743,641,621 | $ 4,354,441,148 |

*See accompanying notes which are an integral part of the financial statements.*

## Financial Highlights — VIP Index 500 Portfolio Initial Class

| Years ended December 31, | 2015 | 2014 | 2013 | 2012 | 2011 |
|---|---|---|---|---|---|
| **Selected Per–Share Data** | | | | | |
| Net asset value, beginning of period | $ 208.12 | $ 186.29 | $ 144.91 | $ 129.33 | $ 132.39 |
| Income from Investment Operations | | | | | |
| Net investment income (loss)[A] | 4.15 | 3.75 | 3.31 | 3.12 | 2.58 |
| Net realized and unrealized gain (loss) | (1.44) | 21.58 | 42.98 | 17.29 | .10 |
| Total from investment operations | 2.71 | 25.33 | 46.29 | 20.41 | 2.68 |
| Distributions from net investment income | (4.26) | (3.31) | (3.27) | (3.06) | (2.65) |
| Distributions from net realized gain | (.13) | (.18) | (1.64) | (1.77) | (3.09) |
| Total distributions | (4.40)[B] | (3.50)[C] | (4.91) | (4.83) | (5.74) |
| Net asset value, end of period | $ 206.43 | $ 208.12 | $ 186.29 | $ 144.91 | $ 129.33 |
| **Total Return**[D,E] | 1.33% | 13.57% | 32.25% | 15.91% | 2.04% |
| **Ratios to Average Net Assets**[F,G] | | | | | |
| Expenses before reductions | .10% | .10% | .10% | .10% | .10% |
| Expenses net of fee waivers, if any | .10% | .10% | .10% | .10% | .10% |
| Expenses net of all reductions | .10% | .10% | .10% | .10% | .10% |
| Net investment income (loss) | 1.98% | 1.91% | 1.98% | 2.20% | 1.96% |
| **Supplemental Data** | | | | | |
| Net assets, end of period (000 omitted) | $ 4,103,865 | $ 3,823,973 | $ 3,163,673 | $ 2,294,364 | $ 1,918,592 |
| Portfolio turnover rate[H] | 9% | 3% | 5% | 5% | 5% |

A *Calculated based on average shares outstanding during the period.*
B *Total distributions of $4.40 per share is comprised of distributions from net investment income of $4.262 and distributions from net realized gain of $.133 per share.*
C *Total distributions of $3.50 per share is comprised of distributions from net investment income of $3.314 and distributions from net realized gain of $.184 per share.*
D *Total returns do not reflect charges attributable to your insurance company's separate account. Inclusion of these charges would reduce the total returns shown.*
E *Total returns would have been lower if certain expenses had not been reduced during the applicable periods shown.*
F *Fees and expenses of any underlying Fidelity Central Funds are not included in the Fund's expense ratio. The Fund indirectly bears its proportionate share of the expenses of any underlying Fidelity Central Funds.*
G *Expense ratios reflect operating expenses of the class. Expenses before reductions do not reflect amounts reimbursed by the investment adviser or reductions from expense offset arrangements and do not represent the amount paid by the class during periods when reimbursements or reductions occur. Expenses net of fee waivers reflect expenses after reimbursement by the investment adviser but prior to reductions from expense offset arrangements. Expenses net of all reductions represent the net expenses paid by the class.*
H *Amount does not include the portfolio activity of any underlying Fidelity Central Funds.*

*See accompanying notes which are an integral part of the financial statements.*

# Notes to Financial Statements
For the period ended December 31, 2015

### 1. Organization.

VIP Index 500 Portfolio (the Fund) is a fund of Variable Insurance Products Fund II (the Trust) and is authorized to issue an unlimited number of shares. The Trust is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company organized as a Massachusetts business trust. Shares of the Fund may only be purchased by insurance companies for the purpose of funding variable annuity or variable life insurance contracts. The Fund offers the following classes of shares: Initial Class shares, Service Class shares and Service Class 2 shares. All classes have equal rights and voting privileges, except for matters affecting a single class.

### 2. Investments in Fidelity Central Funds.

The Fund invests in Fidelity Central Funds, which are open-end investment companies generally available only to other investment companies and accounts managed by the investment adviser and its affiliates. The Fund's Schedule of Investments lists each of the Fidelity Central Funds held as of period end, if any, as an investment of the Fund, but does not include the underlying holdings of each Fidelity Central Fund. As an Investing Fund, the Fund indirectly bears its proportionate share of the expenses of the underlying Fidelity Central Funds.

The Money Market Central Funds seek preservation of capital and current income and are managed by Fidelity Investments Money Management, Inc. (FIMM), an affiliate of the investment adviser. Annualized expenses of the Money Market Central Funds as of their most recent shareholder report date are less than .005%.

A complete unaudited list of holdings for each Fidelity Central Fund is available upon request or at the Securities and Exchange Commission (the SEC) website at www.sec.gov. In addition, the financial statements of the Fidelity Central Funds, which are not covered by the Fund's Report of Independent Registered Public Accounting Firm, are available on the SEC website or upon request.

### 3. Significant Accounting Policies.

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), which require management to make certain estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates. Subsequent events, if any, through the date that the financial statements were issued have been evaluated in the preparation of the financial statements. The following summarizes the significant accounting policies of the Fund:

**Investment Valuation.** Investments are valued as of 4:00 p.m. Eastern time on the last calendar day of the period. The Board of Trustees (the Board) has delegated the day to day responsibility for the valuation of the Fund's investments to the Fidelity Management & Research Company (FMR) Fair Value Committee (the Committee). In accordance with valuation policies and procedures approved by the Board, the Fund attempts to obtain prices from one or more third party pricing vendors or brokers to value its investments. When current market prices, quotations or currency exchange rates are not readily available or reliable, investments will be fair valued in good faith by the Committee, in accordance with procedures adopted by the Board. Factors used in determining fair value vary by investment type and may include market or investment specific events, changes in interest rates and credit quality. The frequency with which these procedures are used cannot be predicted and they may be utilized to a significant extent. The Committee oversees the Fund's valuation policies and procedures and reports to the Board on the Committee's activities and fair value determinations. The Board monitors the appropriateness of the procedures used in valuing the Fund's investments and ratifies the fair value determinations of the Committee.

The Fund categorizes the inputs to valuation techniques used to value its investments into a disclosure hierarchy consisting of three levels as shown below:

Level 1 – quoted prices in active markets for identical investments

Level 2 – other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, etc.)

Level 3 – unobservable inputs (including the Fund's own assumptions based on the best information available)

Valuation techniques used to value the Fund's investments by major category are as follows:

Equity securities, including restricted securities, for which market quotations are readily available, are valued at the last reported sale price or official closing price as reported by a third party pricing vendor on the primary market or exchange on which they are traded and are categorized as Level 1 in the hierarchy. In the event there were no sales during the day or closing prices are not available, securities are valued at the last quoted bid price or may be valued using the last available price and are generally categorized as Level 2 in the hierarchy. For foreign equity securities, when market or security specific events arise, comparisons to the valuation of American Depositary Receipts (ADRs), futures contracts, Exchange-Traded Funds (ETFs) and certain indexes as well as quoted prices for similar securities may be used and would be categorized as Level 2 in the hierarchy. Utilizing these techniques may result in transfers between Level 1 and Level 2. For equity securities, including restricted securities, where observable inputs are limited, assumptions about market activity and risk are used and these securities may be categorized as Level 3 in the hierarchy.

Debt securities, including restricted securities, are valued based on evaluated prices received from third party pricing vendors or from brokers who make markets in such securities. U.S. government and government agency obligations are valued by pricing vendors who utilize matrix pricing which considers yield or price of bonds of comparable quality, coupon, maturity and type or by broker-supplied prices When independent prices are unavailable or unreliable, debt securities may be valued utilizing pricing methodologies which consider similar factors that would be used by third party pricing vendors. Debt securities are generally categorized as Level 2 in the hierarchy but may be Level 3 depending on the circumstances.

Futures contracts are valued at the settlement price established each day by the board of trade or exchange on which they are traded and are categorized as Level 1 in the hierarchy. Investments in open-end mutual funds, including the Fidelity Central Funds, are valued at their closing net asset value (NAV) each business day and are categorized as Level 1 in the hierarchy.

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The aggregate value of investments by input level as of December 31, 2015 is included at the end of the Fund's Schedule of Investments.

**Investment Transactions and Income.** For financial reporting purposes, the Fund's investment holdings and NAV include trades executed through the end of the last business day of the period. The NAV per share for processing shareholder transactions is calculated as of the close of business of the New York Stock Exchange (NYSE), normally 4:00 p.m. Eastern time and includes trades executed through the end of the prior business day. Gains and losses on securities sold are determined on the basis of identified cost and may include proceeds received from litigation. Dividend income is recorded on the ex-dividend date, except for certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the Fund is informed of the ex-dividend date. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Income and capital gain distributions from Fidelity Central Funds, if any, are recorded on the ex-dividend date. Distributions received on securities that represent a return of capital or capital gain are recorded as a reduction of cost of investments and/or as a realized gain. Subsequent to ex-dividend date the Fund determines the components of these distributions, based upon receipt of tax filings or other correspondence relating to the underlying investment. Interest income is accrued as earned and includes coupon interest and amortization of premium and accretion of discount on debt securities as applicable.

**Class Allocations and Expenses.** Investment income, realized and unrealized capital gains and losses, common expenses of the Fund, and certain fund-level expense reductions, if any, are allocated daily on a pro-rata basis to each class based on the relative net assets of each class to the total net assets of the Fund. Each class differs with respect to distribution and service plan fees incurred. Certain expense reductions may also differ by class. For the reporting period, the allocated portion of income and expenses to each class as a percent of its average net assets may vary due to the timing of recording these transactions in relation to fluctuating net assets of the classes. Expenses directly attributable to a fund are charged to that fund. Expenses attributable to more than one fund are allocated among the respective funds on the basis of relative net assets or other appropriate methods. Expense estimates are accrued in the period to which they relate and adjustments are made when actual amounts are known.

**Deferred Trustee Compensation.** Under a Deferred Compensation Plan (the Plan), independent Trustees may elect to defer receipt of a portion of their annual compensation. Deferred amounts are invested in a cross-section of Fidelity funds, are marked-to-market and remain in the Fund until distributed in accordance with the Plan. The investment of deferred amounts and the offsetting payable to the Trustees are included in the accompanying Statement of Assets and Liabilities.

**Income Tax Information and Distributions to Shareholders.** Each year, the Fund intends to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code, including distributing substantially all of its taxable income and realized gains. As a result, no provision for U.S. Federal income taxes is required. As of December 31, 2015, the Fund did not have any unrecognized tax benefits in the financial statements; nor is the Fund aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months. The Fund files a U.S. federal tax return, in addition to state and local tax returns as required. The Fund's federal income tax returns are subject to examination by the Internal Revenue Service (IRS) for a period of three fiscal years after they are filed. State and local tax returns may be subject to examination for an additional fiscal year depending on the jurisdiction.

Distributions are declared and recorded on the ex-dividend date. Income dividends and capital gain distributions are declared separately for each class. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP.

Capital accounts within the financial statements are adjusted for permanent book-tax differences. These adjustments have no impact on net assets or the results of operations. Capital accounts are not adjusted for temporary book-tax differences which will reverse in a subsequent period.

Book-tax differences are primarily due to futures contracts, market discount, deferred trustees compensation and losses deferred due to wash sales.

The federal tax cost of investment securities and unrealized appreciation (depreciation) as of period end were as follows:

| | |
|---|---|
| **Gross unrealized appreciation** | $ 2,368,147,015 |
| **Gross unrealized depreciation** | (160,474,402) |
| **Net unrealized appreciation (depreciation) on securities** | $ 2,207,672,613 |
| **Tax Cost** | $ 2,781,340,950 |

The tax-based components of distributable earnings as of period end were as follows:

| | |
|---|---|
| **Undistributed ordinary income** | $ 190,953 |
| **Undistributed long-term capital gain** | $ 4,767,769 |
| **Net unrealized appreciation (depreciation) on securities and other investments** | $2,207,672,613 |

The tax character of distributions paid was as follows:

| | December 31, 2015 | December 31, 2014 |
|---|---|---|
| **Ordinary Income** | $95,404,758 | $71,025,700 |
| **Long-term Capital Gains** | 2,012,218 | – |
| **Total** | $97,416,976 | $71,025,700 |

## 4. Derivative Instruments.

**Risk Exposures and the Use of Derivative Instruments.** The Fund's investment objective allows the Fund to enter into various types of derivative contracts, including futures contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or over-the-counter (OTC). Derivatives may involve a future commitment to buy or sell a specified asset based on specified terms, to exchange future cash flows at periodic intervals based on a notional principal amount, or for one party to make one or more payments upon the occurrence of specified events in exchange for periodic payments from the other party.

The Fund used derivatives to increase returns and to manage exposure to certain risks as defined below. The success of any strategy involving derivatives depends on analysis of numerous economic factors, and if the strategies for investment do not work as intended, the Fund may not achieve its objectives.

The Fund's use of derivatives increased or decreased its exposure to the following risk:

| | |
|---|---|
| Equity Risk | Equity risk relates to the fluctuations in the value of financial instruments as a result of changes in market prices (other than those arising from interest rate risk or foreign exchange risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. |

The Fund is also exposed to additional risks from investing in derivatives, such as liquidity risk and counterparty credit risk. Liquidity risk is the risk that the Fund will be unable to close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligation to the Fund. Counterparty credit risk related to exchange-traded futures contracts may be mitigated by the protection provided by the exchange on which they trade.

Investing in derivatives may involve greater risks than investing in the underlying assets directly and, to varying degrees, may involve risk of loss in excess of any initial investment and collateral received and amounts recognized in the Statement of Assets and Liabilities. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

**Futures Contracts.** A futures contract is an agreement between two parties to buy or sell a specified underlying instrument for a fixed price at a specified future date. The Fund used futures contracts to manage its exposure to the stock market.

Upon entering into a futures contract, a fund is required to deposit either cash or securities (initial margin) with a clearing broker in an amount equal to a certain percentage of the face value of the contract. Futures contracts are marked-to-market daily and subsequent daily payments (variation margin) are made or received by a fund depending on the daily fluctuations in the value of the futures contracts and are recorded as unrealized appreciation or (depreciation). This receivable and/or payable, if any, is included in daily variation margin for derivative instruments in the Statement of Assets and Liabilities. Realized gain or (loss) is recorded upon the expiration or closing of a futures contract.

Any open futures contracts at period end are presented in the Schedule of Investments under the caption "Futures Contracts". The underlying face amount at value reflects each contract's exposure to the underlying instrument or index at period end and is representative of volume of activity during the period. Securities deposited to meet initial margin requirements are identified in the Schedule of Investments.

During the period the Fund recognized net realized gain (loss) of $1,240,704 and a change in net unrealized appreciation (depreciation) of $(861,192) related to its investment in futures contracts. These amounts are included in the Statement of Operations.

## 5. Purchases and Sales of Investments.

Purchases and sales of securities, other than short-term securities, aggregated $851,506,506 and $389,366,139, respectively.

## 6. Fees and Other Transactions with Affiliates.

**Management Fee and Expense Contract.** Fidelity Management & Research Company (the investment adviser) and its affiliates provide the Fund with investment management related services for which the Fund pays a monthly management fee. The management fee is based on an annual rate of .045% of the Fund's average net assets. Under the management contract, the investment adviser pays all other fund-level expenses, except the compensation of the independent Trustees and certain other expenses such as interest expense, including commitment fees. In addition, under an expense contract, the investment adviser pays class-level expenses as necessary so that total expenses do not exceed an annual rate of .10% of each class' average net assets, excluding the distribution and service fee for each applicable class, with certain exceptions.

**Sub-Adviser.** Geode Capital Management, LLC (Geode), serves as sub-adviser for the Fund. Geode provides discretionary investment advisory services to the Fund and is paid by the investment adviser for providing these services.

**Distribution and Service Plan Fees.** In accordance with Rule 12b-1 of the 1940 Act, the Fund has adopted separate 12b-1 Plans for each Service Class of shares. Each Service Class pays Fidelity Distributors Corporation (FDC), an affiliate of the investment adviser, a service fee. For the period, the service fee is based on an annual rate of .10% of Service Class' average net assets and .25% of Service Class 2's average net assets.

For the period, total fees, all of which were re-allowed to insurance companies for the distribution of shares and providing shareholder support services, were as follows:

| | |
|---|---|
| **Service Class** | $ 64,627 |
| **Service Class 2** | 1,348,268 |
| | $1,412,895 |

**Transfer Agent Fees.** Fidelity Investments Institutional Operations Company, Inc. (FIIOC), an affiliate of the investment adviser, is the transfer, dividend disbursing, and shareholder servicing agent for each class. FIIOC receives asset-based fees of .07% of each class's average net assets for transfer agent services, typesetting, printing and mailing of shareholder reports, excluding mailing of proxy statements and out of pocket expenses. Under the expense contract, each class pays a portion of the transfer agent fees equal to an annual rate of .055% of class-level average net assets. For the period, transfer agent fees for each class, including out of pocket expenses, were as follows:

| | |
|---|---|
| **Initial Class** | $2,177,984 |
| **Service Class** | 35,545 |
| **Service Class 2** | 296,619 |
| | $2,510,148 |

**Interfund Lending Program.** Pursuant to an Exemptive Order issued by the SEC, the Fund, along with other registered investment companies having management contracts with Fidelity Management & Research Company (FMR) or other affiliated entities of FMR, may participate in an interfund lending program. This program provides an alternative credit facility allowing the funds to borrow from, or lend money to, other participating affiliated funds. At period end, there were no interfund loans outstanding. The Fund's activity in this program during the period for which loans were outstanding was as follows:

| Borrower or Lender | Average Loan Balance | Weighted Average Interest Rate | Interest Expense |
|---|---|---|---|
| Borrower | $13,617,400 | .41% | $784 |

**Interfund Trades.** The Fund may purchase from or sell securities to other Fidelity Funds under procedures adopted by the Board. The procedures have been designed to ensure these interfund trades are executed in accordance with Rule 17a-7 of the 1940 Act. Interfund trades are included within the respective purchases and sales amounts shown in the Purchases and Sales of Investments note.

## 7. Committed Line of Credit.

The Fund participates with other funds managed by the investment adviser or an affiliate in a $4.25 billion credit facility (the "line of credit") to be utilized for temporary or emergency purposes to fund shareholder redemptions or for other short-term liquidity purposes. The Fund has agreed to pay commitment fees on its pro-rata portion of the line of credit, which amounted to $6,390 and is reflected in Miscellaneous expenses on the Statement of Operations. During the period, the Fund did not borrow on this line of credit.

## 8. Security Lending.

The Fund lends portfolio securities through a lending agent from time to time in order to earn additional income. On the settlement date of the loan, the Fund receives collateral (in the form of U.S. Treasury obligations, letters of credit and/or cash) against the loaned securities and maintains collateral in an amount not less than 100% of the market value of the loaned securities during the period of the loan. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day. The Fund or borrower may terminate the loan at any time, and if the borrower defaults on its obligation to return the securities loaned because of insolvency or other reasons, the Fund may apply collateral received from the borrower against the obligation. The Fund may experience delays and costs in recovering the securities loaned. Any cash collateral received is invested in the Fidelity Securities Lending Cash Central Fund. The value of loaned securities and cash collateral at period end are disclosed on the Fund's Statement of Assets and Liabilities. Security lending income represents the income earned on investing cash collateral, less rebates paid to borrowers and any lending agent fees associated with the loan, plus any premium payments received for lending certain types of securities. Security lending income is presented in the Statement of Operations as a component of income from Fidelity Central Funds. Total security lending income during the period amounted to $371,854.

## 9. Expense Reductions.

Through arrangements with the Fund's custodian, credits realized as a result of certain uninvested cash balances were used to reduce the Fund's expenses. During the period, these credits reduced the Fund's custody expenses by $107.

## 10. Distributions to Shareholders.

Distributions to shareholders of each class were as follows:

| Years ended December 31, | 2015 | 2014 |
|---|---|---|
| **From net investment income** | | |
| Initial Class | $81,979,682 | $59,778,108 |
| Service Class | 1,236,538 | 964,455 |
| Service Class 2 | 11,383,651 | 6,498,085 |
| Total | $94,599,871 | $67,240,648 |
| **From net realized gain** | | |
| Initial Class | $ 2,464,544 | $ 3,319,370 |
| Service Class | 40,908 | 56,538 |
| Service Class 2 | 311,653 | 409,144 |
| Total | $ 2,817,105 | $ 3,785,052 |

## 11. Share Transactions.

Transactions for each class of shares were as follows:

| Years ended December 31, | Shares 2015 | Shares 2014 | Dollars 2015 | Dollars 2014 |
|---|---|---|---|---|
| **Initial Class** | | | | |
| Shares sold | 3,162,148 | 3,319,575 | $ 663,026,404 | $ 652,017,440 |
| Reinvestment of distributions | 415,051 | 298,991 | 84,444,226 | 63,097,478 |
| Shares redeemed | (2,070,988) | (2,227,193) | (432,681,340) | (438,600,626) |
| Net increase (decrease) | 1,506,211 | 1,391,373 | $ 314,789,290 | $ 276,514,292 |
| **Service Class** | | | | |
| Shares sold | 36,097 | 38,635 | $ 7,586,924 | $ 7,586,589 |
| Reinvestment of distributions | 6,296 | 4,853 | 1,277,446 | 1,020,993 |
| Shares redeemed | (39,010) | (29,328) | (8,131,171) | (5,767,815) |
| Net increase (decrease) | 3,383 | 14,160 | $ 733,199 | $ 2,839,767 |
| **Service Class 2** | | | | |
| Shares sold | 2,406,847 | 583,624 | $ 505,411,905 | $ 115,933,018 |
| Reinvestment of distributions | 58,109 | 33,065 | 11,695,304 | 6,907,229 |
| Shares redeemed | (1,911,012) | (343,791) | (383,226,538) | (66,223,506) |
| Net increase (decrease) | 553,944 | 272,898 | $ 133,880,671 | $ 56,616,741 |

## 12. Other.

The Fund's organizational documents provide former and current trustees and officers with a limited indemnification against liabilities arising in connection with the performance of their duties to the Fund. In the normal course of business, the Fund may also enter into contracts that provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown as this would be dependent on future claims that may be made against the Fund. The risk of material loss from such claims is considered remote.

At the end of the period, the investment adviser or its affiliates were the owners of record of 39% of the total outstanding shares of the Fund.

# Report of Independent Registered Public Accounting Firm

To the Trustees of Variable Insurance Products Fund II and Shareholders of VIP Index 500 Portfolio:

We have audited the accompanying statement of assets and liabilities of VIP Index 500 Portfolio (the Fund), a fund of Variable Insurance Products Fund II, including the schedule of investments, as of December 31, 2015, and the related statement of operations for the year then ended, the statement of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2015, by correspondence with the custodians and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of VIP Index 500 Portfolio as of December 31, 2015, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

# Trustees and Officers

The Trustees, Members of the Advisory Board (if any), and officers of the trust and fund, as applicable, are listed below. The Board of Trustees governs the fund and is responsible for protecting the interests of shareholders. The Trustees are experienced executives who meet periodically throughout the year to oversee the fund's activities, review contractual arrangements with companies that provide services to the fund, oversee management of the risks associated with such activities and contractual arrangements, and review the fund's performance. Each of the Trustees oversees 170 funds.

The Trustees hold office without limit in time except that (a) any Trustee may resign; (b) any Trustee may be removed by written instrument, signed by at least two-thirds of the number of Trustees prior to such removal; (c) any Trustee who requests to be retired or who has become incapacitated by illness or injury may be retired by written instrument signed by a majority of the other Trustees; and (d) any Trustee may be removed at any special meeting of shareholders by a two-thirds vote of the outstanding voting securities of the trust. Each Trustee who is not an interested person (as defined in the 1940 Act) of the trust and the fund is referred to herein as an Independent Trustee. Each Independent Trustee shall retire not later than the last day of the calendar year in which his or her 75th birthday occurs. The Independent Trustees may waive this mandatory retirement age policy with respect to individual Trustees. Officers and Advisory Board Members hold office without limit in time, except that any officer or Advisory Board Member may resign or may be removed by a vote of a majority of the Trustees at any regular meeting or any special meeting of the Trustees. Except as indicated, each individual has held the office shown or other offices in the same company for the past five years.

The fund's Statement of Additional Information (SAI) includes more information about the Trustees. To request a free copy, call Fidelity at 1-877-208-0098.

**Experience, Skills, Attributes, and Qualifications of the Trustees.** The Governance and Nominating Committee has adopted a statement of policy that describes the experience, qualifications, attributes, and skills that are necessary and desirable for potential Independent Trustee candidates (Statement of Policy). The Board believes that each Trustee satisfied at the time he or she was initially elected or appointed a Trustee, and continues to satisfy, the standards contemplated by the Statement of Policy. The Governance and Nominating Committee also engages professional search firms to help identify potential Independent Trustee candidates who have the experience, qualifications, attributes, and skills consistent with the Statement of Policy. From time to time, additional criteria based on the composition and skills of the current Independent Trustees, as well as experience or skills that may be appropriate in light of future changes to board composition, business conditions, and regulatory or other developments, have also been considered by the professional search firms and the Governance and Nominating Committee. In addition, the Board takes into account the Trustees' commitment and participation in Board and committee meetings, as well as their leadership of standing and ad hoc committees throughout their tenure.

In determining that a particular Trustee was and continues to be qualified to serve as a Trustee, the Board has considered a variety of criteria, none of which, in isolation, was controlling. The Board believes that, collectively, the Trustees have balanced and diverse experience, qualifications, attributes, and skills, which allow the Board to operate effectively in governing the fund and protecting the interests of shareholders. Information about the specific experience, skills, attributes, and qualifications of each Trustee, which in each case led to the Board's conclusion that the Trustee should serve (or continue to serve) as a trustee of the fund, is provided below.

**Board Structure and Oversight Function.** James C. Curvey is an interested person and currently serves as Chairman. The Trustees have determined that an interested Chairman is appropriate and benefits shareholders because an interested Chairman has a personal and professional stake in the quality and continuity of services provided to the fund. Independent Trustees exercise their informed business judgment to appoint an individual of their choosing to serve as Chairman, regardless of whether the Trustee happens to be independent or a member of management. The Independent Trustees have determined that they can act independently and effectively without having an Independent Trustee serve as Chairman and that a key structural component for assuring that they are in a position to do so is for the Independent Trustees to constitute a substantial majority for the Board. The Independent Trustees also regularly meet in executive session. Ned C. Lautenbach serves as Chairman of the Independent Trustees and as such (i) acts as a liaison between the Independent Trustees and management with respect to matters important to the Independent Trustees and (ii) with management prepares agendas for Board meetings.

Fidelity® funds are overseen by different Boards of Trustees. The fund's Board oversees Fidelity's high income and certain equity funds, and other Boards oversee Fidelity's investment-grade bond, money market, asset allocation, and sector funds. The asset allocation funds may invest in Fidelity® funds overseen by the fund's Board. The use of separate Boards, each with its own committee structure, allows the Trustees of each group of Fidelity® funds to focus on the unique issues of the funds they oversee, including common research, investment, and operational issues. On occasion, the separate Boards establish joint committees to address issues of overlapping consequences for the Fidelity® funds overseen by each Board.

The Trustees operate using a system of committees to facilitate the timely and efficient consideration of all matters of importance to the Trustees, the fund, and fund shareholders and to facilitate compliance with legal and regulatory requirements and oversight of the fund's activities and associated risks. The Board, acting through its committees, has charged FMR and its affiliates with (i) identifying events or circumstances the occurrence of which could have demonstrably adverse effects on the fund's business and/or reputation; (ii) implementing processes and controls to lessen the possibility that such events or circumstances occur or to mitigate the effects of such events or circumstances if they do occur; and (iii) creating and maintaining a system designed to evaluate continuously business and market conditions in order to facilitate the identification and implementation processes described in (i) and (ii) above. Because the day-to-day operations and activities of the fund are carried out by or through FMR, its affiliates, and other service providers, the fund's exposure to risks is mitigated but not eliminated by the processes overseen

by the Trustees. While each of the Board's committees has responsibility for overseeing different aspects of the fund's activities, oversight is exercised primarily through the Operations, Audit, and Compliance Committees. In addition, the Independent Trustees have worked with FMR to enhance the Board's oversight of investment and financial risks, legal and regulatory risks, technology risks, and operational risks, including the development of additional risk reporting to the Board. For example, a working group comprised of Independent Trustees and FMR has worked and continues to work to review the Fidelity®funds' valuation-related activities, reporting and risk management. Appropriate personnel, including but not limited to the fund's Chief Compliance Officer (CCO), FMR's internal auditor, the independent accountants, the fund's Treasurer and portfolio management personnel, make periodic reports to the Board's committees, as appropriate, including an annual review of Fidelity's risk management program for the Fidelity®funds. The responsibilities of each standing committee, including their oversight responsibilities, are described further under "Standing Committees of the Trustees."

Interested Trustees*:

Correspondence intended for a Trustee who is an interested person may be sent to Fidelity Investments, 245 Summer Street, Boston, Massachusetts 02210.

Name, Year of Birth; Principal Occupations and Other Relevant Experience+

James C. Curvey (1935)

Year of Election or Appointment: 2007
Trustee
Chairman of the Board of Trustees

Mr. Curvey also serves as Trustee of other Fidelity® funds. Mr. Curvey is a Director of Fidelity Research & Analysis Co. (investment adviser firm, 2009-present), and Vice Chairman (2007-present) and Director of FMR LLC (diversified financial services company). In addition, Mr. Curvey serves as an Overseer for the Boston Symphony Orchestra and a member of the board of Artis-Naples, Naples, Florida, and as a Trustee for Brewster Academy, Wolfeboro, New Hampshire. Previously, Mr. Curvey served as a Director of Fidelity Investments Money Management, Inc. (investment adviser firm, 2009-2014) and a Director of FMR and FMR Co., Inc. (investment adviser firms, 2007-2014).

Charles S. Morrison (1960)

Year of Election or Appointment: 2014
Trustee

Mr. Morrison also serves as Trustee of other funds. He serves as a Director of Fidelity Investments Money Management, Inc. (FIMM) (investment adviser firm, 2014-present), Director of Fidelity SelectCo, LLC (investment adviser firm, 2014-present), President, Asset Management (2014-present), and is an employee of Fidelity Investments. Previously, Mr. Morrison served as Vice President of Fidelity's Fixed Income and Asset Allocation Funds (2012-2014), President, Fixed Income (2011-2014), Vice President of Fidelity's Money Market Funds (2005-2009), President, Money Market Group Leader of FMR (investment adviser firm, 2009), and Senior Vice President, Money Market Group of FMR (2004-2009). Mr. Morrison also served as Vice President of Fidelity's Bond Funds (2002-2005), certain Balanced Funds (2002-2005), and certain Asset Allocation Funds (2002-2007), and as Senior Vice President (2002-2005) of Fidelity's Bond Division.

* Determined to be an "Interested Trustee" by virtue of, among other things, his or her affiliation with the trust or various entities under common control with FMR.

+ The information includes the Trustee's principal occupation during the last five years and other information relating to the experience, attributes, and skills relevant to the Trustee's qualifications to serve as a Trustee, which led to the conclusion that the Trustee should serve as a Trustee for the fund.

Independent Trustees:

Correspondence intended for an Independent Trustee may be sent to Fidelity Investments, P.O. Box 55235, Boston, Massachusetts 02205-5235.

Name, Year of Birth; Principal Occupations and Other Relevant Experience+

Dennis J. Dirks (1948)

Year of Election or Appointment: 2005
Trustee

Mr. Dirks also serves as Trustee of other Fidelity® funds. Prior to his retirement in May 2003, Mr. Dirks was Chief Operating Officer and a member of the Board of The Depository Trust & Clearing Corporation (DTCC). He also served as President, Chief Operating Officer, and Board member of The Depository Trust Company (DTC) and President and Board member of the National Securities Clearing Corporation (NSCC). In addition, Mr. Dirks served as Chief Executive Officer and Board member of the Government Securities Clearing Corporation, Chief Executive Officer and Board member of the Mortgage-Backed Securities Clearing Corporation, as a Trustee and a member of the Finance Committee of Manhattan College (2005-2008), as a Trustee and a member of the Finance Committee of AHRC of Nassau County (2006-2008), and as a member of the Independent Directors Council (IDC) Governing Council (2010-2015). Mr. Dirks is a member of the Board of Directors for The Brookville Center for Children's Services, Inc. (2009-present).

Alan J. Lacy (1953)

Year of Election or Appointment: 2008
Trustee

Mr. Lacy also serves as Trustee of other Fidelity® funds. Mr. Lacy serves as Chairman (2014-present) and a member (2010-present) of the Board of Directors of Dave & Buster's Entertainment, Inc. (restaurant and entertainment complexes) and a Director of Bristol-Myers Squibb Company (global pharmaceuticals, 2008-present). He is a Trustee of the California Chapter of The Nature Conservancy (2015-present) and a Director of the Center for Advanced Study in the Behavioral Sciences at Stanford University (2015-present). In addition, Mr. Lacy served as Senior Adviser (2007-2014) of Oak Hill Capital Partners, L.P. (private equity) and also served as Chief Executive Officer (2005) and Vice Chairman (2005-2006) of Sears Holdings Corporation (retail) and Chief Executive Officer and Chairman of the Board of Sears, Roebuck and Co. (retail, 2000-2005). Previously, Mr. Lacy served as Chairman (2008-2011) and a member (2006-2015) of the Board of Trustees of the National Parks Conservation Association and as a member of the Board of Directors for The Western Union Company (global money transfer, 2006-2011), The Hillman Companies, Inc. (hardware wholesalers, 2010-2014), and Earth Fare, Inc. (retail grocery, 2010-2014).

Ned C. Lautenbach (1944)

Year of Election or Appointment: 2000
Trustee
Chairman of the Independent Trustees

Mr. Lautenbach also serves as Trustee of other Fidelity® funds. Mr. Lautenbach currently serves as the Lead Director of the Eaton Corporation Board of Directors (diversified industrial, 1997-present). Mr. Lautenbach is Chairman of the Board of Directors of Artis-Naples in Naples, Florida (2012-present), a member of the Council on Foreign Relations (1994-present), and a member of the Board of Governors, State University System of Florida (2013-present). Previously, Mr. Lautenbach was a Partner/Advisory Partner at Clayton, Dubilier & Rice, LLC (private equity investment, 1998-2010), as well as a Director of Sony Corporation (2006-2007).

Joseph Mauriello (1944)

Year of Election or Appointment: 2008
Trustee

Mr. Mauriello also serves as Trustee of other Fidelity® funds. Prior to his retirement in January 2006, Mr. Mauriello served in numerous senior management positions including Deputy Chairman and Chief Operating Officer (2004-2005), and Vice Chairman of Financial Services (2002-2004) of KPMG LLP US (professional services, 1965-2005). Mr. Mauriello currently serves as a member of the Board of Directors of XL Group plc. (global insurance and re-insurance, 2006-present) and the Independent Directors Council (IDC) Governing Council (2015-present). Previously, Mr. Mauriello served as a Director of the Hamilton Funds of the Bank of New York (2006-2007) and of Arcadia Resources Inc. (health care services and products, 2007-2012).

Robert W. Selander (1950)

Year of Election or Appointment: 2011
Trustee

Mr. Selander also serves as Trustee of other Fidelity® funds. Mr. Selander serves as a Director of The Western Union Company (global money transfer, 2014-present) and a non-executive Chairman of Health Equity, Inc. (health savings custodian, 2015-present). Previously, Mr. Selander served as a Member of the Advisory Board of other Fidelity® funds (2011), and Executive Vice Chairman (2010), Chief Executive Officer (2009-2010), and President and Chief Executive Officer (1997-2009) of Mastercard, Inc.

Cornelia M. Small (1944)

Year of Election or Appointment: 2005
Trustee

Ms. Small also serves as Trustee of other Fidelity® funds. Ms. Small is a member of the Board of Directors (2009-present) and Chair of the Investment Committee (2010-present) of the Teagle Foundation. Ms. Small also serves on the Investment Committee of the Berkshire Taconic Community Foundation (2008-present). Previously, Ms. Small served as Chairperson (2002-2008) and a member of the Investment Committee and Chairperson (2008-2012) and a member of the Board of Trustees of Smith College. In addition, Ms. Small served as Chief Investment Officer, Director of Global Equity Investments, and a member of the Board of Directors of Scudder, Stevens & Clark and Scudder Kemper Investments.

William S. Stavropoulos (1939)

Year of Election or Appointment: 2001
Trustee
Vice Chairman of the Independent Trustees

Mr. Stavropoulos also serves as Trustee of other Fidelity® funds. Mr. Stavropoulos serves as President and Founder of the Michigan Baseball Foundation, the Great Lakes Loons (2007-present). Mr. Stavropoulos is Chairman Emeritus of the Board of Directors of The Dow Chemical Company, where he previously served in numerous senior management positions, including President, CEO (1995-2000; 2002-2004), Chairman of the Executive Committee (2000-2006), and as a member of the Board of Directors (1990-2006). Currently, Mr. Stavropoulos is Chairman of the Board of Directors of Univar Inc. (global distributor of commodity and specialty chemicals), a Director of Teradata Corporation (data warehousing and technology solutions), and Maersk Inc. (industrial conglomerate), and a member of the Advisory Board for Metalmark Capital LLC (private equity investment, 2005-present). Mr. Stavropoulos is an operating advisor to Clayton, Dubilier & Rice, LLC (private equity investment). In addition, Mr. Stavropoulos is a member of the University of Notre Dame Advisory Council for the College of Science, a Trustee of the Rollin L. Gerstacker Foundation, and a Director of the Naples Philharmonic Center for the Arts. Previously, Mr. Stavropoulos served as a Director of Chemical Financial Corporation (bank holding company, 1993-2012) and Tyco International, Ltd. (multinational manufacturing and services, 2007-2012).

David M. Thomas (1949)

Year of Election or Appointment: 2008
Trustee

Mr. Thomas also serves as Trustee of other Fidelity® funds. Mr. Thomas serves as Non-Executive Chairman of the Board of Directors of Fortune Brands Home and Security (home and security products, 2011-present), as a member of the Board of Directors (2004-present) and Presiding Director (2013-present) of Interpublic Group of Companies, Inc. (marketing communication), and as a member of the Board of Trustees of the University of Florida (2013-present). Previously, Mr. Thomas served as Executive Chairman (2005-2006) and Chairman and Chief Executive Officer (2000-2005) of IMS Health, Inc. (pharmaceutical and healthcare information solutions), and a Director of Fortune Brands, Inc. (consumer products, 2000-2011).

+ The information includes the Trustee's principal occupation during the last five years and other information relating to the experience, attributes, and skills relevant to the Trustee's qualifications to serve as a Trustee, which led to the conclusion that the Trustee should serve as a Trustee for the fund.

Advisory Board Members and Officers:

Correspondence intended for an officer or Peter S. Lynch may be sent to Fidelity Investments, 245 Summer Street, Boston, Massachusetts 02210. Officers appear below in alphabetical order.

Name, Year of Birth; Principal Occupation

Peter S. Lynch (1944)

Year of Election or Appointment: 2003
Member of the Advisory Board

Mr. Lynch also serves as Member of the Advisory Board of other Fidelity® funds. Mr. Lynch is Vice Chairman and a Director of FMR (investment adviser firm) and FMR Co., Inc. (investment adviser firm). In addition, Mr. Lynch serves as a Trustee of Boston College and as the Chairman of the Inner-City Scholarship Fund. Previously, Mr. Lynch served on the Special Olympics International Board of Directors (1997-2006).

Marc R. Bryant (1966)

Year of Election or Appointment: 2015
Secretary and Chief Legal Officer (CLO)

Mr. Bryant also serves as Secretary and CLO of other funds. Mr. Bryant serves as CLO, Secretary, and Senior Vice President of Fidelity Management & Research Company (investment adviser firm, 2015-present) and FMR Co., Inc. (investment adviser firm, 2015-present); Secretary of Fidelity SelectCo, LLC (investment adviser firm, 2015-present) and Fidelity Investments Money Management, Inc. (investment adviser firm, 2015-present); and CLO of Fidelity Management & Research (Hong Kong) Limited (investment adviser firm, 2015-present). He is Senior Vice President and Deputy General Counsel of FMR LLC (diversified financial services company). Previously, Mr. Bryant served as Secretary and CLO of Fidelity Rutland Square Trust II (2010-2014) and Assistant Secretary of Fidelity's Fixed Income and Asset Allocation Funds (2013-2015). Prior to joining Fidelity Investments, Mr. Bryant served as a Senior Vice President and the Head of Global Retail Legal for AllianceBernstein L.P. (2006-2010), and as the General Counsel for ProFund Advisors LLC (2001-2006).

William C. Coffey (1969)

Year of Election or Appointment: 2009
Assistant Secretary

Mr. Coffey also serves as Assistant Secretary of other funds. He is Senior Vice President and Deputy General Counsel of FMR LLC (diversified financial services company, 2010-present), and is an employee of Fidelity Investments. Previously, Mr. Coffey served as Vice President and Associate General Counsel of FMR LLC (2005-2009).

Jonathan Davis (1968)

Year of Election or Appointment: 2010
Assistant Treasurer

Mr. Davis also serves as Assistant Treasurer of other funds, and is an employee of Fidelity Investments. Previously, Mr. Davis served as Vice President and Associate General Counsel of FMR LLC (diversified financial services company, 2003-2010).

Adrien E. Deberghes (1967)

Year of Election or Appointment: 2008
Deputy Treasurer

Mr. Deberghes also serves as an officer of other funds. He is an employee of Fidelity Investments (2008-present). Prior to joining Fidelity Investments, Mr. Deberghes was Senior Vice President of Mutual Fund Administration at State Street Corporation (2007-2008), Senior Director of Mutual Fund Administration at Investors Bank & Trust (2005-2007), and Director of Finance for Dunkin' Brands (2000-2005).

Stephanie J. Dorsey (1969)

Year of Election or Appointment: 2010
Assistant Treasurer

Ms. Dorsey also serves as an officer of other funds. She is an employee of Fidelity Investments (2008-present) and has served in other fund officer roles. Prior to joining Fidelity Investments, Ms. Dorsey served as Treasurer (2004-2008) of the JPMorgan Mutual Funds and Vice President (2004-2008) of JPMorgan Chase Bank.

Howard J. Galligan III (1966)

Year of Election or Appointment: 2014
Chief Financial Officer

Mr. Galligan also serves as Chief Financial Officer of other funds. Mr. Galligan serves as President of Fidelity Pricing and Cash Management Services (FPCMS) (2014-present) and as a Director of Strategic Advisers, Inc. (investment adviser firm, 2008-present). Previously, Mr. Galligan served as Chief Administrative Officer of Asset Management (2011-2014) and Chief Operating Officer and Senior Vice President of Investment Support for Strategic Advisers, Inc. (2003-2011).

Scott C. Goebel (1968)

Year of Election or Appointment: 2015
Vice President

Mr. Goebel serves as Vice President of other funds and is an employee of Fidelity Investments (2001-present). Previously, Mr. Goebel served as Secretary of Fidelity SelectCo, LLC (investment adviser firm, 2013-2015), Fidelity Investments Money Management, Inc. (FIMM) (investment adviser firm, 2010-2015), and Fidelity Research and Analysis Company (FRAC) (investment adviser firm, 2010-2015); General Counsel, Secretary, and Senior Vice President of Fidelity Management & Research Company (investment adviser firm, 2008-2015) and FMR Co., Inc. (investment adviser firm, 2008-2015); Assistant Secretary of Fidelity Management & Research (Japan) Limited (investment adviser firm, 2008-2015) and FMR Investment Management (U.K.) Limited (investment adviser firm, 2008-2015); Chief Legal Officer (CLO) of Fidelity Management & Research (Hong Kong) Limited (investment adviser firm, 2008-2015); Secretary and CLO of certain Fidelity® funds (2008-2015); Assistant Secretary of FIMM (2008-2010), FRAC (2008-2010), and certain funds (2007-2008); and as Vice President and Secretary of Fidelity Distributors Corporation (FDC) (2005-2007).

Brian B. Hogan (1964)

Year of Election or Appointment: 2009
Vice President

Mr. Hogan also serves as Trustee or Vice President of other funds. Mr. Hogan serves as a Director of Fidelity SelectCo, LLC (investment adviser firm, 2014-present) and President of the Equity Division of FMR (investment adviser firm, 2009-present). Previously, Mr. Hogan served as Senior Vice President, Equity Research of FMR (2006-2009) and as a portfolio manager.

Chris Maher (1972)

Year of Election or Appointment: 2013
Assistant Treasurer

Mr. Maher serves as Assistant Treasurer of other funds. Mr. Maher is Vice President of Valuation Oversight and is an employee of Fidelity Investments. Previously, Mr. Maher served as Vice President of Asset Management Compliance (2013), Vice President of the Program Management Group of FMR (investment adviser firm, 2010-2013), and Vice President of Valuation Oversight (2008-2010).

John F. Papandrea (1972)

Year of Election or Appointment: 2016
Anti-Money Laundering (AML) Officer

Mr. Papandrea also serves as AML Officer of other funds. Mr. Papandrea is Vice President of FMR LLC (diversified financial services company, 2008-present) and is an employee of Fidelity Investments (2005-present).

Kenneth B. Robins (1969)

Year of Election or Appointment: 2008
President and Treasurer

Mr. Robins also serves as an officer of other funds. Mr. Robins serves as Executive Vice President of Fidelity Investments Money Management, Inc. (FIMM) (investment adviser firm, 2013-present) and is an employee of Fidelity Investments (2004-present). Previously, Mr. Robins served in other fund officer roles.

Stacie M. Smith (1974)

Year of Election or Appointment: 2013
Deputy Treasurer

Ms. Smith also serves as an officer of other funds. She is an employee of Fidelity Investments (2009-present) and has served in other fund officer roles. Prior to joining Fidelity Investments, Ms. Smith served as Senior Audit Manager of Ernst & Young LLP (1996-2009).

Renee Stagnone (1975)

Year of Election or Appointment: 2013
Deputy Treasurer

Ms. Stagnone also serves as Deputy Treasurer of other funds. Ms. Stagnone is an employee of Fidelity Investments (1997-present).

Linda J. Wondrack (1964)

Year of Election or Appointment: 2014
Chief Compliance Officer

Ms. Wondrack also serves as Chief Compliance Officer of other funds. Ms. Wondrack is Executive Vice President and head of the Ethics Office and Asset Management Compliance for Fidelity Investments (2012-present). Ms. Wondrack also serves as Chief Compliance Officer of Fidelity SelectCo, LLC (investment adviser firm, 2014-present); Chief Compliance Officer of Impresa Management LLC (2013-present); and Chief Compliance Officer of FMR Co., Inc. (investment adviser firm), Fidelity Investments Money Management, Inc. (investment adviser firm), FMR Investment Management (U.K.) Limited (investment adviser firm), Fidelity Management & Research (Hong Kong) (investment adviser firm), Fidelity Management & Research Company (investment adviser firm), FIAM LLC (investment adviser firm), and Strategic Advisers, Inc. (investment adviser firm), Ballyrock Investment Advisors LLC, and Northern Neck Investors LLC (2012-present). Previously, Ms. Wondrack served as Chief Compliance Officer of Fidelity Management & Research (Japan) Limited (investment adviser firm, 2012-2016); Senior Vice President and Chief Compliance Officer for Columbia Management Investment Advisers, LLC (2005-2012); Chief Compliance Officer for certain funds within the Columbia Family of Funds (2007-2012); and Senior Vice President of Compliance Risk Management at Bank of America (2005-2010).

Joseph F. Zambello (1957)

Year of Election or Appointment: 2011
Deputy Treasurer

Mr. Zambello also serves as Deputy Treasurer of other funds. Mr. Zambello is an employee of Fidelity Investments (1991-present). Previously, Mr. Zambello served as Vice President of the Program Management Group of FMR (investment adviser firm, 2009-2011) and Vice President of the Transfer Agent Oversight Group (2005-2009).

# Shareholder Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees, distribution and/or service (12b-1) fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of $1,000 invested at the beginning of the period and held for the entire period (July 1, 2015 to December 31, 2015).

### *Actual Expenses*

The first line of the accompanying table for each class of the Fund provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000.00 (for example, an $8,600 account value divided by $1,000.00 = 8.6), then multiply the result by the number in the first line for a class of the Fund under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period. The estimate of expenses does not include any fees or other expenses of any variable annuity or variable life insurance product. If they were, the estimate of expenses you paid during the period would be higher, and your ending account value would be lower. In addition, the Fund, as a shareholder in the underlying Fidelity Central Funds, will indirectly bear its pro-rata share of the fees and expenses incurred by the underlying Fidelity Central Funds. These fees and expenses are not included in the Fund's annualized expense ratio used to calculate the expense estimate in the table below.

### *Hypothetical Example for Comparison Purposes*

The second line of the accompanying table for each class of the Fund provides information about hypothetical account values and hypothetical expenses based on a Class' actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Class' actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. The estimate of expenses does not include any fees or other expenses of any variable annuity or variable life insurance product. If they were, the estimate of expenses you paid during the period would be higher, and your ending account value would be lower. In addition, the Fund, as a shareholder in the underlying Fidelity Central Funds, will indirectly bear its pro-rata share of the fees and expenses incurred by the underlying Fidelity Central Funds. These fees and expenses are not included in the Fund's annualized expense ratio used to calculate the expense estimate in the table below.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds.

| | Annualized Expense Ratio-[A] | Beginning Account Value July 1, 2015 | Ending Account Value December 31, 2015 | Expenses Paid During Period-[B] July 1, 2015 to December 31, 2015 |
|---|---|---|---|---|
| **Initial Class** | .10% | | | |
| **Actual** | | $1,000.00 | $1,001.30 | $.50 |
| **Hypothetical-**[C] | | $1,000.00 | $1,024.70 | $.51 |
| **Service Class** | .20% | | | |
| **Actual** | | $1,000.00 | $1,000.80 | $1.01 |
| **Hypothetical-**[C] | | $1,000.00 | $1,024.20 | $1.02 |

| **Actual** | | $1,000.00 | $1,000.10 | $1.76 |
| **Hypothetical-**[C] | | $1,000.00 | $1,023.44 | $1.79 |

A *Annualized expense ratio reflects expenses net of applicable fee waivers.*

B *Expenses are equal to each Class' annualized expense ratio, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).*

C *5% return per year before expenses*

# Distributions (Unaudited)

The Board of Trustees of VIP Index 500 Portfolio voted to pay to shareholders of record at the opening of business on record date, the following distributions per share derived from capital gains realized from sales of portfolio securities, and dividends derived from net investment income:

| | Pay Date | Record Date | Dividends | Capital Gains |
|---|---|---|---|---|
| Initial Class | 02/05/2016 | 02/05/2016 | $0.009 | $0.216 |
| Service Class | 02/05/2016 | 02/05/2016 | $0.009 | $0.216 |
| Service Class 2 | 02/05/2016 | 02/05/2016 | $0.009 | $0.216 |

The fund hereby designates as a capital gain dividend with respect to the taxable year ended December 31, 2015, $4,854,971, or, if subsequently determined to be different, the net capital gain of such year.

Initial Class designates 30% and 100%; Service Class designates 32% and 100%; and Service Class 2 designates 34% and 100%; of the dividends distributed in February and December 2015, respectively during the fiscal year as qualifying for the dividends–received deduction for corporate shareholders.

# Board Approval of Investment Advisory Contracts and Management Fees

## VIP Index 500 Portfolio

Each year, the Board of Trustees, including the Independent Trustees (together, the Board), votes on the renewal of the management contract with Fidelity Management & Research Company (FMR) and the sub-advisory agreements (together, the Advisory Contracts) for the fund, including the fund's sub-advisory agreement with Geode Capital Management, LLC (Geode). The Board, assisted by the advice of fund counsel and Independent Trustees' counsel, requests and considers a broad range of information relevant to the renewal of the Advisory Contracts throughout the year.

The Board meets regularly and, at each of its meetings, covers an extensive agenda of topics and materials and considers factors that are relevant to its annual consideration of the renewal of the fund's Advisory Contracts, including the services and support provided to the fund and its shareholders. The Board has established various standing committees (Committees), each composed of and chaired by Independent Trustees with varying backgrounds, to which the Board has assigned specific subject matter responsibilities in order to enhance effective decision-making by the Board. The Board, acting directly and through its Committees, requests and receives information concerning the annual consideration of the renewal of the fund's Advisory Contracts. The Board also meets as needed to consider matters specifically related to the Board's annual consideration of the renewal of the Advisory Contracts. Members of the Board may also meet with trustees of other Fidelity funds through ad hoc joint committees to discuss certain matters relevant to all of the Fidelity funds.

At its July 2015 meeting, the Board unanimously determined to renew the fund's Advisory Contracts. In reaching its determination, the Board considered all factors it believed relevant, including (i) the nature, extent, and quality of the services to be provided to the fund and its shareholders (including the investment performance of the fund); (ii) the competitiveness of the fund's management fee and total expense ratio relative to peer funds; (iii) the total costs of the services to be provided by and the profits to be realized by Fidelity from its relationship with the fund; and (iv) the extent to which (if any) economies of scale exist and would be realized as the fund grows, and whether any economies of scale are appropriately shared with fund shareholders.

In considering whether to renew the Advisory Contracts for the fund, the Board reached a determination, with the assistance of fund counsel and Independent Trustees' counsel and through the exercise of its business judgment, that the renewal of the Advisory Contracts was in the best interests of the fund and its shareholders and that the compensation payable under the Advisory Contracts was fair and reasonable. The Board's decision to renew the Advisory Contracts was not based on any single factor, but rather was based on a comprehensive consideration of all the information provided to the Board at its meetings throughout the year. The Board, in reaching its determination to renew the Advisory Contracts, was aware that shareholders of the fund have a broad range of investment choices available to them, including a wide choice among funds offered by Fidelity's competitors, and that the fund's shareholders, who have the opportunity to review and weigh the disclosure provided by the fund in its prospectus and other public disclosures, have chosen to invest in this fund, which is part of the Fidelity family of funds.

**Nature, Extent, and Quality of Services Provided.** The Board considered staffing as it relates to the fund, including the backgrounds of investment personnel of Fidelity and Geode, and also considered the fund's investment objective, strategies, and related investment philosophy. The Independent Trustees also had discussions with senior management of Fidelity's investment operations and investment groups and with representatives of Geode. The Board considered the portfolio managers' investments, if any, in the funds that they manage.

Resources Dedicated to Investment Management and Support Services. The Board and the Fund Oversight and Research Committees reviewed the general qualifications and capabilities of Fidelity's and Geode's investment staff, including their size, education, experience, and resources, as well as Fidelity's approach to recruiting, training, managing, and compensating investment personnel. The Board noted that Fidelity has continued to increase the resources devoted to non-U.S. offices, including expansion of Fidelity's global investment organization. Additionally, in its deliberations, the Board considered Fidelity's and Geode's trading, risk management, and compliance capabilities and resources, which are integral parts of the investment management process.

Shareholder and Administrative Services. The Board considered (i) the nature, extent, quality, and cost of advisory, administrative, and shareholder services performed by FMR, the sub-advisers (together with FMR, the Investment Advisers), and their affiliates under the Advisory Contracts and under separate agreements covering transfer agency, pricing and bookkeeping, and securities lending services for the fund; (ii) the nature and extent of the supervision of third party service providers, principally custodians and subcustodians; and (iii) the resources devoted to, and the record of compliance with, the fund's compliance policies and procedures. The Board also reviewed the allocation of fund brokerage, including allocations to brokers affiliated with the Investment Advisers.

The Board noted that the growth of fund assets over time across the complex allows Fidelity to reinvest in the development of services designed to enhance the value or convenience of the Fidelity funds as investment vehicles. These services include 24-hour access to account information and market information through telephone representatives and over the Internet, investor education materials and asset allocation tools, and the expanded availability of Fidelity Investor Centers.

In 2014, the Board formed an ad hoc Committee on Transfer Agency Fees to review the variety of transfer agency fee structures throughout the industry and Fidelity's competitive positioning with respect to industry participants.

Investment in a Large Fund Family. The Board considered the benefits to shareholders of investing in a Fidelity fund, including the benefits of investing in a fund that is part of a large family of funds offering a variety of investment disciplines and providing a large variety of mutual fund investor services. The Board noted that Fidelity had taken, or had made recommendations that resulted in the Fidelity funds taking, a number of actions over the previous year that benefited particular funds, including (i) continuing to dedicate additional resources to investment research and to the support of the senior management team that oversees asset management; (ii) continuing efforts to enhance Fidelity's global research capabilities; (iii) launching new funds and making other enhancements to meet client needs; (iv) reducing management fees and total expenses for certain index funds and diversified international funds; (v) continuing to launch dedicated lower cost underlying funds to meet portfolio construction needs related to expanding underlying fund options for Fidelity funds of funds, specifically for the Freedom Fund product lines; (vi) rationalizing product lines and gaining increased efficiencies through fund mergers; (vii) launching active fixed-income exchange-traded funds; (viii) continuing to develop, acquire and implement systems and technology to improve services to the funds and information security and to increase efficiency; (ix) implementing investment enhancements to further strengthen Fidelity's target date product line to increase investors' probability of success in achieving their goals; (x) modifying the eligibility criteria for certain share classes to accommodate roll-over assets from employer-sponsored retirement plans; (xi) launching a new Class W of the Freedom Index Funds to attract and retain Fidelity record-kept retirement plan assets; and (xii) implementing changes to Fidelity's money market product line in response to recent money market regulatory reforms.

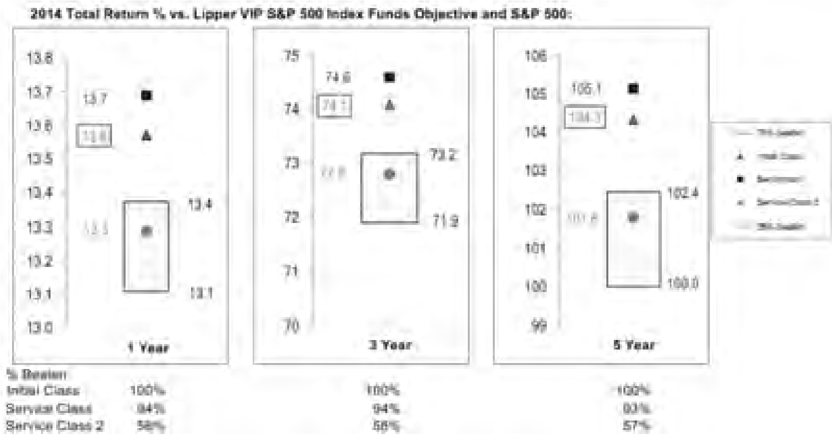
Investment Performance. The Board considered whether the fund has operated in accordance with its investment objective, as well as its record of compliance with its investment restrictions and its performance history.

The Board took into account discussions with representatives of the Investment Advisers about fund investment performance that occur at Board meetings throughout the year. In this regard the Board noted that as part of regularly scheduled fund reviews and other reports to the Board on fund performance, the Board considers annualized return information for the fund, for different time periods, measured against the securities market index the fund seeks to track and a peer group of funds with similar objectives ("peer group"), if any. The Board also periodically considers the fund's tracking error versus its benchmark index. In its evaluation of fund investment performance, the Board gave particular attention to information indicating changes in performance of certain Fidelity funds for specific time periods and discussed with the Investment Advisers the reasons for any overperformance or underperformance.

In addition to reviewing absolute and relative fund performance, the Independent Trustees periodically consider the appropriateness of fund performance metrics in evaluating the results achieved. In general, the Independent Trustees believe that fund performance should be evaluated based on net performance (after fees and expenses) of both the highest performing and lowest performing fund share classes, where applicable, compared to a fund's benchmark index, over appropriate time periods taking into account relevant factors including the following: general market conditions; the characteristics of the fund's benchmark index; the extent to which statistical sampling is employed; securities lending revenues; and fund cash flows and other factors.

The Independent Trustees recognize that shareholders evaluate performance on a net basis over their own holding periods, for which one-, three-, and five-year periods are often used as a proxy. For this reason, the performance information reviewed by the Board also included net cumulative calendar year total return information for the fund and an appropriate benchmark index and peer group for the most recent one-, three-, and five-year periods, as shown below. Returns are shown compared to the 25th percentile (top of box, 75% beaten) and 75th percentile (bottom of box, 25% beaten) of the peer universe.

## VIP Index 500 Portfolio

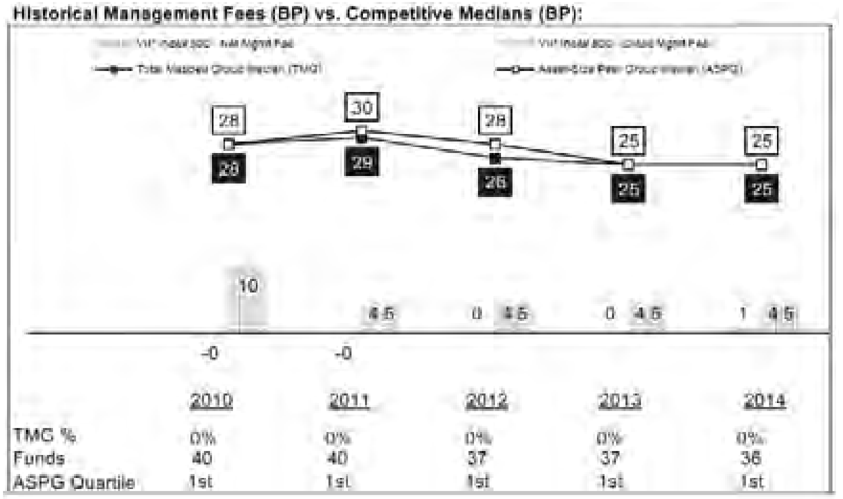


Based on its review, the Board concluded that the nature, extent, and quality of services provided to the fund under the Advisory Contracts should benefit the shareholders of the fund.

**Competitiveness of Management Fee and Total Expense Ratio.** The Board considered the fund's management fee and total expense ratio compared to "mapped groups" of competitive funds and classes created for the purpose of facilitating the Trustees' competitive analysis of management fees and total expenses. Fidelity creates "mapped groups" by combining similar Lipper investment objective categories that have comparable investment mandates. Combining Lipper investment objective categories aids the Board's management fee and total expense ratio comparisons by broadening the competitive group used for comparison.

Management Fee. The Board considered two proprietary management fee comparisons for the 12-month periods shown in basis points (BP) in the chart below. The group of Lipper funds used by the Board for management fee comparisons is referred to below as the "Total Mapped Group." The Total Mapped Group is broader than the Lipper peer group used by the Board for performance comparisons because the Total Mapped Group combines several Lipper investment objective categories while the Lipper peer group does not. The Total Mapped Group comparison focuses on a fund's standing in terms of gross management fees before expense reimbursements or caps relative to the total universe of funds with comparable investment mandates, regardless of whether their management fee structures also are comparable. Funds with comparable investment mandates offer exposure to similar types of securities. Funds with comparable management fee structures have similar management fee contractual arrangements (*e.g.*, flat rate charged for advisory services, all-inclusive fee rate, *etc.*). "TMG %" represents the percentage of funds in the Total Mapped Group that had management fees that were lower than the fund's. For example, a hypothetical TMG % of 20% would mean that 80% of the funds in the Total Mapped Group had higher, and 20% had lower, management fees than the fund. The fund's actual TMG %s and the number of funds in the Total Mapped Group are in the chart below. The "Asset-Size Peer Group" (ASPG) comparison focuses on a fund's standing relative to a subset of non-Fidelity funds within the Total Mapped Group that are similar in size and management fee structure. For example, if a fund is in the first quartile of the ASPG, the fund's management fee ranks in the least expensive or lowest 25% of funds in the ASPG. The ASPG represents at least 15% of the funds in the Total Mapped Group with comparable asset size and management fee structures, subject to a minimum of 50 funds (or all funds in the Total Mapped Group if fewer than 50). Additional information, such as the ASPG quartile in which the fund's management fee rate ranked, is also included in the chart and considered by the Board. Because the vast majority of competitor funds' management fees do not cover non-management expenses, for a more meaningful comparison of management fees, the fund is compared on the basis of a hypothetical "net management fee," which is derived by subtracting payments made by FMR for "fund-level" non-management expenses (including pricing and bookkeeping fees and fees paid to non-affiliated custodians) from the fund's management fee. In this regard, the Board considered that net management fees can vary from year to year because of differences in "fund-level" non-management expenses. The Board noted that, although FMR does not pay transfer agent fees or other "class-level" expenses under the fund's management contract, such expenses (excluding 12b-1 fees, if applicable) are paid by FMR pursuant to expense limitation arrangements in effect for the fund and, as a result, are also subtracted from the management fee for purposes of calculating the hypothetical "net management fee."

## VIP Index 500 Portfolio



The Board noted that the fund's hypothetical net management fee rate ranked below the median of its Total Mapped Group and below the median of its ASPG for 2014.

Furthermore, the Board considered that it had approved an amended and restated management contract for the fund (effective September 1, 2011) that lowered the fund's management fee from 0.10% to 0.045%. The Board considered that the chart reflects the fund's lower management fee for 2011, as if the lower fee were in effect for the entire year.

The Board noted that, in 2014, the ad hoc Committee on Group Fee was formed by it and other Fidelity fund boards to conduct an in-depth review of the "group fee" component of the management fee of funds with such management fee structures. Committee focus included the mechanics of the group fee, the competitive landscape of group fee structures, Fidelity funds with no group fee component and investment products not included in group fee assets. The Board also considered that, for funds subject to the group fee, FMR agreed to voluntarily waive fees over a specified period of time in amounts designed to account for assets converted from certain funds to certain collective investment trusts.

Based on its review, the Board concluded that the fund's management fee is fair and reasonable in light of the services that the fund receives and the other factors considered.

Total Expense Ratio. In its review of each class's total expense ratio, the Board considered the fund's hypothetical net management fee as well as the fund's gross management fee. The Board also considered other "fund-level" expenses, such as pricing and bookkeeping fees and custodial, legal, and audit fees. The Board also considered other "class-level" expenses, such as transfer agent fees and fund-paid 12b-1 fees. The Board also noted that Fidelity may agree to waive fees and expenses from time to time, and the extent to which, if any, it has done so for the fund. As part of its review, the Board also considered the current and historical total expense ratios of each class of the fund compared to competitive fund median expenses. Each class of the fund is compared to those funds and classes in the Total Mapped Group (used by the Board for management fee comparisons) that have a similar sales load structure.

The Board noted that the total expense ratio of each class ranked below its competitive median for 2014.

The Board considered that current contractual arrangements for the fund oblige FMR to pay all "class-level" expenses of each class of the fund to the extent necessary to limit total expenses, with certain exceptions, as follows: Initial Class: 0.10%; Service Class: 0.20%; and Service Class 2: 0.35%. These contractual arrangements may not be increased without the approval of the Board and the shareholders of the applicable class.

Fees Charged to Other Fidelity Clients. The Board also considered Fidelity fee structures and other information with respect to clients of Fidelity, such as other funds advised or subadvised by Fidelity, pension plan clients, and other institutional clients with similar mandates. The Board noted the findings of the 2013 ad hoc joint committee (created with the board of other Fidelity funds), which reviewed and compared Fidelity's institutional investment advisory business with its business of providing services to the Fidelity funds, including the differences in services provided, fees charged, and costs incurred, as well as competition in their respective marketplaces.

Based on its review of total expense ratios and fees charged to other Fidelity clients, the Board concluded that the total expense ratio of each class of the fund was reasonable in light of the services that the fund and its shareholders receive and the other factors considered.

**Costs of the Services and Profitability.** The Board considered the revenues earned and the expenses incurred by Fidelity in conducting the business of developing, marketing, distributing, managing, administering and servicing the fund and servicing the fund's shareholders. The Board also considered the level of Fidelity's profits in respect of all the Fidelity funds.

On an annual basis, Fidelity presents to the Board information about the profitability of its relationship with the fund. Fidelity calculates profitability information for each fund, as well as aggregate profitability information for groups of Fidelity funds and all Fidelity funds, using a series of detailed revenue and cost allocation methodologies which originate with the books and records of Fidelity on which Fidelity's audited financial statements are based. The Audit Committee of the Board reviews any significant changes from the prior year's methodologies.

PricewaterhouseCoopers LLP (PwC), independent registered public accounting firm and auditor to Fidelity and certain Fidelity funds, has been engaged annually by the Board as part of the Board's assessment of Fidelity's profitability analysis. PwC's engagement includes the review and assessment of the methodologies used by Fidelity in determining the revenues and expenses attributable to Fidelity's mutual fund business, and completion of agreed-upon procedures in respect of the mathematical accuracy of fund profitability and its conformity to established allocation methodologies. After considering PwC's reports issued under the engagement and information provided by Fidelity, the Board concluded that while other allocation methods may also be reasonable, Fidelity's profitability methodologies are reasonable in all material respects.

The Board also reviewed Fidelity's non-fund businesses and fall-out benefits related to the mutual fund business as well as cases where Fidelity's affiliates may benefit from or be related to the fund's business.

The Board considered the costs of the services provided by and the profits realized by Fidelity in connection with the operation of the fund and was satisfied that the profitability was not excessive.

**Economies of Scale.** The Board considered whether there have been economies of scale in respect of the management of the Fidelity funds, whether the Fidelity funds (including the fund) have appropriately benefited from any such economies of scale, and whether there is potential for realization of any further economies of scale. The Board considered the extent to which the fund will benefit from economies of scale as assets grow through increased services to the fund, through waivers or reimbursements, or through fee or expense ratio reductions. The Board also noted that in 2013, it and the boards of other Fidelity funds created an ad hoc committee (the Economies of Scale Committee) to analyze whether Fidelity attains economies of scale in respect of the management and servicing of the Fidelity funds, whether the Fidelity funds have appropriately benefited from such economies of scale, and whether there is potential for realization of any further economies of scale.

The Board concluded, taking into account the analysis of the Economies of Scale Committee, that economies of scale, if any, are being appropriately shared between fund shareholders and Fidelity.

**Additional Information Requested by the Board.** In order to develop fully the factual basis for consideration of the Fidelity funds' Advisory Contracts, the Board requested and received additional information on certain topics, including: (i) fund performance trends and Fidelity's long-term strategies for certain funds; (ii) the various share classes employed by Fidelity and the attributes of each class, together with similar information on the distribution and servicing payments made by Fidelity or the funds to third-party participants in the distribution channels; (iii) fund profitability, and fund performance in relation to fund profitability; (iv) the methodology with respect to evaluating competitive fund data and peer group classifications and fee comparisons; (v) annual fund profitability margins, with particular focus on certain funds with negative margins; (vi) the realization of fall-out benefits in certain Fidelity business units; (vii) economies of scale and the way in which they are shared with fund shareholders;(viii) Fidelity's group fee structures, including the group fee schedule of breakpoints;(ix) the impact of cost containment measures on the funds; and (x) the transfer agent fee structure.

Based on its evaluation of all of the conclusions noted above, and after considering all factors it believed relevant, the Board concluded that the advisory fee structures are fair and reasonable, and that the fund's Advisory Contracts should be renewed.

# Performance: The Bottom Line

Average annual total return reflects the change in the value of an investment, assuming reinvestment of distributions from dividend income and capital gains (the profits earned upon the sale of securities that have grown in value, if any) and assuming a constant rate of performance each year. During periods of reimbursement by Fidelity, a fund's total return will be greater than it would be had the reimbursement not occurred. Performance numbers are net of all underlying fund operating expenses, but do not include any insurance charges imposed by your insurance company's separate account. If performance information included the effect of these additional charges, the total returns would have been lower. How a fund did yesterday is no guarantee of how it will do tomorrow.

## Average Annual Total Returns

| For the periods ended December 31, 2015 | Past 1 year | Past 5 years | Past 10 years |
|---|---|---|---|
| Initial Class | -1.39% | 7.94% | 7.64% |

# Management's Discussion of Fund Performance

**Market Recap:** U.S. stocks gained modestly in 2015, rebounding from a steep decline in August and September over worries about China's slowing economic growth. The S&P 500® index rose 1.38% for the period, its lowest calendar-year return since 2008. After the late-summer rout, stocks sharply reversed course in October, lifted by the Federal Reserve's decision to put off raising near-term interest rates until mid-December. Investors also were encouraged by an interest-rate cut in China and economic stimulus in Europe. Overall, growth stocks fared much better than their value counterparts, as investors sought growth in a subpar economic environment. This helped lift the technology-heavy Nasdaq Composite Index® 6.96% for the year. Sector performance in the broader market was split, with five of 10 sectors in the S&P 500® gaining ground and five retreating. Consumer discretionary (+10%) led the way, benefiting from rising personal income and low inflation. Health care (+7%), consumer staples (+7%) and information technology (+6%) also outpaced the broad market amid strong fundamentals. Conversely, the energy sector (-21%) was by far the worst performer, stung by deflated commodity prices that also hit materials (-8%). The defensive, but rate-sensitive utilities sector (-5%) lost ground on the cusp of Fed tightening, while industrials (-3%) were dragged down with energy prices and a slower-growing China.

**Comments from Portfolio Manager Thomas Allen:** For the year, the fund's share classes recorded small declines and finished modestly ahead of the -2.18% return of the benchmark S&P MidCap 400® index. Positioning in information technology, energy, materials and health care aided the fund's performance versus the index. Underweighting the lower end of the benchmark's market capitalization spectrum also was helpful, as larger-caps tended to perform better this period. At the stock level, Global Payments was the fund's top contributor. The provider of payment processing services announced strong quarterly results in both July and October, which aided its stock. Electronic Arts, a leading maker of video games, also was helpful, as were Freescale Semiconductor and Netherlands-based NXP Semiconductors. All three were non-index positions. NXP closed a deal to buy Freescale during the period. Conversely, performance was hampered by stock picking in industrials and financials. In the former category, a non-index position in Spirit Airlines was by far our biggest relative detractor. Another detractor from transportation – a group where I reduced the fund's allocation during the period – was less-than-truckload (LTL) hauler and logistics provider Saia. One detractor from the technology sector was Belden, a manufacturer of networking, connectivity and cable products.

*The views expressed above reflect those of the portfolio manager(s) only through the end of the period as stated on the cover of this report and do not necessarily represent the views of Fidelity or any other person in the Fidelity organization. Any such views are subject to change at any time based upon market or other conditions and Fidelity disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for a Fidelity fund are based on numerous factors, may not be relied on as an indication of trading intent on behalf of any Fidelity fund.*

## Legend

(a) Non-income producing

(b) Security or a portion of the security is on loan at period end.

(c) Affiliated fund that is generally available only to investment companies and other accounts managed by Fidelity Investments. The rate quoted is the annualized seven-day yield of the fund at period end. A complete unaudited listing of the fund's holdings as of its most recent quarter end is available upon request. In addition, each Fidelity Central Fund's financial statements, which are not covered by the Fund's Report of Independent Registered Public Accounting Firm, are available on the SEC's website or upon request.

(d) Investment made with cash collateral received from securities on loan.

## Affiliated Central Funds

Information regarding fiscal year to date income earned by the Fund from investments in Fidelity Central Funds is as follows:

| Fund | Income earned |
|---|---|
| Fidelity Cash Central Fund | $ 68,209 |
| Fidelity Securities Lending Cash Central Fund | 333,919 |
| Total | $ 402,128 |

## Investment Valuation

The following is a summary of the inputs used, as of December 31, 2015, involving the Fund's assets and liabilities carried at fair value. The inputs or methodology used for valuing securities may not be an indication of the risk associated with investing in those securities. For more information on valuation inputs, and their aggregation into the levels used below, please refer to the Investment Valuation section in the accompanying Notes to Financial Statements.

**Valuation Inputs at Reporting Date:**

| Description | Total | Level 1 | Level 2 | Level 3 |
|---|---|---|---|---|
| **Investments in Securities:** | | | | |
| **Equities:** | | | | |
| Consumer Discretionary | $1,432,286,701 | $1,417,756,129 | $14,530,572 | $ — |
| Consumer Staples | 176,972,821 | 176,303,233 | 669,588 | — |

# Notes to Financial Statements

For the period ended December 31, 2015

## 1. Organization.

VIP Mid Cap Portfolio (the Fund) is a fund of Variable Insurance Products Fund III (the Trust) and is authorized to issue an unlimited number of shares. The Trust is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company organized as a Massachusetts business trust. Shares of the Fund may only be purchased by insurance companies for the purpose of funding variable annuity or variable life insurance contracts. The Fund offers the following classes of shares: Initial Class shares, Service Class shares, Service Class 2 shares and Investor Class shares. All classes have equal rights and voting privileges, except for matters affecting a single class.

## 2. Investments in Fidelity Central Funds.

The Fund invests in Fidelity Central Funds, which are open-end investment companies generally available only to other investment companies and accounts managed by the investment adviser and its affiliates. The Fund's Schedule of Investments lists each of the Fidelity Central Funds held as of period end, if any, as an investment of the Fund, but does not include the underlying holdings of each Fidelity Central Fund. As an Investing Fund, the Fund indirectly bears its proportionate share of the expenses of the underlying Fidelity Central Funds.

The Money Market Central Funds seek preservation of capital and current income and are managed by Fidelity Investments Money Management, Inc. (FIMM), an affiliate of the investment adviser. Annualized expenses of the Money Market Central Funds as of their most recent shareholder report date are less than .005%.

A complete unaudited list of holdings for each Fidelity Central Fund is available upon request or at the Securities and Exchange Commission (the SEC) website at www.sec.gov. In addition, the financial statements of the Fidelity Central Funds, which are not covered by the Fund's Report of Independent Registered Public Accounting Firm, are available on the SEC website or upon request.

## 3. Significant Accounting Policies.

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), which require management to make certain estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates. Subsequent events, if any, through the date that the financial statements were issued have been evaluated in the preparation of the financial statements. The following summarizes the significant accounting policies of the Fund:

**Investment Valuation.** Investments are valued as of 4:00 p.m. Eastern time on the last calendar day of the period. The Board of Trustees (the Board) has delegated the day to day responsibility for the valuation of the Fund's investments to the Fidelity Management & Research Company (FMR) Fair Value Committee (the Committee). In accordance with valuation policies and procedures approved by the Board, the Fund attempts to obtain prices from one or more third party pricing vendors or brokers to value its investments. When current market prices, quotations or currency exchange rates are not readily available or reliable, investments will be fair valued in good faith by the Committee, in accordance with procedures adopted by the Board. Factors used in determining fair value vary by investment type and may include market or investment specific events. The frequency with which these procedures are used cannot be predicted and they may be utilized to a significant extent. The Committee oversees the Fund's valuation policies and procedures and reports to the Board on the Committee's activities and fair value determinations. The Board monitors the appropriateness of the procedures used in valuing the Fund's investments and ratifies the fair value determinations of the Committee.

The Fund categorizes the inputs to valuation techniques used to value its investments into a disclosure hierarchy consisting of three levels as shown below:

Level 1 – quoted prices in active markets for identical investments

Level 2 – other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, etc.)

Level 3 – unobservable inputs (including the Fund's own assumptions based on the best information available)

Valuation techniques used to value the Fund's investments by major category are as follows:

Equity securities, including restricted securities, for which market quotations are readily available, are valued at the last reported sale price or official closing price as reported by a third party pricing vendor on the primary market or exchange on which they are traded and are categorized as Level 1 in the hierarchy. In the event there were no sales during the day or closing prices are not available, securities are valued at the last quoted bid price or may be valued using the last available price and are generally categorized as Level 2 in the hierarchy. For foreign equity securities, when market or security specific events arise, comparisons to the valuation of American Depositary Receipts (ADRs), futures contracts, Exchange-Traded Funds (ETFs) and certain indexes as well as quoted prices for similar securities may be used and would be categorized as Level 2 in the hierarchy. Utilizing these techniques may result in transfers between Level 1 and Level 2. For equity securities, including restricted securities, where observable inputs are limited, assumptions about market activity and risk are used and these securities may be categorized as Level 3 in the hierarchy.

Investments in open-end mutual funds, including the Fidelity Central Funds, are valued at their closing net asset value (NAV) each business day and are categorized as Level 1 in the hierarchy.

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The aggregate value of investments by input level, as of December 31, 2015, is included at the end of the Fund's Schedule of Investments.

**Foreign Currency.** The Fund may use foreign currency contracts to facilitate transactions in foreign-denominated securities. Gains and losses from these transactions may arise from changes in the value of the foreign currency or if the counterparties do not perform under the contracts' terms.

Foreign-denominated assets, including investment securities, and liabilities are translated into U.S. dollars at the exchange rates at period end. Purchases and sales of investment securities, income and dividends received and expenses denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date.

The effects of exchange rate fluctuations on investments are included with the net realized and unrealized gain (loss) on investment securities. Other foreign currency transactions resulting in realized and unrealized gain (loss) are disclosed separately.

**Investment Transactions and Income.** For financial reporting purposes, the Fund's investment holdings and NAV include trades executed through the end of the last business day of the period. The NAV per share for processing shareholder transactions is calculated as of the close of business of the New York Stock Exchange (NYSE), normally 4:00 p.m. Eastern time and includes trades executed through the end of the prior business day. Gains and losses on securities sold are determined on the basis of identified cost and may include proceeds received from litigation. Dividend income is recorded on the ex-dividend date, except for certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the Fund is informed of the ex-dividend date. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Income and capital gain distributions from Fidelity Central Funds, if any, are recorded on the ex-dividend date. Distributions received on securities that represent a return of capital or capital gain are recorded as a reduction of cost of investments and/or as a realized gain. Subsequent to ex-dividend date the Fund determines the components of these distributions, based upon receipt of tax filings or other correspondence relating to the underlying investment. Investment income is recorded net of foreign taxes withheld where recovery of such taxes is uncertain.

**Class Allocations and Expenses.** Investment income, realized and unrealized capital gains and losses, common expenses of the Fund, and certain fund-level expense reductions, if any, are allocated daily on a pro-rata basis to each class based on the relative net assets of each class to the total net assets of the Fund. Each class differs with respect to transfer agent and distribution and service plan fees incurred. Certain expense reductions may also differ by class. For the reporting period, the allocated portion of income and expenses to each class as a percent of its average net assets may vary due to the timing of recording these transactions in relation to fluctuating net assets of the classes. Expenses directly attributable to a fund are charged to that fund. Expenses attributable to more than one fund are allocated among the respective funds on the basis of relative net assets or other appropriate methods. Expense estimates are accrued in the period to which they relate and adjustments are made when actual amounts are known.

**Income Tax Information and Distributions to Shareholders.** Each year, the Fund intends to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code, including distributing substantially all of its taxable income and realized gains. As a result, no provision for U.S. Federal income taxes is required. As of December 31, 2015, the Fund did not have any unrecognized tax benefits in the financial statements; nor is the Fund aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months. The Fund files a U.S. federal tax return, in addition to state and local tax returns as required. The Fund's federal income tax returns are subject to examination by the Internal Revenue Service (IRS) for a period of three fiscal years after they are filed. State and local tax returns may be subject to examination for an additional fiscal year depending on the jurisdiction. Foreign taxes are provided for based on the Fund's understanding of the tax rules and rates that exist in the foreign markets in which it invests. The Fund is subject to a tax imposed on capital gains by certain countries in which it invests.

Distributions are declared and recorded on the ex-dividend date. Income dividends and capital gain distributions are declared separately for each class. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP. These differences resulted in distribution reclassifications.

Capital accounts within the financial statements are adjusted for permanent book-tax differences. These adjustments have no impact on net assets or the results of operations. Capital accounts are not adjusted for temporary book-tax differences which will reverse in a subsequent period.

Book-tax differences are primarily due to foreign currency transactions, partnerships, certain foreign taxes, equity-debt classifications and losses deferred due to wash sales and excise tax regulations.

The federal tax cost of investment securities and unrealized appreciation (depreciation) as of period end were as follows:

| | |
|---|---|
| **Gross unrealized appreciation** | $1,472,882,706 |
| **Gross unrealized depreciation** | (654,677,896) |
| **Net unrealized appreciation (depreciation) on securities** | $ 818,204,810 |
| **Tax Cost** | $7,327,553,347 |

The tax-based components of distributable earnings as of period end were as follows:

| | |
|---|---|
| **Undistributed long-term capital gain** | $493,205,790 |
| **Net unrealized appreciation (depreciation) on securities and other investments** | $818,164,557 |

The Fund intends to elect to defer to its next fiscal year $8,021,978 of capital losses recognized during the period November 1, 2015 to December 31, 2015.

The tax character of distributions paid was as follows:

| | December 31, 2015 | December 31, 2014 |
|---|---|---|
| **Ordinary Income** | $ 30,795,763 | $ 87,283,265 |
| **Long-term Capital Gains** | 1,068,353,375 | 132,570,212 |
| **Total** | $1,099,149,138 | $219,853,477 |

## 4. Purchases and Sales of Investments.

Purchases and sales of securities, other than short-term securities and securities acquired in the merger, aggregated $2,296,119,671 and $3,188,329,627, respectively.

## 5. Fees and Other Transactions with Affiliates.

**Management Fee.** Fidelity Management & Research Company (the investment adviser) and its affiliates provide the Fund with investment management related services for which the Fund pays a monthly management fee. The management fee is the sum of an individual fund fee rate that is based on an annual rate of .30% of the Fund's average net assets and an annualized group fee rate that averaged .25% during the period. The group fee rate is based upon the average net assets of all the mutual funds advised by the investment adviser, including any mutual funds previously advised by the investment adviser that are currently advised by Fidelity SelectCo, LLC, an affiliate of the investment adviser. The group fee rate decreases as assets under management increase and increases as assets under management decrease. For the reporting period, the total annual management fee rate was .55% of the Fund's average net assets.

**Distribution and Service Plan Fees.** In accordance with Rule 12b-1 of the 1940 Act, the Fund has adopted separate 12b-1 Plans for each Service Class of shares. Each Service Class pays Fidelity Distributors Corporation (FDC), an affiliate of the investment adviser, a service fee. For the period, the service fee is based on an annual rate of .10% of Service Class' average net assets and .25% of Service Class 2's average net assets.

For the period, total fees, all of which were re-allowed to insurance companies for the distribution of shares and providing shareholder support services, were as follows:

| | |
|---|---|
| **Service Class** | $ 614,201 |
| **Service Class 2** | 15,511,194 |
| | $16,125,395 |

**Transfer Agent Fees.** Fidelity Investments Institutional Operations Company, Inc. (FIIOC), an affiliate of the investment adviser, is the Fund's transfer, dividend disbursing, and shareholder servicing agent. FIIOC receives an asset-based fee with respect to each class. Each class (with the exception of Investor Class) pays a fee for transfer agent services, typesetting, printing and mailing of shareholder reports, excluding mailing of proxy statements and out of pocket expenses, equal to an annual rate of .07% (.15% for Investor Class) of class-level average net assets. For the period, transfer agent fees for each class, including out of pocket expenses, were as follows:

| | |
|---|---|
| **Initial Class** | $ 978,036 |
| **Service Class** | 405,885 |
| **Service Class 2** | 4,095,758 |
| **Investor Class** | 797,945 |
| | $6,277,624 |

**Accounting and Security Lending Fees.** Fidelity Service Company, Inc. (FSC), an affiliate of the investment adviser, maintains the Fund's accounting records. The accounting fee is based on the level of average net assets for each month. Under a separate contract, FSC administers the security lending program. The security lending fee is based on the number and duration of lending transactions.

**Brokerage Commissions.** The Fund placed a portion of its portfolio transactions with brokerage firms which are affiliates of the investment adviser. Brokerage commissions are included in net realized gain (loss) and change in net unrealized appreciation (depreciation) in the Statement of Operations. The commissions paid to these affiliated firms were $53,341 for the period.

**Interfund Lending Program.** Pursuant to an Exemptive Order issued by the SEC, the Fund, along with other registered investment companies having management contracts with Fidelity Management & Research Company (FMR) or other affiliated entities of FMR, may participate in an interfund lending program. This program provides an alternative credit facility allowing the funds to borrow from, or lend money to, other participating affiliated funds. At period end, there were no interfund loans outstanding. The Fund's activity in this program during the period for which loans were outstanding was as follows:

| Borrower or Lender | Average Loan Balance | Weighted Average Interest Rate | Interest Expense |
|---|---|---|---|
| **Borrower** | $9,404,229 | .36% | $9,964 |

**Interfund Trades.** The Fund may purchase from or sell securities to other Fidelity Funds under procedures adopted by the Board. The procedures have been designed to ensure these interfund trades are executed in accordance with Rule 17a-7 of the 1940 Act. Interfund trades are included within the respective purchases and sales amounts shown in the Purchases and Sales of Investments note.

## 6. Committed Line of Credit.

The Fund participates with other funds managed by the investment adviser or an affiliate in a $4.25 billion credit facility (the "line of credit") to be utilized for temporary or emergency purposes to fund shareholder redemptions or for other short-term liquidity purposes. The Fund has agreed to pay commitment fees on its pro-rata portion of the line of credit, which amounted to $12,913 and is reflected in Miscellaneous expenses on the Statement of Operations. During the period, the Fund did not borrow on this line of credit.

## 7. Security Lending.

The Fund lends portfolio securities through a lending agent from time to time in order to earn additional income. For equity securities, a lending agent is used and may loan securities to certain qualified borrowers, including Fidelity Capital Markets (FCM), a broker-dealer affiliated with the Fund. On the settlement date of the loan, the Fund receives collateral (in the form of U.S. Treasury obligations, letters of credit and/or cash) against the loaned securities and maintains collateral in an amount not less than 100% of the market value of the loaned securities during the period of the loan. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day. The Fund or borrower may terminate the loan at any time, and if the borrower defaults on its obligation to return the securities loaned because of insolvency or other reasons, the Fund may apply collateral received from the borrower against the obligation. The Fund may experience delays and costs in recovering the securities loaned. Any cash collateral received is invested in the Fidelity Securities Lending Cash Central Fund. The value of loaned securities and cash collateral at period end are disclosed on the Fund's Statement of Assets and Liabilities. At period end, there were no security loans outstanding with FCM. Security lending income represents the income earned on investing cash collateral, less rebates paid to borrowers and any lending agent fees associated with the loan, plus any premium payments received for lending certain types of securities. Security lending income is presented in the Statement of Operations as a component of income from Fidelity Central Funds. Total security lending income during the period amounted to $333,919, including $876 from securities loaned to FCM.

## 8. Bank Borrowings.

The Fund is permitted to have bank borrowings for temporary or emergency purposes to fund shareholder redemptions or for other short-term liquidity requirements. The Fund has established borrowing arrangements with certain banks. The interest rate on the borrowings is the bank's base rate, as revised from time to time. The average loan balance during the period for which loans were outstanding amounted to $11,037,722. The weighted average interest rate was .62%. The interest expense amounted to $6,818 under the bank borrowing program. At period end, there were no bank borrowings outstanding.

## 9. Expense Reductions.

Commissions paid to certain brokers with whom the investment adviser, or its affiliates, places trades on behalf of the Fund include an amount in addition to trade execution, which may be rebated back to the Fund to offset certain expenses. This amount totaled $84,123 for the period. In addition, through arrangements with the Fund's custodian, credits realized as a result of certain uninvested cash balances were used to reduce the Fund's expenses. During the period, these credits reduced the Fund's custody expenses by $145.

In addition, during the period the investment adviser reimbursed and/or waived a portion of fund-level operating expenses in the amount $36,698 and a portion of class-level operating expenses as follows:

| | Amount |
|---|---|
| **Investor Class** | $11,354 |

## 10. Distributions to Shareholders.

Distributions to shareholders of each class were as follows:

| Years ended December 31, | 2015 | 2014 |
|---|---|---|
| **From net investment income** | | |
| Initial Class | $ 6,856,691 | $ 3,774,917 |
| Service Class | 2,239,466 | 990,351 |
| Service Class 2 | 13,204,712 | 1,215,921 |
| Investor Class | 2,196,855 | 904,982 |
| Total | $ 24,497,724 | $ 6,886,171 |
| **From net realized gain** | | |
| Initial Class | $ 173,008,924 | $ 34,174,917 |
| Service Class | 73,895,308 | 14,603,745 |
| Service Class 2 | 768,328,236 | 153,016,366 |
| Investor Class | 59,418,946 | 11,172,278 |
| Total | $1,074,651,414 | $212,967,306 |

## 11. Share Transactions.

Transactions for each class of shares were as follows:

| Years ended December 31, | Shares 2015 | Shares 2014 | Dollars 2015 | Dollars 2014 |
|---|---|---|---|---|
| **Initial Class** | | | | |
| Shares sold | 4,347457 | 3,868,698 | $ 150,311,214 | $ 141,786,603 |
| Issued in exchange for the shares of VIP Growth Strategies Portfolio | 360,771 | – | 12,767,680 | – |
| Reinvestment of distributions | 5,354,795 | 1,054,394 | 179,865,615 | 37,949,834 |
| Shares redeemed | (6,893,278) | (6,692,546) | (237,965,645) | (244,766,127) |
| Net increase (decrease) | 3,169,745 | (1,769,454) | $ 104,978,864 | $ (65,029,690) |
| **Service Class** | | | | |
| Shares sold | 1,507,053 | 1,246,174 | $ 51,724,215 | $ 45,087,196 |
| Issued in exchange for the shares of VIP Growth Strategies Portfolio | 2,365 | – | 83,060 | – |
| Reinvestment of distributions | 2,283,479 | 437,179 | 76,134,774 | 15,594,096 |
| Shares redeemed | (2,939,119) | (2,725,033) | (101,018,159) | (98,952,997) |
| Net increase (decrease) | 853,778 | (1,041,680) | $ 26,923,890 | $ (38,271,705) |
| **Service Class 2** | | | | |
| Shares sold | 8,545,475 | 12,121,569 | $ 287,200,999 | $ 436,064,579 |
| Issued in exchange for the shares of VIP Growth Strategies Portfolio | 219,579 | – | 7,566,682 | – |
| Reinvestment of distributions | 23,864,809 | 4,408,382 | 781,532,948 | 154,232,287 |
| Shares redeemed | (31,525,458) | (26,657,188) | (1,056,122,491) | (947,962,455) |
| Net increase (decrease) | 1,104,405 | (10,127,237) | $ 20,178,138 | $ (357,665,589) |
| **Investor Class** | | | | |
| Shares sold | 1,067,585 | 1,116,739 | $ 36,914,564 | $ 40,550,127 |
| Issued in exchange for the shares of VIP Growth Strategies Portfolio | 1,289,847 | – | 45,428,423 | – |

| Years ended December 31, | Shares 2015 | Shares 2014 | Dollars 2015 | Dollars 2014 |
|---|---|---|---|---|
| Reinvestment of distributions | 1,843,002 | 336,975 | 61,615,801 | 12,077,260 |
| Shares redeemed | (1,513,170) | (1,012,211) | (51,788,379) | (36,794,057) |
| Net increase (decrease) | 2,687,264 | 441,503 | $ 92,170,409 | $ 15,833,330 |

## 12. Other.

The Fund's organizational documents provide former and current trustees and officers with a limited indemnification against liabilities arising in connection with the performance of their duties to the Fund. In the normal course of business, the Fund may also enter into contracts that provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown as this would be dependent on future claims that may be made against the Fund. The risk of material loss from such claims is considered remote.

At the end of the period, the investment adviser or its affiliates were the owners of record of 11% of the total outstanding shares of the Fund.

## 13. Merger Information.

On April 24, 2015, the Fund acquired all of the assets and assumed all of the liabilities of VIP Growth Strategies Portfolio ("Target Fund") pursuant to an Agreement and Plan of Reorganization approved by the Board of Trustees ("The Board"). The acquisition was accomplished by an exchange of shares of each class of the Fund for corresponding shares then outstanding of the Target Fund at their respective net asset value on the acquisition date. The reorganization provides shareholders of the Target Fund access to a larger portfolio with a similar investment objective and lower expenses. The reorganization qualified as a tax-free reorganization for federal income tax purposes with no gain or loss recognized to the funds or their shareholders. The Target Fund's net assets of $65,845,845, including securities of $65,918,670 and unrealized appreciation of $3,990,039 were combined with the Fund's net assets of $9,322,211,254 for total net assets after the acquisition of $9,388,057,099.

Pro forma results of operations of the combined entity for the entire period ended December 31, 2015, as though the acquisition had occurred as of the beginning of the year (rather than on the actual acquisition date), are as follows:

| | |
|---|---|
| Net Investment income (loss) | $ 26,894,205 |
| Total net realized gain (loss) | 515,198,842 |
| Total change in net unrealized appreciation (depreciation) | (653,262,046) |
| Net increase (decrease) in net assets resulting from operations | $(111,168,999) |

Because the combined investment portfolios have been managed as a single portfolio since the acquisition was completed, it is not practicable to separate the amounts of revenue and earnings of the acquired fund that have been included in the Fund's accompanying Statement of Operations since April 24, 2015.

# Report of Independent Registered Public Accounting Firm

To the Trustees of Variable Insurance Products Fund III and Shareholders of VIP Mid Cap Portfolio:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of VIP Mid Cap Portfolio (a fund of Variable Insurance Products Fund III) at December 31, 2015, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the VIP Mid Cap Portfolio's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2015 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

PricewaterhouseCoopers LLP

# Trustees and Officers

The Trustees, Members of the Advisory Board (if any), and officers of the trust and fund, as applicable, are listed below. The Board of Trustees governs the fund and is responsible for protecting the interests of shareholders. The Trustees are experienced executives who meet periodically throughout the year to oversee the fund's activities, review contractual arrangements with companies that provide services to the fund, oversee management of the risks associated with such activities and contractual arrangements, and review the fund's performance. Each of the Trustees oversees 170 funds.

The Trustees hold office without limit in time except that (a) any Trustee may resign; (b) any Trustee may be removed by written instrument, signed by at least two-thirds of the number of Trustees prior to such removal; (c) any Trustee who requests to be retired or who has become incapacitated by illness or injury may be retired by written instrument signed by a majority of the other Trustees; and (d) any Trustee may be removed at any special meeting of shareholders by a two-thirds vote of the outstanding voting securities of the trust. Each Trustee who is not an interested person (as defined in the 1940 Act) of the trust and the fund is referred to herein as an Independent Trustee. Each Independent Trustee shall retire not later than the last day of the calendar year in which his or her 75th birthday occurs. The Independent Trustees may waive this mandatory retirement age policy with respect to individual Trustees. Officers and Advisory Board Members hold office without limit in time, except that any officer or Advisory Board Member may resign or may be removed by a vote of a majority of the Trustees at any regular meeting or any special meeting of the Trustees. Except as indicated, each individual has held the office shown or other offices in the same company for the past five years.

The fund's Statement of Additional Information (SAI) includes more information about the Trustees. To request a free copy, call Fidelity at 1-877-208-0098.

**Experience, Skills, Attributes, and Qualifications of the Trustees.** The Governance and Nominating Committee has adopted a statement of policy that describes the experience, qualifications, attributes, and skills that are necessary and desirable for potential Independent Trustee candidates (Statement of Policy). The Board believes that each Trustee satisfied at the time he or she was initially elected or appointed a Trustee, and continues to satisfy, the standards contemplated by the Statement of Policy. The Governance and Nominating Committee also engages professional search firms to help identify potential Independent Trustee candidates who have the experience, qualifications, attributes, and skills consistent with the Statement of Policy. From time to time, additional criteria based on the composition and skills of the current Independent Trustees, as well as experience or skills that may be appropriate in light of future changes to board composition, business conditions, and regulatory or other developments, have also been considered by the professional search firms and the Governance and Nominating Committee. In addition, the Board takes into account the Trustees' commitment and participation in Board and committee meetings, as well as their leadership of standing and ad hoc committees throughout their tenure.

In determining that a particular Trustee was and continues to be qualified to serve as a Trustee, the Board has considered a variety of criteria, none of which, in isolation, was controlling. The Board believes that, collectively, the Trustees have balanced and diverse experience, qualifications, attributes, and skills, which allow the Board to operate effectively in governing the fund and protecting the interests of shareholders. Information about the specific experience, skills, attributes, and qualifications of each Trustee, which in each case led to the Board's conclusion that the Trustee should serve (or continue to serve) as a trustee of the fund, is provided below.

**Board Structure and Oversight Function.** James C. Curvey is an interested person and currently serves as Chairman. The Trustees have determined that an interested Chairman is appropriate and benefits shareholders because an interested Chairman has a personal and professional stake in the quality and continuity of services provided to the fund. Independent Trustees exercise their informed business judgment to appoint an individual of their choosing to serve as Chairman, regardless of whether the Trustee happens to be independent or a member of management. The Independent Trustees have determined that they can act independently and effectively without having an Independent Trustee serve as Chairman and that a key structural component for assuring that they are in a position to do so is for the Independent Trustees to constitute a substantial majority for the Board. The Independent Trustees also regularly meet in executive session. Ned C. Lautenbach serves as Chairman of the Independent Trustees and as such (i) acts as a liaison between the Independent Trustees and management with respect to matters important to the Independent Trustees and (ii) with management prepares agendas for Board meetings.

Fidelity® funds are overseen by different Boards of Trustees. The fund's Board oversees Fidelity's high income and certain equity funds, and other Boards oversee Fidelity's investment-grade bond, money market, asset allocation, and sector funds. The asset allocation funds may invest in Fidelity® funds overseen by the fund's Board. The use of separate Boards, each with its own committee structure, allows the Trustees of each group of Fidelity® funds to focus on the unique issues of the funds they oversee, including common research, investment, and operational issues. On occasion, the separate Boards establish joint committees to address issues of overlapping consequences for the Fidelity® funds overseen by each Board.

The Trustees operate using a system of committees to facilitate the timely and efficient consideration of all matters of importance to the Trustees, the fund, and fund shareholders and to facilitate compliance with legal and regulatory requirements and oversight of the fund's activities and associated risks. The Board, acting through its committees, has charged FMR and its affiliates with (i) identifying events or circumstances the occurrence of which could have demonstrably adverse effects on the fund's business and/or reputation; (ii) implementing processes and controls to lessen the possibility that such events or circumstances occur or to mitigate the effects of such events or circumstances if they do occur; and (iii) creating and maintaining a system designed to evaluate continuously business and market conditions in order to facilitate the identification and implementation processes described in (i) and (ii) above. Because the day-to-day operations and activities of the fund are carried out by or through FMR, its affiliates, and other service providers, the fund's exposure to risks is mitigated but not eliminated by the processes overseen

by the Trustees. While each of the Board's committees has responsibility for overseeing different aspects of the fund's activities, oversight is exercised primarily through the Operations, Audit, and Compliance Committees. In addition, the Independent Trustees have worked with FMR to enhance the Board's oversight of investment and financial risks, legal and regulatory risks, technology risks, and operational risks, including the development of additional risk reporting to the Board. For example, a working group comprised of Independent Trustees and FMR has worked and continues to work to review the Fidelity® funds' valuation-related activities, reporting and risk management. Appropriate personnel, including but not limited to the fund's Chief Compliance Officer (CCO), FMR's internal auditor, the independent accountants, the fund's Treasurer and portfolio management personnel, make periodic reports to the Board's committees, as appropriate, including an annual review of Fidelity's risk management program for the Fidelity® funds. The responsibilities of each standing committee, including their oversight responsibilities, are described further under "Standing Committees of the Trustees."

Interested Trustees*:

Correspondence intended for a Trustee who is an interested person may be sent to Fidelity Investments, 245 Summer Street, Boston, Massachusetts 02210.

Name, Year of Birth; Principal Occupations and Other Relevant Experience+

James C. Curvey (1935)

Year of Election or Appointment: 2007
Trustee
Chairman of the Board of Trustees

Mr. Curvey also serves as Trustee of other Fidelity® funds. Mr. Curvey is a Director of Fidelity Research & Analysis Co. (investment adviser firm, 2009-present), and Vice Chairman (2007-present) and Director of FMR LLC (diversified financial services company). (investment adviser firms, 2007-2014).

Charles S. Morrison (1960)

Year of Election or Appointment: 2014
Trustee

Mr. Morrison also serves as Trustee of other funds. He serves as a Director of Fidelity Investments Money Management, Inc. (FIMM) (investment adviser firm, 2014-present), Director of Fidelity SelectCo, LLC (investment adviser firm, 2014-present), President, Asset Management (2014-present), and is an employee of Fidelity Investments. Previously, Mr. Morrison served as Vice President of Fidelity's Fixed Income and Asset Allocation Funds (2012-2014), President, Fixed Income (2011-2014), Vice President of Fidelity's Money Market Funds (2005-2009), President, Money Market Group Leader of FMR (investment adviser firm, 2009), and Senior Vice President, Money Market Group of FMR (2004-2009). Mr. Morrison also served as Vice President of Fidelity's Bond Funds (2002-2005), certain Balanced Funds (2002-2005), and certain Asset Allocation Funds (2002-2007), and as Senior Vice President (2002-2005) of Fidelity's Bond Division.

* Determined to be an "Interested Trustee" by virtue of, among other things, his or her affiliation with the trust or various entities under common control with FMR.

+ The information includes the Trustee's principal occupation during the last five years and other information relating to the experience, attributes, and skills relevant to the Trustee's qualifications to serve as a Trustee, which led to the conclusion that the Trustee should serve as a Trustee for the fund.

Independent Trustees:

Correspondence intended for an Independent Trustee may be sent to Fidelity Investments, P.O. Box 55235, Boston, Massachusetts 02205-5235.

Name, Year of Birth; Principal Occupations and Other Relevant Experience+

Dennis J. Dirks (1948)

Year of Election or Appointment: 2005
Trustee

Mr. Dirks also serves as Trustee of other Fidelity® funds. Prior to his retirement in May 2003, Mr. Dirks was Chief Operating Officer and a member of the Board of The Depository Trust & Clearing Corporation (DTCC). He also served as President, Chief Operating Officer, and Board member of The Depository Trust Company (DTC) and President and Board member of the National Securities Clearing Corporation (NSCC). In addition, Mr. Dirks served as Chief Executive Officer and Board member of the Government Securities Clearing Corporation, Chief Executive Officer and Board member of the Mortgage-Backed Securities Clearing Corporation, as a Trustee and a member of the Finance Committee of Manhattan College (2005-2008), as a Trustee and a member of the Finance Committee of AHRC of Nassau County (2006-2008), and as a member of the Independent Directors Council (IDC) Governing Council (2010-2015). Mr. Dirks is a member of the Board of Directors for The Brookville Center for Children's Services, Inc. (2009-present).

Alan J. Lacy (1953)

Year of Election or Appointment: 2008
Trustee

Mr. Lacy also serves as Trustee of other Fidelity® funds. Mr. Lacy serves as Chairman (2014-present) and a member (2010-present) of the Board of Directors of Dave & Buster's Entertainment, Inc. (restaurant and entertainment complexes) and a Director of Bristol-Myers Squibb Company (global pharmaceuticals, 2008-present). He is a Trustee of the California Chapter of The Nature Conservancy (2015-present) and a Director of the Center for Advanced Study in the Behavioral Sciences at Stanford University (2015-present). In addition, Mr. Lacy served as Senior Adviser (2007-2014) of Oak Hill Capital Partners, L.P. (private equity) and also served as Chief Executive Officer (2005) and Vice Chairman (2005-2006) of Sears Holdings Corporation (retail) and Chief Executive Officer and Chairman of the Board of Sears, Roebuck and Co. (retail, 2000-2005). Previously, Mr. Lacy served as Chairman (2008-2011) and a member (2006-2015) of the Board of Trustees of the National Parks Conservation Association and as a member of the Board of Directors for The Western Union Company (global money transfer, 2006-2011), The Hillman Companies, Inc. (hardware wholesalers, 2010-2014), and Earth Fare, Inc. (retail grocery, 2010-2014).

Ned C. Lautenbach (1944)

Year of Election or Appointment: 2000
Trustee
Chairman of the Independent Trustees

Mr. Lautenbach also serves as Trustee of other Fidelity® funds. Mr. Lautenbach currently serves as the Lead Director of the Eaton Corporation Board of Directors (diversified industrial, 1997-present). Mr. Lautenbach is Chairman of the Board of Directors of Artis-Naples in Naples, Florida (2012-present), a member of the Council on Foreign Relations (1994-present), and a member of the Board of Governors, State University System of Florida (2013-present). Previously, Mr. Lautenbach was a Partner/Advisory Partner at Clayton, Dubilier & Rice, LLC (private equity investment, 1998-2010), as well as a Director of Sony Corporation (2006-2007).

Joseph Mauriello (1944)

Year of Election or Appointment: 2008
Trustee

Mr. Mauriello also serves as Trustee of other Fidelity® funds. Prior to his retirement in January 2006, Mr. Mauriello served in numerous senior management positions including Deputy Chairman and Chief Operating Officer (2004-2005), and Vice Chairman of Financial Services (2002-2004) of KPMG LLP US (professional services, 1965-2005). Mr. Mauriello currently serves as a member of the Board of Directors of XL Group plc. (global insurance and re-insurance, 2006-present) and the Independent Directors Council (IDC) Governing Council (2015-present). Previously, Mr. Mauriello served as a Director of the Hamilton Funds of the Bank of New York (2006-2007) and of Arcadia Resources Inc. (health care services and products, 2007-2012).

Robert W. Selander (1950)

Year of Election or Appointment: 2011
Trustee

Mr. Selander also serves as Trustee of other Fidelity® funds. Mr. Selander serves as a Director of The Western Union Company (global money transfer, 2014-present) and a non-executive Chairman of Health Equity, Inc. (health savings custodian, 2015-present). Previously, Mr. Selander served as a Member of the Advisory Board of other Fidelity® funds (2011), and Executive Vice Chairman (2010), Chief Executive Officer (2009-2010), and President and Chief Executive Officer (1997-2009) of Mastercard, Inc.

Cornelia M. Small (1944)

Year of Election or Appointment: 2005
Trustee

Ms. Small also serves as Trustee of other Fidelity® funds. Ms. Small is a member of the Board of Directors (2009-present) and Chair of the Investment Committee (2010-present) of the Teagle Foundation. Ms. Small also serves on the Investment Committee of the Berkshire Taconic Community Foundation (2008-present). Previously, Ms. Small served as Chairperson (2002-2008) and a member of the Investment Committee and Chairperson (2008-2012) and a member of the Board of Trustees of Smith College. In addition, Ms. Small served as Chief Investment Officer, Director of Global Equity Investments, and a member of the Board of Directors of Scudder, Stevens & Clark and Scudder Kemper Investments.

William S. Stavropoulos (1939)

Year of Election or Appointment: 2002
Trustee
Vice Chairman of the Independent Trustees

Mr. Stavropoulos also serves as Trustee of other Fidelity® funds. Mr. Stavropoulos serves as President and Founder of the Michigan Baseball Foundation, the Great Lakes Loons (2007-present). Mr. Stavropoulos is Chairman Emeritus of the Board of Directors of The Dow Chemical Company, where he previously served in numerous senior management positions, including President, CEO (1995-2000; 2002-2004), Chairman of the Executive Committee (2000-2006), and as a member of the Board of Directors (1990-2006). Currently, Mr. Stavropoulos is Chairman of the Board of Directors of Univar Inc. (global distributor of commodity and specialty chemicals), a Director of Teradata Corporation (data warehousing and technology solutions), and Maersk Inc. (industrial conglomerate), and a member of the Advisory Board for Metalmark Capital LLC (private equity investment, 2005-present). Mr. Stavropoulos is an operating advisor to Clayton, Dubilier & Rice, LLC (private equity investment). In addition, Mr. Stavropoulos is a member of the University of Notre Dame Advisory Council for the College of Science, a Trustee of the Rollin L. Gerstacker Foundation, and a Director of the Naples Philharmonic Center for the Arts. Previously, Mr. Stavropoulos served as a Director of Chemical Financial Corporation (bank holding company, 1993-2012) and Tyco International, Ltd. (multinational manufacturing and services, 2007-2012).

David M. Thomas (1949)

Year of Election or Appointment: 2008
Trustee

Mr. Thomas also serves as Trustee of other Fidelity® funds. Mr. Thomas serves as Non-Executive Chairman of the Board of Directors of Fortune Brands Home and Security (home and security products, 2011-present), as a member of the Board of Directors (2004-present) and Presiding Director (2013-present) of Interpublic Group of Companies, Inc. (marketing communication), and as a member of the Board of Trustees of the University of Florida (2013-present). Previously, Mr. Thomas served as Executive Chairman (2005-2006) and Chairman and Chief Executive Officer (2000-2005) of IMS Health, Inc. (pharmaceutical and healthcare information solutions), and a Director of Fortune Brands, Inc. (consumer products, 2000-2011).

\+ The information includes the Trustee's principal occupation during the last five years and other information relating to the experience, attributes, and skills relevant to the Trustee's qualifications to serve as a Trustee, which led to the conclusion that the Trustee should serve as a Trustee for the fund.

Advisory Board Members and Officers:

Correspondence intended for an officer or Peter S. Lynch may be sent to Fidelity Investments, 245 Summer Street, Boston, Massachusetts 02210. Officers appear below in alphabetical order.

Name, Year of Birth; Principal Occupation

Peter S. Lynch (1944)

Year of Election or Appointment: 2003
Member of the Advisory Board

Mr. Lynch also serves as Member of the Advisory Board of other Fidelity® funds. Mr. Lynch is Vice Chairman and a Director of FMR (investment adviser firm) and FMR Co., Inc. (investment adviser firm). Year of Election or Appointment: 2008
Deputy Treasurer

Mr. Deberghes also serves as an officer of other funds. He is an employee of Fidelity Investments (2008-present). Prior to joining Fidelity Investments, Mr. Deberghes was Senior Vice President of Mutual Fund Administration at State Street Corporation (2007-2008), Senior Director of Mutual Fund Administration at Investors Bank & Trust (2005-2007), and Director of Finance for Dunkin' Brands (2000-2005).

Stephanie J. Dorsey (1969)

Year of Election or Appointment: 2010
Assistant Treasurer

Ms. Dorsey also serves as an officer of other funds. She is an employee of Fidelity Investments (2008-present) and has served in other fund officer roles. Prior to joining Fidelity Investments, Ms. Dorsey served as Treasurer (2004-2008) of the JPMorgan Mutual Funds and Vice President (2004-2008) of JPMorgan Chase Bank.

Howard J. Galligan III (1966)

Year of Election or Appointment: 2014
Chief Financial Officer

Mr. Galligan also serves as Chief Financial Officer of other funds. Mr. Galligan serves as President of Fidelity Pricing and Cash Management Services (FPCMS) (2014-present) and as a Director of Strategic Advisers, Inc. (investment adviser firm, 2008-present). Previously, Mr. Galligan served as Chief Administrative Officer of Asset Management (2011-2014) and Chief Operating Officer and Senior Vice President of Investment Support for Strategic Advisers, Inc. (2003-2011).

Scott C. Goebel (1968)

Year of Election or Appointment: 2015
Vice President

Mr. Goebel serves as Vice President of other funds and is an employee of Fidelity Investments (2001-present). Previously, Mr. Goebel served as Secretary of Fidelity SelectCo, LLC (investment adviser firm, 2013-2015), Fidelity Investments Money Management, Inc. (FIMM) (investment adviser firm, 2010-2015), and Fidelity Research and Analysis Company (FRAC) (investment adviser firm, 2010-2015); General Counsel, Secretary, and Senior Vice President of Fidelity Management & Research Company (investment adviser firm, 2008-2015) and FMR Co., Inc. (investment adviser firm, 2008-2015); Assistant Secretary of Fidelity Management & Research (Japan) Limited (investment adviser firm, 2008-2015) and FMR Investment Management (U.K.) Limited (investment adviser firm, 2008-2015); Chief Legal Officer (CLO) of Fidelity Management & Research (Hong Kong) Limited (investment adviser firm, 2008-2015); Secretary and CLO of certain Fidelity® funds (2008-2015); Assistant Secretary of FIMM (2008-2010), FRAC (2008-2010), and certain funds (2007-2008); and as Vice President and Secretary of Fidelity Distributors Corporation (FDC) (2005-2007).

Brian B. Hogan (1964)

Year of Election or Appointment: 2009
Vice President

Mr. Hogan also serves as Trustee or Vice President of other funds. Mr. Hogan serves as a Director of Fidelity SelectCo, LLC (investment adviser firm, 2014-present) and President of the Equity Division of FMR (investment adviser firm, 2009-present). Previously, Mr. Hogan served as Senior Vice President, Equity Research of FMR (2006-2009) and as a portfolio manager.

Chris Maher (1972)

Year of Election or Appointment: 2013
Assistant Treasurer

Mr. Maher serves as Assistant Treasurer of other funds. Mr. Maher is Vice President of Valuation Oversight and is an employee of Fidelity Investments. Previously, Mr. Maher served as Vice President of Asset Management Compliance (2013), Vice President of the Program Management Group of FMR (investment adviser firm, 2010-2013), and Vice President of Valuation Oversight (2008-2010).

John F. Papandrea (1972)

Year of Election or Appointment: 2016
Anti-Money Laundering (AML) Officer

Mr. Papandrea also serves as AML Officer of other funds. Mr. Papandrea is Vice President of FMR LLC (diversified financial services company, 2008-present) and is an employee of Fidelity Investments (2005-present).

Melissa M. Reilly (1971)

Year of Election or Appointment: 2014
Vice President of certain Equity Funds

Ms. Reilly also serves as Vice President of other funds. Ms. Reilly is an employee of Fidelity Investments (2004-present).

Kenneth B. Robins (1969)

Year of Election or Appointment: 2008
President and Treasurer

Mr. Robins also serves as an officer of other funds. Mr. Robins serves as Executive Vice President of Fidelity Investments Money Management, Inc. (FIMM) (investment adviser firm, 2013-present) and is an employee of Fidelity Investments (2004-present). Previously, Mr. Robins served in other fund officer roles.

Stacie M. Smith (1974)

Year of Election or Appointment: 2013
Deputy Treasurer

Ms. Smith also serves as an officer of other funds. She is an employee of Fidelity Investments (2009-present) and has served in other fund officer roles. Prior to joining Fidelity Investments, Ms. Smith served as Senior Audit Manager of Ernst & Young LLP (1996-2009).

Renee Stagnone (1975)

Year of Election or Appointment: 2013
Deputy Treasurer

Ms. Stagnone also serves as Deputy Treasurer of other funds. Ms. Stagnone is an employee of Fidelity Investments (1997-present).

Linda J. Wondrack (1964)

Year of Election or Appointment: 2014
Chief Compliance Officer

Ms. Wondrack also serves as Chief Compliance Officer of other funds. Ms. Wondrack is Executive Vice President and head of the Ethics Office and Asset Management Compliance for Fidelity Investments (2012-present). Ms. Wondrack also serves as Chief Compliance Officer of Fidelity SelectCo, LLC (investment adviser firm, 2014-present); Chief Compliance Officer of Impresa Management LLC (2013-present); and Chief Compliance Officer of FMR Co., Inc. (investment adviser firm), Fidelity Investments Money Management, Inc. (investment adviser firm), FMR Investment Management (U.K.) Limited (investment adviser firm), Fidelity Management & Research (Hong Kong) (investment adviser firm), Fidelity Management & Research Company (investment adviser firm), FIAM LLC (investment adviser firm), and Strategic Advisers, Inc. (investment adviser firm), Ballyrock Investment Advisors LLC, and Northern Neck Investors LLC (2012-present). Previously, Ms. Wondrack served as Chief Compliance Officer of Fidelity Management & Research (Japan) Limited (investment adviser firm, 2012-2016); Senior Vice President and Chief Compliance Officer for Columbia Management Investment Advisers, LLC (2005-2012); Chief Compliance Officer for certain funds within the Columbia Family of Funds (2007-2012); and Senior Vice President of Compliance Risk Management at Bank of America (2005-2010).

Joseph F. Zambello (1957)

Year of Election or Appointment: 2011
Deputy Treasurer

Mr. Zambello also serves as Deputy Treasurer of other funds. Mr. Zambello is an employee of Fidelity Investments (1991-present). Previously, Mr. Zambello served as Vice President of the Program Management Group of FMR (investment adviser firm, 2009-2011) and Vice President of the Transfer Agent Oversight Group (2005-2009).

# Shareholder Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees, distribution and/or service (12b-1) fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of $1,000 invested at the beginning of the period and held for the entire period (July 1, 2015 to December 31, 2015).

### *Actual Expenses*

The first line of the accompanying table for each class of the Fund provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000.00 (for example, an $8,600 account value divided by $1,000.00 = 8.6), then multiply the result by the number in the first line for a class of the Fund under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period. The estimate of expenses does not include any fees or other expenses of any variable annuity or variable life insurance product. If they were, the estimate of expenses you paid during the period would be higher, and your ending account value would be lower. In addition, the Fund, as a shareholder in the underlying Fidelity Central Funds, will indirectly bear its pro-rata share of the fees and expenses incurred by the underlying Fidelity Central Funds. These fees and expenses are not included in the Fund's annualized expense ratio used to calculate the expense estimate in the table below.

### *Hypothetical Example for Comparison Purposes*

The second line of the accompanying table for each class of the Fund provides information about hypothetical account values and hypothetical expenses based on a Class' actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Class' actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. The estimate of expenses does not include any fees or other expenses of any variable annuity or variable life insurance product. If they were, the estimate of expenses you paid during the period would be higher, and your ending account value would be lower. In addition, the Fund, as a shareholder in the underlying Fidelity Central Funds, will indirectly bear its pro-rata share of the fees and expenses incurred by the underlying Fidelity Central Funds. These fees and expenses are not included in the Fund's annualized expense ratio used to calculate the expense estimate in the table below.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds.

| | Annualized Expense Ratio-[A] | Beginning Account Value July 1, 2015 | Ending Account Value December 31, 2015 | Expenses Paid During Period-[B] July 1, 2015 to December 31, 2015 |
|---|---|---|---|---|
| **Initial Class** | .63% | | | |
| **Actual** | | $1,000.00 | $936.90 | $3.08 |
| **Hypothetical-[C]** | | $1,000.00 | $1,022.03 | $3.21 |
| **Service Class** | .73% | | | |
| **Actual** | | $1,000.00 | $936.50 | $3.56 |
| **Hypothetical-[C]** | | $1,000.00 | $1,021.53 | $3.72 |
| **Service Class 2** | .88% | | | |
| **Actual** | | $1,000.00 | $936.10 | $4.29 |
| **Hypothetical-[C]** | | $1,000.00 | $1,020.77 | $4.48 |
| **Investor Class** | .71% | | | |
| **Actual** | | $1,000.00 | $936.70 | $3.47 |
| **Hypothetical-[C]** | | $1,000.00 | $1,021.63 | $3.62 |

[A] *Annualized expense ratio reflects expenses net of applicable fee waivers.*

[B] *Expenses are equal to each Class' annualized expense ratio, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).*

[C] *5% return per year before expenses*

# Distributions (Unaudited)

The Board of Trustees of VIP Growth Strategies Portfolio voted to pay to shareholders of record at the opening of business on record date, the following distributions per share derived from capital gains realized from sales of portfolio securities:

| | Pay Date | Record Date | Capital Gains |
|---|---|---|---|
| Initial Class | 04/21/15 | 04/21/15 | $1.272 |
| Service Class | 04/21/15 | 04/21/15 | $1.272 |
| Service Class 2 | 04/21/15 | 04/21/15 | $1.272 |
| Investor Class | 04/21/15 | 04/21/15 | $1.272 |

The Board of Trustees of VIP Mid Cap Portfolio voted to pay to shareholders of record at the opening of business on record date, the following distributions per share derived from capital gains realized from sales of portfolio securities:

| | Pay Date | Record Date | Capital Gains |
|---|---|---|---|
| Initial Class | 02/05/16 | 02/05/16 | $1.983 |
| Service Class | 02/05/16 | 02/05/16 | $1.983 |
| Service Class 2 | 02/05/16 | 02/05/16 | $1.983 |
| Investor Class | 02/05/16 | 02/05/16 | $1.983 |

VIP Growth Strategies Portfolio hereby designates as a capital gain dividend with respect to the taxable year ended April 24, 2015 $5,514,443, or, if subsequently determined to be different, the net capital gain of such year.

VIP Mid Cap Portfolio hereby designates as a capital gain dividend with respect to the taxable year ended December 31, 2015 $495,935,518, or, if subsequently determined to be different, the net capital gain of such year.

VIP Mid Cap Portfolio Initial Class, VIP Mid Cap Portfolio Service Class, VIP Mid Cap Portfolio Service Class 2, and VIP Mid Cap Portfolio Investor Class designate 100% of the dividends distributed in December 2015, as qualifying for the dividends-received deduction for corporate shareholders.

# Board Approval of Investment Advisory Contracts and Management Fees

## VIP Mid Cap Portfolio

Each year, the Board of Trustees, including the Independent Trustees (together, the Board), votes on the renewal of the management contract with Fidelity Management & Research Company (FMR) and the sub-advisory agreements (together, the Advisory Contracts) for the fund. The Board, assisted by the advice of fund counsel and Independent Trustees' counsel, requests and considers a broad range of information relevant to the renewal of the Advisory Contracts throughout the year.

The Board meets regularly and, at each of its meetings, covers an extensive agenda of topics and materials and considers factors that are relevant to its annual consideration of the renewal of the fund's Advisory Contracts, including the services and support provided to the fund and its shareholders. The Board has established various standing committees (Committees), each composed of and chaired by Independent Trustees with varying backgrounds, to which the Board has assigned specific subject matter responsibilities in order to enhance effective decision-making by the Board. The Board, acting directly and through its Committees, requests and receives information concerning the annual consideration of the renewal of the fund's Advisory Contracts. The Board also meets as needed to consider matters specifically related to the Board's annual consideration of the renewal of the Advisory Contracts. Members of the Board may also meet with trustees of other Fidelity funds through ad hoc joint committees to discuss certain matters relevant to all of the Fidelity funds.

At its July 2015 meeting, the Board unanimously determined to renew the fund's Advisory Contracts. In reaching its determination, the Board considered all factors it believed relevant, including (i) the nature, extent, and quality of the services to be provided to the fund and its shareholders (including the investment performance of the fund); (ii) the competitiveness of the fund's management fee and total expense ratio relative to peer funds; (iii) the total costs of the services to be provided by and the profits to be realized by Fidelity from its relationship with the fund; and (iv) the extent to which (if any) economies of scale exist and would be realized as the fund grows, and whether any economies of scale are appropriately shared with fund shareholders.

In considering whether to renew the Advisory Contracts for the fund, the Board reached a determination, with the assistance of fund counsel and Independent Trustees' counsel and through the exercise of its business judgment, that the renewal of the Advisory Contracts was in the best interests of the fund and its shareholders and that the compensation payable under the Advisory Contracts was fair and reasonable. The Board's decision to renew the Advisory Contracts was not based on any single factor, but rather was based on a comprehensive consideration of all the information provided to the Board at its meetings throughout the year. The Board, in reaching its determination to renew the Advisory Contracts, was aware that shareholders of the fund have a broad range of investment choices available to them, including a wide choice among funds offered by Fidelity's competitors, and that the fund's shareholders, who have the opportunity to review and weigh the disclosure provided by the fund in its prospectus and other public disclosures, have chosen to invest in this fund, which is part of the Fidelity family of funds.

**Nature, Extent, and Quality of Services Provided.** The Board considered Fidelity's staffing as it relates to the fund, including the backgrounds of investment personnel of Fidelity, and also considered the fund's investment objective, strategies, and related investment philosophy. The Independent Trustees also had discussions with senior management of Fidelity's investment operations and investment groups. The Board considered the structure of the portfolio manager compensation program and whether this structure provides appropriate incentives to act in the best interests of the fund. Additionally, the Board considered the portfolio managers' investments, if any, in the funds that they manage.

Resources Dedicated to Investment Management and Support Services. The Board and the Fund Oversight and Research Committees reviewed the general qualifications and capabilities of Fidelity's investment staff, including its size, education, experience, and resources, as well as Fidelity's approach to recruiting, training, managing, and compensating investment personnel. The Board noted that Fidelity has continued to increase the resources devoted to non-U.S. offices, including expansion of Fidelity's global investment organization. The Board also noted that Fidelity's analysts have extensive resources, tools and capabilities that allow them to conduct sophisticated quantitative and fundamental analysis, as well as credit analysis of issuers, counterparties and guarantors. Further, the Board considered that Fidelity's investment professionals have sufficient access to global information and data so as to provide competitive investment results over time, and that those professionals also have access to sophisticated tools that permit them to assess portfolio construction and risk and performance attribution characteristics continuously, as well as to transmit new information and research conclusions rapidly around the world. Additionally, in its deliberations, the Board considered Fidelity's trading, risk management, and compliance capabilities and resources, which are integral parts of the investment management process.

Shareholder and Administrative Services. The Board considered (i) the nature, extent, quality, and cost of advisory, administrative, and shareholder services performed by FMR, the sub-advisers (together with FMR, the Investment Advisers), and their affiliates under the Advisory Contracts and under separate agreements covering transfer agency, pricing and bookkeeping, and securities lending services for the fund; (ii) the nature and extent of the supervision of third party service providers, principally custodians and subcustodians; and (iii) the resources devoted to, and the record of compliance with, the fund's compliance policies and procedures. The Board also reviewed the allocation of fund brokerage, including allocations to brokers affiliated with the Investment Advisers, the use of brokerage commissions to pay fund expenses, and the use of "soft" commission dollars to pay for research services.

The Board noted that the growth of fund assets over time across the complex allows Fidelity to reinvest in the development of services designed to enhance the value or convenience of the Fidelity funds as investment vehicles. These services include 24-hour access to account information and market information through telephone representatives and over the Internet, investor education materials and asset allocation tools, and the expanded availability of Fidelity Investor Centers.

In 2014, the Board formed an ad hoc Committee on Transfer Agency Fees to review the variety of transfer agency fee structures throughout the industry and Fidelity's competitive positioning with respect to industry participants.

Investment in a Large Fund Family. The Board considered the benefits to shareholders of investing in a Fidelity fund, including the benefits of investing in a fund that is part of a large family of funds offering a variety of investment disciplines and providing a large variety of mutual fund investor services. The Board noted that Fidelity had taken, or had made recommendations that resulted in the Fidelity funds taking, a number of actions over the previous year that benefited particular funds, including (i) continuing to dedicate additional resources to investment research and to the support of the senior management team that oversees asset management; (ii) continuing efforts to enhance Fidelity's global research capabilities; (iii) launching new funds and making other enhancements to meet client needs; (iv) reducing management fees and total expenses for certain index funds and diversified international funds; (v) continuing to launch dedicated lower cost underlying funds to meet portfolio construction needs related to expanding underlying fund options for Fidelity funds of funds, specifically for the Freedom Fund product lines; (vi) rationalizing product lines and gaining increased efficiencies through fund mergers; (vii) launching active fixed-income exchange-traded funds; (viii) continuing to develop, acquire and implement systems and technology to improve services to the funds and information security and to increase efficiency; (ix) implementing investment enhancements to further strengthen Fidelity's target date product line to increase investors' probability of success in achieving their goals; (x) modifying the eligibility criteria for certain share classes to accommodate roll-over assets from employer-sponsored retirement plans; (xi) launching a new Class W of the Freedom Index Funds to attract and retain Fidelity record-kept retirement plan assets; and (xii) implementing changes to Fidelity's money market product line in response to recent money market regulatory reforms.

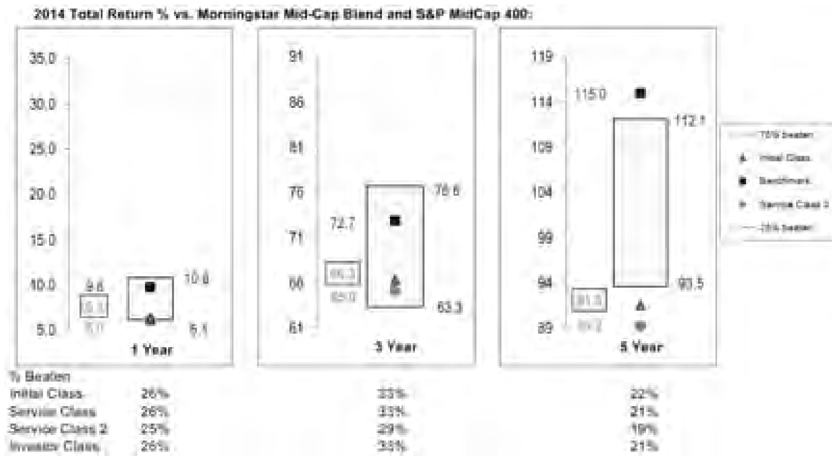
Investment Performance. The Board considered whether the fund has operated in accordance with its investment objective, as well as its record of compliance with its investment restrictions and its performance history.

The Board took into account discussions with representatives of the Investment Advisers about fund investment performance that occur at Board meetings throughout the year. In this regard the Board noted that as part of regularly scheduled fund reviews and other reports to the Board on fund performance, the Board considers annualized return information for the fund, for different time periods, measured against a securities market index ("benchmark index") and a peer group of funds with similar objectives ("peer group"), if any. In its evaluation of fund investment performance, the Board gave particular attention to information indicating changes in performance of certain Fidelity funds for specific time periods and discussed with the Investment Advisers the reasons for any overperformance or underperformance.

In addition to reviewing absolute and relative fund performance, the Independent Trustees periodically consider the appropriateness of fund performance metrics in evaluating the results achieved. In general, the Independent Trustees believe that fund performance should be evaluated based on net performance (after fees and expenses) of both the highest performing and lowest performing fund share classes, where applicable, compared to appropriate benchmark indices, over appropriate time periods that may include full market cycles, and compared to peer groups, as applicable, over the same periods, taking into account relevant factors including the following: general market conditions; issuer-specific information; and fund cash flows and other factors.

The Independent Trustees recognize that shareholders evaluate performance on a net basis over their own holding periods, for which one-, three-, and five-year periods are often used as a proxy. For this reason, the performance information reviewed by the Board also included net cumulative calendar year total return information for the fund and an appropriate benchmark index and peer group for the most recent one-, three-, and five-year periods, as shown below. Returns are shown compared to the 25th percentile (top of box, 75% beaten) and 75th percentile (bottom of box, 25% beaten) of the peer universe.

## VIP Mid Cap Portfolio



The Board has discussed with FMR the fund's underperformance (based on the December 31, 2014 data presented herein) and has engaged with FMR to consider what steps might be taken to remediate the fund's underperformance. The Board noted that the fund's performance has improved since the period shown.

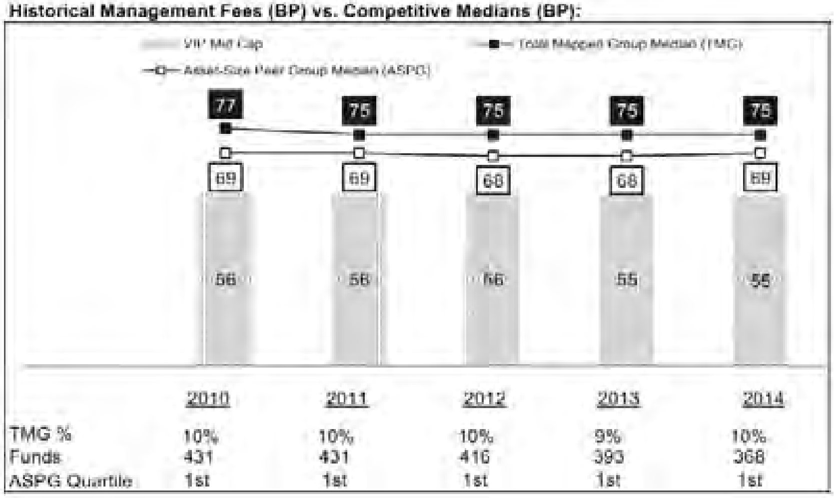
Based on its review, the Board concluded that the nature, extent, and quality of services provided to the fund under the Advisory Contracts should benefit the shareholders of the fund.

**Competitiveness of Management Fee and Total Expense Ratio.** The Board considered the fund's management fee and total expense ratio compared to "mapped groups" of competitive funds and classes created for the purpose of facilitating the Trustees' competitive analysis of management fees and total expenses. Fidelity creates "mapped groups" by combining similar Lipper investment objective categories that have comparable investment mandates. Combining Lipper investment objective categories aids the Board's management fee and total expense ratio comparisons by broadening the competitive group used for comparison.

Management Fee. The Board considered two proprietary management fee comparisons for the 12-month periods shown in basis points (BP) in the chart below. The group of Lipper funds used by the Board for management fee comparisons is referred to below as the "Total Mapped Group." The Total Mapped Group comparison focuses on a fund's standing in terms of gross management fees before expense reimbursements or caps relative to the total universe of funds with comparable investment mandates, regardless of whether their management fee structures also are comparable. Funds with comparable investment mandates offer exposure to similar types of securities. Funds with comparable management fee structures have similar management fee contractual arrangements (*e.g.*, flat rate charged for advisory services, all-inclusive fee rate, *etc.*). "TMG %" represents the percentage of funds in the Total Mapped Group that had management fees that were lower than the fund's. For example, a hypothetical TMG % of 20% would mean that 80% of the funds in the Total Mapped Group had higher, and 20% had lower, management fees than the fund. The fund's actual TMG %s and the number of funds in the Total Mapped Group are in the chart below. The "Asset-Size Peer Group" (ASPG) comparison focuses on a fund's standing relative to a subset of non-Fidelity funds within the Total Mapped Group that are similar in size and management fee structure without taking into account performance adjustments, if any. For example, if a fund is in the first quartile of the ASPG, the fund's management fee ranks in the least expensive or lowest 25% of funds in the ASPG. The ASPG represents at least 15% of the funds in the Total Mapped Group with comparable asset size and management fee structures, subject to a minimum of 50 funds (or all funds in the Total Mapped Group if fewer than 50). Additional information, such as the ASPG quartile in which the fund's management fee rate ranked, is also included in the chart and considered by the Board.

## VIP Mid Cap Portfolio

Historical Management Fees (BP) vs. Competitive Medians (BP):



The Board noted that the fund's management fee rate ranked below the median of its Total Mapped Group and below the median of its ASPG for 2014.

The Board noted that, in 2014, the ad hoc Committee on Group Fee was formed by it and other Fidelity fund boards to conduct an in-depth review of the "group fee" component of the management fee of funds with such management fee structures. Committee focus included the mechanics of the group fee, the competitive landscape of group fee structures, Fidelity funds with no group fee component and investment products not included in group fee assets. The Board also considered that, for funds subject to the group fee, FMR agreed to voluntarily waive fees over a specified period of time in amounts designed to account for assets converted from certain funds to certain collective investment trusts.

The Board also noted that, in 2013, the ad hoc Committee on Management Fees was formed to conduct an in-depth review of the management fee rates of Fidelity's active equity mutual funds. The Committee focused on the following areas: (i) standard fee structures; (ii) research consumption and trading evolution; (iii) management fee competitiveness/profitability by category; and (iv) factors that drive institutional pricing.

Based on its review, the Board concluded that the fund's management fee is fair and reasonable in light of the services that the fund receives and the other factors considered.

Total Expense Ratio. In its review of each class's total expense ratio, the Board considered the fund's management fee as well as other fund or class expenses, as applicable, such as transfer agent fees, pricing and bookkeeping fees, fund-paid 12b-1 fees, and custodial, legal, and audit fees. The Board also noted that Fidelity may agree to waive fees and expenses from time to time, and the extent to which, if any, it has done so for the fund. As part of its review, the Board also considered the current and historical total expense ratios of each class of the fund compared to competitive fund median expenses. Each class of the fund is compared to those funds and classes in the Total Mapped Group (used by the Board for management fee comparisons) that have a similar sales load structure.

The Board noted that the total expense ratio of each class ranked below its competitive median for 2014.

Fees Charged to Other Fidelity Clients. The Board also considered Fidelity fee structures and other information with respect to clients of Fidelity, such as other funds advised or subadvised by Fidelity, pension plan clients, and other institutional clients with similar mandates. The Board noted the findings of the 2013 ad hoc joint committee (created with the board of other Fidelity funds), which reviewed and compared Fidelity's institutional investment advisory business with its business of providing services to the Fidelity funds, including the differences in services provided, fees charged, and costs incurred, as well as competition in their respective marketplaces.

Based on its review of total expense ratios and fees charged to other Fidelity clients, the Board concluded that the total expense ratio of each class of the fund was reasonable in light of the services that the fund and its shareholders receive and the other factors considered.

**Costs of the Services and Profitability.** The Board considered the revenues earned and the expenses incurred by Fidelity in conducting the business of developing, marketing, distributing, managing, administering and servicing the fund and servicing the fund's shareholders. The Board also considered the level of Fidelity's profits in respect of all the Fidelity funds.

On an annual basis, Fidelity presents to the Board information about the profitability of its relationship with the fund. Fidelity calculates profitability information for each fund, as well as aggregate profitability information for groups of Fidelity funds and all Fidelity funds, using a series of detailed revenue and cost allocation methodologies which originate with the books and records of Fidelity on which Fidelity's audited financial statements are based. The Audit Committee of the Board reviews any significant changes from the prior year's methodologies.

PricewaterhouseCoopers LLP (PwC), independent registered public accounting firm and auditor to Fidelity and certain Fidelity funds, has been engaged annually by the Board as part of the Board's assessment of Fidelity's profitability analysis. PwC's engagement includes the review and assessment of the methodologies used by Fidelity in determining the revenues and expenses attributable to Fidelity's mutual fund business, and completion of agreed-upon procedures in respect of the mathematical accuracy of fund profitability and its conformity to established allocation methodologies. After considering PwC's reports issued under the engagement and information provided by Fidelity, the Board concluded that while other allocation methods may also be reasonable, Fidelity's profitability methodologies are reasonable in all material respects.

The Board also reviewed Fidelity's non-fund businesses and fall-out benefits related to the mutual fund business as well as cases where Fidelity's affiliates may benefit from or be related to the fund's business.

The Board considered the costs of the services provided by and the profits realized by Fidelity in connection with the operation of the fund and was satisfied that the profitability was not excessive.

**Economies of Scale.** The Board considered whether there have been economies of scale in respect of the management of the Fidelity funds, whether the Fidelity funds (including the fund) have appropriately benefited from any such economies of scale, and whether there is potential for realization of any further economies of scale. The Board considered the extent to which the fund will benefit from economies of scale as assets grow through increased services to the fund, through waivers or reimbursements, or through fee or expense ratio reductions. The Board also noted that in 2013, it and the boards of other Fidelity funds created an ad hoc committee (the Economies of Scale Committee) to analyze whether Fidelity attains economies of scale in respect of the management and servicing of the Fidelity funds, whether the Fidelity funds have appropriately benefited from such economies of scale, and whether there is potential for realization of any further economies of scale.

The Board recognized that the fund's management contract incorporates a "group fee" structure, which provides for lower group fee rates as total group assets increase, and for higher group fee rates as total group assets decrease (with "group assets" defined to include fund assets under FMR's management plus sector fund assets previously under FMR's management and currently managed by Fidelity SelectCo, LLC). FMR calculates the group fee rates based on a tiered asset "breakpoint" schedule that varies based on asset class. The Board considered that the group fee is designed to deliver the benefits of economies of scale to fund shareholders when total Fidelity fund assets increase, even if assets of any particular fund are unchanged or have declined, because some portion of Fidelity's costs are attributable to services provided to all Fidelity funds, and all funds benefit if those costs can be allocated among more assets. The Board concluded that, given the group fee structure, fund shareholders will benefit from lower management fees as group assets increase at the fund complex level, regardless of whether Fidelity achieves any such economies of scale.

The Board concluded, taking into account the analysis of the Economies of Scale Committee, that economies of scale, if any, are being appropriately shared between fund shareholders and Fidelity.

**Additional Information Requested by the Board.** In order to develop fully the factual basis for consideration of the Fidelity funds' Advisory Contracts, the Board requested and received additional information on certain topics, including: (i) fund performance trends and Fidelity's long-term strategies for certain funds; (ii) the various share classes employed by Fidelity and the attributes of each class, together with similar information on the distribution and servicing payments made by Fidelity or the funds to third-party participants in the distribution channels; (iii) fund profitability, and fund performance in relation to fund profitability; (iv) the methodology with respect to evaluating competitive fund data and peer group classifications and fee comparisons; (v) annual fund profitability margins, with particular focus on certain funds with negative margins; (vi) the realization of fall-out benefits in certain Fidelity business units; (vii) economies of scale and the way in which they are shared with fund shareholders;(viii) Fidelity's group fee structures, including the group fee schedule of breakpoints;(ix) the impact of cost containment measures on the funds; and (x) the transfer agent fee structure.

Based on its evaluation of all of the conclusions noted above, and after considering all factors it believed relevant, the Board concluded that the advisory fee structures are fair and reasonable, and that the fund's Advisory Contracts should be renewed.

# Franklin Templeton Variable Insurance Products Trust Annual Report

## Table of Contents

*Not part of the annual report. Retain for your records.

# Important Notes to Performance Information

Performance data is historical and cannot predict or guarantee future results. Principal value and investment return will fluctuate with market conditions, and you may have a gain or loss when you withdraw your money. Inception dates of the funds may have preceded the effective dates of the subaccounts, contracts or their availability in all states.

When reviewing the index comparisons, please keep in mind that indexes have a number of inherent performance differentials over the funds. First, unlike the funds, which must hold a minimum amount of cash to maintain liquidity, indexes do not have a cash component. Second, the funds are actively managed and, thus, are subject to management fees to cover salaries of securities analysts or portfolio managers in addition to other expenses. Indexes are unmanaged and do not include any commissions or other expenses typically associated with investing in securities. Third, indexes often contain a different mix of securities than the fund to which they are compared. Additionally, please remember that indexes are simply a measure of performance and cannot be invested in directly.

**SUPPLEMENT DATED FEBRUARY 8, 2016**
**TO THE STATEMENT OF ADDITIONAL INFORMATION DATED MAY 1, 2015**
**OF**
**FRANKLIN TEMPLETON VARIABLE INSURANCE PRODUCTS TRUST**

The statement of additional information (SAI) is amended as follows:

The section under the heading "**Dealer Compensation**" beginning on page 99 is replaced with the following:

In addition to the payments above, Distributors and/or its affiliates may make the following payments out of its own assets to certain dealers who sell shares of Franklin Templeton funds, or participate in the offering of variable insurance products that invest directly or indirectly in the Trust (VIP Qualifying Dealers):

*Marketing support payments.* Distributors may make payments to VIP Qualifying Dealers out of its own resources. A VIP Qualifying Dealer's marketing support services may include business planning assistance, marketing and advertising, training and ongoing education and support for dealer personnel about the Franklin Templeton funds (including the Trust) and financial planning needs of shareholders of the Franklin Templeton funds or contract owners that allocate contract value indirectly to one or more Franklin Templeton funds, placement on the VIP Qualifying Dealer's list of offered funds, access to sales meetings, sales representatives and management representatives of the dealer, and contract owner assistance in allocating contract value directly or indirectly to the Trust. Distributors compensates VIP Qualifying Dealers differently depending upon, among other factors, whether the VIP Qualifying Dealer is directly selling Franklin Templeton funds, or participating in the offering of variable insurance products that invest directly or indirectly in the Trust, sales and asset levels, redemption rates and the level and/or type of marketing and educational activities provided by the VIP Qualifying Dealer. Such compensation may include financial assistance to such dealers that enable Distributors to develop, manage or participate in and/or present at conferences or seminars, sales or training programs for invited registered representatives and other employees, client and investor events, and other dealer-sponsored events. These payments may vary depending upon the nature of the event. Distributors will, on an annual basis, determine whether to continue such payments. Currently, Distributors does not make marketing support payments in connection with the Trust except under limited circumstances for certain Funds of the Trust offered through a special product. Marketing support payments will not exceed 0.20% of the relevant Fund's or Funds' average daily net assets attributable to an insurance company, on an annual basis.

*Other payments.* From time to time, Distributors, at its expense, may provide additional compensation to VIP Qualifying Dealers which sell or arrange for the direct or indirect sale of shares of Franklin Templeton funds, including the Trust. Such compensation may include financial assistance to VIP Qualifying Dealers that enable Distributors to participate in and/or present at conferences or seminars, sales or training programs for invited registered representatives and other employees, client and investor events and other dealer-sponsored events. These payments may vary depending upon the nature of the event.

Distributors routinely sponsors due diligence meetings for registered representatives during which they receive updates on various Franklin Templeton funds and are afforded the

opportunity to speak with portfolio managers. Invitation to these meetings is not conditioned on selling a specific number of shares. Those who have shown an interest in Franklin Templeton funds, however, are more likely to be considered. To the extent permitted by their firm's policies and procedures, registered representatives' expenses in attending these meetings may be covered by Distributors.

Other compensation may be offered to the extent not prohibited by federal or state laws or any self-regulatory agency, such as FINRA. Distributors makes payments for events it deems appropriate, subject to Distributors' guidelines and applicable law. Distributors and/or its affiliates may also reimburse VIP Qualifying Dealers and/or their affiliates for certain costs associated with obtaining voting instructions from contract owners and the solicitation process in connection with Trust-sponsored proxy statements.

You can ask your insurance company and VIP Qualifying Dealer for information about any payments they receive from Distributors and any services provided. Additional disclosure may be included in the insurance contract prospectus.

*Please keep this supplement with your statement of additional information for future reference.*

# Franklin Small Cap Value VIP Fund

This annual report for Franklin Small Cap Value VIP Fund covers the fiscal year ended December 31, 2015.

## Class 2 Performance Summary as of December 31, 2015

Average annual total return of Class 2 shares* represents the average annual change in value, assuming reinvestment of dividends and capital gains. Average returns smooth out variations in returns, which can be significant; they are not the same as year-by-year results.

| Periods ended 12/31/15 | 1-Year | 5-Year | 10-Year |
|---|---|---|---|
| Average Annual Total Return | -7.39% | +7.65% | +6.24% |

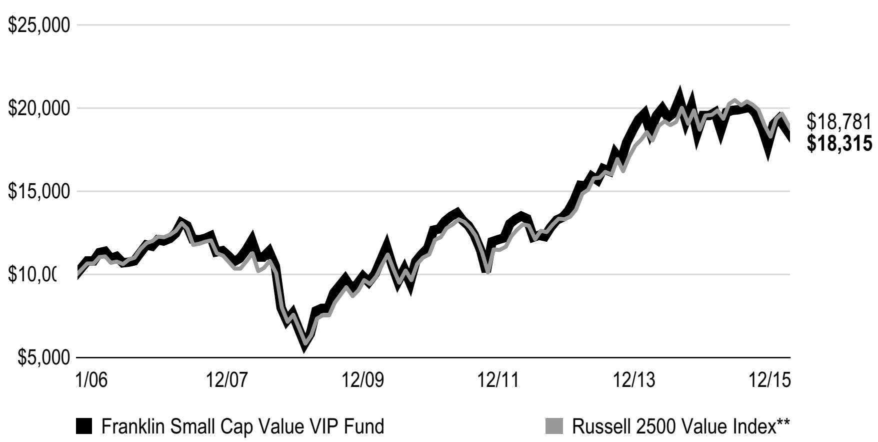
*The Fund has a fee waiver associated with any investment in a Franklin Templeton money fund, contractually guaranteed through at least its current fiscal year-end. Fund investment results reflect the fee waiver, to the extent applicable; without this reduction, the results would have been lower.

*Performance reflects the Fund's Class 2 operating expenses, but does* ***not*** *include any contract fees, expenses or sales charges. If they had been included, performance would be lower. These charges and deductions, particularly for variable life policies, can have a significant effect on contract values and insurance benefits. See the contract prospectus for a complete description of these expenses, including sales charges.*

*Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown.*

### Total Return Index Comparison for a Hypothetical $10,000 Investment (1/1/06–12/31/15)

The graph below shows the change in value of a hypothetical $10,000 investment in the Fund over the indicated period and includes reinvestment of any income or distributions. The Fund's performance* is compared to the performance of the Russell 2500™ Value Index. One cannot invest directly in an index, and an index is not representative of the Fund's portfolio. **Please see Important Notes to Performance Information preceding the Fund Summaries.**



**Source: Morningstar. Please see Index Descriptions following the Fund Summaries.

## Fund Goal and Main Investments

The Fund seeks long-term total return. Under normal market conditions, the Fund invests at least 80% of its net assets in investments of small capitalization companies. For this Fund, small capitalization companies are those with market capitalizations under $3.5 billion at the time of purchase. The Fund generally invests in equity securities of companies that the manager believes are undervalued and have the potential for capital appreciation.

## Fund Risks

All investments involve risks, including possible loss of principal. The Fund's investments in smaller company stocks carry special risks as such stocks have historically exhibited greater price volatility than large-company stocks, particularly over the short term. Additionally, smaller companies often have relatively small revenues, limited product lines and a small market share. In addition, the Fund may invest up to 25% of its total assets in foreign securities, which involve special risks, including currency fluctuations and economic and political uncertainty. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results. The Fund's prospectus also includes a description of the main investment risks.

## Performance Overview

You can find the Fund's one-year total return in the Performance Summary. For comparison, the Fund's benchmark, the Russell 2500™ Value Index, had a -5.49% total return for the same period.[1] Please note the Fund employs a bottom-up stock selection process, and the managers invest in securities without regard to benchmark comparisons.

## Economic and Market Overview

The U.S. economy grew moderately during the 12 months under review amid healthy consumer spending. After starting 2015 with modest growth, the economy strengthened in the second quarter but moderated in the third and fourth quarters as exports slowed and state and local governments reduced their spending. Manufacturing activities expanded for most of the period but contracted toward period-end. Non-manufacturing activities, however, expanded throughout the 12-month period, contributing to new jobs and helping drive down the unemployment rate to 5.0% from October through period-end, the lowest level in more than seven years.[2] The housing market improved at period-end as existing and new home sales increased and home prices rose despite slightly higher mortgage rates. Retail sales grew modestly, led by automobile and auto component sales. Annual inflation, as measured by the Consumer Price Index, remained subdued largely due to low energy prices.

After maintaining its target interest rate at a range of 0%–0.25% for seven years to support the U.S. economy's recovery, the Federal Reserve (Fed) raised its target range for the federal funds rate to 0.25%–0.50% at its December meeting. Policymakers cited the labor market's considerable improvement and were reasonably confident that inflation would move back to the Fed's 2.0% medium-term objective. The Fed indicated that its process of normalizing interest rates would be data dependent and would likely be gradual. Furthermore, the Fed raised its 2016 U.S. economic growth forecast and lowered its unemployment rate projection.

U.S. stock markets experienced sell-offs at times during the year, resulting from investor concerns about the timing of the Fed's interest rate increases, slower global economic growth, geopolitical tensions in certain regions and a plunge in crude oil prices. Investors generally remained confident, however, as the Fed maintained an accommodative monetary policy stance despite the rate increase, the eurozone economy improved and China implemented more stimulus measures to support its economy. Despite periods of volatility, the broad U.S. stock market, as measured by the Standard & Poor's® 500 Index, generated a modest positive total return for 2015.[3] The energy and materials sectors were among the worst performers, while consumer discretionary, health care, consumer staples and information technology outperformed.

## Investment Strategy

We generally invest in stocks that we believe are undervalued and have the potential for capital appreciation. We consider a stock price a "value" when it trades at less than the price at which we believe it would trade if the market reflected all factors relating to the company's worth. Accordingly, we invest in companies that we believe have, for example, stock prices that are low relative to current or historical or future earnings, book value, cash flow or sales; recent sharp price declines but the potential for good long-term earnings prospects; and valuable

3. Please see Index Descriptions following the Fund Summaries.

intangibles not reflected in the stock price. Companies in which we may invest include those that may be considered out of favor, such as companies attempting to recover from bankruptcy, business setbacks, adverse events or cyclical downturns, or that may be considered potential takeover targets.

## Manager's Discussion

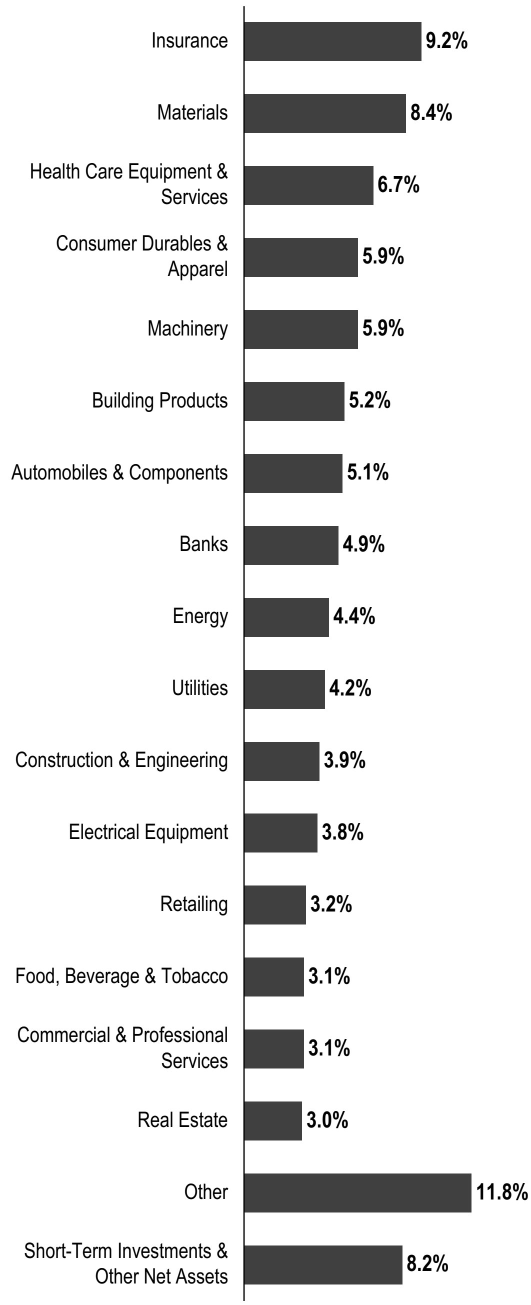
During the reporting period, contributors to absolute Fund performance included StanCorp Financial Group, The Pep Boys – Manny, Moe & Jack and Gerresheimer. StanCorp Financial Group, an insurance provider and asset manager, received a cash takeover offer from Meiji Yasuda Life Insurance at a premium. The Pep Boys, an automobile sales and services provider, received cash takeover offers from Bridgestone and investor, Carl Icahn, which helped increase the company's share price. We liquidated the position by the end of the period. Gerresheimer, a health-care-focused glass and plastics products manufacturer, benefited from strategic moves intended to improve the company's long-term return profile. Specifically, the company sold its low-margin glass tubing business and acquired Centor, a leading, high-margin, U.S.-based manufacturer of plastic vials.

Detractors from absolute Fund performance included Axiall, Unit Corp. and The Men's Wearhouse. Axiall, a chemical and building products manufacturer, was negatively affected by weaker-than expected end-market pricing due to industry-wide chlor-alkali capacity expansions and still relatively weak demand. The company replaced its chief executive officer and is implementing cost-cutting measures to offset weakness while simultaneously exploring alternatives for its building products business. Shares of Unit Corp., an onshore provider of drilling rigs, experienced a negative impact from a sharp drop in oil prices that began in mid-2014, resulting in lower demand for its equipment. The Men's Wearhouse, a men's clothing retailer, reported weaker-than-expected results from its recently acquired Jos. A. Bank business, as a change to a less promotional-driven model disrupted sales. We exited the position during the period.

During the period, we initiated several positions including LTC Properties, a real estate investment trust; The Laclede Group, a natural gas service provider; IDACORP, an energy operator and provider; Crocs, a footwear designer; and BRP Inc., a manufacturer of personal watercraft and all-terrain vehicles; among others. We also added to existing holdings including Everbank Financial, a provider of commercial and retail banking services; Drew Industries, a manufacturer and supplier of home and recreational vehicle components; and the aforementioned Gerresheimer; among others.

**Portfolio Breakdown**

Based on Total Net Assets as of 12/31/15



We eliminated several positions including Group 1 Automotive, Cabot., Apogee Enterprises, Lincoln Electric Holdings and Rowan Companies, among others. We reduced our positions in StanCorp Financial, Thor Industries and RPM International, among others.

Thank you for your participation in Franklin Small Cap Value VIP Fund. We look forward to serving your future investment needs.

# Class 2 Fund Expenses

As an investor in a variable insurance contract (Contract) that indirectly provides for investment in an underlying mutual fund, you can incur transaction and/or ongoing expenses at both the Fund level and the Contract level.

- Transaction expenses can include sales charges (loads) on purchases, redemption fees, surrender fees, transfer fees and premium taxes.
- Ongoing expenses can include management fees, distribution and service (12b-1) fees, contract fees, annual maintenance fees, mortality and expense risk fees and other fees and expenses. All mutual funds and Contracts have some types of ongoing expenses.

*The expenses shown in the table are meant to highlight ongoing expenses at the Fund level only and do not include ongoing expenses at the Contract level, or transaction expenses at either the Fund or Contract level. While the Fund does not have transaction expenses, if the transaction and ongoing expenses at the Contract level were included, the expenses shown below would be higher. You should consult your Contract prospectus or disclosure document for more information.*

The table shows Fund-level ongoing expenses and can help you understand these expenses and compare them with those of other mutual funds offered through the Contract. The table assumes a $1,000 investment held for the six months indicated. Please refer to the Fund prospectus for additional information on operating expenses.

## Actual Fund Expenses

The first line (Actual) of the table provides actual account values and expenses. The "Ending Account Value" is derived from the Fund's actual return, which includes the effect of ongoing Fund expenses, but does not include the effect of ongoing Contract expenses.

You can estimate the Fund-level expenses you incurred during the period by following these steps. *Of course, your account value and expenses will differ from those in this illustration:*

1. Divide your account value by $1,000.
   *If an account had an $8,600 value, then $8,600 ÷ $1,000 = 8.6.*
2. Multiply the result by the number under the heading "Fund-Level Expenses Incurred During Period."
   *If Fund-Level Expenses Incurred During Period were $7.50, then 8.6 × $7.50 = $64.50.*

In this illustration, the estimated expenses incurred this period at the Fund level are $64.50.

## Hypothetical Example for Comparison with Other Mutual Funds

Information in the second line (Hypothetical) of the table can help you compare ongoing expenses of the Fund with those of other mutual funds offered through the Contract. This information may not be used to estimate the actual ending account balance or expenses you incurred during the period. The hypothetical "Ending Account Value" is based on the Fund's actual expense ratio and an assumed 5% annual rate of return before expenses, which does not represent the Fund's actual return. The figure under the heading "Fund-Level Expenses Incurred During Period" shows the hypothetical expenses your account would have incurred under this scenario. You can compare this figure with the 5% hypothetical examples that appear in shareholder reports of other funds offered through a Contract.

| Class 2 | Beginning Account Value 7/1/15 | Ending Account Value 12/31/15 | Fund-Level Expenses Incurred During Period* 7/1/15–12/31/15 |
|---|---|---|---|
| Actual | $1,000 | $ 912.80 | $4.29 |
| Hypothetical (5% return before expenses) | $1,000 | $1,020.72 | $4.53 |

*Expenses are calculated using the most recent six-month annualized expense ratio, net of expense waivers, for the Fund's Class 2 shares (0.89%), which does not include any ongoing expenses of the Contract for which the Fund is an investment option, multiplied by the average account value over the period, multiplied by 184/365 to reflect the one-half year period.

# Notes to Financial Statements

## Franklin Small Cap Value VIP Fund

### 1. Organization and Significant Accounting Policies

Franklin Templeton Variable Insurance Products Trust (Trust) is registered under the Investment Company Act of 1940 (1940 Act) as an open-end management investment company, consisting of nineteen separate funds and applies the specialized accounting and reporting guidance in U.S. Generally Accepted Accounting Principles (U.S. GAAP). Franklin Small Cap Value VIP Fund (Fund) is included in this report. The financial statements of the remaining funds in the Trust are presented separately. Shares of the Fund are generally sold only to insurance company separate accounts to fund the benefits of variable life insurance policies or variable annuity contracts. The Fund offers three classes of shares: Class 1, Class 2 and Class 4. Each class of shares differs by its distribution fees, voting rights on matters affecting a single class and its exchange privilege.

The following summarizes the Fund's significant accounting policies.

**a. Financial Instrument Valuation**

The Fund's investments in financial instruments are carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. The Fund calculates the net asset value (NAV) per share as of 4 p.m. Eastern time each day the New York Stock Exchange (NYSE) is open for trading. Under compliance policies and procedures approved by the Trust's Board of Trustees (the Board), the Fund's administrator has responsibility for oversight of valuation, including leading the cross-functional Valuation and Liquidity Oversight Committee (VLOC). The VLOC provides administration and oversight of the Fund's valuation policies and procedures, which are approved annually by the Board. Among other things, these procedures allow the Fund to utilize independent pricing services, quotations from securities and financial instrument dealers, and other market sources to determine fair value.

Equity securities listed on an exchange or on the NASDAQ National Market System are valued at the last quoted sale price or the official closing price of the day, respectively. Foreign equity securities are valued as of the close of trading on the foreign stock exchange on which the security is primarily traded or as of 4 p.m. Eastern time whichever is earlier. The value is then converted into its U.S. dollar equivalent at the foreign exchange rate in effect at 4 p.m. Eastern time on the day that the value of the security is determined. Over-the-counter (OTC) securities are valued within the range of the most recent quoted bid and ask prices. Securities that trade in multiple markets or on multiple exchanges are valued according to the broadest and most representative market. Certain equity securities are valued based upon fundamental characteristics or relationships to similar securities.

Debt securities generally trade in the OTC market rather than on a securities exchange. The Fund's pricing services use multiple valuation techniques to determine fair value. In instances where sufficient market activity exists, the pricing services may utilize a market-based approach through which quotes from market makers are used to determine fair value. In instances where sufficient market activity may not exist or is limited, the pricing services also utilize proprietary valuation models which may consider market characteristics such as benchmark yield curves, credit spreads, estimated default rates, anticipated market interest rate volatility, coupon rates, anticipated timing of principal repayments, underlying collateral, and other unique security features in order to estimate the relevant cash flows, which are then discounted to calculate the fair value.

Investments in open-end mutual funds are valued at the closing NAV. Repurchase agreements are valued at cost, which approximates fair value.

The Fund has procedures to determine the fair value of financial instruments for which market prices are not reliable or readily available. Under these procedures, the VLOC convenes on a regular basis to review such financial instruments and considers a number of factors, including significant unobservable valuation inputs, when arriving at fair value. The VLOC primarily employs a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, book values, and other relevant information for the investment to determine the fair value of the investment. An income-based valuation approach may also be used in which the anticipated future cash flows of the investment are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Due to the inherent uncertainty of valuations of such investments, the fair values may differ significantly from the values that would have been used had an active market existed. The VLOC employs various methods for calibrating these valuation approaches including a regular review of key inputs and assumptions, transactional back-testing or disposition analysis, and reviews of any related market activity.

## Franklin Small Cap Value VIP Fund (continued)

### 1. Organization and Significant Accounting Policies (continued)

**a. Financial Instrument Valuation** *(continued)*

Trading in securities on foreign securities stock exchanges and OTC markets may be completed before 4 p.m. Eastern time. In addition, trading in certain foreign markets may not take place on every NYSE business day. Occasionally, events occur between the time at which trading in a foreign security is completed and the close of the NYSE that might call into question the reliability of the value of a portfolio security held by the Fund. As a result, differences may arise between the value of the Fund's portfolio securities as determined at the foreign market close and the latest indications of value at the close of the NYSE. In order to minimize the potential for these differences, the VLOC monitors price movements following the close of trading in foreign stock markets through a series of country specific market proxies (such as baskets of American Depositary Receipts, futures contracts and exchange traded funds). These price movements are measured against established trigger thresholds for each specific market proxy to assist in determining if an event has occurred that may call into question the reliability of the values of the foreign securities held by the Fund. If such an event occurs, the securities may be valued using fair value procedures, which may include the use of independent pricing services.

When the last day of the reporting period is a non-business day, certain foreign markets may be open on those days that the NYSE is closed, which could result in differences between the value of the Fund's portfolio securities on the last business day and the last calendar day of the reporting period. Any significant security valuation changes due to an open foreign market are adjusted and reflected by the Fund for financial reporting purposes.

**b. Foreign Currency Translation**

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. The Fund may enter into foreign currency exchange contracts to facilitate transactions denominated in a foreign currency. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Portfolio securities and assets and liabilities denominated in foreign currencies contain risks that those currencies will decline in value relative to the U.S. dollar. Occasionally, events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Board.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments in the Statement of Operations.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

**c. Joint Repurchase Agreement**

The Fund enters into a joint repurchase agreement whereby its uninvested cash balance is deposited into a joint cash account with other funds managed by the investment manager or an affiliate of the investment manager and is used to invest in one or more repurchase agreements. The value and face amount of the joint repurchase agreement are allocated to the funds based on their pro-rata interest. A repurchase agreement is accounted for as a loan by the Fund to the seller, collateralized by securities which are delivered to the Fund's custodian. The fair value, including accrued interest, of the initial collateralization is required to be at least 102% of the dollar amount invested by the funds, with the value of the underlying securities marked to market daily to maintain coverage of at least 100%. Repurchase agreements are subject to the terms of Master Repurchase Agreements (MRAs) with approved counterparties (sellers). The MRAs contain various provisions, including but not limited to events of default and maintenance of collateral for repurchase agreements. In the event of default by either the seller or the Fund, certain MRAs may permit the non-defaulting party to net and close-out all transactions, if any, traded under such agreements. The Fund may sell securities it holds as collateral and

**Franklin Small Cap Value VIP Fund** (continued)

apply the proceeds towards the repurchase price and any other amounts owed by the seller to the Fund in the event of default by the seller. This could involve costs or delays in addition to a loss on the securities if their value falls below the repurchase price owed by the seller. The joint repurchase agreement held by the Fund at year end, as indicated in the Statement of Investments, had been entered into on December 31, 2015.

**d. Securities Lending**

The Fund participates in an agency based securities lending program to earn additional income. The Fund receives cash collateral against the loaned securities in an amount equal to at least 102% of the fair value of the loaned securities. Collateral is maintained over the life of the loan in an amount not less than 100% of the fair value of loaned securities, as determined at the close of Fund business each day; any additional collateral required due to changes in security values is delivered to the Fund on the next business day. The collateral is deposited into a joint cash account with other funds and is used to invest in a money market fund managed by Franklin Advisers, Inc., an affiliate of the Fund and/or a joint repurchase agreement. The Fund may receive income from the investment of cash collateral, in addition to lending fees and rebates paid by the borrower. Income from securities loaned is reported separately in the Statement of Operations. The Fund bears the market risk with respect to the collateral investment, securities loaned, and the risk that the agent may default on its obligations to the Fund. If the borrower defaults on its obligation to return the securities loaned, the Fund has the right to repurchase the securities in the open market using the collateral received. The securities lending agent has agreed to indemnify the Fund in the event of default by a third party borrower.

Securities lending transactions are accounted for as secured borrowing transactions. The securities out on loan represent the collateral pledged by the Fund, and the cash collateral received for the loaned securities represents the amount borrowed by the Fund. At December 31, 2015, the Fund's secured borrowing transactions were as follows:

| | |
|---|---|
| **Securities lending transactions[a]:** | |
| Equity Investments[b] | $4,859,465 |

[a]The agreements open at period end can be terminated at any time.

[b]Gross amount of recognized liabilities for securities lending transactions is included in payable upon return of securities loaned in the Statement of Assets and Liabilities.

**e. Income and Deferred Taxes**

It is the Fund's policy to qualify as a regulated investment company under the Internal Revenue Code. The Fund intends to distribute to shareholders substantially all of its taxable income and net realized gains to relieve it from federal income and if applicable, excise taxes. As a result, no provision for U.S. federal income taxes is required.

The Fund may be subject to foreign taxation related to income received, capital gains on the sale of securities and certain foreign currency transactions in the foreign jurisdictions in which it invests. Foreign taxes, if any, are recorded based on the tax regulations and rates that exist in the foreign markets in which the Fund invests. When a capital gain tax is determined to apply, the Fund records an estimated deferred tax liability in an amount that would be payable if the securities were disposed of on the valuation date.

The Fund may recognize an income tax liability related to its uncertain tax positions under U.S. GAAP when the uncertain tax position has a less than 50% probability that it will be sustained upon examination by the tax authorities based on its technical merits. As of December 31, 2015, the Fund has determined that no tax liability is required in its financial statements related to uncertain tax positions for any open tax years (or expected to be taken on future tax returns). Open tax years are those that remain subject to examination and are based on each tax jurisdiction's statute of limitation.

**f. Security Transactions, Investment Income, Expenses and Distributions**

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Interest income and estimated expenses are accrued daily. Amortization of premium and accretion of discount on debt securities are included in interest income. Dividend income recorded on the ex-dividend date except for certain dividends from foreign securities where the dividend rate is not available. In such cases, the dividend is recorded as soon as the information is received by the Fund. Distributions to shareholders are recorded on the ex-dividend date and are determined according to income tax regulations (tax basis). Distributable earnings determined on a tax basis may differ from earnings recorded in accordance with U.S. GAAP. These differences may be permanent or temporary. Permanent differences are reclassified among capital accounts to reflect

## Franklin Small Cap Value VIP Fund (continued)

### 1. Organization and Significant Accounting Policies (continued)

**f. Security Transactions, Investment Income, Expenses and Distributions** *(continued)*

their tax character. These reclassifications have no impact on net assets or the results of operations. Temporary differences are not reclassified, as they may reverse in subsequent periods.

Common expenses incurred by the Trust are allocated among the Funds based on the ratio of net assets of each Fund to the combined net assets of the Trust. Fund specific expenses are charged directly to the fund that incurred the expense.

Realized and unrealized gains and losses and net investment income, not including class specific expenses, are allocated daily to each class of shares based upon the relative proportion of net assets of each class. Differences in per share distributions, by class, are generally due to differences in class specific expenses.

**g. Accounting Estimates**

The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

**h. Guarantees and Indemnifications**

Under the Trust's organizational documents, its officers and trustees are indemnified by the Trust against certain liabilities arising out of the performance of their duties to the Trust. Additionally, in the normal course of business, the Trust, on behalf of the Fund, enters into contracts with service providers that contain general indemnification clauses. The Trust's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Trust that have not yet occurred. Currently, the Trust expects the risk of loss to be remote.

### 2. Shares of Beneficial Interest

At December 31, 2015, there were an unlimited number of shares authorized (without par value). Transactions in the Fund's shares were as follows:

| | Year Ended December 31, | | | |
|---|---|---|---|---|
| | 2015 | | 2014 | |
| | Shares | Amount | Shares | Amount |
| **Class 1 Shares:** | | | | |
| Shares sold | 97,924 | $ 2,017,340 | 175,851 | $ 4,068,553 |
| Shares issued in reinvestment of distributions | 407,044 | 8,149,019 | 206,102 | 4,785,680 |
| Shares redeemed | (507,751) | (10,332,072) | (388,575) | (9,061,003) |
| Net increase (decrease) | (2,783) | $ (165,713) | (6,622) | $ (206,770) |
| **Class 2 Shares:** | | | | |
| Shares sold | 3,551,318 | $ 71,764,155 | 5,020,152 | $ 113,569,546 |
| Shares issued in reinvestment of distributions | 10,305,710 | 201,579,696 | 5,364,390 | 122,093,507 |
| Shares redeemed | (12,288,306) | (247,644,089) | (12,408,353) | (281,695,473) |
| Net increase (decrease) | 1,568,722 | $ 25,699,762 | (2,023,811) | $ (46,032,420) |
| **Class 4 Shares:** | | | | |
| Shares sold | 220,435 | $ 4,535,105 | 176,245 | $ 3,946,345 |
| Shares issued in reinvestment of distributions | 221,510 | 4,405,833 | 112,435 | 2,596,120 |
| Shares redeemed | (332,844) | (6,631,937) | (418,040) | (9,718,599) |
| Net increase (decrease) | 109,101 | $ 2,309,001 | (129,360) | $ (3,176,134) |

## Franklin Small Cap Value VIP Fund (continued)

### 3. Transactions With Affiliates

Franklin Resources, Inc. is the holding company for various subsidiaries that together are referred to as Franklin Templeton Investments. Certain officers and trustees of the Fund are also officers and/or directors of the following subsidiaries:

| Subsidiary | Affiliation |
|---|---|
| Franklin Advisory Services, LLC (Advisory Services) | Investment manager |
| Franklin Templeton Services, LLC (FT Services) | Administrative manager |
| Franklin Templeton Distributors, Inc. (Distributors) | Principal underwriter |
| Franklin Templeton Investor Services, LLC (Investor Services) | Transfer agent |

#### a. Management Fees

The Fund pays an investment management fee to Advisory Services based on the average daily net assets of the Fund as follows:

| Annualized Fee Rate | Net Assets |
|---|---|
| 0.750% | Up to and including $200 million |
| 0.635% | Over $200 million, up to and including $700 million |
| 0.600% | Over $700 million, up to and including $1.2 billion |
| 0.575% | Over $1.2 billion, up to and including $1.3 billion |
| 0.475% | In excess of $1.3 billion |

#### b. Administrative Fees

Under an agreement with Advisory Services, FT Services provides administrative services to the Fund. The fee is paid by Advisory Services based on the Fund's average daily net assets, and is not an additional expense of the Fund.

#### c. Distribution Fees

The Board has adopted distribution plans for Class 2 and Class 4 shares pursuant to Rule 12b-1 under the 1940 Act. Under the Fund's compensation distribution plans, the Fund pays Distributors for costs incurred in connection with the servicing, sale and distribution of the Fund's shares up to 0.35% per year of its average daily net assets of each class. The Board has agreed to limit the current rate to 0.25% per year for Class 2. The plan year, for purposes of monitoring compliance with the maximum annual plan rates, is February 1 through January 31.

#### d. Transfer Agent Fees

Investor Services, under terms of an agreement, performs shareholder servicing for the Fund and is not paid by the Fund for the services.

#### e. Investments in Affiliated Management Investment Companies

The Fund invests in an affiliated management investment company for purposes other than exercising a controlling influence over the management or policies. Management fees paid by the Fund are waived on assets invested in the affiliated management investment company, as noted in the Statement of Operations, in an amount not to exceed the management and administrative fees paid directly or indirectly by each affiliate. Prior to January 1, 2014, the waiver was accounted for as a reduction to management fees.

## Franklin Small Cap Value VIP Fund (continued)

### 3. Transactions With Affiliates (continued)

**e. Investments in Affiliated Management Investment Companies** *(continued)*

| | Number of Shares Held at Beginning of Year | Gross Additions | Gross Reductions | Number of Shares Held at End of Year | Value at End of Year | Investment Income | Realized Gain (Loss) | % of Affiliated Fund Shares Outstanding Held at End of Year |
|---|---|---|---|---|---|---|---|---|
| **Non-Controlled Affiliates** | | | | | | | | |
| Institutional Fiduciary Trust Money Market Portfolio | 43,920,522 | 326,265,559 | (266,828,463) | 103,357,618 | $103,357,618 | $ — | $ — | 0.53% |

**f. Interfund Transactions**

The Fund engaged in purchases and sales of investments with funds or other accounts that have a common investment manager (or affiliated investment managers), directors, trustees, or officers. These transactions complied with Rule 17a-7 under the 1940 Act. During the year ended December 31, 2015, the purchase and sale transactions aggregated $7,083,143 and $0, respectively.

### 4. Expense Offset Arrangement

The Fund has entered into an arrangement with its custodian whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the Fund's custodian expenses. During the year ended December 31, 2015, the custodian fees were reduced as noted in the Statement of Operations.

### 5. Income Taxes

The tax character of distributions paid during the years ended December 31, 2015 and 2014, was as follows:

| | 2015 | 2014 |
|---|---|---|
| Distributions paid from: | | |
| Ordinary income | $ 11,870,655 | $ 16,187,412 |
| Long term capital gain | 202,263,893 | 113,287,896 |
| | $214,134,548 | $129,475,308 |

At December 31, 2015, the cost of investments, net unrealized appreciation (depreciation), undistributed ordinary income and undistributed long term capital gains for income tax purposes were as follows:

| | |
|---|---|
| Cost of investments | $1,053,781,552 |
| Unrealized appreciation | $ 301,451,689 |
| Unrealized depreciation | (105,295,511) |
| Net unrealized appreciation (depreciation) | $ 196,156,178 |
| Undistributed ordinary income | $ 11,124,878 |
| Undistributed long term capital gains | 196,638,969 |
| Distributable earnings | $ 207,763,847 |

Differences between income and/or capital gains as determined on a book basis and a tax basis are primarily due to differing treatment of passive foreign investment company shares and wash sales.

**Franklin Small Cap Value VIP Fund** (continued)

### 6. Investment Transactions

Purchases and sales of investments (excluding short term securities) for the year ended December 31, 2015, aggregated $357,243,332 and $590,985,549, respectively.

### 7. Credit Facility

The Fund, together with other U.S. registered and foreign investment funds (collectively, Borrowers), managed by Franklin Templeton Investments, are borrowers in a joint syndicated senior unsecured credit facility totaling $2 billion (Global Credit Facility) which matured on February 12, 2016. This Global Credit Facility provides a source of funds to the Borrowers for temporary and emergency purposes, including the ability to meet future unanticipated or unusually large redemption requests. Effective February 12, 2016, the Borrowers renewed the Global Credit Facility for a one year term, maturing February 10, 2017, for a total of $2 billion.

Under the terms of the Global Credit Facility, the Fund shall, in addition to interest charged on any borrowings made by the Fund and other costs incurred by the Fund, pay its share of fees and expenses incurred in connection with the implementation and maintenance of the Global Credit Facility, based upon its relative share of the aggregate net assets of all of the Borrowers, including an annual commitment fee of 0.07% based upon the unused portion of the Global Credit Facility. Effective February 12, 2016, the annual commitment fee is 0.15%. These fees are reflected in other expenses in the Statement of Operations. During the year ended December 31, 2015, the Fund did not use the Global Credit Facility.

### 8. Fair Value Measurements

The Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's financial instruments and are summarized in the following fair value hierarchy:

- Level 1 – quoted prices in active markets for identical financial instruments
- Level 2 – other significant observable inputs (including quoted prices for similar financial instruments, interest rates, prepayment speed, credit risk, etc.)
- Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of financial instruments)

The input levels are not necessarily an indication of the risk or liquidity associated with financial instruments at that level.

For movements between the levels within the fair value hierarchy, the Fund has adopted a policy of recognizing the transfers as of the date of the underlying event which caused the movement.

A summary of inputs used as of December 31, 2015, in valuing the Fund's assets carried at fair value, is as follows:

| | Level 1 | Level 2 | Level 3 | Total |
|---|---|---|---|---|
| **Assets:** | | | | |
| Investments in Securities: | | | | |
| Equity Investments[a] | $1,134,737,447 | $ — | $ — | $1,134,737,447 |
| Corporate Bonds | — | 6,983,200 | — | 6,983,200 |
| Short Term Investments | 103,357,618 | 4,859,465 | — | 108,217,083 |
| Total Investments in Securities | $1,238,095,065 | $11,842,665 | $ — | $1,249,937,730 |

[a]For detailed categories, see the accompanying Statement of Investments.

**Franklin Small Cap Value VIP Fund** (continued)

### 9. Subsequent Events

The Fund has evaluated subsequent events through the issuance of the financial statements and determined that no events have occurred that require disclosure other than those already disclosed in the financial statements.

# Report of Independent Registered Public Accounting Firm

## Franklin Small Cap Value VIP Fund

### To the Board of Trustees and Shareholders of Franklin Templeton Variable Insurance Products Trust

In our opinion, the accompanying statement of assets and liabilities, including the statement of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Franklin Small Cap Value VIP Fund (the "Fund") at December 31, 2015, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit, which included confirmation of securities at December 31, 2015 by correspondence with the custodian, transfer agent and brokers, provides a reasonable basis for our opinion.

PricewaterhouseCoopers LLP

San Francisco, California

# Tax Information (unaudited)

### Franklin Small Cap Value VIP Fund

Under Section 852(b)(3)(C) of the Internal Revenue Code (Code), the Fund hereby reports the maximum amount allowable but no less than $202,263,893 as a long term capital gain dividend for the fiscal year ended December 31, 2015.

Under Section 854(b)(1)(A) of the Code, the Fund hereby reports 100% of the ordinary income dividends as income qualifying for the dividends received deduction for the fiscal year ended December 31, 2015.

# Index Descriptions

The indexes are unmanaged and include reinvestment of any income or distributions.

For Russell Indexes: Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.

See www.franklintempletondatasources.com for additional data provider information.

**Barclays 1-3 Month U.S. Treasury Bill Index** includes all publicly issued zero-coupon U.S. Treasury bills that have a remaining maturity between one month and three months and are investment-grade rated, U.S. dollar denominated, fixed rate and nonconvertible.

**Barclays U.S. Aggregate Bond Index** is a market capitalization-weighted index representing the U.S. investment-grade, fixed-rate, taxable bond market with index components for government and corporate, mortgage pass-through and asset-backed securities. All issues included are SEC registered, taxable, dollar denominated and nonconvertible, must have at least one year to final maturity and must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, Standard & Poor's and Fitch, respectively.

**Barclays U.S. Government Index: Intermediate Component** is the intermediate component of the Barclays U.S. Government Index, which includes public obligations of the U.S. Treasury with at least one year to final maturity and publicly issued debt of U.S. government agencies, quasi-federal corporations, and corporate or foreign debt guaranteed by the U.S. government.

**Bloomberg Commodity Index** comprises exchange-traded futures on physical commodities, which are weighted to account for economic significance and market liquidity.

**Citigroup World Government Bond Index** is a market capitalization-weighted index consisting of investment-grade world government bond markets.

**Consumer Price Index (CPI)** is a commonly used measure of the inflation rate.

**Credit Suisse (CS) High Yield Index** is designed to mirror the investable universe of the U.S. dollar-denominated high yield debt market.

**FTSE® EPRA®/NAREIT® Developed Index** is a free float-adjusted index designed to measure the performance of publicly traded real estate securities in the North American, European and Asian real estate markets.

**J.P. Morgan (JPM) Global Government Bond Index (GGBI)** tracks total returns for liquid, fixed-rate, domestic government bonds with maturities greater than one year issued by developed countries globally.

**Lipper Multi-Sector Income Funds Classification Average** is calculated by averaging the total returns of all funds within the Lipper Multi-Sector Income Funds classification in the Lipper Open-End underlying funds universe. Lipper Multi-Sector Income Funds are defined as funds that seek current income by allocating assets among different fixed income securities sectors (not primarily in one sector except for defensive purposes), including U.S. and foreign governments, with a significant portion rated below investment grade. For the 12-month period ended 12/31/15, there were 286 funds in this category. Lipper calculations do not include contract fees, expenses or sales charges, and may have been different if such charges had been considered.

**Lipper VIP Equity Income Funds Classification Average** is an equally weighted average calculation of performance figures for all funds within the Lipper Equity Income Funds classification in the Lipper VIP underlying funds universe. Lipper Equity Income Funds seek relatively high current income and growth of income through investing 60% or more of their portfolios in equities. For the 12-month period ended 12/31/15, there were 71 funds in this category. Lipper calculations do not include contract fees, expenses or sales charges, and may have been different if such charges had been considered.

**Lipper VIP General U.S. Government Funds Classification Average** is an equally weighted average calculation of performance figures for all funds within the Lipper General U.S. Government Funds classification in the Lipper VIP underlying funds universe. Lipper General U.S. Government Funds invest primarily in U.S. government and agency issues. For the 12-month period ended 12/31/15, there were 55 funds in this category. Lipper calculations do not include contract fees, expenses or sales charges, and may have been different if such charges had been considered.

**Lipper VIP High Yield Funds Classification Average** is an equally weighted average calculation of performance figures for all funds within the Lipper High Yield Funds Classification in the Lipper VIP underlying funds universe. Lipper High Yield Funds aim at high (relative) current yield from fixed income securities, have no quality or maturity restrictions, and tend to invest in lower grade debt issues. For the 12-month period ended 12/31/15, there were 111 funds in this category. Lipper calculations do not include contract fees, expenses or sales charges, and may have been different if such charges had been considered.

**MSCI All Country World Index (ACWI)** is a free float-adjusted, market capitalization-weighted index designed to measure equity market performance in global developed and emerging markets.

**MSCI Emerging Markets (EM) Index** is a free float-adjusted, market capitalization-weighted index designed to measure equity market performance in global emerging markets.

**MSCI Europe, Australasia, Far East (EAFE) Index** is a free float-adjusted, market capitalization-weighted index designed to measure equity market performance in global developed markets excluding the U.S. and Canada.

**MSCI World Index** is a free float-adjusted, market capitalization-weighted index designed to measure equity market performance in global developed markets.

**Russell 1000® Growth Index** is market capitalization weighted and measures performance of those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values.

**Russell 1000® Index** is market capitalization weighted and measures performance of the largest companies in the Russell 3000® Index, which represents the majority of the U.S. market's total capitalization.

**Russell 2500™ Index** is market capitalization weighted and measures performance of the smallest companies in the Russell 3000® Index, which represent a modest amount of the Russell 3000® Index's total market capitalization.

**Russell 2500 ™ Value Index** is market capitalization weighted and measures performance of those Russell 2500 ™ Index companies with lower price-to-book ratios and lower forecasted growth values.

**Russell 3000® Growth Index** is market capitalization weighted and measures performance of those Russell 3000® Index companies with higher price-to-book ratios and higher forecasted growth values.

**Russell 3000® Index** is market capitalization weighted and measures performance of the largest U.S. companies based on total market capitalization and represents the majority of the investable U.S. equity market.

**Russell Midcap® Growth Index** is market capitalization weighted and measures performance of those Russell Midcap® Index companies with higher price-to-book ratios and higher forecasted growth values.

**Russell Midcap® Index** is market capitalization weighted and measures performance of the smallest companies in the Russell 1000® Index, which represent a modest amount of the Russell 1000® Index's total market capitalization.

**Standard & Poor's® 500 Index (S&P 500®)** is a market capitalization-weighted index of 500 stocks designed to measure total U.S. equity market performance.

**Standard & Poor's®/International Finance Corporation Investable (S&P/IFCI) Composite Index** is a free float-adjusted, market capitalization-weighted index designed to measure equity performance in global emerging markets.

# Board Members and Officers

The name, year of birth and address of the officers and board members, as well as their affiliations, positions held with the Trust, principal occupation during at least the past five years and number of portfolios overseen in the Franklin Templeton Investments fund complex, are shown below. Generally, each board member serves until that person's successor is elected and qualified.

## Independent Board Members

| Name, Year of Birth and Address | Position | Length of Time Served | Number of Portfolios in Fund Complex Overseen by Board Member* | Other Directorships Held During at Least the Past 5 Years |
|---|---|---|---|---|
| **Harris J. Ashton (1932)**<br>One Franklin Parkway<br>San Mateo, CA 94403-1906 | Trustee | Since 1988 | 147 | Bar-S Foods (meat packing company) (1981-2010). |

*We base the number of portfolios on each separate series of the U.S. registered investment companies within the Franklin Templeton Investments fund complex. These portfolios have a common investment manager or affiliated investment managers.

**Gregory E. Johnson is considered to be an interested person of the Fund under the federal securities laws due to his position as an officer and director of Franklin Resources, Inc. (Resources), which is the parent company of the Fund's investment manager and distributor. Rupert H. Johnson, Jr. is considered to be an interested person of the Fund under the federal securities laws due to his position as officer and director and major shareholder of Resources.

Note 1: Rupert H. Johnson, Jr. is the uncle of Gregory E. Johnson.

Note 2: Officer information is current as of the date of this report. It is possible that after this date, information about officers may change.

Note 3: Effective April 30, 2015, Sam Ginn ceased to be a trustee of the Trust.

**The Sarbanes-Oxley Act of 2002 and Rules adopted by the Securities and Exchange Commission require the Fund to disclose whether the Fund's Audit Committee includes at least one member who is an audit committee financial expert within the meaning of such Act and Rules. The Fund's Board has determined that there is at least one such financial expert on the Audit Committee and has designated John B. Wilson as its audit committee financial expert. The Board believes that Mr. Wilson qualifies as such an expert in view of his extensive business background and experience, including service as chief financial officer of Staples, Inc. from 1992 to 1996. Mr. Wilson has been a Member and Chairman of the Fund's Audit Committee since 2007. As a result of such background and experience, the Board believes that Mr. Wilson has acquired an understanding of generally accepted accounting principles and financial statements, the general application of such principles in connection with the accounting estimates, accruals and reserves, and analyzing and evaluating financial statements that present a breadth and level of complexity of accounting issues generally comparable to those of the Fund, as well as an understanding of internal controls and procedures for financial reporting and an understanding of audit committee functions. Mr. Wilson is an independent Board member as that term is defined under the relevant Securities and Exchange Commission Rules and Releases.**

**The Statement of Additional Information (SAI) includes additional information about the board members and is available, without charge, upon request. Shareholders may call (800) 321-8563 or their insurance companies to request the SAI.**

# Shareholder Information

### Proxy Voting Policies and Procedures

The Trust's investment manager has established Proxy Voting Policies and Procedures (Policies) that the Trust uses to determine how to vote proxies relating to portfolio securities. Shareholders may view the Trust's complete Policies online at franklintempleton.com. Alternatively, shareholders may request copies of the Policies free of charge by calling the Proxy Group collect at (954) 527-7678 or by sending a written request to: Franklin Templeton Companies, LLC, 300 S.E. 2nd Street, Fort Lauderdale, FL 33301, Attention: Proxy Group. Copies of the Trust's proxy voting records are also made available online at franklintempleton.com and posted on the U.S. Securities and Exchange Commission's website at sec.gov and reflect the most recent 12-month period ended June 30.

### Quarterly Statement of Investments

The Trust files a complete statement of investments with the U.S. Securities and Exchange Commission for the first and third quarters for each fiscal year on Form N-Q. Shareholders may view the filed Form N-Q by visiting the Commission's website at sec.gov. The filed form may also be viewed and copied at the Commission's Public Reference Room in Washington, DC. Information regarding the operations of the Public Reference Room may be obtained by calling (800) SEC-0330.

**Not FDIC Insured | May Lose Value | No Bank Guarantee**

# Important Notes to Performance Information

Performance data is historical and cannot predict or guarantee future results. Principal value and investment return will fluctuate with market conditions, and you may have a gain or loss when you withdraw your money. Inception dates of the funds may have preceded the effective dates of the subaccounts, contracts or their availability in all states.

When reviewing the index comparisons, please keep in mind that indexes have a number of inherent performance differentials over the funds. First, unlike the funds, which must hold a minimum amount of cash to maintain liquidity, indexes do not have a cash component. Second, the funds are actively managed and, thus, are subject to management fees to cover salaries of securities analysts or portfolio managers in addition to other expenses. Indexes are unmanaged and do not include any commissions or other expenses typically associated with investing in securities. Third, indexes often contain a different mix of securities than the fund to which they are compared. Additionally, please remember that indexes are simply a measure of performance and cannot be invested in directly.

**SUPPLEMENT DATED FEBRUARY 8, 2016**
**TO THE STATEMENT OF ADDITIONAL INFORMATION DATED MAY 1, 2015**
**OF**
**FRANKLIN TEMPLETON VARIABLE INSURANCE PRODUCTS TRUST**

The statement of additional information (SAI) is amended as follows:

The section under the heading "**Dealer Compensation**" beginning on page 99 is replaced with the following:

In addition to the payments above, Distributors and/or its affiliates may make the following payments out of its own assets to certain dealers who sell shares of Franklin Templeton funds, or participate in the offering of variable insurance products that invest directly or indirectly in the Trust (VIP Qualifying Dealers):

*Marketing support payments.* Distributors may make payments to VIP Qualifying Dealers out of its own resources. A VIP Qualifying Dealer's marketing support services may include business planning assistance, marketing and advertising, training and ongoing education and support for dealer personnel about the Franklin Templeton funds (including the Trust) and financial planning needs of shareholders of the Franklin Templeton funds or contract owners that allocate contract value indirectly to one or more Franklin Templeton funds, placement on the VIP Qualifying Dealer's list of offered funds, access to sales meetings, sales representatives and management representatives of the dealer, and contract owner assistance in allocating contract value directly or indirectly to the Trust. Distributors compensates VIP Qualifying Dealers differently depending upon, among other factors, whether the VIP Qualifying Dealer is directly selling Franklin Templeton funds, or participating in the offering of variable insurance products that invest directly or indirectly in the Trust, sales and asset levels, redemption rates and the level and/or type of marketing and educational activities provided by the VIP Qualifying Dealer. Such compensation may include financial assistance to such dealers that enable Distributors to develop, manage or participate in and/or present at conferences or seminars, sales or training programs for invited registered representatives and other employees, client and investor events, and other dealer-sponsored events. These payments may vary depending upon the nature of the event. Distributors will, on an annual basis, determine whether to continue such payments. Currently, Distributors does not make marketing support payments in connection with the Trust except under limited circumstances for certain Funds of the Trust offered through a special product. Marketing support payments will not exceed 0.20% of the relevant Fund's or Funds' average daily net assets attributable to an insurance company, on an annual basis.

*Other payments.* From time to time, Distributors, at its expense, may provide additional compensation to VIP Qualifying Dealers which sell or arrange for the direct or indirect sale of shares of Franklin Templeton funds, including the Trust. Such compensation may include financial assistance to VIP Qualifying Dealers that enable Distributors to participate in and/or present at conferences or seminars, sales or training programs for invited registered representatives and other employees, client and investor events and other dealer-sponsored events. These payments may vary depending upon the nature of the event.

Distributors routinely sponsors due diligence meetings for registered representatives during which they receive updates on various Franklin Templeton funds and are afforded the

opportunity to speak with portfolio managers. Invitation to these meetings is not conditioned on selling a specific number of shares. Those who have shown an interest in Franklin Templeton funds, however, are more likely to be considered. To the extent permitted by their firm's policies and procedures, registered representatives' expenses in attending these meetings may be covered by Distributors.

Other compensation may be offered to the extent not prohibited by federal or state laws or any self-regulatory agency, such as FINRA. Distributors makes payments for events it deems appropriate, subject to Distributors' guidelines and applicable law. Distributors and/or its affiliates may also reimburse VIP Qualifying Dealers and/or their affiliates for certain costs associated with obtaining voting instructions from contract owners and the solicitation process in connection with Trust-sponsored proxy statements.

You can ask your insurance company and VIP Qualifying Dealer for information about any payments they receive from Distributors and any services provided. Additional disclosure may be included in the insurance contract prospectus.

*Please keep this supplement with your statement of additional information for future reference.*

# Franklin Small-Mid Cap Growth VIP Fund

This annual report for Franklin Small-Mid Cap Growth VIP Fund covers the fiscal year ended December 31, 2015.

## Class 2 Performance Summary as of December 31, 2015

Average annual total return of Class 2 shares* represents the average annual change in value, assuming reinvestment of dividends and capital gains. Average returns smooth out variations in returns, which can be significant; they are not the same as year-by-year results.

| Periods ended 12/31/15 | 1-Year | 5-Year | 10-Year |
|---|---|---|---|
| Average Annual Total Return | -2.66% | +8.80% | +6.87% |

*The Fund has a fee waiver associated with any investment in a Franklin Templeton money fund, contractually guaranteed through at least its current fiscal year-end. Fund investment results reflect the fee waiver, to the extent applicable; without this reduction, the results would have been lower.

*Performance reflects the Fund's Class 2 operating expenses, but does* **not** *include any contract fees, expenses or sales charges. If they had been included, performance would be lower. These charges and deductions, particularly for variable life policies, can have a significant effect on contract values and insurance benefits. See the contract prospectus for a complete description of these expenses, including sales charges.*

*Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown.*

### Total Return Index Comparison for a Hypothetical $10,000 Investment (1/1/06–12/31/15)

The graph below shows the change in value of a hypothetical $10,000 investment in the Fund over the indicated period and includes reinvestment of any income or distributions. The Fund's performance* is compared to the performance of the Russell Midcap® Growth Index and the Standard & Poor's® 500 Index (S&P 500®). One cannot invest directly in an index, and an index is not representative of the Fund's portfolio. **Please see Important Notes to Performance Information preceding the Fund Summaries.**

**Source: Morningstar. Please see Index Descriptions following the Fund Summaries.

## Fund Goal and Main Investments

The Fund seeks long-term capital growth. Under normal market conditions, the Fund invests at least 80% of its net assets in equity securities of small-capitalization and mid-capitalization companies. For this Fund, small cap companies are those within the market capitalization range of companies in the Russell 2500™ Index at the time of purchase, and midcap companies are those within the market capitalization range of companies in the Russell Midcap® Index at the time of purchase.[1]

## Fund Risks

All investments involve risks, including possible loss of principal. Growth stock prices reflect projections of future earnings or revenues, and can, therefore, fall dramatically if the company fails to meet those projections. Smaller, midsized and relatively new or unseasoned companies can be particularly sensitive to changing economic conditions, and their prospects for growth are less certain than those of larger, more established companies. Historically, these securities have experienced more price volatility than larger company stocks, especially over the short term. To the extent the Fund focuses on particular countries, regions, industries, sectors or types of investment from time to time, it may be subject to greater risks of adverse developments in such areas of focus than a fund that invests in a wider variety of countries, regions, industries, sectors or investments. From time to time, the trading market for a particular security or type of security in which the Fund invests may become less liquid or even illiquid. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results. The Fund's prospectus also includes a description of the main investment risks.

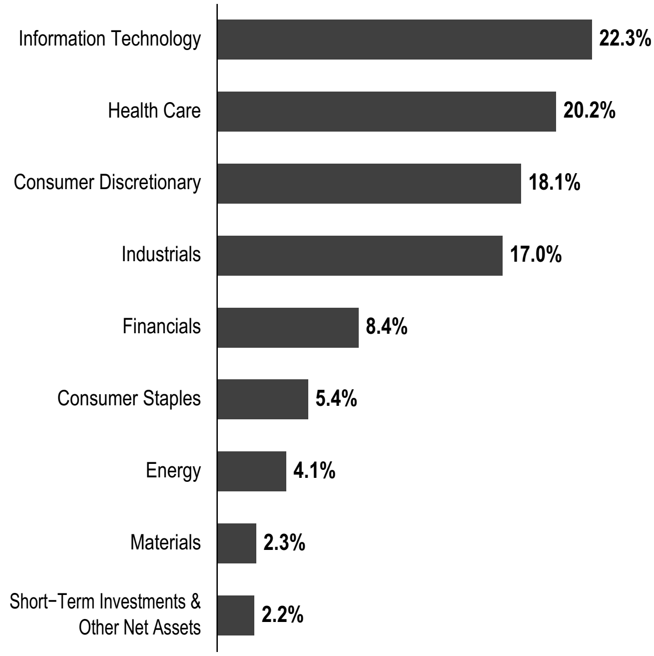
## Performance Overview

You can find the Fund's one-year total return in the Performance Summary. In comparison, the Fund's narrow benchmark, the Russell Midcap® Growth Index, had a -0.20% total return, and its broad benchmark, the S&P 500, produced a +1.38% total return for the same period.[2]

## Economic and Market Overview

The U.S. economy grew moderately during the 12 months under review amid healthy consumer spending. After starting

**Portfolio Breakdown**
Based on Total Net Assets as of 12/31/15



2015 with modest growth, the economy strengthened in the second quarter but moderated in the third and fourth quarters as exports slowed and state and local governments reduced their spending. Manufacturing activities expanded for most of the period but contracted toward period-end. Non-manufacturing activities, however, expanded throughout the 12-month period, contributing to new jobs and helping drive down the unemployment rate to 5.0% from October through period-end, the lowest level in more than seven years.[3] The housing market improved at period-end as existing and new home sales increased and home prices rose despite slightly higher mortgage rates. Retail sales grew modestly, led by automobile and auto component sales. Annual inflation, as measured by the Consumer Price Index, remained subdued largely due to low energy prices.

After maintaining its target interest rate at a range of 0%–0.25% for seven years to support the U.S. economy's recovery, the Federal Reserve (Fed) raised its target range for the federal funds rate to 0.25%–0.50% at its December meeting. Policymakers cited the labor market's considerable improvement and were reasonably confident that inflation would move back to

1. Please see Index Descriptions following the Fund Summaries.

3. Source: Bureau of Labor Statistics.

the Fed's 2.0% medium-term objective. The Fed indicated that its process of normalizing interest rates would be data dependent and would likely be gradual. Furthermore, the Fed raised its 2016 U.S. economic growth forecast and lowered its unemployment rate projection.

U.S. stock markets experienced sell-offs at times during the year, resulting from investor concerns about the timing of the Fed's interest rate increases, slower global economic growth, geopolitical tensions in certain regions and a plunge in crude oil prices. Investors generally remained confident, however, as the Fed maintained an accommodative monetary policy stance despite the rate increase, the eurozone economy improved and China implemented more stimulus measures to support its economy. Despite periods of volatility, the broad U.S. stock market, as measured by the S&P 500, generated a modest positive total return for 2015. The energy and materials sectors were among the worst performers, while consumer discretionary, health care, consumer staples and information technology outperformed.

## Investment Strategy

We use fundamental, bottom-up research to seek companies meeting our criteria of growth potential, quality and valuation. In seeking sustainable growth characteristics, we look for companies we believe can produce sustainable earnings and cash flow growth, evaluating the long-term market opportunity and competitive structure of an industry to target leaders and emerging leaders. We define quality companies as those with strong and improving competitive positions in attractive markets. We also believe important attributes of quality are experienced and talented management teams as well as financial strength reflected in the capital structure, gross and operating margins, free cash flow generation and returns on capital employed. Our valuation analysis includes a range of potential outcomes based on an assessment of multiple scenarios. In assessing value, we consider whether security prices fully reflect the balance of the sustainable growth opportunities relative to business and financial risks.

## Manager's Discussion

During the period under review, several sectors represented in the Fund's portfolio delivered positive returns and contributed to absolute performance. Relative to the Russell Midcap Growth® Index, key contributors included stock selection in materials and information technology (IT).

### Top 10 Holdings
12/31/15

| **Company** *Sector/Industry* | **% of Total Net Assets** |
|---|---|
| NXP Semiconductors NV (Netherlands) *Information Technology* | 2.4% |
| Roper Technologies Inc. *Industrials* | 1.9% |
| Constellation Brands Inc., A *Consumer Staples* | 1.8% |
| Intercontinental Exchange Inc. *Financials* | 1.8% |
| Electronic Arts Inc. *Information Technology* | 1.7% |
| AMETEK Inc. *Industrials* | 1.7% |
| Monster Beverage Corp. *Consumer Staples* | 1.7% |
| Signature Bank *Financials* | 1.7% |
| L Brands Inc. *Consumer Discretionary* | 1.5% |
| Towers Watson & Co., A *Industrials* | 1.5% |

The dollar value, number of shares or principal amount, and names of all portfolio holdings are listed in the Fund's Statement of Investments.

In the materials sector, our holding in specialty materials and chemicals company Cytec Industries contributed to relative returns.[4] Cytec shares surged in July due to an announced acquisition by Belgium-based Solvay at a premium to Cytec's share price. Solvay completed the acquisition in December.

Within IT, video game company Electronic Arts enjoyed some of the largest gains. Under new management, the company experienced improved game quality and expanded margins. It also benefited from excitement about the release of its Star Wars game, which sought to capitalize on the new Star Wars movie.

Other notable contributors included our investments in technology-based specialty pharmaceutical firm Impax Laboratories,[5] clinical-stage specialty biopharmaceutical company Revance Therapeutics,[5] and engineered products and solutions provider Roper Technologies. Impax resolved its manufacturing issues, successfully launched its new Parkinson's disease drug Rytarry and quickly integrated a recent acquisition. Revance announced positive phase II data comparing its injectable botulinum toxin to a placebo and

4. Not held at period-end.
5. Not part of the index.

Allergan's Botox, giving investors a reason to believe its product will have regulatory and commercial success. Roper continued execution on its stated merger and acquisition strategy while generating steady organic revenue and earnings growth, bolstering share performance for the year.

In contrast, key detractors from the Fund's relative performance included stock selection in the consumer discretionary, consumer staples and industrials sectors.

Our position in Dick's Sporting Goods hurt relative performance in the consumer discretionary sector. The sporting goods retailer reported disappointing third-quarter earnings results and lowered its fourth-quarter outlook as in-store traffic slowed and sales of cold-weather apparel and gear were negatively affected by warmer fall temperatures. The company indicated that lower sales levels will impact near-term profit margins and necessitate more promotional selling.

Within consumer staples, our holding in fresh and refrigerated pet food manufacturer and distributor Freshpet was a major dectractor.[4,5] Management's underappreciation of the slower-than-forecast growth in company-owned refrigerated display units derailed our original thesis regarding the sustainability of a robust, long-term growth rate.

In the industrials sector, our positions in ultra-low-cost carrier Spirit Airlines,[4] geospatial information product and service provider DigitalGlobe[5] and global freight railroad operator Genesee & Wyoming hindered performance. Spirit Airlines shares declined when the company's fares came under pressure as American Airlines and Southwest Airlines added capacity in some of their core markets. The commercial side of DigitalGlobe's business has been struggling recently, while the defense side has been experiencing stable growth. The commercial side has been trying to expand into the most troubled markets and sectors, such as Russia, energy and agriculture. We remained confident that the company's new, higher resolution capabilities can drive acceleration in growth later in 2016. Low natural gas and iron ore prices affected Genesee & Wyoming's shipment volume.

Thank you for your participation in Franklin Small-Mid Cap Growth VIP Fund. We look forward to serving your future investment needs.

*The foregoing information reflects our analysis, opinions and portfolio holdings as of December 31, 2015, the end of the reporting period. The way we implement our main investment strategies and the resulting portfolio holdings may change depending on factors such as market and economic conditions. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. Although historical performance is no guarantee of future results, these insights may help you understand our investment management philosophy.*

# Class 2 Fund Expenses

As an investor in a variable insurance contract (Contract) that indirectly provides for investment in an underlying mutual fund, you can incur transaction and/or ongoing expenses at both the Fund level and the Contract level.

- Transaction expenses can include sales charges (loads) on purchases, redemption fees, surrender fees, transfer fees and premium taxes.
- Ongoing expenses can include management fees, distribution and service (12b-1) fees, contract fees, annual maintenance fees, mortality and expense risk fees and other fees and expenses. All mutual funds and Contracts have some types of ongoing expenses.

*The expenses shown in the table are meant to highlight ongoing expenses at the Fund level only and do not include ongoing expenses at the Contract level, or transaction expenses at either the Fund or Contract level. While the Fund does not have transaction expenses, if the transaction and ongoing expenses at the Contract level were included, the expenses shown below would be higher. You should consult your Contract prospectus or disclosure document for more information.*

The table shows Fund-level ongoing expenses and can help you understand these expenses and compare them with those of other mutual funds offered through the Contract. The table assumes a $1,000 investment held for the six months indicated. Please refer to the Fund prospectus for additional information on operating expenses.

## Actual Fund Expenses

The first line (Actual) of the table provides actual account values and expenses. The “Ending Account Value” is derived from the Fund’s actual return, which includes the effect of ongoing Fund expenses, but does not include the effect of ongoing Contract expenses.

You can estimate the Fund-level expenses you incurred during the period by following these steps. *Of course, your account value and expenses will differ from those in this illustration:*

1. Divide your account value by $1,000.
   *If an account had an $8,600 value, then $8,600 ÷ $1,000 = 8.6.*
2. Multiply the result by the number under the heading “Fund-Level Expenses Incurred During Period.”
   *If Fund-Level Expenses Incurred During Period were $7.50, then 8.6 × $7.50 = $64.50.*

In this illustration, the estimated expenses incurred this period at the Fund level are $64.50.

## Hypothetical Example for Comparison with Other Mutual Funds

Information in the second line (Hypothetical) of the table can help you compare ongoing expenses of the Fund with those of other mutual funds offered through the Contract. This information may not be used to estimate the actual ending account balance or expenses you incurred during the period. The hypothetical “Ending Account Value” is based on the Fund’s actual expense ratio and an assumed 5% annual rate of return before expenses, which does not represent the Fund’s actual return. The figure under the heading “Fund-Level Expenses Incurred During Period” shows the hypothetical expenses your account would have incurred under this scenario. You can compare this figure with the 5% hypothetical examples that appear in shareholder reports of other funds offered through a Contract.

| Class 2 | Beginning Account Value 7/1/15 | Ending Account Value 12/31/15 | Fund-Level Expenses Incurred During Period* 7/1/15–12/31/15 |
|---|---|---|---|
| Actual | $1,000 | $ 907.20 | $5.14 |
| Hypothetical (5% return before expenses) | $1,000 | $1,019.81 | $5.45 |

*Expenses are calculated using the most recent six-month annualized expense ratio, net of expense waivers, for the Fund’s Class 2 shares (1.07%), which does not include any ongoing expenses of the Contract for which the Fund is an investment option, multiplied by the average account value over the period, multiplied by 184/365 to reflect the one-half year period.

# Financial Highlights

## Franklin Small-Mid Cap Growth VIP Fund

| | Year Ended December 31, | | | | |

# Notes to Financial Statements

## Franklin Small-Mid Cap Growth VIP Fund

### 1. Organization and Significant Accounting Policies

Franklin Templeton Variable Insurance Products Trust (Trust) is registered under the Investment Company Act of 1940 (1940 Act) as an open-end management investment company, consisting of nineteen separate funds and applies the specialized accounting and reporting guidance in U.S. Generally Accepted Accounting Principles (U.S. GAAP). Franklin Small-Mid Cap Growth VIP Fund (Fund) is included in this report. The financial statements of the remaining funds in the Trust are presented separately. Shares of the Fund are generally sold only to insurance company separate accounts to fund the benefits of variable life insurance policies or variable annuity contracts. At December 31, 2015, 40.40% of the Fund's shares were held through one insurance company. Investment activities of these insurance company separate accounts could have a material impact on the Fund. The Fund offers three classes of shares: Class 1, Class 2 and Class 4. Each class of shares differs by its distribution fees, voting rights on matters affecting a single class and its exchange privilege.

The following summarizes the Fund's significant accounting policies.

**a. Financial Instrument Valuation**

The Fund's investments in financial instruments are carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. The Fund calculates the net asset value (NAV) per share as of 4 p.m. Eastern time each day the New York Stock Exchange (NYSE) is open for trading. Under compliance policies and procedures approved by the Trust's Board of Trustees (the Board), the Fund's administrator has responsibility for oversight of valuation, including leading the cross-functional Valuation and Liquidity Oversight Committee (VLOC). The VLOC provides administration and oversight of the Fund's valuation policies and procedures, which are approved annually by the Board. Among other things, these procedures allow the Fund to utilize independent pricing services, quotations from securities and financial instrument dealers, and other market sources to determine fair value.

Equity securities listed on an exchange or on the NASDAQ National Market System are valued at the last quoted sale price or the official closing price of the day, respectively. Foreign equity securities are valued as of the close of trading on the foreign stock exchange on which the security is primarily traded or as of 4 p.m. Eastern time whichever is earlier. The value is then converted into its U.S. dollar equivalent at the foreign exchange rate in effect at 4 p.m. Eastern time on the day that the value of the security is determined. Over-the-counter (OTC) securities are valued within the range of the most recent quoted bid and ask prices. Securities that trade in multiple markets or on multiple exchanges are valued according to the broadest and most representative market. Certain equity securities are valued based upon fundamental characteristics or relationships to similar securities.

Investments in open-end mutual funds are valued at the closing NAV.

The Fund has procedures to determine the fair value of financial instruments for which market prices are not reliable or readily available. Under these procedures, the VLOC convenes on a regular basis to review such financial instruments and considers a number of factors, including significant unobservable valuation inputs, when arriving at fair value. The VLOC primarily employs a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, book values, and other relevant information for the investment to determine the fair value of the investment. An income-based valuation approach may also be used in which the anticipated future cash flows of the investment are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Due to the inherent uncertainty of valuations of such investments, the fair values may differ significantly from the values that would have been used had an active market existed. The VLOC employs various methods for calibrating these valuation approaches including a regular review of key inputs and assumptions, transactional back-testing or disposition analysis, and reviews of any related market activity.

Trading in securities on foreign securities stock exchanges and OTC markets may be completed before 4 p.m. Eastern time. In addition, trading in certain foreign markets may not take place on every NYSE business day. Occasionally, events occur between the time at which trading in a foreign security is completed and the close of the NYSE that might call into question the reliability of the value of a portfolio security held by the Fund. As a result, differences may arise between the value of the Fund's portfolio securities as determined at the foreign market close and the latest indications of value at the close of

## Franklin Small-Mid Cap Growth VIP Fund (continued)

the NYSE. In order to minimize the potential for these differences, the VLOC monitors price movements following the close of trading in foreign stock markets through a series of country specific market proxies (such as baskets of American Depositary Receipts, futures contracts and exchange traded funds). These price movements are measured against established trigger thresholds for each specific market proxy to assist in determining if an event has occurred that may call into question the reliability of the values of the foreign securities held by the Fund. If such an event occurs, the securities may be valued using fair value procedures, which may include the use of independent pricing services.

When the last day of the reporting period is a non-business day, certain foreign markets may be open on those days that the NYSE is closed, which could result in differences between the value of the Fund's portfolio securities on the last business day and the last calendar day of the reporting period. Any significant security valuation changes due to an open foreign market are adjusted and reflected by the Fund for financial reporting purposes.

**b. Foreign Currency Translation**

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. The Fund may enter into foreign currency exchange contracts to facilitate transactions denominated in a foreign currency. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Portfolio securities and assets and liabilities denominated in foreign currencies contain risks that those currencies will decline in value relative to the U.S. dollar. Occasionally, events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Board.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments in the Statement of Operations.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

**c. Securities Lending**

The Fund participates in an agency based securities lending program to earn additional income. The Fund receives cash collateral against the loaned securities in an amount equal to at least 102% of the fair value of the loaned securities. Collateral is maintained over the life of the loan in an amount not less than 100% of the fair value of loaned securities, as determined at the close of Fund business each day; any additional collateral required due to changes in security values is delivered to the Fund on the next business day. The collateral is deposited into a joint cash account with other funds and is used to invest in a money market fund managed by Franklin Advisers, Inc., an affiliate of the Fund. The Fund may receive income from the investment of cash collateral, in addition to lending fees and rebates paid by the borrower. Income from securities loaned is reported separately in the Statement of Operations. The Fund bears the market risk with respect to the collateral investment, securities loaned, and the risk that the agent may default on its obligations to the Fund. If the borrower defaults on its obligation to return the securities loaned, the Fund has the right to repurchase the securities in the open market using the collateral received. The securities lending agent has agreed to indemnify the Fund in the event of default by a third party borrower.

Securities lending transactions are accounted for as secured borrowing transactions. The securities out on loan represent the collateral pledged by the Fund, and the cash collateral received for the loaned securities represents the amount borrowed by the Fund. At December 31, 2015, the Fund's secured borrowing transactions were as follows:

| | |
|---|---|
| **Securities lending transactions**[a] | |
| Equity investments[b] | $19,891,250 |

[a]The agreements open at year end can be terminated at any time.

[b]Gross amount of recognized liabilities for securities lending transactions is included in payable upon return of securities loaned in the Statement of Assets and Liabilities.

## Franklin Small-Mid Cap Growth VIP Fund (continued)

### 1. Organization and Significant Accounting Policies (continued)

**d. Income and Deferred Taxes**

It is the Fund's policy to qualify as a regulated investment company under the Internal Revenue Code. The Fund intends to distribute to shareholders substantially all of its taxable income and net realized gains to relieve it from federal income and if applicable, excise taxes. As a result, no provision for U.S. federal income taxes is required.

The Fund may be subject to foreign taxation related to income received, capital gains on the sale of securities and certain foreign currency transactions in the foreign jurisdictions in which it invests. Foreign taxes, if any, are recorded based on the tax regulations and rates that exist in the foreign markets in which the Fund invests. When a capital gain tax is determined to apply, the Fund records an estimated deferred tax liability in an amount that would be payable if the securities were disposed of on the valuation date.

The Fund may recognize an income tax liability related to its uncertain tax positions under U.S. GAAP when the uncertain tax position has a less than 50% probability that it will be sustained upon examination by the tax authorities based on its technical merits. As of December 31, 2015, the Fund has determined that no tax liability is required in its financial statements related to uncertain tax positions for any open tax years (or expected to be taken on future tax returns). Open tax years are those that remain subject to examination and are based on each tax jurisdiction's statute of limitation.

**e. Security Transactions, Investment Income, Expenses and Distributions**

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Estimated expenses are accrued daily. Dividend income is recorded on the ex-dividend date except for certain dividends from foreign securities where the dividend rate is not available. In such cases, the dividend is recorded as soon as the information is received by the Fund.

Distributions to shareholders are recorded on the ex-dividend date and are determined according to income tax regulations (tax basis). Distributable earnings determined on a tax basis may differ from earnings recorded in accordance with U.S. GAAP. These differences may be permanent or temporary. Permanent differences are reclassified among capital accounts to reflect their tax character. These reclassifications have no impact on net assets or the results of operations. Temporary differences are not reclassified, as they may reverse in subsequent periods.

Common expenses incurred by the Trust are allocated among the Funds based on the ratio of net assets of each Fund to the combined net assets of the Trust. Fund specific expenses are charged directly to the fund that incurred the expense.

Realized and unrealized gains and losses and net investment income, not including class specific expenses, are allocated daily to each class of shares based upon the relative proportion of net assets of each class. Differences in per share distributions, by class, are generally due to differences in class specific expenses.

**f. Accounting Estimates**

The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

**g. Guarantees and Indemnifications**

Under the Trust's organizational documents, its officers and trustees are indemnified by the Trust against certain liabilities arising out of the performance of their duties to the Trust. Additionally, in the normal course of business, the Trust, on behalf of the Fund, enters into contracts with service providers that contain general indemnification clauses. The Trust's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Trust that have not yet occurred. Currently, the Trust expects the risk of loss to be remote.

**Franklin Small-Mid Cap Growth VIP Fund** (continued)

## 2. Shares of Beneficial Interest

At December 31, 2015, there were an unlimited number of shares authorized (without par value). Transactions in the Fund's shares were as follows:

| | Year Ended December 31, | | | |
|---|---|---|---|---|
| | 2015 | | 2014 | |
| | Shares | Amount | Shares | Amount |
| **Class 1 Shares:** | | | | |
| Shares sold | 195,710 | $ 4,581,670 | 274,487 | $ 7,229,775 |
| Shares issued in reinvestment of distributions | 1,062,262 | 22,509,343 | 759,699 | 18,164,400 |
| Shares redeemed | (655,587) | (14,610,806) | (487,310) | (12,735,194) |
| Net increase (decrease) | 602,385 | $ 12,480,207 | 546,876 | $ 12,658,981 |
| **Class 2 Shares:** | | | | |
| Shares sold | 1,198,268 | $ 26,202,656 | 897,666 | $ 22,309,519 |
| Shares issued in reinvestment of distributions | 6,905,322 | 135,758,632 | 5,327,162 | 120,447,127 |
| Shares redeemed | (5,776,970) | (120,003,185) | (5,821,755) | (143,225,718) |
| Net increase (decrease) | 2,326,620 | $ 41,958,103 | 403,073 | $ (469,072) |
| **Class 4 Shares:** | | | | |
| Shares sold | 239,982 | $ 5,202,958 | 67,020 | $ 1,726,663 |
| Shares issued in reinvestment of distributions | 202,211 | 4,098,814 | 152,628 | 3,536,394 |
| Shares redeemed | (292,263) | (6,050,381) | (231,062) | (5,725,821) |
| Net increase (decrease) | 149,930 | $ 3,251,391 | (11,414) | $ (462,764) |

## 3. Transactions With Affiliates

Franklin Resources, Inc. is the holding company for various subsidiaries that together are referred to as Franklin Templeton Investments. Certain officers and trustees of the Fund are also officers and/or directors of the following subsidiaries:

| Subsidiary | Affiliation |
|---|---|
| Franklin Advisers, Inc. (Advisers) | Investment manager |
| Franklin Templeton Services, LLC (FT Services) | Administrative manager |
| Franklin Templeton Distributors, Inc. (Distributors) | Principal underwriter |
| Franklin Templeton Investor Services, LLC (Investor Services) | Transfer agent |

## Franklin Small-Mid Cap Growth VIP Fund (continued)

### 3. Transactions With Affiliates (continued)

**a. Management Fees**

The Fund pays an investment management fee to Advisers based on the average daily net assets of the Fund as follows:

| Annualized Fee Rate | Net Assets |
|---|---|
| 0.800% | Up to and including $500 million |
| 0.700% | Over $500 million, up to and including $1 billion |
| 0.650% | Over $1 billion, up to and including $1.5 billion |
| 0.600% | Over $1.5 billion, up to and including $6.5 billion |
| 0.575% | Over $6.5 billion, up to and including $11.5 billion |
| 0.550% | Over $11.5 billion, up to and including $16.5 billion |
| 0.540% | Over $16.5 billion, up to and including $19 billion |
| 0.530% | Over $19 billion, up to and including $21.5 billion |
| 0.520% | In excess of $21.5 billion |

**b. Administrative Fees**

Under an agreement with Advisers, FT Services provides administrative services to the Fund. The fee is paid by Advisers based on the Fund's average daily net assets, and is not an additional expense of the Fund.

**c. Distribution Fees**

The Board has adopted distribution plans for Class 2 and Class 4 shares pursuant to Rule 12b-1 under the 1940 Act. Under the Fund's compensation distribution plans, the Fund pays Distributors for costs incurred in connection with the servicing, sale and distribution of the Fund's shares up to 0.35%, per year of its average daily net assets of each class. The Board has agreed to limit the current rate to 0.25% per year for Class 2. The plan year, for purposes of monitoring compliance with the maximum annual plan rates, is February 1 through January 31.

**d. Transfer Agent Fees**

Investor Services, under terms of an agreement, performs shareholder servicing for the Fund and is not paid by the Fund for the services.

**e. Investments in Affiliated Management Investment Companies**

The Fund invests in an affiliated management investment company for purposes other than exercising a controlling influence over the management or policies. Management fees paid by the Fund are waived on assets invested in the affiliated management investment company, as noted in the Statement of Operations, in an amount not to exceed the management and administrative fees paid directly or indirectly by each affiliate. Prior to January 1, 2014, the waiver was accounted for as a reduction to management fees.

| | Number of Shares Held at Beginning of Year | Gross Additions | Gross Reductions | Number of Shares Held at End of Year | Value at End of Year | Investment Income | Realized Gain (Loss) | % of Affiliated Fund Shares Outstanding Held at End of Year |

## Franklin Small-Mid Cap Growth VIP Fund (continued)

**f. Interfund Transactions**

The Fund engaged in purchases and sales of investments with funds or other accounts that have a common investment manager (or affiliated investment managers), directors, trustees, or officers. These transactions complied with Rule 17a-7 under the 1940 Act. During the year ended December 31, 2015, the purchase and sale transactions aggregated $516,731 and $1,690,052, respectively.

### 4. Expense Offset Arrangement

The Fund has entered into an arrangement with its custodian whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the Fund's custodian expenses. During the year ended December 31, 2015, there were no credits earned.

### 5. Income Taxes

The tax character of distributions paid during the years ended December 31, 2015 and 2014, was as follows:

| | 2015 | 2014 |
|---|---|---|
| Distributions paid from: | | |
| Ordinary income | $ 11,955,020 | $ 16,670,971 |
| Long term capital gain | 150,411,769 | 125,476,950 |
| | $162,366,789 | $142,147,921 |

At December 31, 2015, the cost of investments, net unrealized appreciation (depreciation) and undistributed long term capital gains for income tax purposes were as follows:

| | |
|---|---|
| Cost of investments | $466,000,210 |
| Unrealized appreciation | $169,237,961 |
| Unrealized depreciation | (33,202,879) |
| Net unrealized appreciation (depreciation) | $136,035,082 |
| Distributable earnings – undistributed long term capital gains | $ 62,763,457 |

Differences between income and/or capital gains as determined on a book basis and a tax basis are primarily due to differing treatments of wash sales.

### 6. Investment Transactions

Purchases and sales of investments (excluding short term securities) for the year ended December 31, 2015, aggregated $249,107,439 and $361,218,142, respectively.

### 7. Restricted Securities

The Fund invests in securities that are restricted under the Securities Act of 1933 (1933 Act) or which are subject to legal, contractual, or other agreed upon restrictions on resale. Restricted securities are often purchased in private placement transactions, and cannot be sold without prior registration unless the sale is pursuant to an exemption under the 1933 Act. Disposal of these securities may require greater effort and expense, and prompt sale at an acceptable price may be difficult. The Fund may have registration rights for restricted securities. The issuer generally incurs all registration costs.

## Franklin Small-Mid Cap Growth VIP Fund (continued)

### 7. Restricted Securities (continued)

At December 31, 2015, the Fund held investments in restricted securities, excluding certain securities exempt from registration under the 1933 Act deemed to be liquid, as follows:

| Shares | Issuer | Acquisition Date | Cost | Value |
|---|---|---|---|---|
| 115,528 | DraftKings Inc., pfd., D | 8/07/15 | $ 622,222 | $ 311,110 |
| 284,105 | DraftKings Inc., pfd., D-1 | 8/07/15 | 2,177,781 | 1,088,891 |
| | **Total Restricted Securities** (Value is 0.24% of Net Assets) | | $2,800,003 | $1,400,001 |

### 8. Credit Facility

The Fund, together with other U.S. registered and foreign investment funds (collectively, Borrowers), managed by Franklin Templeton Investments, are borrowers in a joint syndicated senior unsecured credit facility totaling $2 billion (Global Credit Facility) which matured on February 12, 2016. This Global Credit Facility provides a source of funds to the Borrowers for temporary and emergency purposes, including the ability to meet future unanticipated or unusually large redemption requests. Effective February 12, 2016, the Borrowers renewed the Global Credit Facility for a one year term, maturing February 10, 2017, for a total of $2 billion.

Under the terms of the Global Credit Facility, the Fund shall, in addition to interest charged on any borrowings made by the Fund and other costs incurred by the Fund, pay its share of fees and expenses incurred in connection with the implementation and maintenance of the Global Credit Facility, based upon its relative share of the aggregate net assets of all of the Borrowers, including an annual commitment fee of 0.07% based upon the unused portion of the Global Credit Facility. Effective February 12, 2016, the annual commitment fee is 0.15%. These fees are reflected in other expenses in the Statement of Operations. During the year ended December 31, 2015, the Fund did not use the Global Credit Facility.

### 9. Fair Value Measurements

The Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's financial instruments and are summarized in the following fair value hierarchy:

- Level 1 – quoted prices in active markets for identical financial instruments
- Level 2 – other significant observable inputs (including quoted prices for similar financial instruments, interest rates, prepayment speed, credit risk, etc.)
- Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of financial instruments)

The input levels are not necessarily an indication of the risk or liquidity associated with financial instruments at that level.

For movements between the levels within the fair value hierarchy, the Fund has adopted a policy of recognizing the transfers as of the date of the underlying event which caused the movement.

### Franklin Small-Mid Cap Growth VIP Fund (continued)

A summary of inputs used as of December 31, 2015, in valuing the Fund's assets carried at fair value, is as follows:

| | Level 1 | Level 2 | Level 3 | Total |
|---|---|---|---|---|
| **Assets:** | | | | |
| Investments in Securities: | | | | |
| Equity Investments:[a] | | | | |
| Consumer Discretionary | $103,776,170 | $ — | $1,400,001 | $105,176,171 |
| Health Care | 117,218,889 | — | 297,903 | 117,516,792 |
| Other Equity Investments[b] | 346,199,161 | — | — | 346,199,161 |
| Short Term Investments | 33,143,168 | — | — | 33,143,168 |
| Total Investments in Securities | $600,337,388 | $ — | $1,697,904 | $602,035,292 |

[a] Includes common and preferred stocks as well as other equity investments.
[b] For detailed categories, see the accompanying Statement of Investments.

A reconciliation of assets in which Level 3 inputs are used in determining fair value is presented when there are significant Level 3 financial instruments at the end of the year.

### 10. Subsequent Events

The Fund has evaluated subsequent events through the issuance of the financial statements and determined that no events have occurred that require disclosure other than those already disclosed in the financial statements.

# Report of Independent Registered Public Accounting Firm

## Franklin Small-Mid Cap Growth VIP Fund

### To the Board of Trustees and Shareholders of Franklin Templeton Variable Insurance Products Trust

In our opinion, the accompanying statement of assets and liabilities, including the statement of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Franklin Small-Mid Cap Growth VIP Fund (the “Fund”) at December 31, 2015, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as “financial statements”) are the responsibility of the Fund’s management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit, which included confirmation of securities at December 31, 2015 by correspondence with the custodian, transfer agent and brokers, provides a reasonable basis for our opinion.

# Index Descriptions

The indexes are unmanaged and include reinvestment of any income or distributions.

For Russell Indexes: Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.

See www.franklintempletondatasources.com for additional data provider information.

**Barclays 1-3 Month U.S. Treasury Bill Index** includes all publicly issued zero-coupon U.S. Treasury bills that have a remaining maturity between one month and three months and are investment-grade rated, U.S. dollar denominated, fixed rate and nonconvertible.

**Barclays U.S. Aggregate Bond Index** is a market capitalization-weighted index representing the U.S. investment-grade, fixed-rate, taxable bond market with index components for government and corporate, mortgage pass-through and asset-backed securities. All issues included are SEC registered, taxable, dollar denominated and nonconvertible, must have at least one year to final maturity and must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, Standard & Poor's and Fitch, respectively.

**Barclays U.S. Government Index: Intermediate Component** is the intermediate component of the Barclays U.S. Government Index, which includes public obligations of the U.S. Treasury with at least one year to final maturity and publicly issued debt of U.S. government agencies, quasi-federal corporations, and corporate or foreign debt guaranteed by the U.S. government.

**Bloomberg Commodity Index** comprises exchange-traded futures on physical commodities, which are weighted to account for economic significance and market liquidity.

**Citigroup World Government Bond Index** is a market capitalization-weighted index consisting of investment-grade world government bond markets.

**Consumer Price Index (CPI)** is a commonly used measure of the inflation rate.

**Credit Suisse (CS) High Yield Index** is designed to mirror the investable universe of the U.S. dollar-denominated high yield debt market.

**FTSE® EPRA®/NAREIT® Developed Index** is a free float-adjusted index designed to measure the performance of publicly traded real estate securities in the North American, European and Asian real estate markets.

**J.P. Morgan (JPM) Global Government Bond Index (GGBI)** tracks total returns for liquid, fixed-rate, domestic government bonds with maturities greater than one year issued by developed countries globally.

**Lipper Multi-Sector Income Funds Classification Average** is calculated by averaging the total returns of all funds within the Lipper Multi-Sector Income Funds classification in the Lipper Open-End underlying funds universe. Lipper Multi-Sector Income Funds are defined as funds that seek current income by allocating assets among different fixed income securities sectors (not primarily in one sector except for defensive purposes), including U.S. and foreign governments, with a significant portion rated below investment grade. For the 12-month period ended 12/31/15, there were 286 funds in this category. Lipper calculations do not include contract fees, expenses or sales charges, and may have been different if such charges had been considered.

**Lipper VIP Equity Income Funds Classification Average** is an equally weighted average calculation of performance figures for all funds within the Lipper Equity Income Funds classification in the Lipper VIP underlying funds universe. Lipper Equity Income Funds seek relatively high current income and growth of income through investing 60% or more of their portfolios in equities. For the 12-month period ended 12/31/15, there were 71 funds in this category. Lipper calculations do not include contract fees, expenses or sales charges, and may have been different if such charges had been considered.

**Lipper VIP General U.S. Government Funds Classification Average** is an equally weighted average calculation of performance figures for all funds within the Lipper General U.S. Government Funds classification in the Lipper VIP underlying funds universe. Lipper General U.S. Government Funds invest primarily in U.S. government and agency issues. For the 12-month period ended 12/31/15, there were 55 funds in this category. Lipper calculations do not include contract fees, expenses or sales charges, and may have been different if such charges had been considered.

**Lipper VIP High Yield Funds Classification Average** is an equally weighted average calculation of performance figures for all funds within the Lipper High Yield Funds Classification in the Lipper VIP underlying funds universe. Lipper High Yield Funds aim at high (relative) current yield from fixed income securities, have no quality or maturity restrictions, and tend to invest in lower grade debt issues. For the 12-month period ended 12/31/15, there were 111 funds in this category. Lipper calculations do not include contract fees, expenses or sales charges, and may have been different if such charges had been considered.

**MSCI All Country World Index (ACWI)** is a free float-adjusted, market capitalization-weighted index designed to measure equity market performance in global developed and emerging markets.

**MSCI Emerging Markets (EM) Index** is a free float-adjusted, market capitalization-weighted index designed to measure equity market performance in global emerging markets.

**MSCI Europe, Australasia, Far East (EAFE) Index** is a free float-adjusted, market capitalization-weighted index designed to measure equity market performance in global developed markets excluding the U.S. and Canada.

**MSCI World Index** is a free float-adjusted, market capitalization-weighted index designed to measure equity market performance in global developed markets.

**Russell 1000® Growth Index** is market capitalization weighted and measures performance of those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values.

**Russell 1000® Index** is market capitalization weighted and measures performance of the largest companies in the Russell 3000® Index, which represents the majority of the U.S. market's total capitalization.

**Russell 2500™ Index** is market capitalization weighted and measures performance of the smallest companies in the Russell 3000® Index, which represent a modest amount of the Russell 3000® Index's total market capitalization.

**Russell 2500 ™ Value Index** is market capitalization weighted and measures performance of those Russell 2500 ™ Index companies with lower price-to-book ratios and lower forecasted growth values.

**Russell 3000® Growth Index** is market capitalization weighted and measures performance of those Russell 3000® Index companies with higher price-to-book ratios and higher forecasted growth values.

**Russell 3000® Index** is market capitalization weighted and measures performance of the largest U.S. companies based on total market capitalization and represents the majority of the investable U.S. equity market.

**Russell Midcap® Growth Index** is market capitalization weighted and measures performance of those Russell Midcap® Index companies with higher price-to-book ratios and higher forecasted growth values.

**Russell Midcap® Index** is market capitalization weighted and measures performance of the smallest companies in the Russell 1000® Index, which represent a modest amount of the Russell 1000® Index's total market capitalization.

**Standard & Poor's® 500 Index (S&P 500®)** is a market capitalization-weighted index of 500 stocks designed to measure total U.S. equity market performance.

**Standard & Poor's®/International Finance Corporation Investable (S&P/IFCI) Composite Index** is a free float-adjusted, market capitalization-weighted index designed to measure equity performance in global emerging markets.

# Board Members and Officers

*We base the number of portfolios on each separate series of the U.S. registered investment companies within the Franklin Templeton Investments fund complex. These portfolios have a common investment manager or affiliated investment managers.

**Gregory E. Johnson is considered to be an interested person of the Fund under the federal securities laws due to his position as an officer and director of Franklin Resources, Inc. (Resources), which is the parent company of the Fund's investment manager and distributor. Rupert H. Johnson, Jr. is considered to be an interested person of the Fund under the federal securities laws due to his position as officer and director and major shareholder of Resources.

Note 1: Rupert H. Johnson, Jr. is the uncle of Gregory E. Johnson.

Note 2: Officer information is current as of the date of this report. It is possible that after this date, information about officers may change.

Note 3: Effective April 30, 2015, Sam Ginn ceased to be a trustee of the Trust.

**The Sarbanes-Oxley Act of 2002 and Rules adopted by the Securities and Exchange Commission require the Fund to disclose whether the Fund's Audit Committee includes at least one member who is an audit committee financial expert within the meaning of such Act and Rules. The Fund's Board has determined that there is at least one such financial expert on the Audit Committee and has designated John B. Wilson as its audit committee financial expert. The Board believes that Mr. Wilson qualifies as such an expert in view of his extensive business background and experience, including service as chief financial officer of Staples, Inc. from 1992 to 1996. Mr. Wilson has been a Member and Chairman of the Fund's Audit Committee since 2007. As a result of such background and experience, the Board believes that Mr. Wilson has acquired an understanding of generally accepted accounting principles and financial statements, the general application of such principles in connection with the accounting estimates, accruals and reserves, and analyzing and evaluating financial statements that present a breadth and level of complexity of accounting issues generally comparable to those of the Fund, as well as an understanding of internal controls and procedures for financial reporting and an understanding of audit committee functions. Mr. Wilson is an independent Board member as that term is defined under the relevant Securities and Exchange Commission Rules and Releases.**

**The Statement of Additional Information (SAI) includes additional information about the board members and is available, without charge, upon request. Shareholders may call (800) 321-8563 or their insurance companies to request the SAI.**

# Shareholder Information

## Proxy Voting Policies and Procedures

The Trust's investment manager has established Proxy Voting Policies and Procedures (Policies) that the Trust uses to determine how to vote proxies relating to portfolio securities. Shareholders may view the Trust's complete Policies online at franklintempleton.com. Alternatively, shareholders may request copies of the Policies free of charge by calling the Proxy Group collect at (954) 527-7678 or by sending a written request to: Franklin Templeton Companies, LLC, 300 S.E. 2nd Street, Fort Lauderdale, FL 33301, Attention: Proxy Group. Copies of the Trust's proxy voting records are also made available online at franklintempleton.com and posted on the U.S. Securities and Exchange Commission's website at sec.gov and reflect the most recent 12-month period ended June 30.

## Quarterly Statement of Investments

The Trust files a complete statement of investments with the U.S. Securities and Exchange Commission for the first and third quarters for each fiscal year on Form N-Q. Shareholders may view the filed Form N-Q by visiting the Commission's website at sec.gov. The filed form may also be viewed and copied at the Commission's Public Reference Room in Washington, DC. Information regarding the operations of the Public Reference Room may be obtained by calling (800) SEC-0330.

# Goldman Sachs Variable Insurance Trust

# Goldman Sachs Mid Cap Value Fund

Annual Report
December 31, 2015

[THIS PAGE INTENTIONALLY LEFT BLANK]

# Principal Investment Strategies and Risks

**This is not a complete list of risks that may affect the Fund. For additional information concerning the risks applicable to the Fund, please see the Fund's Prospectuses.**

**Shares of the Goldman Sachs Variable Insurance Trust — Goldman Sachs Mid Cap Value Fund are offered to separate accounts of participating life insurance companies for the purpose of funding variable annuity contracts and variable life insurance policies. Shares of the Fund are not offered directly to the general public. The variable annuity contracts and variable life insurance policies are described in the separate prospectuses issued by participating insurance companies. You should refer to those prospectuses for information about surrender charges, mortality and expense risk fees and other charges that may be assessed by participating insurance companies under the variable annuity contracts or variable life insurance policies. Such fees or charges, if any, may affect the return you realize with respect to your investments. Ask your representative for more complete information. Please consider the Fund's objective, risks and charges and expenses, and read the Prospectus carefully before investing. The Prospectus contains this and other information about the Fund.**

**The Goldman Sachs Mid Cap Value Fund** invests primarily in mid-capitalization U.S. equity investments. The Fund's equity investments are subject to **market risk**, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors and/or general economic conditions. The securities of **mid- and small-capitalization companies** involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements. **Different investment styles** (*e.g.,* "value") tend to shift in and out of favor, and at times the Fund may underperform other funds that invest in similar asset classes.

**INVESTMENT OBJECTIVE**

The Fund seeks long-term capital appreciation.

# Portfolio Management Discussion and Analysis

*Below, the Goldman Sachs Value Portfolio Management Team discusses the Goldman Sachs Variable Insurance Trust — Goldman Sachs Mid Cap Value Fund's (the "Fund") performance and positioning for the 12-month period ended December 31, 2015 (the "Reporting Period").*

### *How did the Fund perform during the Reporting Period?*

During the Reporting Period, the Fund's Institutional and Service Shares generated average annual total returns of -9.24% and -9.52%, respectively. These returns compare to the -4.78% average annual total return of the Fund's benchmark, the Russell Midcap® Value Index (with dividends reinvested) (the "Russell Index"), during the same time period.

### *What economic and market factors most influenced the equity markets as a whole during the Reporting Period?*

Representing the U.S. equity market, the S&P 500® Index gained 1.38% during the Reporting Period. Central bank policy, a commodity price sell-off, geopolitical tensions, and China and global economic growth concerns were the key themes impacting U.S. equities throughout 2015.

As evidence of a U.S. economic and labor market recovery mounted, market expectations of a Federal Reserve ("Fed") interest rate hike increased. The monetary policy divergence with the European Central Bank and the Bank of Japan, which each eased policy during the calendar year, resulted in relative U.S. dollar strength. This paradoxically hurt U.S. equity performance despite improving domestic economic fundamentals. Also, geopolitical tensions intensified in the summer of 2015, as negotiations between Greece and its creditors unraveled, and the probability of a Greek exit, popularly known in the media as "Grexit," from the euro increased. "Grexit" risk subsequently declined with an agreement in July 2015. However, concerns then escalated around China's economic weakness, exacerbated by a surprise devaluation of its renminbi in August 2015, which further shook market confidence. U.S. equities sold off in the ensuing sharp global equity correction.

After holding the targeted federal funds rate steady in September and October 2015 in light of these external macroeconomic and geopolitical risks, the Fed voted unanimously for a 25 basis point hike in December 2015, a move largely expected by markets. (A basis point is 1/100th of a percentage point.) The fairly dovish language in the Fed's announcement, which emphasized "gradual" adjustments to policy going forward, helped to somewhat assuage the markets.

Oil and commodity prices were "lower for longer" in 2015, as the supply glut took longer than expected to correct and demand concerns arose. Brent crude oil and West Texas Intermediate ("WTI") crude oil prices began 2015 at $57 and $53 per barrel, respectively, already well below 2014 highs of more than $100 per barrel. Both Brent and WTI crude oil prices ended 2015 still lower at approximately $37 per barrel. The U.S. consumer benefited from savings at the gas pump and consumer spending rose, particularly in areas typically associated with lower gas prices, such as autos and restaurants. However, this did not fully offset the negative impact on the U.S. energy industry and industrials companies. As a result, energy was the worst performing sector in the S&P 500 Index by a wide margin during the Reporting Period, followed by materials, utilities and industrials. Conversely, more consumer-oriented sectors, including consumer discretionary, health care, information technology and consumer staples were the best performing sectors in the S&P 500 Index during the Reporting Period.

Within the U.S. equity market, there was significant disparity in performance not only among sectors but also among the various capitalization and style segments. Large-cap stocks, as measured by the Russell 1000® Index, posted modestly positive returns, while mid-cap stocks and small-cap stocks, as measured by the Russell Midcap® Index and Russell 2000® Index, respectively, generated negative returns. Large-cap stocks were most successful relative to small-cap stocks in the consumer discretionary sector. From a style perspective, growth-oriented stocks significantly outpaced value-oriented stocks across the capitalization spectrum. Growth outperformed relative to value during the Reporting Period primarily due to stronger performance of the growth-oriented information technology sector. (All as measured by the Russell Investments indices.)

### *What key factors were responsible for the Fund's performance during the Reporting Period?*

The Fund underperformed the Russell Index on a relative basis. Stock selection had the greatest effect on the Fund's performance relative to the Russell Index during the Reporting Period.

### *Which equity market sectors most significantly affected Fund performance?*

Detracting from the Fund's relative results most was stock selection in the financials, consumer discretionary, financials and utilities sectors. Such detractors were only partially offset by effective stock selection in the energy and materials sectors, which helped the Fund's performance relative to the Russell Index. Having an overweighted allocation to consumer staples, which was the second-best performing sector in the Russell Index during the Reporting Period, also boosted the Fund's relative results.

### *Which stocks detracted significantly from the Fund's performance during the Reporting Period?*

Detracting from the Fund's results relative to its benchmark index were positions in oil and natural gas exploration and production company Southwestern Energy, loan management, servicing and asset recovery company Navient and global clothing and accessories retailer Gap.

During the Reporting Period, Southwestern Energy's underperformance was driven primarily by weak natural gas prices, which declined more than 20% in 2015. While we remained positive on its management team's commitment to disciplined growth, we moderated the size of the Fund's position in Southwestern Energy in favor of other opportunities that, in our view, have a more favorable risk/reward profile.

Following weak second calendar quarter results reported in July 2015, shares of Navient came under additional pressure after the company disclosed it received a letter from the Consumer Financial Protection Bureau ("CFPB") stating it may take legal action over Navient's student loan practices. Shares of Navient came under additional pressure due to concerns around a potential downgrade of the company's asset-backed securities by ratings agencies. While we did not believe, at the end of the Reporting Period, these issues posed a material risk to Navient's operations in isolation, we moderated the size of the Fund's position in favor of other opportunities which, in our view, have a more favorable risk/reward profile.

During the Reporting Period, Gap's performance was driven by disappointing earnings results, induced by weaker than expected same-store sales comparisons and gross margins, foreign exchange headwinds resulting from a stronger U.S. dollar, and an increase in promotional expense due to a port strike that caused product delays and thus excess inventory. At the end of the Reporting Period, we remained constructive on the company's new Chief Executive Officer and the changes he is implementing to improve the Gap brand, although we acknowledge a turnaround will take time. We also remained encouraged by what we see as the company's long-term growth potential given its international expansion opportunities as well as its strong e-commerce platform. Gap's management team is focused on modeling the Gap brand's organization on Old Navy's successful sourcing, merchandising and marketing model. The company plans to take these robust processes and implement them at Gap and Banana Republic, another retailer owned by Gap. We believe these initiatives could yield significant margin improvements and shorter lead times. Additionally, we believe Gap could benefit from an improving consumer spending environment, increasing demand for denim products and large declines in cotton prices, which make up a significant portion of the company's cost structure.

### *What were some of the Fund's best-performing individual stocks?*

The Fund benefited most relative to the Russell Index from positions in Maxim Integrated Products, Fortune Brands Home & Security and Tyson Foods.

Shares of semiconductor company Maxim Integrated Products performed well throughout the Reporting Period, as its management continued to deliver on its restructuring initiatives, which contributed to the company's earnings beat, driven by operational cost reductions. Additionally, its shares rose in October 2015 after news of a potential merger. At the end of the Reporting Period, we believed that Maxim Integrated Products was one of the most attractive opportunities in the semiconductor industry, regardless of whether it is acquired, and we were encouraged by its management team's commitment to shareholder-friendly actions.

Fortune Brands Home & Security performed well, as the company continued to build on its industry-leading position in the U.S. home products market, benefiting from an improving U.S. housing market that increased demand for the company's products. At the end of the Reporting Period, we continued to believe the company has a strong business model that is positioned well to continue to benefit from a strong U.S. housing market. We also think the company has a strong management team with the ability to increase share buybacks or participate in a merger or acquisition.

Tyson Foods' shares rose throughout the Reporting Period as a result of executing on its strategy to diversify away from traditional fresh meat sales through its acquisition of Hillshire Brands. The acquisition provided a differentiated product stream while also providing a boost to profitability. Tyson Foods' shares also reacted positively to delivering strong fourth fiscal quarter results, along with an increase to its 2016 guidance and in its dividend. At the end of the Reporting Period, we believed Tyson Foods remained attractively valued relative to peers. We also believed the company remained a high quality business that generates strong cash flow, and we had confidence that its management would continue to allocate capital to maximize shareholder value.

***How did the Fund use derivatives and similar instruments during the Reporting Period?***

During the Reporting Period, we did not use derivatives as part of an active management strategy.

***Did the Fund make any significant purchases or sales during the Reporting Period?***

We initiated a Fund position in Citizens Financial Group, a consumer and commercial banking company. We believe its management can improve the bank's operational efficiency through its cost-savings program and are encouraged by its asset sensitivity to higher interest rates. Overall, we are encouraged by its management team's commitment to creating shareholder value and believe that Citizens Financial Group is attractively valued relative to its peer group.

We established a Fund position in Ralph Lauren at what we considered to be an attractive entry point after the company missed first quarter 2015 earnings estimates, largely due to foreign exchange headwinds and increased investments. We believe Ralph Lauren can benefit from strong growth trends in international markets, supported by store growth, as the company strengthens its store distribution around the world. In addition, we believe its margins became depressed after two years of investments, and we see room for operating margin expansion during the next few years. Overall, we believe Ralph Lauren is a strong brand that offers an attractive risk/reward profile, and we remained encouraged by its management's commitment to return capital to shareholders.

We exited the Fund's position in Fifth Third Bancorp during the Reporting Period. While we maintain a favorable view of the company, we opted to use the proceeds for positions within the financials sector that we felt had better risk-adjusted return potential.

We sold the Fund's position in Cigna, a global health service organization. Cigna's stock rose after the company reported better than expected first calendar quarter earnings and its management raised earnings guidance for 2015. Its shares continued to rise through much of the second quarter of 2015 on news flow of merger and acquisitions activity and industry consolidation amongst domestic health care maintenance organizations. Strict to our sell discipline, however, as the stock's valuations appreciated and reached our price target, we exited the position and transitioned capital into higher conviction names.

***Were there any notable changes in the Fund's weightings during the Reporting Period?***

In constructing the Fund's portfolio, we focus on picking stocks rather than on making industry or sector bets. We seek to outpace the benchmark index by overweighting stocks that we expect to outperform and underweighting those that we think may lag. Consequently, changes in its sector weights are generally the direct result of individual stock selection or of stock appreciation or depreciation. That said, during the Reporting Period, the Fund's exposure to financials, health care and materials increased compared to the Russell Index. The Fund's allocations compared to the benchmark index in consumer discretionary, consumer staples and telecommunication services decreased.

***How was the Fund positioned relative to its benchmark index at the end of the Reporting Period?***

At the end of December 2015, the Fund had overweighted positions relative to the Russell Index in the consumer discretionary, consumer staples and information technology sectors. On the same date, the Fund had an underweighted position compared to the Russell Index in utilities and was rather neutrally weighted to the Russell Index in energy, health care, industrials, materials and financials. The Fund had no exposure to telecommunication services at the end of the Reporting Period.

***Were there any changes to the Fund's portfolio management team during the Reporting Period?***

Effective February 18, 2015, Andrew Braun no longer serves as Co-Chief Investment Officer of the U.S. Value Equity Team or as a lead portfolio manager of the Mid Cap Value strategy. Andrew will, however, retain his sector coverage responsibilities for the Large and Mid Cap Value strategies.

With Andrew's shift in responsibilities, Timothy Ryan, Vice President, began sharing lead portfolio management responsibility for our Mid Cap Value strategy with Dolores Bamford, Managing Director, who co-lead the strategy until her retirement. Tim will retain his sector coverage responsibilities for the Large, Mid, Small and SMID Cap Value portfolios and will continue to share lead portfolio management responsibility for our Real Estate Securities strategy with Nora Creedon, Managing Director. Tim joined the U.S. Value Equity Team in 2010 and has 19 years of experience in the industry.

Upon Dolores' retirement, Sung Cho, Vice President, assumed co-lead portfolio manager responsibilities for the Mid Cap Value strategy, along with Tim Ryan. Sung joined the U.S. Value Equity Team in 2008 and has 12 years of industry experience. Sung retained his research responsibilities for the telecommunications and consumer discretionary sectors in both the Large and Mid Cap Value strategies as well as for technology in Mid Cap Value.

Sean Gallagher, Managing Director and Head of the U.S. Value Equity Team, will continue in his role as Chief Investment Officer of the U.S. Value Equity Team. Sean has 22 years of investing experience and has been the head of the U.S. Value Equity Team and Co-Chief Investment Officer since 2009. He joined Goldman Sachs in 2000, was named managing director in 2005 and partner in 2008. As he has in the past, Sean will continue to work closely with his team, including 15 portfolio managers and more than 10 research analysts, to ensure the seamless management of our shareholders' portfolios.

Effective September 1, 2015, Dolores Bamford retired from the firm. She left to pursue a Master of Divinity degree from the Gordon-Conwell Theological Seminary. Dolores had research responsibilities for energy in the Mid Cap Value strategy and served as co-lead portfolio manager, along with Tim Ryan.

### *What is the Fund's tactical view and strategy for the months ahead?*

At the end of the Reporting Period, we believe positive, but below average, returns for global equities in 2016 in light of modest economic growth forecasts and rising valuations in some areas of the market. However, in our view, equities still looked more attractive than other asset classes in a persistently low-return environment.

After dipping in 2015, we believe global economic growth to increase modestly in 2016, which we think will be enough to sustain corporate profitability and allow stock prices to move higher. In our view, central banks are likely to remain accommodative given still-fragile global economic growth, which we also see as helpful for equity markets. Even in the U.S., where Fed policy has moved toward normalization, we do not expect to see much negative impact from what are likely to be gradual interest rate increases given continued strength in the housing and labor markets. However, the strong U.S. dollar may well remain a headwind for U.S. multi-nationals.

While the macro outlook remains benign, U.S. credit and equities reflect some typical late-cycle signs, such as more shareholder-friendly actions, an increase in merger and acquisition activity and a pick-up in leverage, all of which tend to coincide with an environment lacking top-line growth. Higher equity valuations are also consistent with late-cycle indicators. In part due to years of ultra-low interest rates, U.S. equity market valuations have risen toward fair value, in our opinion, with some areas looking particularly vulnerable if companies cannot deliver growth.

One common theme across the developed markets is that we believe domestically-focused companies in the major regions could benefit from increasing domestic consumption while being more insulated from currency volatility. In the U.S., we expect that the strong dollar could continue to be a headwind for many globally-exposed companies but believe the consumer remains healthy.

We also believe that some extraordinary dynamics in the U.S. equity market in 2015 have set up investment opportunities for 2016. The extremely narrow trading breadth of the market hit a 30-year low. For example, just ten stocks accounted for approximately 40% of the total positive contribution to the S&P 500 Index return. Also, as mentioned earlier, value stocks notably underperformed growth stocks. We expect some broadening of the market and reversal of these trends in 2016, as investors focus on the risk of high-priced stocks as well as on the relative attractiveness of the hundreds of stocks trading below the market multiple.

Regardless of market direction, our fundamental, bottom-up stock selection continues to drive our process, rather than headlines or sentiment. We maintain high conviction in the companies the Fund owns and believe they have the potential to outperform relative to the broader market regardless of economic growth conditions. We continue to focus on undervalued companies that we believe have comparatively greater control of their own destiny, such as innovators with differentiated products, companies with low cost structures or companies that have been investing in their own businesses and may be poised to gain market share. We maintain our discipline in identifying companies with what we believe to be strong or improving balance sheets, led by quality management teams and trading at discounted valuations. We remain focused on the long-term performance of the Fund.

# Index Definitions

The Russell Midcap Value® Index is an unmanaged index of common stock prices that measures the performance of those Russell Midcap companies with lower price-to-book ratios and lower forecasted growth values. The Index figures do not reflect any deduction for fees, expenses or taxes. It is not possible to invest directly in an index.

The Russell 2000® Index (with dividends reinvested) is an unmanaged index of common stock prices that measures the performance of the 2000 smallest companies in the Russell 3000® Index. The figures for the Index do not include any deduction for fees, expenses or taxes. It is not possible to invest directly in an index.

The S&P 500® Index (with dividends reinvested) is the Standard & Poor's 500 Composite Index of 500 stocks, an unmanaged index of common stock prices. The figures for the Index do not include any deduction for fees, expenses or taxes. It is not possible to invest directly in an index.

The Russell Midcap® Index measures the performance of the 800 smallest companies in the Russell 1000® Index, which represent approximately 25% of the total market capitalization of the Russell 1000 Index. It is not possible to invest directly in an index.

The Russell 1000® Index measures the performance of the 1,000 largest companies in the Russell 3000® Index, which represents approximately 92% of the total market capitalization of the Russell 3000 Index. It is not possible to invest directly in an index.

# Mid Cap Value Fund

*as of December 31, 2015*

## STANDARDIZED TOTAL RETURNS[1]

| For the period ended 12/31/15 | One Year | Five Years | Ten Years | Since Inception | Inception Date |
|---|---|---|---|---|---|
| Institutional | -9.24% | 8.72% | 6.67% | 8.41% | 5/01/98 |
| Service | -9.52 | 8.44 | N/A | 6.16 | 1/09/06 |

[1] **The Standardized Total Returns are average annual total returns as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value ("NAV"). Because Institutional Shares and Service Shares do not involve a sales charge, such a charge is not applied to their Standardized Total Returns.**

**Total return figures in the above chart represent past performance and do not indicate future results, which will vary. The investment return and principal value of an investment will fluctuate and, therefore, an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the total return figures in the above chart. Please visit www.GSAMFUNDS.com to obtain the most recent month-end returns.** Performance reflects fee waivers and/or expense limitations in effect during the periods shown. In their absence, performance would be reduced.

## EXPENSE RATIOS[2]

| | Net Expense Ratio (Current) | Gross Expense Ratio (Before Waivers) |
|---|---|---|
| Institutional | 0.83% | 0.87% |
| Service | 1.08 | 1.12 |

[2] The expense ratios of the Fund, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations) are as set forth above according to the most recent publicly available Prospectus for the Fund and may differ from the expense ratios disclosed in the Financial Highlights in this report. Pursuant to a contractual arrangement, the Fund's waivers and/or expense limitations will remain in place through at least April 30, 2016 and prior to such date the Investment Adviser may not terminate the arrangements without the approval of the Fund's Board of Trustees. If these arrangements are discontinued in the future, the expense ratios may change without shareholder approval.

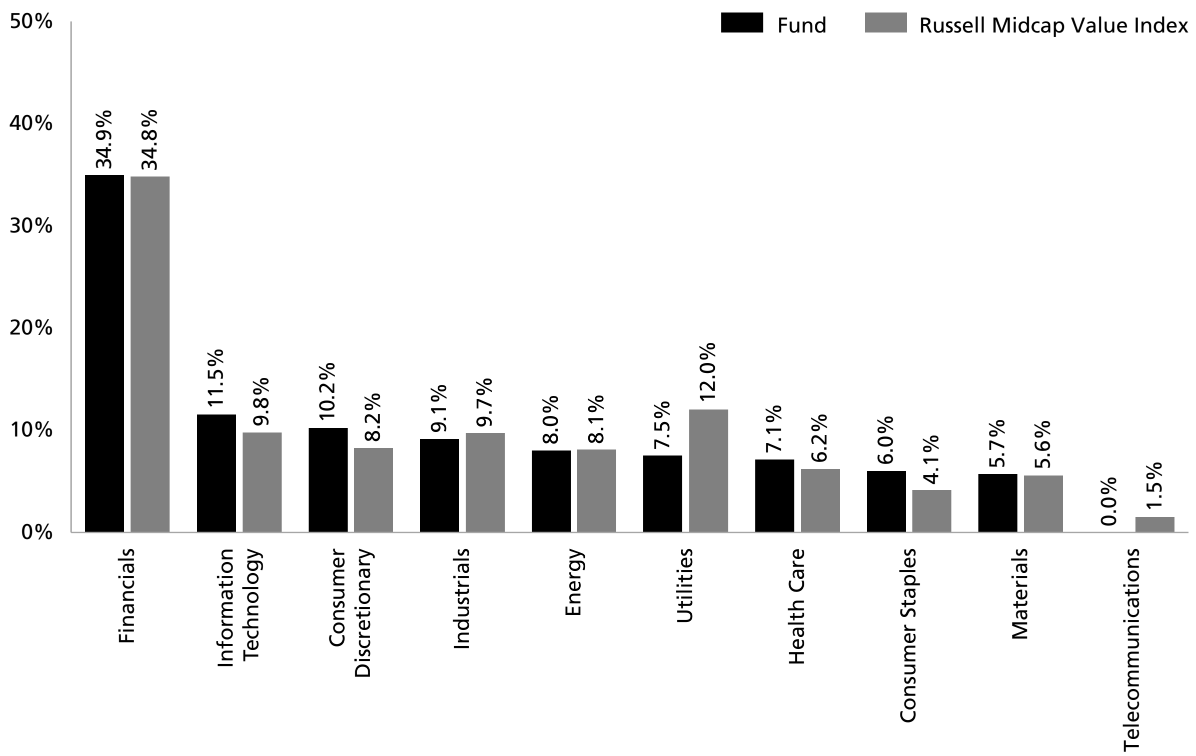
## TOP TEN HOLDINGS AS OF 12/31/15[3]

| Holding | % of Net Assets | Line of Business |
|---|---|---|
| Citizens Financial Group, Inc. | 2.5% | Banks |
| Lincoln National Corp. | 2.4 | Insurance |
| Raymond James Financial, Inc. | 2.1 | Diversified Financials |
| Sempra Energy | 1.9 | Utilities |
| Ralph Lauren Corp. | 1.9 | Consumer Durables & Apparel |
| Huntington Bancshares, Inc. | 1.9 | Banks |
| FirstEnergy Corp. | 1.9 | Utilities |
| Brixmor Property Group, Inc. | 1.8 | Real Estate Investment Trust |
| Brocade Communications Systems, Inc. | 1.7 | Technology Hardware & Equipment |
| Prologis, Inc. | 1.7 | Real Estate Investment Trust |

[3] The top 10 holdings may not be representative of the Fund's future investments.

## FUND vs. BENCHMARK SECTOR ALLOCATIONS[4]

**As of December 31, 2015**



[4] The Fund is actively managed and, as such, its composition may differ over time. Consequently, the Fund's overall sector allocations may differ from percentages contained in the graph above. The graph categorizes investments using Global Industry Classification Standard ("GICS"), however, the sector classifications used by the portfolio management team may differ from GICS. The percentage shown for each investment category reflects the value of investments in that category as a percentage of market value. The graph depicts the Fund's investments but may not represent the Fund's market exposure due to the exclusion of certain derivatives, if any, as listed in the Additional Investment Information section of the Schedule of Investments.

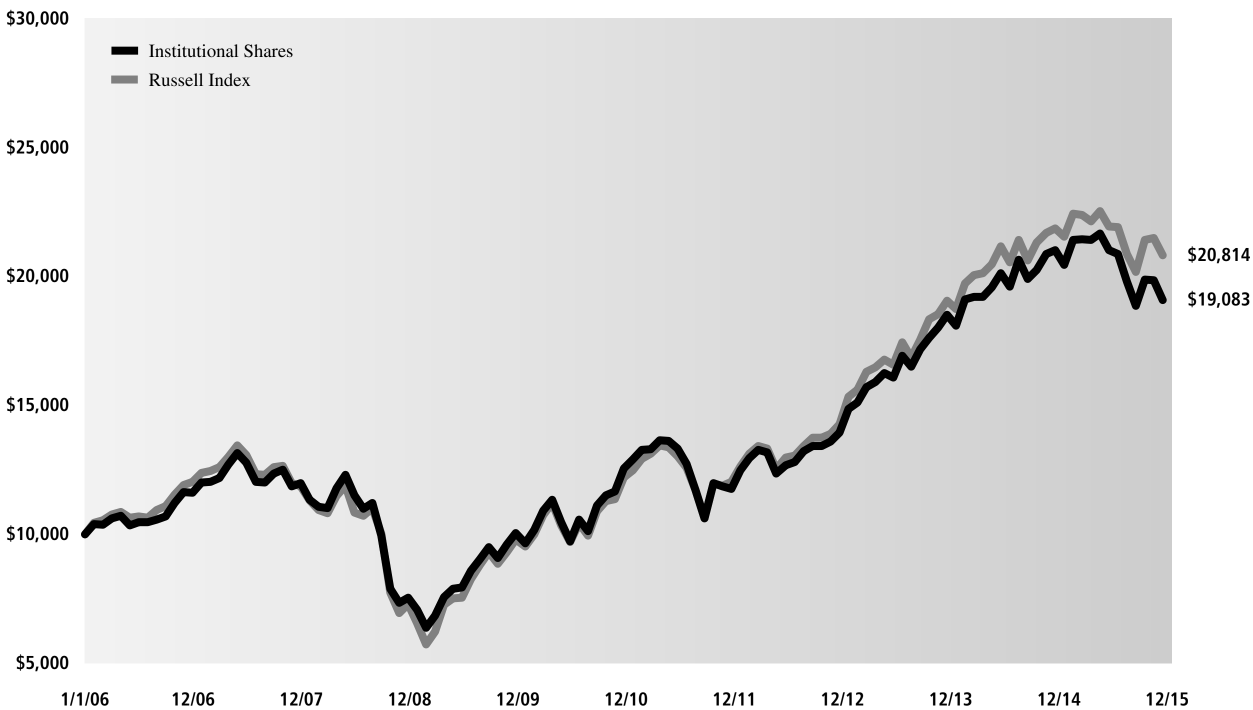
# Performance Summary

*December 31, 2015*

The following graph shows the value, as of December 31, 2015, of a $10,000 investment made on January 1, 2006 in the Institutional Shares at NAV. For comparative purposes, the performance of the Fund's benchmark, the Russell Index (with distributions reinvested), is shown. This performance data represents past performance and should not be considered indicative of future performance, which will fluctuate with changes in market conditions. These performance fluctuations will cause an investor's shares, when redeemed, to be worth more or less than their original cost. Performance reflects Fund level expenses but does not reflect fees and expenses associated with any variable annuity contract or variable life insurance policy that uses the Fund as an investment option for any contract or policy. Had performance reflected all of those fees and expenses, performance would have been reduced. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown, and in their absence, performance would be reduced. Performance of Service Shares will vary from Institutional Shares due to differences in class specific fees. In addition to the Investment Adviser's decisions regarding issuer/industry investment selection and allocation, other factors may affect Fund performance. These factors include, but are not limited to, Fund operating fees and expenses, portfolio turnover, and subscription and redemption cash flows affecting the Fund.

**Mid Cap Value Fund's 10 Year Performance**

**Performance of a $10,000 investment, with distributions reinvested, from January 1, 2006 through December 31, 2015.**



| Average Annual Total Return through December 31, 2015 | One Year | Five Years | Ten Years | Since Inception |
|---|---|---|---|---|
| **Institutional (Commenced May 1, 1998)** | -9.24% | 8.72% | 6.67% | 8.41% |
| **Service (Commenced January 9, 2006)** | -9.52% | 8.44% | N/A | 6.16% |

(a) Calculated based on the average shares outstanding methodology.
(b) Assumes investment at the net asset value at the beginning of the year, reinvestment of all distributions, and a complete redemption of the investment at the net asset value at the end of the year.
(c) The Fund's portfolio turnover rate is calculated in accordance with regulatory requirements, without regard to transactions involving short term investments. If such transactions were included, the Fund's portfolio turnover rate may be higher.
(d) Reflects income recognized from special dividends which amounted to $0.04 per share and 0.31% of average net assets.

# Notes to Financial Statements

*December 31, 2015*

## 1. ORGANIZATION

Goldman Sachs Variable Insurance Trust (the "Trust" or "VIT") is a Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the "Act"), as an open-end management investment company. The Trust includes the Goldman Sachs Mid Cap Value Fund (the "Fund"). The Fund is a diversified portfolio under the Act offering two classes of shares — Institutional and Service Shares. Shares of the Trust are offered to separate accounts of participating life insurance companies for the purpose of funding variable annuity contracts and variable life insurance policies.

Goldman Sachs Asset Management, L.P. ("GSAM"), an affiliate of Goldman, Sachs & Co. ("Goldman Sachs"), serves as investment adviser to the Fund pursuant to a management agreement (the "Agreement") with the Trust.

## 2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and require management to make estimates and assumptions that may affect the reported amounts and disclosures. Actual results may differ from those estimates and assumptions.

A. Investment Valuation — The Fund's valuation policy is to value investments at fair value.

B. Investment Income and Investments — Investment income includes interest income and dividend income, net of any foreign withholding taxes, less any amounts reclaimable. Interest income is accrued daily and adjusted for amortization of premiums and accretion of discounts. Dividend income is recognized on ex-dividend date or, for certain foreign securities, as soon as such information is obtained subsequent to the ex-dividend date. Investment transactions are reflected on trade date. Realized gains and losses are calculated using identified cost. Investment transactions are recorded on the following business day for daily net asset value ("NAV") calculations. Any foreign capital gains tax is accrued daily based upon net unrealized gains, and is payable upon sale of such investments. Distributions received from the Fund's investments in United States ("U.S.") real estate investment trusts ("REITs") may be characterized as ordinary income, net capital gain or a return of capital. A return of capital is recorded by the Fund as a reduction to the cost basis of the REIT.

C. Class Allocations and Expenses — Investment income, realized and unrealized gain (loss), and non-class specific expenses of the Fund are allocated daily based upon the proportion of net assets of each class. Non-class specific expenses directly incurred by a Fund are charged to that Fund, while such expenses incurred by the Trust are allocated across the applicable Funds on a straight-line and/or pro-rata basis depending upon the nature of the expenses. Class specific expenses, where applicable, are borne by the respective share classes and include Distribution and Service and Transfer Agency fees.

D. Federal Taxes and Distributions to Shareholders — It is the Fund's policy to comply with the requirements of the Internal Revenue Code of 1986, as amended (the "Code"), applicable to regulated investment companies (mutual funds) and to distribute each year substantially all of its investment company taxable income and capital gains to its shareholders. Accordingly, the Fund is not required to make any provisions for the payment of federal income tax. Distributions to shareholders are recorded on the ex-dividend date. Income and capital gains distributions, if any, are declared and paid annually.

Net capital losses are carried forward to future fiscal years and may be used to the extent allowed by the Code to offset any future capital gains. Losses that are carried forward will retain their character as either short-term or long-term capital losses. Utilization of capital loss carryforwards will reduce the requirement of future capital gains distributions.

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with federal income tax rules, which may differ from GAAP. The source of the Fund's distributions may be shown in the accompanying financial statements as either from net investment income, net realized gain or capital. Certain components of the Fund's net assets on the Statement of Assets and Liabilities reflect permanent GAAP/tax differences based on the appropriate tax character.

E. Commission Recapture — GSAM, on behalf of certain Funds, may direct portfolio trades, subject to seeking best execution, to various brokers who have agreed to rebate a portion of the commissions generated. Such rebates are made directly to a Fund as cash payments and are included in net realized gain (loss) from investments on the Statement of Operations.

## 3. INVESTMENTS AND FAIR VALUE MEASUREMENTS

The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price). GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The levels used for classifying investments are not necessarily an indication of the risk associated with investing in these investments. The three levels of the fair value hierarchy are described below:

Level 1 — Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
Level 2 — Quoted prices in markets that are not active or financial instruments for which significant inputs are observable (including, but not limited to, quoted prices for similar investments, interest rates, foreign exchange rates, volatility and credit spreads), either directly or indirectly;
Level 3 — Prices or valuations that require significant unobservable inputs (including GSAM's assumptions in determining fair value measurement).

Changes in valuation techniques may result in transfers into or out of an assigned level within the hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value hierarchy resulting from such changes are deemed to have occurred as of the beginning of the reporting period.

The Board of Trustees ("Trustees") has approved Valuation Procedures that govern the valuation of the portfolio investments held by the Fund, including investments for which market quotations are not readily available. The Trustees have delegated to GSAM day-to-day responsibility for implementing and maintaining internal controls and procedures related to the valuation of the Fund's portfolio investments. To assess the continuing appropriateness of pricing sources and methodologies, GSAM regularly performs price verification procedures and issues challenges as necessary to third party pricing vendors or brokers, and any differences are reviewed in accordance with the Valuation Procedures.

**A. Level 1 and Level 2 Fair Value Investments** — The valuation techniques and significant inputs used in determining the fair values for investments classified as Level 1 and Level 2 are as follows:

**Equity Securities** — Equity securities traded on a U.S. securities exchange or the NASDAQ system, or those located on certain foreign exchanges, including but not limited to the Americas, are valued daily at their last sale price or official closing price on the principal exchange or system on which they are traded. If there is no sale or official closing price or such price is believed by GSAM to not represent fair value, equity securities are valued at the last bid price for long positions and at the last ask price for short positions. To the extent these investments are actively traded, they are classified as Level 1 of the fair value hierarchy, otherwise they are generally classified as Level 2.

Unlisted equity securities for which market quotations are available are valued at the last sale price on the valuation date, or if no sale occurs, at the last bid price. Securities traded on certain foreign securities exchanges are valued daily at fair value determined by an independent fair value service (if available) under Valuation Procedures approved by the Trustees and consistent with applicable regulatory guidance. The independent fair value service takes into account multiple factors including, but not limited to, movements in the securities markets, certain depositary receipts, futures contracts and foreign currency exchange rates that have occurred subsequent to the close of the foreign securities exchange. These investments are generally classified as Level 2 of the fair value hierarchy.

**B. Level 3 Fair Value Investments** — To the extent that significant inputs to valuation models and other alternative pricing sources are unobservable, or if quotations are not readily available, or if GSAM believes that such quotations do not accurately reflect fair value, the fair value of the Fund's investments may be determined under Valuation Procedures approved by the Trustees. GSAM, consistent with its procedures and applicable regulatory guidance, may make an adjustment to the most recent valuation prices of either domestic or foreign securities in light of significant events to reflect what it believes to be the fair value of

## 3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

the securities at the time of determining a Fund's NAV. Significant events which could affect a large number of securities in a particular market may include, but are not limited to: significant fluctuations in U.S. or foreign markets; market dislocations; market disruptions; or unscheduled market closings. Significant events which could also affect a single issuer may include, but are not limited to: corporate actions such as reorganizations, mergers and buy-outs; ratings downgrades; and bankruptcies.

**C. Fair Value Hierarchy** — The following is a summary of the Fund's investments classified in the fair value hierarchy as of December 31, 2015:

| Investment Type | Level 1 | Level 2 | Level 3 |
|---|---|---|---|
| **Assets** | | | |
| Common Stock and/or Other Equity Investments[(a)] | | | |
| North America | $774,581,592 | $— | $— |

(a) Amounts are disclosed by continent to highlight the impact of time zone differences between local market close and the calculation of NAV. Security valuations are based on the principal exchange or system on which they are traded, which may differ from country of domicile.

For further information regarding security characteristics, see the Schedule of Investments.

## 4. AGREEMENTS AND AFFILIATED TRANSACTIONS

**A. Management Agreement** — Under the Agreement, GSAM manages the Fund, subject to the general supervision of the Trustees.

As compensation for the services rendered pursuant to the Agreement, the assumption of the expenses related thereto and administration of the Fund's business affairs, including providing facilities, GSAM is entitled to a management fee, accrued daily and paid monthly, equal to an annual percentage rate of the Fund's average daily net assets.

For the fiscal year ended December 31, 2015, contractual and effective net management fees with GSAM were at the following rates:

| Contractual Management Rate | | | | | |
|---|---|---|---|---|---|
| First $2 billion | Next $3 billion | Next $3 billion | Over $8 billion | Effective Rate | Effective Net Management Rate^ |
| 0.80% | 0.72% | 0.68% | 0.67% | 0.80% | 0.77%* |

^ Effective Net Management Rate includes the impact of management fee waivers of affiliated underlying funds, if any.
* GSAM agreed to waive a portion of its management fee in order to achieve a net management rate, as defined in the Fund's most recent prospectus. This waiver will be effective through at least April 30, 2016 and prior to such date GSAM may not terminate the arrangement without approval of the Trustees. For the fiscal year ended December 31, 2015, GSAM waived $288,577 of its management fee.

**B. Distribution and Service Plan** — The Trust, on behalf of the Service Shares of the Fund, has adopted a Distribution and Service Plan (the "Plan"). Under the Plan, Goldman Sachs, which serves as distributor (the "Distributor"), is entitled to a fee accrued daily and paid monthly, for distribution services and personal and account maintenance services, which may then be paid by Goldman Sachs to authorized dealers, equal to, on an annual basis, 0.25% of the Fund's average daily net assets attributable to Service Shares.

**C. Transfer Agency Agreement** — Goldman Sachs also serves as the transfer agent of the Fund for a fee pursuant to the Transfer Agency Agreement. The fees charged for such transfer agency services are accrued daily and paid monthly at an annual rate of 0.02% of the average daily net assets of Institutional and Service Shares.

**D. Other Expense Agreements and Affiliated Transactions** — GSAM has agreed to limit certain "Other Expenses" of the Fund (excluding acquired fund fees and expenses, transfer agency fees and expenses, taxes, interest, brokerage fees, shareholder meeting, litigation, indemnification and extraordinary expenses) to the extent such expenses exceed, on an annual basis, a

## 4. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

percentage rate of the average daily net assets of the Fund. Such Other Expense reimbursements, if any, are accrued daily and paid monthly. In addition, the Fund is not obligated to reimburse GSAM for prior fiscal year expense reimbursements, if any. The Other Expense limitation as an annual percentage rate of average daily net assets for the Fund is 0.054%. The Other Expense limitation will remain in place through at least April 30, 2016, and prior to such date GSAM may not terminate the arrangement without the approval of the Trustees. For the fiscal year ended December 31, 2015, GSAM did not reimburse to the Fund. In addition, the Fund has entered into certain offset arrangements with the custodian and the transfer agent, which may result in a reduction of the Fund's expenses and are received irrespective of the application of the "Other Expense" limitation described above. For the fiscal year ended December 31, 2015, custody fee credits were $20,849.

**E. Line of Credit Facility** — As of December 31, 2015, the Fund participated in a $1,205,000,000 committed, unsecured revolving line of credit facility (the "facility") together with other funds of the Trust and certain registered investment companies having management agreements with GSAM or its affiliates ("Other Borrowers"). Pursuant to the terms of the facility, the Fund and Other Borrowers could increase the credit amount by up to an additional $115,000,000, for a total of up to $1,320,000,000. This facility is to be used for temporary emergency purposes, or to allow for an orderly liquidation of securities to meet redemption requests. The interest rate on borrowings is based on the federal funds rate. The facility also requires a fee to be paid by the Fund based on the amount of the commitment that has not been utilized. For the fiscal year ended December 31, 2015, the Fund did not have any borrowings under the facility.

**F. Other Transactions with Affiliates** — For the fiscal year ended December 31, 2015, Goldman Sachs earned $42,686 in brokerage commissions from portfolio transactions.

## 5. PORTFOLIO SECURITIES TRANSACTIONS

The cost of purchases and proceeds from sales and maturities of long-term securities for the fiscal year ended December 31, 2015, were $875,607,048 and $1,025,258,585, respectively.

## 6. TAX INFORMATION

The tax character of distributions paid during the fiscal years ended December 31, 2014 and December 31, 2015, was as follows:

| | 2014 | 2015 |
|---|---|---|
| Distributions paid from: | | |
| Ordinary income | $ 65,381,467 | $19,814,139 |
| Net long-term capital gains | 115,857,033 | 46,427,168 |
| Total taxable distributions | $181,238,500 | $66,241,307 |

As of December 31, 2015, the components of accumulated earnings (losses) on a tax-basis were as follows:

| | |
|---|---|
| Undistributed ordinary income — net | $ 3,516,192 |
| Undistributed long-term capital gains | 235,384 |
| Total undistributed earnings | $ 3,751,576 |
| Timing differences (Post October Loss Deferral, and certain REIT Adjustments) | (13,981,487) |
| Unrealized losses — net | (12,524,706) |
| Total accumulated losses — net | $(22,754,617) |

# Notes to Financial Statements (continued)

*December 31, 2015*

## 6. TAX INFORMATION (continued)

As of December 31, 2015, the Fund's aggregate security unrealized gains and losses based on cost for U.S. federal income tax purposes were as follows:

| | |
|---|---|
| Tax cost | $787,106,298 |
| Gross unrealized gain | 63,209,073 |
| Gross unrealized loss | (75,733,779) |
| Net unrealized security loss | $ (12,524,706) |

The difference between GAAP-basis and tax-basis unrealized gains (losses) is attributable primarily to wash sales and differences in the tax treatment of real estate investment trust investments.

In order to present certain components of the Fund's capital accounts on a tax-basis, the Fund has reclassified $39,729 from undistributed net investment income to accumulated net realized gain (loss). This reclassification has no impact on the net asset value of the Fund and results primarily from differences in the tax treatment of real estate investment trust investments.

GSAM has reviewed the Fund's tax positions for all open tax years (the current and prior three years, as applicable) and has concluded that no provision for income tax is required in the Fund's financial statements. Such open tax years remain subject to examination and adjustment by tax authorities.

## 7. OTHER RISKS

The Fund's risks include, but are not limited to, the following:

Large Shareholder Transactions Risk — The Fund may experience adverse effects when certain large shareholders, such as other funds, participating insurance companies, accounts and Goldman Sachs affiliates, purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio. Similarly, large Fund share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash and is required to maintain a larger cash position than it ordinarily would.

Liquidity Risk — The Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value. Liquidity risk may also refer to the risk that a Fund will not be able to pay redemption proceeds within the allowable time period because of unusual market conditions, an unusually high volume of redemption requests, or other reasons. To meet redemption requests, the Fund may be forced to sell investments at an unfavorable time and/or under unfavorable conditions.

Market and Credit Risks — In the normal course of business, the Fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to changes in the market (market risk). Additionally, the Fund may also be exposed to credit risk in the event that an issuer or guarantor fails to perform or that an institution or entity with which the Fund has unsettled or open transactions defaults.

## 8. INDEMNIFICATIONS

Under the Trust's organizational documents, its Trustees, officers, employees and agents are indemnified, to the extent permitted by the Act and state law, against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the course of business, the Fund enters into contracts that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. However, GSAM believes the risk of loss under these arrangements to be remote.

## 9. SUBSEQUENT EVENTS

Subsequent events after the Statement of Assets and Liabilities date have been evaluated through the date the financial statements were issued. GSAM has concluded that there is no impact requiring adjustment or disclosure in the financial statements.

## 10. SUMMARY OF SHARE TRANSACTIONS

Share activity is as follows:

| | For the Fiscal Year Ended December 31, 2015 | | For the Fiscal Year Ended December 31, 2014 | |
|---|---|---|---|---|
| | Shares | Dollars | Shares | Dollars |
| **Institutional Shares** | | | | |
| Shares sold | 1,719,609 | $ 28,721,424 | 1,715,321 | $ 33,575,125 |
| Reinvestment of distributions | 3,114,450 | 44,848,085 | 7,070,766 | 119,849,483 |
| Shares redeemed | (7,566,438) | (128,872,863) | (6,423,243) | (125,120,050) |
| | (2,732,379) | (55,303,354) | 2,362,844 | 28,304,558 |
| **Service Shares** | | | | |
| Shares sold | 2,499,549 | 43,059,384 | 3,196,021 | 64,259,749 |
| Reinvestment of distributions | 1,482,552 | 21,393,222 | 3,617,502 | 61,389,017 |
| Shares redeemed | (6,456,250) | (110,594,491) | (3,169,219) | (61,058,949) |
| | (2,474,149) | (46,141,885) | 3,644,304 | 64,589,817 |
| **NET INCREASE (DECREASE)** | (5,206,528) | $(101,445,239) | 6,007,148 | $ 92,894,375 |

# Report of Independent Registered Public Accounting Firm

To the Board of Trustees and Shareholders of
Goldman Sachs Variable Insurance Trust — Goldman Sachs Mid Cap Value Fund:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of the Goldman Sachs Mid Cap Value Fund (the "Fund"), a Fund of Goldman Sachs Variable Insurance Trust, at December 31, 2015 and the results of its operations, the changes in its net assets and the financial highlights for each of the periods indicated, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2015 by correspondence with the custodian and the application of alternative auditing procedures where confirmation of securities purchased had not been received, provide a reasonable basis for the opinion expressed above.

PricewaterhouseCoopers LLP

Boston, Massachusetts
February 17, 2016

## Fund Expenses — Six Month Period Ended December 31, 2015 (Unaudited)

As a shareholder of Institutional or Service Shares of the Fund, you incur ongoing costs, including management fees, distribution and service (12b-1) fees (with respect to Service Shares) and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Institutional Shares and Service Shares of the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of $1,000 invested at the beginning of the period and held for the entire period from July 1, 2015 through December 31, 2015, which represents a period of 184 days of a 365 day year.

*Actual Expenses* — The first line under each share class in the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000=8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid" to estimate the expenses you paid on your account during this period.

*Hypothetical Example for Comparison Purposes* — The second line under each share class in the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual net expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Funds and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only. As a shareholder of the Fund you do not incur any transaction costs, such as sales charges, redemption fees, or exchange fees, but shareholders of other funds may incur such costs. The second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds whose shareholders may incur transaction costs.

| Share Class | Beginning Account Value 07/01/15 | Ending Account Value 12/31/15 | Expenses Paid for the 6 Months Ended 12/31/15* |
|---|---|---|---|
| **Institutional** | | | |
| Actual | $1,000 | $ 908.10 | $4.09 |
| Hypothetical 5% return | 1,000 | 1,020.92+ | 4.33 |
| **Service** | | | |
| Actual | 1,000 | 906.30 | 5.29 |
| Hypothetical 5% return | 1,000 | 1,019.66+ | 5.60 |

* Expenses are calculated using the Fund's annualized net expense ratio for each class, which represents the ongoing expenses as a percentage of net assets for the six months ended December 31, 2015. Expenses are calculated by multiplying the annualized net expense ratio by the average account value for the period; then multiplying the result by the number of days in the most recent fiscal half year; and then dividing that result by the number of days in the fiscal year. The annualized net expense ratios for the period were 0.85% and 1.10% for Institutional and Service Shares, respectively.

+ Hypothetical expenses are based on the Fund's actual annualized net expense ratios and an assumed rate of return of 5% per year before expenses.

The reports concerning the Fund included in this shareholder report may contain certain forward-looking statements about the factors that may affect the performance of the Fund in the future. These statements are based on Fund management's predictions and expectations concerning certain future events and their expected impact on the Fund, such as performance of the economy as a whole and of specific industry sectors, changes in the levels of interest rates, the impact of developing world events, and other factors that may influence the future performance of the Fund. Management believes these forward-looking statements to be reasonable, although they are inherently uncertain and difficult to predict. Actual events may cause adjustments in portfolio management strategies from those currently expected to be employed.

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities and information regarding how the Fund voted proxies relating to portfolio securities for the 12-month period ended December 31 is available (i) without charge, upon request by calling 1-800-621-2550; and (ii) on the Securities and Exchange Commission ("SEC") web site at *http://www.sec.gov.*

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Form N-Qs are available on the SEC's web site at http://www.sec.gov within 60 days after the Fund's first and third fiscal quarters. The Fund's Form N-Qs may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. and information on the operation of the Public Reference Room may also be obtained by calling 1-800-SEC-0330. Form N-Qs may be obtained upon request and without charge by calling 1-800-621-2550.

Fund holdings and allocations shown are as of December 31, 2015 and may not be representative of future investments. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk.

References to indices, benchmarks or other measures of relative market performance over a specified period of time are provided for your information only and do not imply that the portfolio will achieve similar results. The index composition may not reflect the manner in which a portfolio is constructed. While an adviser seeks to design a portfolio which reflects appropriate risk and return features, portfolio characteristics may deviate from those of the benchmark.

The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of Morgan Stanley Capital international Inc. ("MSCI") and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. ("S&P") and is licensed for use by Goldman Sachs. Neither MSCI, S&P nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

The portfolio risk management process includes an effort to monitor and manage risk, but does not imply low risk.

**Shares of the Goldman Sachs VIT Funds are offered to separate accounts of participating life insurance companies for the purpose of funding variable annuity contracts and variable life insurance policies. Shares of the Fund are not offered directly to the general public. The variable annuity contracts and variable life insurance policies are described in the separate prospectuses issued by participating insurance companies. You should refer to those prospectuses for information about surrender charges, mortality and expense risk fees and other charges that may be assessed by participating insurance companies under the variable annuity contracts or variable life insurance policies. Such fees or charges, if any, may affect the return you may realize with respect to your investments. Ask your representative for more complete information. Please consider a fund's objectives, risks and charges and expenses, and read the prospectus carefully before investing. The prospectus contains this and other information about the Fund.**

# Principal Investment Strategies and Risks

**This is not a complete list of risks that may affect the Fund. For additional information concerning the risks applicable to the Fund, please see the Fund's Prospectuses.**

**Shares of the Goldman Sachs Variable Insurance Trust — Goldman Sachs Small Cap Equity Insights Fund are offered to separate accounts of participating life insurance companies for the purpose of funding variable annuity contracts and variable life insurance policies. Shares of the Fund are not offered directly to the general public. The variable annuity contracts and variable life insurance policies are described in the separate prospectuses issued by participating insurance companies. You should refer to those prospectuses for information about surrender charges, mortality and expense risk fees and other charges that may be assessed by participating insurance companies under the variable annuity contracts or variable life insurance policies. Such fees or charges, if any, may affect the return you realize with respect to your investments. Ask your representative for more complete information. Please consider the Fund's objective, risks and charges and expenses, and read the Prospectus carefully before investing. The Prospectus contains this and other information about the Fund.**

**The Goldman Sachs Small Cap Equity Insights Fund** invests primarily in a broadly diversified portfolio of equity investments in small-capitalization U.S. issuers, including foreign issuers traded in the United States. The Fund's equity investments will be subject to **market risk**, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors and/or general economic conditions. The securities of **mid- and small-capitalization companies** involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements. The Investment Adviser's **use of quantitative models** to execute the Fund's investment strategy may fail to produce the intended result. **Different investment styles** (e.g., "quantitative") tend to shift in and out of favor, and at times the Fund may underperform other funds that invest in similar asset classes. The Fund may have a **high rate of portfolio turnover**, which involves correspondingly greater expenses which must be borne by the Fund, and is also likely to result in short-term capital gains taxable to shareholders.

**INVESTMENT OBJECTIVE**

The Fund seeks long-term growth of capital.

# Portfolio Management Discussion and Analysis

*Below, the Goldman Sachs Quantitative Investment Strategies Team discusses the Goldman Sachs Variable Insurance Trust — Goldman Sachs Small Cap Equity Insights Fund's (the "Fund") performance and positioning for the 12-month period ended December 31, 2015 (the "Reporting Period").*

### *How did the Fund perform during the Reporting Period?*

During the Reporting Period, the Fund's Institutional and Service Shares generated average annual total returns of -2.13% and -2.49%, respectively. These returns compare to the -4.41% average annual total return of the Fund's benchmark, the Russell 2000® Index (with dividends reinvested) (the "Russell Index") during the same time period.

### *What economic and market factors most influenced the equity markets as a whole during the Reporting Period?*

Representing the U.S. equity market, the S&P 500® Index gained 1.38% during the Reporting Period. Central bank policy, a commodity price sell-off, geopolitical tensions, and China and global economic growth concerns were the key themes impacting U.S. equities throughout 2015.

As evidence of a U.S. economic and labor market recovery mounted, market expectations of a Federal Reserve ("Fed") interest rate hike increased. The monetary policy divergence with the European Central Bank and the Bank of Japan, which each eased policy during the calendar year, resulted in relative U.S. dollar strength. This paradoxically hurt U.S. equity performance despite improving domestic economic fundamentals. Also, geopolitical tensions intensified in the summer of 2015, as negotiations between Greece and its creditors unraveled, and the probability of a Greek exit, popularly known in the media as "Grexit," from the euro increased. "Grexit" risk subsequently declined with an agreement in July 2015. However, concerns then escalated around China's economic weakness, exacerbated by a surprise devaluation of its renminbi in August 2015, which further shook market confidence. U.S. equities sold off in the ensuing sharp global equity correction.

After holding the targeted federal funds rate steady in September and October 2015 in light of these external macroeconomic and geopolitical risks, the Fed voted unanimously for a 25 basis point hike in December 2015, a move largely expected by markets. (A basis point is 1/100th of a percentage point.) The fairly dovish language in the Fed's announcement, which emphasized "gradual" adjustments to policy going forward, helped to somewhat assuage the markets.

Oil and commodity prices were "lower for longer" in 2015, as the supply glut took longer than expected to correct and demand concerns arose. Brent crude oil and West Texas Intermediate ("WTI") crude oil prices began 2015 at $57 and $53 per barrel, respectively, already well below 2014 highs of more than $100 per barrel. Both Brent and WTI crude oil prices ended 2015 still lower at approximately $37 per barrel. The U.S. consumer benefited from savings at the gas pump and consumer spending rose, particularly in areas typically associated with lower gas prices, such as autos and restaurants. However, this did not fully offset the negative impact on the U.S. energy industry and industrials companies. As a result, energy was the worst performing sector in the S&P 500 Index by a wide margin during the Reporting Period, followed by materials, utilities and industrials. Conversely, more consumer-oriented sectors, including consumer discretionary, health care, information technology and consumer staples were the best performing sectors in the S&P 500 Index during the Reporting Period.

Within the U.S. equity market, there was significant disparity in performance not only among sectors but also among the various capitalization and style segments. Large-cap stocks, as measured by the Russell 1000® Index, posted modestly positive returns, while mid-cap stocks and small-cap stocks, as measured by the Russell Midcap® Index and Russell 2000® Index, respectively, generated negative returns. Large-cap stocks were most successful relative to small-cap stocks in the consumer discretionary sector. From a style perspective, growth-oriented stocks significantly outpaced value-oriented stocks across the capitalization spectrum. Growth outperformed relative to value during the Reporting Period primarily due to stronger performance of the growth-oriented information technology sector. (All as measured by the Russell Investments indices.)

### *What key factors were responsible for the Fund's performance during the Reporting Period?*

While the Fund's absolute returns disappointed, the Fund outperformed the Russell Index on a relative basis during the Reporting Period. During the Reporting Period, stock selection driven by our quantitative model and four of its six investment themes contributed positively to relative returns.

### *What impact did the Fund's investment themes have on performance during the Reporting Period?*

As expected, and in keeping with our investment approach, our quantitative model and its six investment themes — Valuation, Profitability, Quality, Management, Momentum and Sentiment—had the greatest impact on relative performance. We use these themes to take a long-term view of market patterns and look for inefficiencies, selecting stocks for the Fund and overweighting or underweighting the ones chosen by the model. Over time and by design, the performance of any one of the model's investment themes tends to have a low correlation with the model's other themes, demonstrating the diversification benefit of the Fund's theme-driven quantitative model. The variance in performance supports our research indicating that the diversification provided by the Fund's different investment themes is a significant investment advantage over the long term, even though the Fund may experience underperformance in the short term. Of course, diversification does not protect an investor from market risk nor does it ensure a profit.

During the Reporting Period, four of our six investment themes contributed positively to the Fund's relative performance. The Sentiment theme contributed most positively to relative performance, followed by Momentum, Quality and Profitability. The Sentiment theme reflects selected investment views and decisions of individuals and financial intermediaries. The Momentum theme seeks to predict drifts in stock prices caused by delayed investor reaction to company-specific information and information about related companies. The Quality theme assesses both firm and financial quality. The Profitability theme assesses whether a company is earning more than its cost of capital.

The Fund's Valuation theme detracted from the Fund's relative performance. Valuation attempts to capture potential mispricings of securities, typically by comparing a measure of the company's intrinsic value to its market value.

The Management theme had a rather neutral effect on the Fund's relative performance during the Reporting Period. The Management theme assesses the characteristics, policies and strategic decisions of company management.

### *How did the Fund's sector and industry allocations affect relative performance?*

In constructing the Fund's portfolio, we focus on picking stocks rather than making industry or sector bets. Consequently, the Fund is similar to its benchmark, the Russell Index, in terms of its sector allocation and style. We manage the Fund's industry and sector exposure by including industry factors in our risk model and by explicitly penalizing industry and sector deviations from the benchmark index in optimization. Sector weights or changes in weights generally do not have a meaningful impact on relative performance.

### *Did stock selection help or hurt Fund performance during the Reporting Period?*

We seek to outpace the Russell Index by overweighting stocks that we expect to outperform and underweighting those that we think may lag. We also build positions based on our thematic views. For example, the Fund aims to hold a basket of stocks with more favorable Momentum characteristics than the benchmark index. During the Reporting Period, stock selection overall contributed positively to the Fund's relative performance.

Security selection in the industrials, energy and health care sectors contributed most positively to the Fund's relative returns. Stock selection in utilities was the only sector to detract from the Fund's results relative to the Russell Index during the Reporting Period.

### *Which individual stock positions contributed the most to the Fund's relative returns during the Reporting Period?*

The Fund benefited most from overweight positions in biopharmaceutical company Dyax and biotechnology companies Ligand Pharmaceuticals and Repligen. We chose to overweight Dyax because of our positive views on Sentiment and Profitability. Our positive views on Value and Profitability led us to overweight Ligand Pharmaceuticals. The Fund was overweight Repligen due to our positive views on Quality and Sentiment.

### *Which individual positions detracted from the Fund's results during the Reporting Period?*

Detracting most from the Fund's results relative to its benchmark index were overweight positions in utilities company Talen Energy, biopharmaceuticals company AMAG Pharmaceuticals and commercial printer Quad/Graphics. The Fund was overweight Talen Energy due to our positive views on Momentum and Quality. Our positive views on Value and Sentiment led us to overweight AMAG Pharmaceuticals. We chose to overweight Quad/Graphics because of our positive views on Value and Management.

***How did the Fund use derivatives during the Reporting Period?***

During the Reporting Period, we did not use derivatives as part of an active management strategy to add value to the Fund's results. However, we used equity index futures contracts, on an opportunistic basis, to equitize the Fund's excess cash holdings. In other words, we put the Fund's excess cash holdings to work by using them as collateral for the purchase of stock futures.

***Did you make any enhancements to your quantitative models during the Reporting Period?***

We continuously look for ways to improve our investment process. We made no significant changes to our quantitative models during the first quarter of 2015. In the second quarter of 2015, we made a number of enhancements across a variety of investment themes. First, we made two enhancements to our Sentiment theme. The first enhancement was in the U.S., Europe and Japan investment regions, where we introduced a signal that uses the credit default swap ("CDS") spread of a company as an early indicator of potential stock price swings. We use data on single-name CDS spreads for more than 300 companies on a daily basis to arrive at our views. The second enhancement was in the U.S. investment region, where we introduced a signal that uses stock options data of a company as a potential indicator of stock mispricing. Due to fewer restrictions on leverage and short-selling, options markets typically incorporate information more efficiently than equity markets. Due to the broad availability of options data on U.S. equities, we can form views on the majority of stocks in our investment universe using this signal.

We also enhanced our Profitability theme in the U.S. by introducing a signal that analyzes web traffic data of companies to provide an insight into future revenues. We analyzed this information for more than 1,700 stocks in the U.S., spanning across various sectors.

Additionally, we expanded the scope of signals within our global linkages theme. We extended an economic linkage signal, which analyzes patent data, from the U.S. and Japan to Europe. We analyzed more than 3.5 million patents globally to establish the economic linkages between companies in various industries. We believe these linkages help predict price movements across similar companies more accurately.

We made no significant changes to our quantitative models during the third quarter of 2015. During the fourth quarter of 2015, we made a number of enhancements across a variety of investment themes. We enhanced our Management theme in the U.S., Europe and Emerging Markets investment regions by expanding the scope of an existing signal that looks at managements' personal transactions in the stock of their respective company. Corporate executives purchasing or selling shares can potentially signal their conviction in the company's stock when assessed under the right circumstances. We obtain and analyze this information through regulatory filings for more than 7,500 companies globally. We expanded the scope of two signals within our Global Linkages theme. We extended a signal, which analyzes patent data to identify economically linked companies, to all investment regions. We now analyze about 40 million patents from various patent offices for more than 3,000 companies globally to establish the economic linkages between stocks of various industries. We also extended a signal that establishes economic linkages between companies in the automotive supply chain from Japan to the U.S. and Europe investment regions. We take a differentiated, region-specific approach and analyze the potential relationships between the stock returns of suppliers and manufacturers multiple levels down the supply chain. Lastly, we extended a signal within our Profitability theme from the U.S. to the Emerging Markets and Japan investment regions. The signal analyzes web traffic data, which we believe can potentially forecast corporate revenue growth. We analyze this information for about 4,000 companies spanning across various sectors.

***What was the Fund's sector positioning relative to its benchmark index at the end of the Reporting Period?***

As of December 31, 2015, the Fund was overweight the industrials, consumer discretionary, materials and energy sectors relative to the Russell Index. The Fund was underweight utilities, consumer staples, financials and information technology and was rather neutrally weighted in health care and telecommunication services compared to the benchmark index on the same date.

***Were there any changes to the Fund's portfolio management team during the Reporting Period?***

During the Reporting Period, one Vice President left the Equity Alpha team. Quantitative Investment Strategies employs a globally integrated team of more than 90 professionals, with an additional 90-plus professionals dedicated to trading, information technology and development of analytical tools.

### *What is your strategy going forward for the Fund?*

Looking ahead, we continue to believe that less expensive stocks should outpace more expensive stocks, and stocks with good momentum are likely to outperform those with poor momentum. We intend to maintain our focus on seeking companies about which fundamental research analysts are becoming more positive as well as profitable companies with sustainable earnings and a track record of using their capital to enhance shareholder value. As such, we anticipate remaining fully invested with long-term performance likely to be the result of stock selection rather than sector or capitalization allocations.

We stand behind our investment philosophy that sound economic investment principles, coupled with a disciplined quantitative approach, can provide strong, uncorrelated returns over the long term. Our research agenda is robust, and we continue to enhance our existing models, add new proprietary forecasting signals and improve our trading execution as we seek to provide the most value to our shareholders.

### *Changes to the Fund's Portfolio Management Team after the Reporting Period*

After the close of the Reporting Period, on February 5, 2016, Ron Hua, Chief Investment Officer of Equity Alpha Strategies for the Quantitative Investment Strategies ("QIS") Team, announced his intention to retire from Goldman Sachs Asset Management, L.P. ("GSAM"). As such, effective that date, Mr. Hua no longer had portfolio management responsibilities for the Fund. Effective February 5, 2016, joining Fund portfolio managers Len Ioffe, Osman Ali and Dennis Walsh is Armen Avanessians, the Chief Investment Officer of GSAM's QIS Team, overseeing research, portfolio management and implementation for all QIS investment strategies globally. As always, the Quantitative Investment Strategies platform is organized into a series of specialist portfolio management teams that focus on generating and implementing investment ideas within their area of expertise. Investment decisions are made by these portfolio management teams, rather than by one portfolio manager or committee. Ultimate accountability for the Fund resides with the senior portfolio managers dedicated to each Team strategy, who oversee their respective research, portfolio management and implementation processes.

# Index Definitions

The Russell 2000® Index (with dividends reinvested) is an unmanaged index of common stock prices that measures the performance of the 2000 smallest companies in the Russell 3000® Index. The figures for the Index do not include any deduction for fees, expenses or taxes. It is not possible to invest directly in an index.

The S&P 500® Index (with dividends reinvested) is the Standard & Poor's 500 Composite Index of 500 stocks, an unmanaged index of common stock prices. The figures for the Index do not include any deduction for fees, expenses or taxes. It is not possible to invest directly in an index.

The Russell Midcap® Index measures the performance of the 800 smallest companies in the Russell 1000® Index, which represent approximately 25% of the total market capitalization of the Russell 1000 Index. It is not possible to invest directly in an index.

The Russell 1000® Index measures the performance of the 1,000 largest companies in the Russell 3000® Index, which represents approximately 92% of the total market capitalization of the Russell 3000 Index. It is not possible to invest directly in an index.

# Small Cap Equity Insights Fund

*as of December 31, 2015*

## STANDARDIZED TOTAL RETURNS[1]

| For the period ended 12/31/15 | One Year | Five Years | Ten Years | Since Inception | Inception Date |
|---|---|---|---|---|---|
| Institutional | -2.13% | 10.02% | 5.18% | 6.09% | 2/13/98 |
| Service | -2.49 | 9.73 | N/A | 6.02 | 8/31/07 |

[1] **The Standardized Total Returns are average annual total returns as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value ("NAV"). Because Institutional Shares and Service Shares do not involve a sales charge, such a charge is not applied to their Standardized Total Returns.**

**Total return figures in the above chart represent past performance and do not indicate future results, which will vary. The investment return and principal value of an investment will fluctuate and, therefore, an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the total return figures in the above chart. Please visit www.GSAMFUNDS.com to obtain the most recent month-end returns.** Performance reflects fee waivers and/or expense limitations in effect during the periods shown. In their absence, performance would be reduced.

## EXPENSE RATIOS[2]

| | Net Expense Ratio (Current) | Gross Expense Ratio (Before Waivers) |
|---|---|---|
| Institutional | 0.83% | 1.04% |
| Service | 1.08 | 1.29 |

[2] The expense ratios of the Fund, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations) are as set forth above according to the most recent publicly available Prospectus for the Fund and may differ from the expense ratios disclosed in the Financial Highlights in this report. Pursuant to a contractual arrangement, the Fund's waivers and/or expense limitations will remain in place through at least April 30, 2016 and prior to such date the Investment Adviser may not terminate the arrangements without the approval of the Fund's Board of Trustees. If these arrangements are discontinued in the future, the expense ratios may change without shareholder approval.

## TOP TEN HOLDINGS AS OF 12/31/15[3,4]

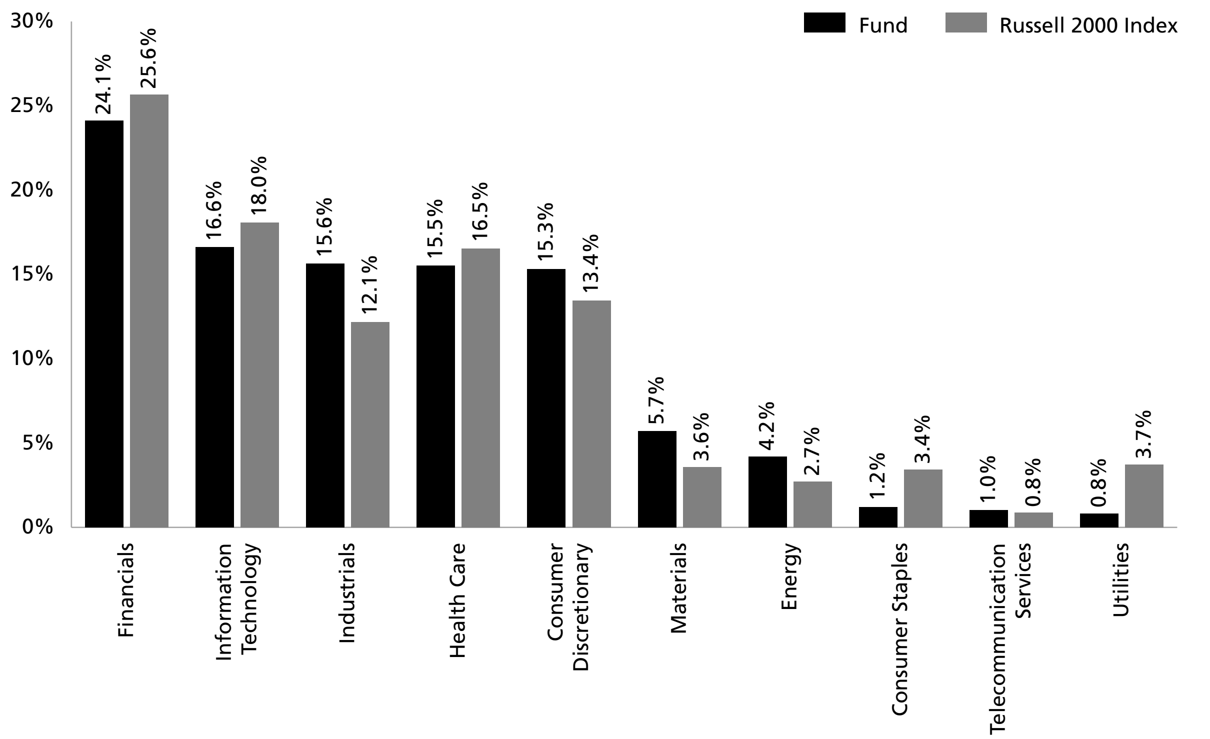
| Holding | % of Net Assets | Line of Business |
|---|---|---|
| CubeSmart. | 1.0% | Real Estate Investment Trust |
| Berry Plastics Group, Inc. | 0.9 | Materials |
| Anacor Pharmaceuticals, Inc. | 0.9 | Pharmaceuticals, Biotechnology & Life Sciences |
| CyrusOne, Inc. | 0.8 | Real Estate Investment Trust |
| West Pharmaceutical Services, Inc. | 0.8 | Health Care Equipment & Services |
| EMCOR Group, Inc. | 0.8 | Capital Goods |
| PS Business Parks, Inc. | 0.8 | Real Estate Investment Trust |
| Sonic Corp. | 0.8 | Consumer Services |
| Cepheid, Inc. | 0.8 | Pharmaceuticals, Biotechnology & Life Sciences |
| Mack-Cali Realty Corp. | 0.8 | Real Estate Investment Trust |

[3] The top 10 holdings may not be representative of the Fund's future investments.

[4] The Fund's overall top ten holdings differ from the table above due to the exclusion of the Goldman Sachs Financial Square Money Market Fund (a securities lending reinvestment vehicle) which represents 2.4% of the Fund's net assets as of 12/31/2015.

**FUND VS. BENCHMARK SECTOR ALLOCATIONS[5]**

**As of December 31, 2015**



[5] The Fund is actively managed and, as such, its composition may differ over time. Consequently, the Fund's overall sector allocations may differ from percentages contained in the graph above. The graph categorizes investments using Global Industry Classification Standard ("GICS"), however, the sector classifications used by the portfolio management team may differ from GICS. The percentage shown for each investment category reflects the value of investments in that category as a percentage of total market value (excluding investments in the securities lending reinvestment vehicle, if any). Underlying sector allocations of Exchange Traded Funds and Investment Companies held by the Fund are not reflected in the graph above. Investments in the securities lending reinvestment vehicle represented 2.4% of the Fund's net assets at December 31, 2015. The graph depicts the Fund's investments but may not represent the Fund's market exposure due to the exclusion of certain derivatives, if any, as listed in the Additional Investment Information section of the Schedule of Investments.

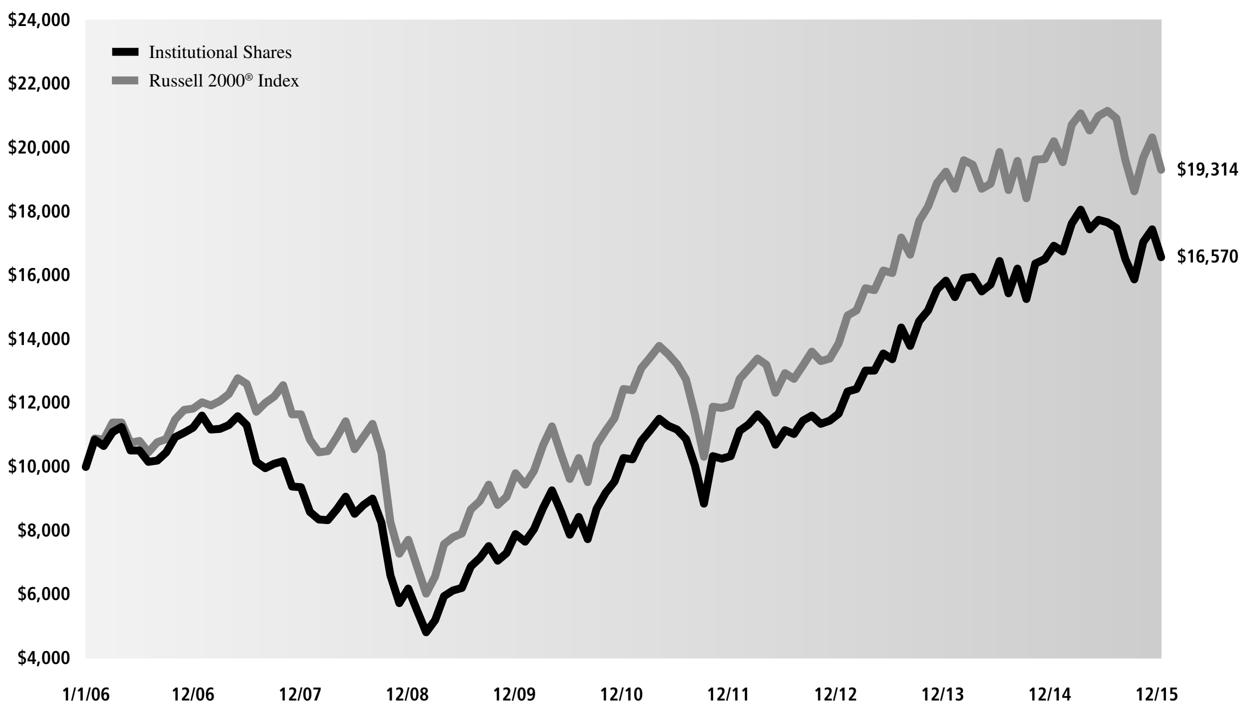
# Performance Summary

*December 31, 2015*

The following graph shows the value, as of December 31, 2015, of a $10,000 investment made on January 1, 2006 in Institutional Shares at NAV. For comparative purposes, the performance of the Fund's benchmark, the Russell 2000® Index (with distributions reinvested), is shown. This performance data represents past performance and should not be considered indicative of future performance, which will fluctuate with changes in market conditions. These performance fluctuations will cause an investor's shares, when redeemed, to be worth more or less than their original cost. Performance reflects Fund level expenses but does not reflect fees and expenses associated with any variable annuity contract or variable life insurance policy that uses the Fund as an investment option for any contract or policy. Had performance reflected all of those fees and expenses, performance would have been reduced. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown, and in their absence, performance would be reduced. Performance of Service Shares will vary from Institutional Shares due to differences in class specific fees. In addition to the Investment Adviser's decisions regarding issuer/industry investment selection and allocation, other factors may affect Fund performance. These factors include, but are not limited to, Fund operating fees and expenses, portfolio turnover, and subscription and redemption cash flows affecting the Fund.

**Small Cap Equity Insights Fund's 10 Year Performance**

**Performance of a $10,000 investment, with distributions reinvested, from January 1, 2006 through December 31, 2015.**



| Average Annual Total Return through December 31, 2015 | One Year | Five Years | Ten Years | Since Inception |
|---|---|---|---|---|
| **Institutional (Commenced February 13, 1998)** | -2.13% | 10.02% | 5.18% | 6.09% |
| **Service (Commenced August 31, 2007)** | -2.49% | 9.73% | N/A | 6.02% |

* Non-income producing security.

(a) All or a portion of security is on loan.

(b) All or a portion of security is segregated as collateral for initial margin requirements on futures transactions.

(c) Represents an affiliated issuer.

(d) Variable rate security. Interest rate or distribution rate disclosed is that which is in effect on December 31, 2015.

## ADDITIONAL INVESTMENT INFORMATION

FUTURES CONTRACTS — At December 31, 2015, the Fund had the following futures contracts:

| Type | Number of Contracts Long (Short) | Expiration Date | Current Value | Unrealized Gain (Loss) |
|---|---|---|---|---|
| Russell 2000 Mini Index | 13 | March 2016 | $1,470,950 | $3,682 |

# Statement of Assets and Liabilities

*December 31, 2015*

| | |
|---|---|
| **Assets:** | |
| Investments in unaffiliated issuers, at value (cost $91,464,729)[a] | $90,493,700 |
| Investments in affiliated securities lending reinvestment vehicle, at value which equals cost | 2,188,175 |
| Cash | 2,265,036 |
| Receivables: | |
| Dividends | 148,081 |
| Fund shares sold | 4,314 |
| Reimbursement from investment adviser | 1,867 |
| Securities lending income | 1,578 |
| **Total assets** | 95,102,751 |
| **Liabilities:** | |
| Variation margin on certain derivative contracts | 14,940 |
| Payables: | |
| Payable upon return of securities loaned | 2,188,175 |
| Management fees | 56,131 |
| Fund shares redeemed | 16,990 |
| Distribution and Service fees and Transfer Agency fees | 5,813 |
| Accrued expenses | 62,710 |
| **Total liabilities** | 2,344,759 |
| **Net Assets:** | |
| Paid-in capital | 92,666,446 |
| Undistributed net investment income | 501,507 |
| Accumulated net realized gain | 557,386 |
| Net unrealized loss | (967,347) |

| 2012 - Institutional | 11.40 | 0.19[f] | 1.27[g] | 1.46 | (0.15) | — | (0.15) | 12.71 | 12.79[g] | 82,961 | 0.81 | 0.97 | 1.55[f] | 95 |
| 2012 - Service | 11.35 | 0.17[f] | 1.25[g] | 1.42 | (0.12) | — | (0.12) | 12.65 | 12.47[g] | 22,674 | 1.06 | 1.22 | 1.34[f] | 95 |
| 2011 - Institutional | 11.42 | 0.06[h] | 0.02[i] | 0.08 | (0.10) | — | (0.10) | 11.40 | 0.67 | 87,956 | 0.83 | 0.99 | 0.55[h] | 33 |
| 2011 - Service | 11.37 | 0.03[h] | 0.02[i] | 0.05 | (0.07) | — | (0.07) | 11.35 | 0.41 | 22,973 | 1.08 | 1.24 | 0.30[h] | 33 |

(a) Calculated based on the average shares outstanding methodology.
(b) Assumes investment at the net asset value at the beginning of the year, reinvestment of all distributions, and a complete redemption of the investment at the net asset value at the end of the year.
(c) The Fund's portfolio turnover rate is calculated in accordance with regulatory requirements, without regard to transactions involving short term investments and certain derivatives. If such transactions were included, the Fund's portfolio turnover rate may be higher.
(d) Reflects income recognized from special dividends which amounted to $0.02 per share and 0.15% of average net assets.
(e) Amount is less than $0.005 per share.
(f) Reflects income recognized from special dividends which amounted to $0.08 per share and 0.62% of average net assets.
(g) Reflects payment from affiliate relating to certain investment transactions which amounted to $0.08 per share. Excluding such payment, the total return would have been 12.44% and 12.12%, respectively.
(h) Reflects income recognized from special dividends which amounted to $0.02 per share and 0.21% of average net assets.
(i) Reflects an increase of $0.02 due to payments received for class action settlements received this year.

# Notes to Financial Statements

*December 31, 2015*

## 1. ORGANIZATION

Goldman Sachs Variable Insurance Trust (the "Trust" or "VIT") is a Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the "Act"), as an open-end management investment company. The Trust includes the Goldman Sachs Small Cap Equity Insights Fund (the "Fund"). The Fund is a diversified portfolio under the Act offering two classes of shares — Institutional and Service Shares. Shares of the Trust are offered to separate accounts of participating life insurance companies for the purpose of funding variable annuity contracts and variable life insurance policies.

Goldman Sachs Asset Management, L.P. ("GSAM"), an affiliate of Goldman, Sachs & Co. ("Goldman Sachs"), serves as investment adviser to the Fund pursuant to a management agreement (the "Agreement") with the Trust.

## 2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and require management to make estimates and assumptions that may affect the reported amounts and disclosures. Actual results may differ from those estimates and assumptions.

A. Investment Valuation — The Fund's valuation policy is to value investments at fair value.

B. Investment Income and Investments — Investment income includes interest income and dividend income, net of any foreign withholding taxes, less any amounts reclaimable. Interest income is accrued daily and adjusted for amortization of premiums and accretion of discounts. Dividend income is recognized on ex-dividend date or, for certain foreign securities, as soon as such information is obtained subsequent to the ex-dividend date. Investment transactions are reflected on trade date. Realized gains and losses are calculated using identified cost. Investment transactions are recorded on the following business day for daily net asset value ("NAV") calculations. Any foreign capital gains tax is accrued daily based upon net unrealized gains, and is payable upon sale of such investments. Distributions received from the Fund's investments in United States ("U.S.") real estate investment trusts ("REITs") may be characterized as ordinary income, net capital gain or a return of capital. A return of capital is recorded by the Fund as a reduction to the cost basis of the REIT.

For derivative contracts, realized gains and losses are recorded upon settlement of the contract.

C. Class Allocations and Expenses — Investment income, realized and unrealized gain (loss), and non-class specific expenses of the Fund are allocated daily based upon the proportion of net assets of each class. Non-class specific expenses directly incurred by a Fund are charged to that Fund, while such expenses incurred by the Trust are allocated across the applicable Funds on a straight-line and/or pro-rata basis depending upon the nature of the expenses. Class specific expenses, where applicable, are borne by the respective share classes and include Distribution and Service and Transfer Agency fees.

D. Federal Taxes and Distributions to Shareholders — It is the Fund's policy to comply with the requirements of the Internal Revenue Code of 1986, as amended (the "Code"), applicable to regulated investment companies (mutual funds) and to distribute each year substantially all of its investment company taxable income and capital gains to its shareholders. Accordingly, the Fund is not required to make any provisions for the payment of federal income tax. Distributions to shareholders are recorded on the ex-dividend date. Income and capital gains distributions, if any, are declared and paid annually.

Net capital losses are carried forward to future fiscal years and may be used to the extent allowed by the Code to offset any future capital gains. Losses that are carried forward will retain their character as either short-term or long-term capital losses. Utilization of capital loss carryforwards will reduce the requirement of future capital gains distributions.

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with federal income tax rules, which may differ from GAAP. The source of the Fund's distributions may be shown in the accompanying financial statements as either from net investment income, net realized gain or capital. Certain components of the Fund's net assets on the Statement of Assets and Liabilities reflect permanent GAAP/tax differences based on the appropriate tax character.

## 3. INVESTMENTS AND FAIR VALUE MEASUREMENTS

The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price). GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The levels used for classifying investments are not necessarily an indication of the risk associated with investing in these investments. The three levels of the fair value hierarchy are described below:

Level 1 — Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
Level 2 — Quoted prices in markets that are not active or financial instruments for which significant inputs are observable (including, but not limited to, quoted prices for similar investments, interest rates, foreign exchange rates, volatility and credit spreads), either directly or indirectly;
Level 3 — Prices or valuations that require significant unobservable inputs (including GSAM's assumptions in determining fair value measurement).

Changes in valuation techniques may result in transfers into or out of an assigned level within the hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value hierarchy resulting from such changes are deemed to have occurred as of the beginning of the reporting period.

The Board of Trustees ("Trustees") has approved Valuation Procedures that govern the valuation of the portfolio investments held by the Fund, including investments for which market quotations are not readily available. The Trustees have delegated to GSAM day-to-day responsibility for implementing and maintaining internal controls and procedures related to the valuation of the Fund's portfolio investments. To assess the continuing appropriateness of pricing sources and methodologies, GSAM regularly performs price verification procedures and issues challenges as necessary to third party pricing vendors or brokers, and any differences are reviewed in accordance with the Valuation Procedures.

A. Level 1 and Level 2 Fair Value Investments — The valuation techniques and significant inputs used in determining the fair values for investments classified as Level 1 and Level 2 are as follows:

Equity Securities — Equity securities traded on a U.S. securities exchange or the NASDAQ system, or those located on certain foreign exchanges, including but not limited to the Americas, are valued daily at their last sale price or official closing price on the principal exchange or system on which they are traded. If there is no sale or official closing price or such price is believed by GSAM to not represent fair value, equity securities are valued at the last bid price for long positions and at the last ask price for short positions. To the extent these investments are actively traded, they are classified as Level 1 of the fair value hierarchy, otherwise they are generally classified as Level 2.

Unlisted equity securities for which market quotations are available are valued at the last sale price on the valuation date, or if no sale occurs, at the last bid price. These investments are generally classified as Level 2 of the fair value hierarchy.

Money Market Funds — Investments in the Goldman Sachs Financial Square Money Market Fund ("Underlying Fund") are valued at the NAV of the FST Share class on the day of valuation. These investments are generally classified as Level 1 of the fair value hierarchy. For information regarding an Underlying Fund's accounting policies and investment holdings, please see the Underlying Fund's shareholder report.

Derivative Contracts — A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. The Fund enters into derivative transactions to hedge against changes in interest rates, securities prices, and/or currency exchange rates, to increase total return, or to gain access to certain markets or attain exposure to other underliers.

Exchange-traded derivatives, including futures and options contracts, are valued at the last sale or settlement price and typically fall within Level 1 of the fair value hierarchy. Over-the-counter ("OTC") and centrally cleared derivatives are valued using market transactions and other market evidence, including market-based inputs to models, calibration to market-clearing

# Notes to Financial Statements (continued)

*December 31, 2015*

## 3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

transactions, broker or dealer quotations, or other alternative pricing sources. Where models are used, the selection of a particular model to value OTC and centrally cleared derivatives depends upon the contractual terms of, and specific risks inherent in, the instrument, as well as the availability of pricing information in the market. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, voluntary and involuntary prepayment rates, loss severity rates and correlations of such inputs. For OTC and centrally cleared derivatives that trade in liquid markets, model inputs can generally be verified and model selection does not involve significant management judgment. OTC and centrally cleared derivatives are classified within Level 2 of the fair value hierarchy when significant inputs are corroborated by market evidence.

i. Futures Contracts — Futures contracts are contracts to buy or sell a standardized quantity of a specified commodity or security and are valued based on exchanged settlement prices or independent market quotes. Futures contracts are valued at the last settlement price, or in the absence of a sale, the last bid price for long positions and at the last ask price for short positions, at the end of each day on the board of trade or exchange upon which they are traded. Upon entering into a futures contract, the Fund deposits cash or securities in an account on behalf of the broker in an amount sufficient to meet the initial margin requirement. Subsequent payments are made or received by the Fund equal to the daily change in the contract value and are recorded as variation margin receivable or payable with a corresponding offset to unrealized gains or losses.

B. Level 3 Fair Value Investments — To the extent that significant inputs to valuation models and other alternative pricing sources are unobservable, or if quotations are not readily available, or if GSAM believes that such quotations do not accurately reflect fair value, the fair value of the Fund's investments may be determined under Valuation Procedures approved by the Trustees. GSAM, consistent with its procedures and applicable regulatory guidance, may make an adjustment to the most recent valuation prices of either domestic or foreign securities in light of significant events to reflect what it believes to be the fair value of the securities at the time of determining a Fund's NAV. Significant events which could affect a large number of securities in a particular market may include, but are not limited to: significant fluctuations in U.S. or foreign markets; market dislocations; market disruptions; or unscheduled market closings. Significant events which could also affect a single issuer may include, but are not limited to: corporate actions such as reorganizations, mergers and buy-outs; ratings downgrades; and bankruptcies.

C. Fair Value Hierarchy — The following is a summary of the Fund's investments and derivatives classified in the fair value hierarchy as of December 31, 2015:

| Investment Type | Level 1 | Level 2 | Level 3 |
|---|---|---|---|
| **Assets** | | | |
| Common Stock and/or Other Equity Investments[(a)] | | | |
| North America | $90,493,700 | $— | $— |
| Securities Lending Reinvestment Vehicle | 2,188,175 | — | — |
| **Total** | $92,681,875 | $— | $— |
| **Derivative Type** | | | |
| **Assets[(b)]** | | | |
| Futures Contracts | $ 3,682 | $— | $— |

(a) Amounts are disclosed by continent to highlight the impact of time zone differences between local market close and the calculation of NAV. Security valuations are based on the principal exchange or system on which they are traded, which may differ from country of domicile.
(b) Amount shown represents unrealized gain (loss) at fiscal year end.

For further information regarding security characteristics, see the Schedule of Investments.

## 4. INVESTMENTS IN DERIVATIVES

The following table sets forth, by certain risk types, the gross value of derivative contracts as of December 31, 2015. These instruments were used as part of the Fund's investment strategies and to obtain and/or manage exposure related to the risks below. The values in the table below exclude the effects of cash collateral received or posted pursuant to these derivative contracts, and therefore are not representative of the Fund's net exposure.

| Risk | Statement of Assets and Liabilities | Assets[(a)] |
|---|---|---|
| Equity | Variation margin on certain derivative contracts | $3,682 |

(a) Includes unrealized gain (loss) on futures contracts described in the Additional Investment Information section of the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.

The following table sets forth, by certain risk types, the Fund's gains (losses) related to these derivatives and their indicative volumes for the fiscal year ended December 31, 2015. These gains (losses) should be considered in the context that these derivative contracts may have been executed to create investment opportunities and/or economically hedge certain investments, and accordingly, certain gains (losses) on such derivative contracts may offset certain (losses) gains attributable to investments. These gains (losses) are included in "Net realized gain (loss)" or "Net change in unrealized gain (loss)" on the Statement of Operations:

| Risk | Statement of Operations | Net Realized Gain (Loss) | Net Change in Unrealized Gain (Loss) | Average Number of Contracts[(a)] |
|---|---|---|---|---|
| Equity | Net realized gain (loss) from futures contracts/Net change in unrealized gain (loss) on futures contracts | $(64,608) | $(43,854) | 10 |

(a) Average number of contracts is based on the average of month end balances for the fiscal year ended December 31, 2015.

## 5. AGREEMENTS AND AFFILIATED TRANSACTIONS

**A. Management Agreement** — Under the Agreement, GSAM manages the Fund, subject to the general supervision of the Trustees.

As compensation for the services rendered pursuant to the Agreement, the assumption of the expenses related thereto and administration of the Fund's business affairs, including providing facilities, GSAM is entitled to a management fee, accrued daily and paid monthly, equal to an annual percentage rate of the Fund's average daily net assets.

For the fiscal year ended December 31, 2015, contractual and effective net management fees with GSAM were at the following rates:

| Contractual Management Rate | | | | | |
|---|---|---|---|---|---|
| First $2 billion | Next $3 billion | Next $3 billion | Over $8 billion | Effective Rate | Effective Net Management Rate^ |
| 0.75% | 0.68% | 0.65% | 0.64% | 0.75% | 0.70%* |

^ Effective Net Management Rate includes the impact of management fee waivers of affiliated underlying funds, if any.

* GSAM agreed to waive a portion of its management fee in order to achieve a net management rate, as defined in the Fund's most recent prospectus. This waiver will be effective through at least April 30, 2016, and prior to such date GSAM may not terminate the arrangement without approval of the Trustees. For the fiscal year ended December 31, 2015, GSAM waived $52,019 of its management fee.

**B. Distribution and Service Plan** — The Trust, on behalf of the Service Shares of the Fund, has adopted a Distribution and Service Plan (the "Plan"). Under the Plan, Goldman Sachs, which serves as distributor (the "Distributor"), is entitled to a fee accrued daily and paid monthly, for distribution services and personal and account maintenance services, which may then be paid by Goldman Sachs to authorized dealers, equal to, on an annual basis, 0.25% of the Fund's average daily net assets attributable to Service Shares.

# Notes to Financial Statements (continued)

*December 31, 2015*

## 5. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

**C. Transfer Agency Agreement** — Goldman Sachs also serves as the transfer agent of the Fund for a fee pursuant to the Transfer Agency Agreement. The fees charged for such transfer agency services are accrued daily and paid monthly at an annual rate of 0.02% of the average daily net assets of Institutional and Service Shares.

**D. Other Expense Agreements and Affiliated Transactions** — GSAM has agreed to limit certain "Other Expenses" of the Fund (excluding acquired fund fees and expenses, transfer agency fees and expenses, taxes, interest, brokerage fees, shareholder meeting, litigation, indemnification, and extraordinary expenses) to the extent such expenses exceed, on an annual basis, a percentage rate of the average daily net assets of the Fund. Such Other Expense reimbursements, if any, are accrued daily and paid monthly. In addition, the Fund is not obligated to reimburse GSAM for prior fiscal year expense reimbursements, if any. The Other Expense limitation as an annual percentage rate of average daily net assets for the Fund is 0.094%. The Other Expense limitation will remain in place through at least April 30, 2016, and prior to such date GSAM may not terminate the arrangement without the approval of the Trustees. For the fiscal year ended December 31, 2015, GSAM reimbursed $131,296 to the Fund. In addition, the Fund has entered into certain offset arrangements with the custodian and the transfer agent, which may result in a reduction of the Fund's expenses and are received irrespective of the application of the "Other Expense" limitation described above. For the fiscal year ended December 31, 2015, custody fee credits were $2,483.

**E. Line of Credit Facility** — As of December 31, 2015, the Fund participated in a $1,205,000,000 committed, unsecured revolving line of credit facility (the "facility") together with other funds of the Trust and certain registered investment companies having management agreements with GSAM or its affiliates ("Other Borrowers"). Pursuant to the terms of the facility, the Fund and Other Borrowers could increase the credit amount by up to an additional $115,000,000, for a total of up to $1,320,000,000. This facility is to be used for temporary emergency purposes, or to allow for an orderly liquidation of securities to meet redemption requests. The interest rate on borrowings is based on the federal funds rate. The facility also requires a fee to be paid by the Fund based on the amount of the commitment that has not been utilized. For the fiscal year ended December 31, 2015, the Fund did not have any borrowings under the facility.

**F. Other Transactions with Affiliates** — For the fiscal year ended December 31, 2015, Goldman Sachs earned $284 in brokerage commissions from portfolio transactions, including futures transactions executed with Goldman Sachs as the Futures Commission Merchant, on behalf of the Fund.

## 6. PORTFOLIO SECURITIES TRANSACTIONS

The cost of purchases and proceeds from sales and maturities of long-term securities for the fiscal year ended December 31, 2015, were $125,014,702 and $139,757,832, respectively.

## 7. SECURITIES LENDING

Pursuant to exemptive relief granted by the Securities and Exchange Commission ("SEC") and the terms and conditions contained therein, the Fund may lend its securities through a securities lending agent, Goldman Sachs Agency Lending ("GSAL"), a wholly-owned subsidiary of Goldman Sachs, to certain qualified borrowers including Goldman Sachs and affiliates. In accordance with the Fund's securities lending procedures, the Fund receives cash collateral at least equal to the market value of the securities on loan. The market value of the loaned securities is determined at the close of business of the Fund, at their last sale price or official closing price on the principal exchange or system on which they are traded, and any additional required collateral is delivered to the Fund on the next business day. As with other extensions of credit, the Fund may experience delay in the recovery of its securities or incur a loss should the borrower of the securities breach its agreement with the Fund or become insolvent at a time when the collateral is insufficient to cover the cost of repurchasing securities on loan. Dividend income received from securities on loan may not be

## 7. SECURITIES LENDING (continued)

subject to withholding taxes and therefore withholding taxes paid may differ from the amounts listed in the Statement of Operations. Loans of securities are terminable at any time and as such 1) the remaining contractual maturities of the outstanding securities lending transactions are considered to be overnight and continuous and 2) the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions.

The Fund invests the cash collateral received in connection with securities lending transactions in the Goldman Sachs Financial Square Money Market Fund ("Money Market Fund"), an affiliated series of the Trust. The Money Market Fund is registered under the Act as an open end investment company, is subject to Rule 2a-7 under the Act, and is managed by GSAM, for which GSAM may receive an investment advisory fee of up to 0.205% on an annualized basis of the average daily net assets of the Money Market Fund.

In the event of a default by a borrower with respect to any loan, GSAL will exercise any and all remedies provided under the applicable borrower agreement to make the Fund whole. These remedies include purchasing replacement securities by applying the collateral held from the defaulting broker against the purchase cost of the replacement securities. If, despite such efforts by GSAL to exercise these remedies, the Fund sustains losses as a result of a borrower's default, GSAL indemnifies the Funds by purchasing replacement securities at GSAL's expense, or paying the Funds an amount equal to the market value of the replacement securities, subject to an exclusion for any shortfalls resulting from a loss of value in the cash collateral pool due to reinvestment risk and a requirement that the Fund agrees to assign rights to the collateral to GSAL for purpose of using the collateral to cover purchase of replacement securities as more fully described in the Securities Lending Agency Agreement. The Fund's loaned securities were all subject to enforceable Securities Lending Agreements and the value of the collateral is at least equal to the value of the cash received. The value of loaned securities and cash collateral at period end are disclosed in the Fund's Statement of Assets and Liabilities.

Both the Fund and GSAL received compensation relating to the lending of the Fund's securities. The amounts earned by the Fund for the fiscal year ended December 31, 2015, are reported under Investment Income on the Statement of Operations.

The table below details securities lending activity with affiliates of Goldman Sachs:

**For the fiscal year ended December 31, 2015**

| Earnings of GSAL Relating to Securities Loaned | Amounts Received by the Fund from Lending to Goldman Sachs | Amounts Payable to Goldman Sachs Upon Return of Securities Loaned as of December 31, 2015 |
|---|---|---|
| $3,160 | $8,367 | $456,175 |

The following table provides information about the Fund's investment in the Money Market Fund for the fiscal year ended December 31, 2015:

| Market Value 12/31/14 | Purchases at Cost | Proceeds from Sales | Market Value 12/31/15 |
|---|---|---|---|
| $6,925,868 | $32,639,364 | $(37,377,057) | $2,188,175 |

# Notes to Financial Statements (continued)

*December 31, 2015*

## 8. TAX INFORMATION

The tax character of distributions paid during the fiscal years ended December 31, 2014 and December 31, 2015, was as follows:

| | 2014 | 2015 |
|---|---|---|
| Distributions paid from: | | |
| Ordinary income | $ 6,700,936 | $ 3,114,694 |
| Net long-term capital gains | 9,615,323 | 9,216,744 |
| Total taxable distributions | $16,316,259 | $12,331,438 |

As of December 31, 2015, the components of accumulated earnings (losses) on a tax-basis were as follows:

| | |
|---|---|
| Undistributed ordinary income — net | $ 453,833 |
| Undistributed long-term capital gains | 1,036,313 |
| Total undistributed earnings | $ 1,490,146 |
| Timing differences (Post October Loss Deferral/§ 857(b)(9) Deferred Dividend) | $ (311,690) |
| Unrealized gains (losses) — net | (1,086,910) |
| Total accumulated earnings (losses) — net | $ 91,546 |

As of December 31, 2015, the Fund's aggregate security unrealized gains and losses based on cost for U.S. federal income tax purposes were as follows:

| | |
|---|---|
| Tax cost | $ 93,768,785 |
| Gross unrealized gain | 9,831,404 |
| Gross unrealized loss | (10,918,314) |
| Net unrealized security loss | $ (1,086,910) |

The difference between GAAP-basis and tax-basis unrealized gains (losses) is attributable primarily to wash sales, net mark to market gains (losses) on regulated futures contracts and differences in the tax treatment of underlying fund investments.

In order to present certain components of the Fund's capital accounts on a tax-basis, the Fund has reclassified $7,686 from accumulated net realized gain (loss) to undistributed net investment income. This reclassification has no impact on the NAV of the Fund and results primarily from differences in the tax treatment of passive foreign investment company investments, real estate investment trust investments and underlying fund investments.

GSAM has reviewed the Fund's tax positions for all open tax years (the current and prior three years, as applicable) and has concluded that no provision for income tax is required in the Fund's financial statements. Such open tax years remain subject to examination and adjustment by tax authorities.

## 9. OTHER RISKS

The Fund's risks include, but are not limited to, the following:

Large Shareholder Transactions Risk — The Fund may experience adverse effects when certain large shareholders, such as other funds, participating insurance companies, accounts and Goldman Sachs affiliates, purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio. Similarly, large Fund share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash and is required to maintain a larger cash position than it ordinarily would.

Liquidity Risk — The Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value. Liquidity risk may also refer to the risk that a Fund will not be able to pay redemption proceeds within the allowable time period because of unusual market conditions, an unusually high volume of redemption requests, or other reasons. To meet redemption requests, the Fund may be forced to sell investments at an unfavorable time and/or under unfavorable conditions.

Market and Credit Risks — In the normal course of business, the Fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to changes in the market (market risk). Additionally, the Fund may also be exposed to credit risk in the event that an issuer or guarantor fails to perform or that an institution or entity with which the Fund has unsettled or open transactions defaults.

## 10. INDEMNIFICATIONS

Under the Trust's organizational documents, its Trustees, officers, employees and agents are indemnified, to the extent permitted by the Act and state law, against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the course of business, the Fund enters into contracts that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. However, GSAM believes the risk of loss under these arrangements to be remote.

## 11. SUBSEQUENT EVENTS

Subsequent events after the Statement of Assets and Liabilities date have been evaluated through the date the financial statements were issued. GSAM has concluded that there is no impact requiring adjustment or disclosure in the financial statements.

*December 31, 2015*

## 12. SUMMARY OF SHARE TRANSACTIONS

Share activity is as follows:

| | For the Fiscal Year Ended December 31, 2015 | | For the Fiscal Year Ended December 31, 2014 | |
|---|---|---|---|---|
| | Shares | Dollars | Shares | Dollars |
| **Institutional Shares** | | | | |
| Shares sold | 1,203,429 | $ 17,154,427 | 1,123,938 | $ 16,714,665 |
| Reinvestment of distributions | 842,249 | 9,770,089 | 960,144 | 12,808,316 |
| Shares redeemed | (2,240,010) | (31,614,902) | (2,080,842) | (31,192,672) |
| | (194,332) | (4,690,386) | 3,240 | (1,669,691) |
| **Service Shares** | | | | |
| Shares sold | 32,525 | 444,696 | 16,602 | 260,295 |
| Reinvestment of distributions | 222,147 | 2,561,349 | 264,351 | 3,507,943 |
| Shares redeemed | (310,170) | (4,339,136) | (263,368) | (3,942,824) |
| | (55,498) | (1,333,091) | 17,585 | (174,586) |
| **NET INCREASE (DECREASE)** | (249,830) | $ (6,023,477) | 20,825 | $ (1,844,277) |

# Report of Independent Registered Public Accounting Firm

To the Board of Trustees and Shareholders of
Goldman Sachs Variable Insurance Trust — Goldman Sachs Small Cap Equity Insights Fund:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of the Goldman Sachs Small Cap Equity Insights Fund (the "Fund"), a fund of Goldman Sachs Variable Insurance Trust, at December 31, 2015, and the results of its operations, the changes in its net assets and the financial highlights for each of the periods indicated, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2015 by correspondence with the custodian, brokers and transfer agent of the underlying fund and the application of alternative auditing procedures where confirmation of securities purchased had not been received, provide a reasonable basis for the opinion expressed above.

PricewaterhouseCoopers LLP

Boston, Massachusetts
February 17, 2016

## Fund Expenses — Six Month Period Ended December 31, 2015 (Unaudited)

As a shareholder of Institutional or Service Shares of the Fund, you incur ongoing costs, including management fees, distribution and service (12b-1) fees (with respect to Service Shares) and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Institutional Shares and Service Shares of the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of $1,000 invested at the beginning of the period and held for the entire period from July 1, 2015 through December 31, 2015, which represents a period of 184 days of a 365 day year.

*Actual Expenses* — The first line under each share class in the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000=8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid" to estimate the expenses you paid on your account during this period.

*Hypothetical Example for Comparison Purposes* — The second line under each share class in the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual net expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only. As a shareholder of the Fund you do not incur any transaction costs, such as sales charges, redemption fees, or exchange fees, but shareholders of other funds may incur such costs. The second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds whose shareholders may incur transaction costs.

| Share Class | Beginning Account Value 07/01/15 | Ending Account Value 12/31/15 | Expenses Paid for the 6 Months Ended 12/31/15* |
|---|---|---|---|
| **Institutional** | | | |
| Actual | $1,000 | $ 938.20 | $3.96 |
| Hypothetical 5% return | 1,000 | 1,021.12+ | 4.13 |
| **Service** | | | |
| Actual | 1,000 | 936.50 | 5.17 |
| Hypothetical 5% return | 1,000 | 1,019.86+ | 5.40 |

* Expenses are calculated using the Fund's annualized net expense ratio for each class, which represents the ongoing expenses as a percentage of net assets for the six months ended December 31, 2015. Expenses are calculated by multiplying the annualized net expense ratio by the average account value for the period; then multiplying the result by the number of days in the most recent fiscal half year; and then dividing that result by the number of days in the fiscal year. The annualized net expense ratios for the period were 0.81% and 1.06% for the Institutional and Service Shares, respectively.

+ Hypothetical expenses are based on the Fund's actual annualized net expense ratios and an assumed rate of return of 5% per year before expenses.

* *These persons are considered to be "Interested Trustees" because they hold positions with Goldman Sachs and own securities issued by The Goldman Sachs Group, Inc. Each Interested Trustee holds comparable positions with certain other companies of which Goldman Sachs, GSAM or an affiliate thereof is the investment adviser, administrator and/or distributor.*

1 *Each Trustee may be contacted by writing to the Trustee, c/o Goldman Sachs, 200 West Street, New York, New York, 10282, Attn: Caroline Kraus. Information is provided as of December 31, 2015.*

2 *Each Trustee holds office for an indefinite term until the earliest of: (a) the election of his or her successor; (b) the date the Trustee resigns or is removed by the Board of Trustees or shareholders, in accordance with the Trust's Declaration of Trust; (c) December 31st of the year in which the Trustee turns 74 years of age, subject to waiver by a majority of the Trustees (in accordance with the current resolutions of the Board of Trustees, which may be changed by the Trustees without shareholder vote); or (d) the termination of the Trust. By resolution of the Board of Trustees determining that an extension of service would be beneficial to the Trust, the retirement age has been extended with respect to Richard P. Strubel.*

3 *The Goldman Sachs Fund Complex includes the Trust and Goldman Sachs Trust ("GST"). As of December 31, 2015, the Trust consisted of 14 portfolios and GST consisted of 100 portfolios (91 of which offered shares to the public). The Goldman Sachs Fund Complex also includes, with respect to Messrs. Bakhru, Coblentz and Strubel, Goldman Sachs Trust II ("GSTII"), Goldman Sachs BDC, Inc. ("GSBDC"), Goldman Sachs MLP Income Opportunities Fund ("GSMLP"), Goldman Sachs MLP and Energy Renaissance Fund ("GSMER") and Goldman Sachs ETF Trust ("GSETF"), and with respect to Mr. McNamara, GSTII, GSMLP, GSMER and GSETF. GSTII consisted of eight portfolios (six of which offered shares to the public). GSBDC, GSMLP and GSMER each consisted of one portfolio. GSETF consisted of 14 portfolios (three of which offered shares to the public).*

4 *This column includes only directorships of companies required to report to the Securities and Exchange Commission under the Securities Exchange Act of 1934 (i.e., "public companies") or other investment companies registered under the Act.*

Additional information about the Trustees is available in the Fund's Statement of Additional Information, which can be obtained from Goldman Sachs free of charge by calling this toll-free number (in the United States of America): 1-800-526-7384.

The reports concerning the Fund included in this shareholder report may contain certain forward-looking statements about the factors that may affect the performance of the Fund in the future. These statements are based on Fund management's predictions and expectations concerning certain future events and their expected impact on the Fund, such as performance of the economy as a whole and of specific industry sectors, changes in the levels of interest rates, the impact of developing world events, and other factors that may influence the future performance of the Fund. Management believes these forward-looking statements to be reasonable, although they are inherently uncertain and difficult to predict. Actual events may cause adjustments in portfolio management strategies from those currently expected to be employed.

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities and information regarding how the Fund voted proxies relating to portfolio securities for the 12-month period ended December 31, 2015 is available (i) without charge, upon request by calling 1-800-621-2550; and (ii) on the Securities and Exchange Commission ("SEC") web site at *http://www.sec.gov*.

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Form N-Qs are available on the SEC's web site at http://www.sec.gov within 60 days after the Fund's first and third fiscal quarters. The Fund's Form N-Qs may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. and information on the operation of the Public Reference Room may also be obtained by calling 1-800-SEC-0330. Form N-Qs may be obtained upon request and without charge by calling 1-800-621-2550.

**The Goldman Sachs Strategic Growth Fund** invests primarily in U.S. equity investments. The Fund's equity investments are subject to **market risk**, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors and/or general economic conditions. **Different investment styles** (*e.g.*, "growth") tend to shift in and out of favor, and at times the Fund may underperform other funds that invest in similar asset classes.

**INVESTMENT OBJECTIVE**

The Fund seeks long-term growth of capital.

# Portfolio Management Discussion and Analysis

*Below, the Goldman Sachs Growth Portfolio Management Team discusses the Goldman Sachs Variable Insurance Trust — Goldman Sachs Strategic Growth Fund's (the "Fund") performance and positioning for the 12-month period ended December 31, 2015 (the "Reporting Period").*

***How did the Fund perform during the Reporting Period?***

During the Reporting Period, the Fund's Institutional and Service Shares generated average annual total returns of 3.40% and 3.14%, respectively. These returns compare to the 5.67% average annual total return of the Fund's benchmark, the Russell 1000® Growth Index (with dividends reinvested) (the "Russell Index"), during the same time period.

***What economic and market factors most influenced the equity markets as a whole during the Reporting Period?***

Representing the U.S. equity market, the S&P 500® Index gained 1.38% during the Reporting Period. Central bank policy, commodity price sell-off, geopolitical tensions, and China and global economic growth concerns were the key themes impacting U.S. equities throughout 2015.

As evidence of a U.S. economic and labor market recovery mounted, market expectations of a Federal Reserve ("Fed") interest rate hike increased. The monetary policy divergence with the European Central Bank and the Bank of Japan, which each eased policy during the calendar year, resulted in relative U.S. dollar strength. This paradoxically hurt U.S. equity performance despite improving domestic economic fundamentals. Also, geopolitical tensions intensified in the summer of 2015, as negotiations between Greece and its creditors unraveled, and the probability of a Greek exit, popularly known in the media as "Grexit," from the euro increased. "Grexit" risk subsequently declined with an agreement in July 2015. However, concerns then escalated around China's economic weakness, exacerbated by a surprise devaluation of its renminbi in August 2015, which further shook market confidence. U.S. equities sold off in the ensuing sharp global equity correction.

After holding the targeted federal funds rate steady in September and October 2015 in light of these external macroeconomic and geopolitical risks, the Fed voted unanimously for a 25 basis point hike in December 2015, a move largely expected by markets. (A basis point is 1/100th of a percentage point.) The fairly dovish language in the Fed's announcement, which emphasized "gradual" adjustments to policy going forward, helped to somewhat assuage the markets.

Oil and commodity prices were "lower for longer" in 2015, as the supply glut took longer than expected to correct and demand concerns arose. Brent crude oil and West Texas Intermediate ("WTI") crude oil prices began 2015 at $57 and $53 per barrel, respectively, already well below 2014 highs of more than $100 per barrel. Both Brent and WTI crude oil prices ended 2015 still lower at approximately $37 per barrel. The U.S. consumer benefited from savings at the gas pump and consumer spending rose, particularly in areas typically associated with lower gas prices, such as autos and restaurants. However, this did not fully offset the negative impact on the U.S. energy industry and industrials companies. As a result, energy was the worst performing sector in the S&P 500 Index by a wide margin during the Reporting Period, followed by materials, utilities and industrials. Conversely, more consumer-oriented sectors, including consumer discretionary, health care, information technology and consumer staples were the best performing sectors in the S&P 500 Index during the Reporting Period.

Within the U.S. equity market, there was significant disparity in performance not only among sectors but also among the various capitalization and style segments. Large-cap stocks, as measured by the Russell 1000® Index, posted modestly positive returns, while mid-cap stocks and small-cap stocks, as measured by the Russell Midcap® Index and Russell 2000® Index, respectively, generated negative returns. Large-cap stocks were most successful relative to small-cap stocks in the consumer discretionary sector. From a style perspective, growth-oriented stocks significantly outpaced value-oriented stocks across the capitalization spectrum. Growth outperformed relative to value during the Reporting Period primarily due to stronger performance of the growth-oriented information technology sector. (All as measured by the Russell Investments indices.)

***What key factors were responsible for the Fund's performance during the Reporting Period?***

The Fund's underperformance relative to the Russell Index during the Reporting Period can be attributed primarily to stock selection overall. Sector allocation contributed positively, albeit modestly, to relative results.

### *Which equity market sectors most significantly affected Fund performance?*

Detracting most from the Fund's relative results during the Reporting Period was stock selection in the consumer staples and health care sectors. Having an overweighted allocation to energy, which was the worst performing sector in the Russell Index during the Reporting Period, also hurt. Partially offsetting such detractors was effective stock selection in the consumer discretionary and information technology sectors. Having an underweighted exposure to industrials, which significantly lagged the Russell Index during the Reporting Period, added value as well.

### *Which stocks detracted significantly from the Fund's performance during the Reporting Period?*

Detracting from the Fund's results relative to its benchmark index were positions in global apparel company PVH, transportation holding company Kansas City Southern and apparel and accessories designer Kate Spade.

During the Reporting Period, PVH released third quarter 2015 results with earnings stronger ahead of market estimates even amidst a challenging macroeconomic environment. However, weakness in the U.S. retail industry, including high promotions and currency headwinds, pressured what is otherwise a high quality company, in our view. Despite these concerns, which we see as short term in nature, we believe PVH remains a leading franchise with dominant market share, strong pricing power and solid fundamentals. Particularly, established brand names Tommy Hilfiger and Calvin Klein have demonstrated international strength and have been a key source of growth. In our view, PVH was, at the end of the Reporting Period, highly undervalued relative to its peers. We remained optimistic on the company's significant free cash flow generation ability, quality of management and return potential.

Kansas City Southern most recently reported third quarter 2015 earnings that were largely in-line with analysts' consensus estimates but lowered its outlook on automobile carload volume expectations, which caused its shares to decline. Like other railroads, Kansas City Southern faced currency hurdles and challenges regarding industry-wide volume growth given weaker macroeconomic activity. Despite such headwinds, which we see as transitory, the company maintained high organic growth relative to its peers. At the end of the Reporting Period, we believed there were significant improvement opportunities for Kansas City Southern in terms of service quality, cost efficiency and operations that may drive meaningful margin expansion. We maintained conviction in the company's strong volume growth drivers, specifically noting Mexico's new auto plants and above-average pricing in contract negotiations in the near term. In our view, Kansas City Southern remains a high quality growth business with a favorable market structure, high barriers to entry and improving fundamental trends, as we move into 2016.

Kate Spade, a new purchase for the Fund during the Reporting Period, reported first and second quarter 2015 earnings that were disappointing overall. Although revenues topped expectations in the first calendar quarter, sales growth was light. However, toward the end of 2015, the company released encouraging third calendar quarter earnings, which highlighted a significant surpassing of same-store sales growth expectations. Despite the company's weakness during the Reporting Period, we believe its strong underlying fundamentals remained intact at the end of the Reporting Period and that its catalysts for growth were unchanged. In our view, wholesale expansion, merchandising initiatives and the company's strategic partnership with Exclusive Brands could potentially fuel revenue growth and support what we consider to be the company's attractive valuation.

### *What were some of the Fund's best-performing individual stocks?*

The Fund benefited relative to the Russell Index from positions in e-commerce discretionary retailer Amazon.com, data center real estate investment trust ("REIT") Equinix and television show and movie Internet subscription service Netflix.

Amazon.com was the top contributor to the Fund's relative results during the Reporting Period. The company ended 2015 reporting strong third calendar quarter results. Amazon.com's core retail business and its cloud computing business Amazon Web Services ("AWS") exceeded exceptionally high market expectations as seen in its strong performance and in AWS' operating margins. At the end of the Reporting Period, we believed the accelerating progress of the high-margin AWS business may well be a key driver of Amazon.com's overall profitability going forward. In our view, Amazon.com is well positioned for further growth given its dominant market share and expansionary efforts worldwide.

Equinix reported strong first, second and third quarter 2015 earnings, and as a result, raised guidance across key metrics for a third time. Most notably, revenue and earnings saw significant growth on a year-over-year basis. Additionally, operating leverage returned to the business after a period of systems investment and international expansion. At the end of the Reporting Period, Equinix continued, in our view, to present an enduringly favorable outlook, as pricing has been net positive in the low churn rate, or customer turnover, environment. Going forward, we believe Equinix may be able to further benefit should its recurring revenue business model and demand environment remain steady and its integration of recent acquisitions unlock significant synergies.

Netflix was a top contributor to the Fund's performance during the Reporting Period. In April 2015, the company reported first quarter 2015 earnings that exceeded market expectations on both earnings per share and key subscription metrics. The company's second and third calendar quarter earnings were largely in line with market expectations and were received favorably by investors. New user additions thrived, seemingly due to improving content availability and increasing success of Netflix original series offerings. In our view, sentiment around subscriber growth and pricing showed signs of improvement and reflected Netflix's ability to execute and deliver unique, high quality content. At the end of the Reporting Period, we continued to have conviction in the strength of Netflix's franchise and believed the company's international expansion initiatives and secular tailwinds could be key drivers of future growth.

Given each of these holdings' strong performance during the Reporting Period, we opted to trim the Fund's position in each to invest in other ideas with what we believed to have better risk/reward opportunities.

### *How did the Fund use derivatives and similar instruments during the Reporting Period?*

During the Reporting Period, we did not use derivatives as part of an active management strategy.

### *Did the Fund make any significant purchases or sales during the Reporting Period?*

Among the purchases initiated during the Reporting Period, we initiated a Fund position in global payment solutions company MasterCard. We believe recent macroeconomic trends are supportive of financial services and that MasterCard could be a key beneficiary. In particular, the company has deep exposure to emerging markets, where consumer card spending has seen some recovery and is supported by promotional government efforts. Given what we see as a favorable industry backdrop, a high quality business franchise and an attractive valuation for MasterCard, we opted to take advantage of what we viewed as a favorable risk/reward opportunity.

We established a Fund position in fast-food franchise McDonald's. We believe improving sales and reductions in costs should lead to earnings upside and margin expansion potential. We further think that McDonald's reduction in capital expenditures and further refranchising could lead to improving return on invested capital and free up additional capital to repurchase stock. At the end of the Reporting Period, McDonald's remained, in our view, a high quality franchise with a proficient management team and attractive opportunities to drive top-line growth and earnings.

We sold the Fund's position in computer hardware and storage company EMC during the Reporting Period. While we continue to like the company, near-term volatility around its acquisition by Dell and long-term issues driven by a backlog of orders led us to use the proceeds of the sale toward other opportunities where we believe the risk/reward balance is more compelling.

We exited the Fund's position in generic and specialty pharmaceuticals company Mylan. Shares of Mylan had detracted from the Fund's performance during the third quarter of 2015, driven by potential acquirer Teva's announcement that it was withdrawing its bid on the company to pursue other merger and acquisition opportunities in the consolidated health care space. While we still believe Mylan is a fundamentally strong company that possesses its own value-creation strategies, our conviction was tested due to the lack of near-term upside and growth visibility. As such, we decided to sell out of the Fund's position to pursue other names with what we considered to be more attractive risk/reward profiles.

### *Were there any notable changes in the Fund's weightings during the Reporting Period?*

In constructing the Fund's portfolio, we focus on picking stocks rather than on making industry or sector bets. We seek to outpace the benchmark index by overweighting stocks that we expect to outperform and underweighting those that we think may lag. Consequently, changes in its sector weights are generally the direct result of individual stock selection or of stock appreciation or depreciation. That said, during the Reporting Period, the Fund's exposure to energy increased compared to the Russell Index. The Fund's allocation to cash also increased during the Reporting Period. The Fund's allocations compared to the benchmark index in consumer discretionary, consumer staples and information technology decreased.

### *How was the Fund positioned relative to its benchmark index at the end of the Reporting Period?*

At the end of December 2015, the Fund had overweighted positions relative to the Russell Index in the financials and consumer discretionary sectors. On the same date, the Fund had underweighted positions compared to the Russell Index in industrials and materials and was rather neutrally weighted to the Russell Index in consumer staples, energy, health care and information technology. The Fund had no exposure to the utilities and telecommunication services sectors at the end of the Reporting Period.

***What is the Fund's tactical view and strategy for the months ahead?***

At the end of the Reporting Period, we believe positive, but below average, returns for global equities in 2016 in light of modest economic growth forecasts and rising valuations in some areas of the market. However, in our view, equities still looked more attractive than other asset classes in a persistently low-return environment.

After dipping in 2015, we expect global economic growth to increase modestly in 2016, which we think will be enough to sustain corporate profitability and allow stock prices to move higher. In our view, central banks are likely to remain accommodative given still-fragile global economic growth, which we also see as helpful for equity markets. Even in the U.S., where Fed policy has moved toward normalization, we do not expect to see much negative impact from what are likely to be gradual interest rate increases given continued strength in the housing and labor markets. However, the strong U.S. dollar may well remain a headwind for U.S. multi-nationals.

While the macro outlook remains benign, U.S. credit and equities reflect some typical late-cycle signs, such as more shareholder-friendly actions, an increase in merger and acquisition activity and a pick-up in leverage, all of which tend to coincide with an environment lacking top-line growth. Higher equity valuations are also consistent with late-cycle indicators. In part due to years of ultra-low interest rates, U.S. equity market valuations have risen toward fair value, in our opinion, with some areas looking particularly vulnerable if companies cannot deliver growth.

One common theme across the developed markets is that we believe domestically-focused companies in the major regions could benefit from increasing domestic consumption while being more insulated from currency volatility. In the U.S., we expect that the strong dollar could continue to be a headwind for many globally-exposed companies but believe the consumer remains healthy.

We also believe that some extraordinary dynamics in the U.S. equity market in 2015 have set up investment opportunities for 2016. The extremely narrow breadth of the market hit a 30-year low. For example, just ten stocks accounted for approximately 40% of the total positive contribution to the S&P 500 Index return. Also, as mentioned earlier, value stocks notably underperformed growth stocks. We expect some broadening of the market and reversal of these trends in 2016, as investors focus on the risk of high-priced stocks as well as on the relative attractiveness of the hundreds of stocks trading below the market multiple.

Regardless of market direction, we remain committed to our core philosophy and process. We intend to maintain a long-term time horizon, rather than forecast the next quarter. We intend to continue to favor high quality growth businesses over breathtaking concepts. We intend to invest when we consider valuations to be attractive, rather than following the trend. These core beliefs have guided our team during the past 30 years; we believe they hold the answer for the next 30.

As always, we maintain our focus on seeking companies that we believe will generate long-term growth in today's ever-changing market conditions.

# Index Definitions

The Russell 1000® Growth Index (with dividends reinvested) is an unmanaged market capitalization weighted index of the 1000 largest U.S. companies with higher price-to-book ratios and higher forecasted growth values. The figures for the Index do not include any deduction for fees, expenses or taxes. It is not possible to invest directly in an index.

The Russell 2000® Index (with dividends reinvested) is an unmanaged index of common stock prices that measures the performance of the 2000 smallest companies in the Russell 3000® Index. The figures for the Index do not include any deduction for fees, expenses or taxes. It is not possible to invest directly in an index.

The S&P 500® Index (with dividends reinvested) is the Standard & Poor's 500 Composite Index of 500 stocks, an unmanaged index of common stock prices. The figures for the Index do not include any deduction for fees, expenses or taxes. It is not possible to invest directly in an index.

The Russell Midcap® Index measures the performance of the 800 smallest companies in the Russell 1000® Index, which represent approximately 25% of the total market capitalization of the Russell 1000 Index. It is not possible to invest directly in an index.

The Russell 1000® Index measures the performance of the 1,000 largest companies in the Russell 3000® Index, which represents approximately 92% of the total market capitalization of the Russell 3000 Index. It is not possible to invest directly in an index.

# Strategic Growth Fund

*as of December 31, 2015*

## STANDARDIZED TOTAL RETURNS[1]

| For the period ended 12/31/15 | One Year | Five Years | Ten Years | Since Inception | Inception Date |
|---|---|---|---|---|---|
| Institutional | 3.40% | 12.67% | 7.54% | 5.25% | 4/30/98 |
| Service | 3.14 | 12.39 | N/A | 6.98 | 1/09/06 |

[1] **The Standardized Total Returns are average annual total returns as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value ("NAV"). Because Institutional Shares and Service Shares do not involve a sales charge, such a charge is not applied to their Standardized Total Returns.**

**Total return figures in the above chart represent past performance and do not indicate future results, which will vary. The investment return and principal value of an investment will fluctuate and, therefore, an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the total return figures in the above chart. Please visit www.GSAMFUNDS.com to obtain the most recent month-end returns.** Performance reflects fee waivers and/or expense limitations in effect during the periods shown. In their absence, performance would be reduced.

## EXPENSE RATIOS[2]

| | Net Expense Ratio (Current) | Gross Expense Ratio (Before Waivers) |
|---|---|---|
| Institutional | 0.78% | 0.82% |
| Service | 1.03 | 1.07 |

[2] The expense ratios of the Fund, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations) are as set forth above according to the most recent publicly available Prospectuses for the Fund and may differ from the expense ratios disclosed in the Financial Highlights in this report. Pursuant to a contractual arrangement, the Fund's waivers and/or expense limitations will remain in place through at least April 30, 2016 and prior to such date the Investment Adviser may not terminate the arrangements without the approval of the Fund's Board of Trustees. If these arrangements are discontinued in the future, the expense ratios may change without shareholder approval.

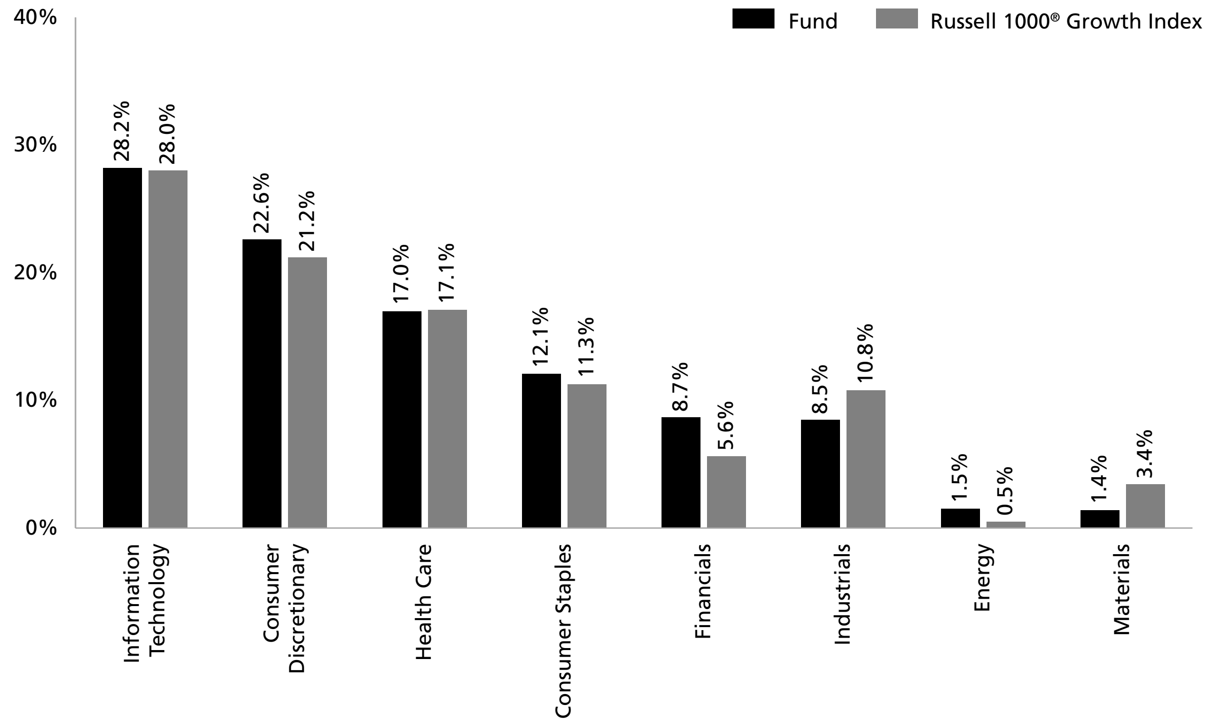
## TOP TEN HOLDINGS AS OF 12/31/15[3]

| Holding | % of Net Assets | Line of Business |
|---|---|---|
| Apple, Inc. | 6.4% | Technology Hardware & Equipment |
| Amazon.com, Inc. | 3.5 | Retailing |
| Alphabet, Inc. Class A | 3.2 | Software & Services |
| Facebook, Inc. Class A | 3.3 | Software & Services |
| Equinix, Inc. (REIT) | 2.7 | Real Estate Investment Trusts |
| Costco Wholesale Corp. | 2.7 | Food & Staples Retailing |
| Alphabet, Inc. Class C | 2.5 | Software & Services |
| Mastercard, Inc. Class A | 2.3 | Software & Services |
| American Tower Corp. (REIT) | 2.3 | Real Estate Investment Trusts |
| The Coca-Cola Co. | 2.2 | Food, Beverage & Tobacco |

[3] The top 10 holdings may not be representative of the Fund's future investments.

## FUND vs. BENCHMARK SECTOR ALLOCATIONS[4]

**As of December 31, 2015**



[4] The Fund is actively managed and, as such, its composition may differ over time. Consequently, the Fund's overall sector allocations may differ from percentages contained in the graph above. The graph categorizes investments using Global Industry Classification Standard ("GICS"), however, the sector classifications used by the portfolio management team may differ from GICS. The percentage shown for each investment category reflects the value of investments in that category as a percentage of market value. The graph depicts the Fund's investments but may not represent the Fund's market exposure due to the exclusion of certain derivatives, if any, as listed in the Additional Investment Information section of the Schedule of Investments.

# Performance Summary

*December 31, 2015*

The following graph shows the value, as of December 31, 2015, of a $10,000 investment made on January 1, 2006 in the Institutional Shares at NAV. For comparative purposes, the performance of the Fund's benchmark, the Russell Index (with distributions reinvested), is shown. This performance data represents past performance and should not be considered indicative of future performance, which will fluctuate with changes in market conditions. These performance fluctuations will cause an investor's shares, when redeemed, to be worth more or less than their original cost. Performance reflects Fund level expenses but does not reflect fees and expenses associated with any variable annuity contract or variable life insurance policy that uses the Fund as an investment option for any contract or policy. Had performance reflected all of those fees and expenses, performance would have been reduced. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown, and in their absence, performance would be reduced. Performance of Service Shares will vary from Institutional Shares due to differences in class specific fees. In addition to the Investment Adviser's decisions regarding issuer/industry investment selection and allocation, other factors may affect Fund performance. These factors include, but are not limited to, Fund operating fees and expenses, portfolio turnover, and subscription and redemption cash flows affecting the Fund.

**Strategic Growth Fund's 10 Year Performance**

**Performance of a $10,000 investment, with distributions reinvested, from January 1, 2006 through December 31, 2015.**

| Average Annual Total Return through December 31, 2015 | One Year | Five Years | Ten Years | Since Inception |
|---|---|---|---|---|
| **Institutional (Commenced April 30, 1998)** | 3.40% | 12.67% | 7.54% | 5.25% |
| **Service (Commenced January 9, 2006)** | 3.14% | 12.39% | N/A | 6.98% |

(a) Calculated based on the average shares outstanding methodology.
(b) Assumes investment at the net asset value at the beginning of the year, reinvestment of all distributions, and a complete redemption of the investment at the net asset value at the end of the year.
(c) The Fund's portfolio turnover rate is calculated in accordance with regulatory requirements, without regard to transactions involving short term investments. If such transactions were included, the Fund's portfolio turnover rate may be higher.
(d) Reflects income recognized from special dividends which amounted to $0.03 per share and 0.20% of average net assets.
(e) Reflects income recognized from special dividends which amounted to $0.04 per share and 0.27% of average net assets.

# Notes to Financial Statements

*December 31, 2015*

## 1. ORGANIZATION

Goldman Sachs Variable Insurance Trust (the "Trust" or "VIT") is a Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the "Act"), as an open-end management investment company. The Trust includes the Goldman Sachs Strategic Growth Fund (the "Fund"). The Fund is a diversified portfolio under the Act offering two classes of shares — Institutional and Service Shares. Shares of the Trust are offered to separate accounts of participating life insurance companies for the purpose of funding variable annuity contracts and variable life insurance policies.

Goldman Sachs Asset Management, L.P. ("GSAM"), an affiliate of Goldman, Sachs & Co. ("Goldman Sachs"), serves as investment adviser to the Fund pursuant to a management agreement (the "Agreement") with the Trust.

## 2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and require management to make estimates and assumptions that may affect the reported amounts and disclosures. Actual results may differ from those estimates and assumptions.

A. Investment Valuation — The Fund's valuation policy is to value investments at fair value.

B. Investment Income and Investments — Investment income includes interest income and dividend income, net of any foreign withholding taxes, less any amounts reclaimable. Interest income is accrued daily and adjusted for amortization of premiums and accretion of discounts. Dividend income is recognized on ex-dividend date or, for certain foreign securities, as soon as such information is obtained subsequent to the ex-dividend date. Investment transactions are reflected on trade date. Realized gains and losses are calculated using identified cost. Investment transactions are recorded on the following business day for daily net asset value ("NAV") calculations. Any foreign capital gains tax is accrued daily based upon net unrealized gains, and is payable upon sale of such investments. Distributions received from the Fund's investments in United States ("U.S.") real estate investment trusts ("REITs") may be characterized as ordinary income, net capital gain or a return of capital. A return of capital is recorded by the Fund as a reduction to the cost basis of the REIT.

C. Class Allocations and Expenses — Investment income, realized and unrealized gain (loss), and non-class specific expenses of the Fund are allocated daily based upon the proportion of net assets of each class. Non-class specific expenses directly incurred by a Fund are charged to that Fund, while such expenses incurred by the Trust are allocated across the applicable Funds on a straight-line and/or pro-rata basis depending upon the nature of the expenses. Class specific expenses, where applicable, are borne by the respective share classes and include Distribution and Service and Transfer Agency fees.

D. Federal Taxes and Distributions to Shareholders — It is the Fund's policy to comply with the requirements of the Internal Revenue Code of 1986, as amended (the "Code"), applicable to regulated investment companies (mutual funds) and to distribute each year substantially all of its investment company taxable income and capital gains to its shareholders. Accordingly, the Fund is not required to make any provisions for the payment of federal income tax. Distributions to shareholders are recorded on the ex-dividend date. Income and capital gains distributions, if any, are declared and paid annually.

Net capital losses are carried forward to future fiscal years and may be used to the extent allowed by the Code to offset any future capital gains. Losses that are carried forward will retain their character as either short-term or long-term capital losses. Utilization of capital loss carryforwards will reduce the requirement of future capital gains distributions.

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with federal income tax rules, which may differ from GAAP. The source of the Fund's distributions may be shown in the accompanying financial statements as either from net investment income, net realized gain or capital. Certain components of the Fund's net assets on the Statement of Assets and Liabilities reflect permanent GAAP/tax differences based on the appropriate tax character.

E. Commission Recapture — GSAM, on behalf of certain Funds, may direct portfolio trades, subject to seeking best execution, to various brokers who have agreed to rebate a portion of the commissions generated. Such rebates are made directly to a Fund as cash payments and are included in net realized gain (loss) from investments on the Statement of Operations.

## 3. INVESTMENTS AND FAIR VALUE MEASUREMENTS

The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price). GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The levels used for classifying investments are not necessarily an indication of the risk associated with investing in these investments. The three levels of the fair value hierarchy are described below:

Level 1 — Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
Level 2 — Quoted prices in markets that are not active or financial instruments for which significant inputs are observable (including, but not limited to, quoted prices for similar investments, interest rates, foreign exchange rates, volatility and credit spreads), either directly or indirectly;
Level 3 — Prices or valuations that require significant unobservable inputs (including GSAM's assumptions in determining fair value measurement).

Changes in valuation techniques may result in transfers into or out of an assigned level within the hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value hierarchy resulting from such changes are deemed to have occurred as of the beginning of the reporting period.

The Board of Trustees ("Trustees") has approved Valuation Procedures that govern the valuation of the portfolio investments held by the Fund, including investments for which market quotations are not readily available. The Trustees have delegated to GSAM day-to-day responsibility for implementing and maintaining internal controls and procedures related to the valuation of the Fund's portfolio investments. To assess the continuing appropriateness of pricing sources and methodologies, GSAM regularly performs price verification procedures and issues challenges as necessary to third party pricing vendors or brokers, and any differences are reviewed in accordance with the Valuation Procedures.

A. Level 1 and Level 2 Fair Value Investments — The valuation techniques and significant inputs used in determining the fair values for investments classified as Level 1 and Level 2 are as follows:

Equity Securities — Equity securities traded on a U.S. securities exchange or the NASDAQ system, or those located on certain foreign exchanges, including but not limited to the Americas, are valued daily at their last sale price or official closing price on the principal exchange or system on which they are traded. If there is no sale or official closing price or such price is believed by GSAM to not represent fair value, equity securities are valued at the last bid price for long positions and at the last ask price for short positions. To the extent these investments are actively traded, they are classified as Level 1 of the fair value hierarchy, otherwise they are generally classified as Level 2.

Unlisted equity securities for which market quotations are available are valued at the last sale price on the valuation date, or if no sale occurs, at the last bid price. These investments are generally classified as Level 2 of the fair value hierarchy.

B. Level 3 Fair Value Investments — To the extent that significant inputs to valuation models and other alternative pricing sources are unobservable, or if quotations are not readily available, or if GSAM believes that such quotations do not accurately reflect fair value, the fair value of the Fund's investments may be determined under Valuation Procedures approved by the Trustees. GSAM, consistent with its procedures and applicable regulatory guidance, may make an adjustment to the most recent valuation prices of either domestic or foreign securities in light of significant events to reflect what it believes to be the fair value of the securities at the time of determining a Fund's NAV. Significant events which could affect a large number of securities in a particular market may include, but are not limited to: significant fluctuations in U.S. or foreign markets; market dislocations; market disruptions; or unscheduled market closings. Significant events which could also affect a single issuer may include, but are not limited to: corporate actions such as reorganizations, mergers and buy-outs; ratings downgrades; and bankruptcies.

# Notes to Financial Statements (continued)

*December 31, 2015*

## 3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

C. Fair Value Hierarchy — The following is a summary of the Fund's investments classified in the fair value hierarchy as of December 31, 2015:

| Investment Type | Level 1 | Level 2 | Level 3 |
|---|---|---|---|
| **Assets** | | | |
| Common Stock and/or Other Equity Investments[(a)] | | | |

(a) Amounts are disclosed by continent to highlight the impact of time zone differences between local market close and the calculation of NAV. Security valuations are based on the principal exchange or system on which they are traded, which may differ from country of domicile.

For further information regarding security characteristics, see the Schedule of Investments.

## 4. AGREEMENTS AND AFFILIATED TRANSACTIONS

A. Management Agreement — Under the Agreement, GSAM manages the Fund, subject to the general supervision of the Trustees.

As compensation for the services rendered pursuant to the Agreement, the assumption of the expenses related thereto and administration of the Fund's business affairs, including providing facilities, GSAM is entitled to a management fee, accrued daily and paid monthly, equal to an annual percentage rate of the Fund's average daily net assets.

For the fiscal year ended December 31, 2015, contractual and effective net management fees with GSAM were at the following rates:

| Contractual Management Rate | | | | | | |
|---|---|---|---|---|---|---|
| First $1 billion | Next $1 billion | Next $3 billion | Next $3 billion | Over $8 billion | Effective Rate | Effective Net Management Rate^ |
| 0.75% | 0.68% | 0.65% | 0.64% | 0.63% | 0.75% | 0.71%* |

^ Effective Net Management Rate includes the impact of management fee waivers of affiliated underlying funds, if any.

* GSAM agreed to waive a portion of its management fee in order to achieve a net management rate, as defined in the Fund's most recent prospectus. This waiver will be effective through at least April 30, 2016 and prior to such date GSAM may not terminate the arrangement without approval of the Trustees. For the fiscal year ended December 31, 2015, GSAM waived $199,316 of its management fee.

B. Distribution and Service Plan — The Trust, on behalf of the Service Shares of the Fund, has adopted a Distribution and Service Plan (the "Plan"). Under the Plan, Goldman Sachs, which serves as distributor (the "Distributor"), is entitled to a fee accrued daily and paid monthly, for distribution services and personal and account maintenance services, which may then be paid by Goldman Sachs to authorized dealers, equal to, on an annual basis, 0.25% of the Fund's average daily net assets attributable to Service Shares.

C. Transfer Agency Agreement — Goldman Sachs also serves as the transfer agent of the Fund for a fee pursuant to the Transfer Agency Agreement. The fees charged for such transfer agency services are accrued daily and paid monthly at an annual rate of 0.02% of the average daily net assets of Institutional and Service Shares.

D. Other Expense Agreements and Affiliated Transactions — GSAM has agreed to limit certain "Other Expenses" of the Fund (excluding acquired fund fees and expenses, transfer agency fees and expenses, taxes, interest, brokerage fees, shareholder meeting, litigation, indemnification and extraordinary expenses) to the extent such expenses exceed, on an annual basis, a percentage rate of the average daily net assets of the Fund. Such Other Expense reimbursements, if any, are accrued daily and paid monthly. In addition, the Fund is not obligated to reimburse GSAM for prior fiscal year expense reimbursements, if any. The Other Expense limitation as an annual percentage rate of average daily net assets for the Fund is 0.114%. The Other Expense limitation will remain in place through at least April 30, 2016, and prior to such date GSAM may not terminate the arrangement without the

## 4. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

approval of the Trustees. For the fiscal year ended December 31, 2015, GSAM did not reimburse to the Fund. In addition, the Fund has entered into certain offset arrangements with the custodian and the transfer agent, which may result in a reduction of the Fund's expenses and are received irrespective of the application of the "Other Expense" limitation described above. For the fiscal year ended December 31, 2015, custody fee credits were $8,191.

E. Line of Credit Facility — As of December 31, 2015, the Fund participated in a $1,205,000,000 committed, unsecured revolving line of credit facility (the "facility") together with other funds of the Trust and certain registered investment companies having management agreements with GSAM or its affiliates ("Other Borrowers"). Pursuant to the terms of the facility, the Fund and Other Borrowers could increase the credit amount by up to an additional $115,000,000, for a total of up to $1,320,000,000. This facility is to be used for temporary emergency purposes, or to allow for an orderly liquidation of securities to meet redemption requests. The interest rate on borrowings is based on the federal funds rate. The facility also requires a fee to be paid by the Fund based on the amount of the commitment that has not been utilized. For the fiscal year ended December 31, 2015, the Fund did not have any borrowings under the facility.

## 5. PORTFOLIO SECURITIES TRANSACTIONS

The cost of purchases and proceeds from sales and maturities of long-term securities for the fiscal year ended December 31, 2015, were $272,283,884 and $331,257,388, respectively.

## 6. TAX INFORMATION

The tax character of distributions paid during the fiscal years ended December 31, 2014 and December 31, 2015, was as follows:

| | 2014 | 2015 |
|---|---|---|
| Distributions paid from: | | |
| Ordinary income | $15,942,732 | $ 808,156 |
| Net long-term capital gains | 81,314,457 | 30,122,678 |
| Total taxable distributions | $97,257,189 | $30,930,834 |

As of December 31, 2015, the components of accumulated earnings (losses) on a tax-basis were as follows:

| | |
|---|---|
| Undistributed ordinary income — net | $ 1,166,533 |
| Undistributed long-term capital gains | 46,394 |
| Total undistributed earnings | $ 1,212,927 |
| Timing differences (Post October Loss Deferral) | (274,792) |
| Unrealized gains — net | 94,641,487 |
| Total accumulated gains net | $95,579,622 |

# Notes to Financial Statements (continued)

*December 31, 2015*

## 6. TAX INFORMATION (continued)

As of December 31, 2015, the Fund's aggregate security unrealized gains and losses based on cost for U.S. federal income tax purposes were as follows:

| | |
|---|---|
| Tax cost | $368,284,418 |
| Gross unrealized gain | 112,262,638 |
| Gross unrealized loss | (17,621,151) |
| Net unrealized security gain | $ 94,641,487 |

The difference between GAAP-basis and tax-basis unrealized gains (losses) is attributable primarily to wash sales, and differences in the tax treatment of underlying fund investments.

In order to present certain components of the Fund's capital accounts on a tax-basis, the Fund has reclassified $9,546 of undistributed net investment income into accumulated net realized gain. These reclassifications have no impact on the NAV of the Fund and result primarily from differences in the tax treatment of underlying fund investments.

GSAM has reviewed the Fund's tax positions for all open tax years (the current and prior three years, as applicable) and has concluded that no provision for income tax is required in the Fund's financial statements. Such open tax years remain subject to examination and adjustment by tax authorities.

## 7. OTHER RISKS

The Fund's risks include, but are not limited to, the following:

**Large Shareholder Transactions Risk** — The Fund may experience adverse effects when certain large shareholders, such as other funds, participating insurance companies, accounts and Goldman Sachs affiliates, purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio. Similarly, large Fund share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash and is required to maintain a larger cash position than it ordinarily would.

**Liquidity Risk** — The Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value. Liquidity risk may also refer to the risk that a Fund will not be able to pay redemption proceeds within the allowable time period because of unusual market conditions, an unusually high volume of redemption requests, or other reasons. To meet redemption requests, the Fund may be forced to sell investments at an unfavorable time and/or under unfavorable conditions.

**Market and Credit Risks** — In the normal course of business, the Fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to changes in the market (market risk). Additionally, the Fund may also be exposed to credit risk in the event that an issuer or guarantor fails to perform or that an institution or entity with which the Fund has unsettled or open transactions defaults.

## 8. INDEMNIFICATIONS

Under the Trust's organizational documents, its Trustees, officers, employees and agents are indemnified, to the extent permitted by the Act and state law, against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the course of business, the Fund enters into contracts that contain a variety of indemnification clauses. The Fund's maximum exposure

## 8. INDEMNIFICATIONS (continued)

under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. However, GSAM believes the risk of loss under these arrangements to be remote.

## 9. SUBSEQUENT EVENTS

Subsequent events after the Statement of Assets and Liabilities date have been evaluated through the date the financial statements were issued. GSAM has concluded that there is no impact requiring adjustment or disclosure in the financial statements.

## 10. SUMMARY OF SHARE TRANSACTIONS

Share activity is as follows:

| | For the Fiscal Year Ended December 31, 2015 | | For the Fiscal Year Ended December 31, 2014 | |
|---|---|---|---|---|
| | Shares | Dollars | Shares | Dollars |
| **Institutional Shares** | | | | |
| Shares sold | 319,675 | $ 5,242,157 | 355,839 | $ 6,506,630 |
| Reinvestment of distributions | 458,800 | 7,161,871 | 1,456,779 | 22,973,406 |
| Shares redeemed | (1,170,524) | (19,375,952) | (1,319,775) | (24,281,424) |
| | (392,049) | (6,971,924) | 492,843 | 5,198,612 |
| **Service Shares** | | | | |
| Shares sold | 5,956,788 | 100,229,401 | 771,692 | 14,397,626 |
| Reinvestment of distributions | 1,525,608 | 23,768,963 | 4,719,427 | 74,283,783 |
| Shares redeemed | (8,800,386) | (141,751,849) | (3,229,668) | (58,894,833) |
| | (1,317,990) | (17,753,485) | 2,261,451 | 29,786,576 |
| **NET INCREASE (DECREASE)** | (1,710,039) | $ (24,725,409) | 2,754,294 | $ 34,985,188 |

# Report of Independent Registered Public Accounting Firm

To the Board of Trustees and Shareholders of
Goldman Sachs Variable Insurance Trust — Goldman Sachs Strategic Growth Fund:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of the Goldman Sachs Strategic Growth Fund (the “Fund”), a fund of Goldman Sachs Variable Insurance Trust, at December 31, 2015 and the results of its operations, the changes in its net assets and the financial highlights for each of the periods indicated, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as “financial statements”) are the responsibility of the Fund’s management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2015 by correspondence with the custodian and the application of alternative auditing procedures where confirmation of securities purchased had not been received, provide a reasonable basis for the opinion expressed above.

PricewaterhouseCoopers LLP

Boston, Massachusetts
February 17, 2016

## Fund Expenses — Six Month Period Ended December 31, 2015 (Unaudited)

As a shareholder of Institutional or Service Shares of the Fund, you incur ongoing costs, including management fees, distribution and service (12b-1) fees (with respect to Service Shares) and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Institutional Shares and Service Shares of the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of $1,000 invested at the beginning of the period and held for the entire period from July 1, 2015 through December 31, 2015, which represents a period of 184 days of a 365 day year.

*Actual Expenses* — The first line under each share class in the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000=8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid" to estimate the expenses you paid on your account during this period.

*Hypothetical Example for Comparison Purposes* — The second line under each share class in the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual net expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only. As a shareholder of the Fund you do not incur any transaction costs, such as sales charges, redemption fees, or exchange fees, but shareholders of other funds may incur such costs. The second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds whose shareholders may incur transaction costs.

| Share Class | Beginning Account Value 07/01/15 | Ending Account Value 12/31/15 | Expenses Paid for the 6 Months Ended 12/31/15* |
|---|---|---|---|
| **Institutional** | | | |
| Actual | $1,000 | $1,007.80 | $4.05 |
| Hypothetical 5% return | 1,000 | 1,021.17+ | 4.08 |
| **Service** | | | |
| Actual | 1,000 | 1,006.50 | 5.31 |
| Hypothetical 5% return | 1,000 | 1,019.91+ | 5.35 |

* Expenses are calculated using the Fund's annualized net expense ratio for each class, which represents the ongoing expenses as a percentage of net assets for the six months ended December 31, 2015. Expenses are calculated by multiplying the annualized net expense ratio by the average account value for the period; then multiplying the result by the number of days in the most recent fiscal half year; and then dividing that result by the number of days in the fiscal year. The annualized net expense ratios for the period were 0.80% and 1.05% for the Institutional and Service Shares, respectively.

\+ Hypothetical expenses are based on the Fund's actual annualized net expense ratios and an assumed rate of return of 5% per year before expenses.

The reports concerning the Fund included in this shareholder report may contain certain forward-looking statements about the factors that may affect the performance of the Fund in the future. These statements are based on Fund management's predictions and expectations concerning certain future events and their expected impact on the Fund, such as performance of the economy as a whole and of specific industry sectors, changes in the levels of interest rates, the impact of developing world events, and other factors that may influence the future performance of the Fund. Management believes these forward-looking statements to be reasonable, although they are inherently uncertain and difficult to predict. Actual events may cause adjustments in portfolio management strategies from those currently expected to be employed.

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities and information regarding how the Fund voted proxies relating to portfolio securities for the 12-month period ended December 31 is available (i) without charge, upon request by calling 1-800-621-2550; and (ii) on the Securities and Exchange Commission ("SEC") web site at *http://www.sec.gov.*

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Form N-Qs are available on the SEC's web site at http://www.sec.gov within 60 days after the Fund's first and third fiscal quarters. The Fund's Form N-Qs may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. and information on the operation of the Public Reference Room may also be obtained by calling 1-800-SEC-0330. Form N-Qs may be obtained upon request and without charge by calling 1-800-621-2550.

Fund holdings and allocations shown are as of December 31, 2015 and may not be representative of future investments. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk.

References to indices, benchmarks or other measures of relative market performance over a specified period of time are provided for your information only and do not imply that the portfolio will achieve similar results. The index composition may not reflect the manner in which a portfolio is constructed. While an adviser seeks to design a portfolio which reflects appropriate risk and return features, portfolio characteristics may deviate from those of the benchmark.

The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of Morgan Stanley Capital International Inc. ("MSCI") and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. ("S&P") and is licensed for use by Goldman Sachs. Neither MSCI, S&P nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

The portfolio risk management process includes an effort to monitor and manage risk, but does not imply low risk.

**Shares of the Goldman Sachs VIT Funds are offered to separate accounts of participating life insurance companies for the purpose of funding variable annuity contracts and variable life insurance policies. Shares of the Fund are not offered directly to the general public. The variable annuity contracts and variable life insurance policies are described in the separate prospectuses issued by participating insurance companies. You should refer to those prospectuses for information about surrender charges, mortality and expense risk fees and other charges that may be assessed by participating insurance companies under the variable annuity contracts or variable life insurance policies. Such fees or charges, if any, may affect the return you may realize with respect to your investments. Ask your representative for more complete information. Please consider a fund's objectives, risks and charges and expenses, and read the prospectus carefully before investing. The prospectus contains this and other information about the Fund.**

**This material is not authorized for distribution to prospective investors unless preceded or accompanied by a current Prospectus or summary prospectus, if applicable. Investors should consider a Fund's objective, risks, and charges and expenses, and read the summary prospectus, if available, and/or the Prospectus carefully before investing or sending money. The summary prospectus, if available, and the Prospectus contain this and other information about a Fund and may be obtained from your Authorized Institution or from Goldman, Sachs & Co. by calling 1-800-621-2550.**

This report is prepared for the general information of contract owners and is not an offer of shares of the Goldman Sachs Variable Insurance Trust: Goldman Sachs Strategic Growth Fund.

## PORTFOLIO SNAPSHOT

We believe a dynamic approach to asset allocation that leverages our bottom-up, fundamental equity and fixed income research will allow us to outperform our benchmark and peers over time. Our integrated equity and fixed income research team seeks an optimal balance of asset class opportunities across market cycles.

## PERFORMANCE OVERVIEW

Janus Aspen Balanced Portfolio's Institutional Shares and Service Shares returned 0.62% and 0.41%, respectively, for the 12-month period ended December 31, 2015, compared with 1.25% by the Balanced Index, an internally-calculated benchmark that combines the total returns from the S&P 500 Index (55%) and the Barclays U.S. Aggregate Bond Index (45%). The S&P 500 Index returned 1.38% and the Barclays U.S. Aggregate Bond Index returned 0.55%.

## INVESTMENT ENVIRONMENT

The multi-year equities rally encountered turbulence during 2015. Cooling growth, weak commodities prices, a surging U.S. dollar and a shift in monetary policy were some of the factors investors had to consider.

Mid-year, a dramatic sell-off in Chinese stocks – after an equally dramatic rally – spread to developed markets, including the U.S., with several indices declining by more than 10%. Global volatility was in the minds of Federal Reserve (Fed) officials when they chose to delay raising interest rates at their September meeting. Later, improving U.S. employment data led to a consensus that rates would indeed rise by the end of the year. Monetary policy did provide one surprise when the European Central Bank (ECB) failed to meet expectations in expanding its quantitative easing (QE) program. Markets were also roiled late year by energy prices coming under renewed pressure, bringing back the prospect that global growth may fall short of projections.

These same factors influenced fixed income markets. The expectations of a rate increase sent the yield on the 2-year Treasury above 1%. The yield on the 10-year, however, dipped as inflation data remained muted. Investment-grade corporate spreads widened in the spring and stayed range-bound for much of the remainder of the year. High-yield credits, on the other hand, widened considerably between June and December.

## PERFORMANCE DISCUSSION

The Portfolio, which seeks to provide more consistent returns over time by allocating across the spectrum of fixed income and equity securities, underperformed the Balanced Index, its blended benchmark of the S&P 500 Index (55%) and the Barclays U.S. Aggregate Bond Index (45%). The Portfolio also underperformed its primary benchmark, the S&P 500 Index, but its Institutional Share class outperformed its secondary benchmark, the Barclays U.S. Aggregate Bond Index.

The equity-to-fixed-income allocation ended the period with an equity weighting of roughly 61% and fixed income at around 36%, with the remainder in cash. The Portfolio's equity asset allocation may vary between 35% and 65% depending on market conditions.

The Portfolio's equity sleeve underperformed its benchmark, the S&P 500 Index, for the period. The Portfolio's holdings in industrials and underweight in consumer staples detracted most from relative results. A combination of overweight positioning and security selection within consumer discretionary aided relative returns, as did the Portfolio's underweight to the hard-hit energy sector.

Union Pacific, a railroad operator, was acutely affected by negative sentiment toward the industry. The sour mood was driven, in part, by a slowdown in U.S. industrial production on account of a strong U.S. dollar weighing on exports, and the continued weak pricing environment across a range of commodities.

Enterprise Products Partners saw shares decline on broad pressure within the energy space. This was despite the company issuing earnings in line with consensus estimates. The company announced that its CEO would be stepping down. We exited the position during the reporting period.

The stock of Valeant Pharmaceuticals sold off after politicians criticized the company for high drug prices for some of its products treating cardiac conditions. A short seller also questioned the company's relationship with a specialty pharmacy that distributed some of its drugs. We have exited our position.

Alphabet Inc. (formerly Google) was a top contributor within the equity sleeve. Alphabet benefited from improvements in its mobile search revenue, as well as strong results for YouTube. The firm also announced a significant stock buyback program, providing additional support to its shares. The company's restructuring, which was initiated in the third quarter, has also been well received by investors because it provides greater transparency around the company's different business lines. In addition, we have been encouraged by Alphabet's new CFO's focus on reining in unnecessary spending.

Microsoft was a top stock contributor. The stock has benefited from a re-valuation as investors begin to give the company credit for the growth of its cloud business, which is second only to Amazon, and the potential for Microsoft Office 365. We believe these businesses will go a long way to offset the decline of some of Microsoft's legacy businesses such as traditional desktop software. Progress on expense control and cost reduction has also been favorable for the stock. We continue to believe Microsoft's cloud business and some of its other services are underappreciated by the market.

Nike was another top contributor. The company continues to benefit from growth of its athletic apparel and footwear across the globe. Going forward we believe innovation for both its products and manufacturing processes are long-term tailwinds for Nike. We also believe that investments to create a better omnichannel sales experience position Nike well as more sales migrate online.

Conditions in fixed income markets, in our view, continued to merit defensive positioning. Among the factors that concern us most are company actions indicative of the later stages of a credit cycle and alarmingly low market liquidity. While we aim at maximizing risk-adjusted returns, we believed that it was in our clients' best interest to focus on capital preservation during the year.

The fixed income sleeve of the Portfolio outperformed its benchmark, the Barclays U.S. Aggregate Bond Index. Our out-of-benchmark allocation to high-yield corporate credit contributed most to relative returns. Performance was largely generated by spread carry, a measure of excess income generated by the Portfolio's holdings. Performance was concentrated in the highest tier of the high-yield segment. We believe this "crossover" segment represents some of the most attractive risk-adjusted returns as management teams instill balance sheet discipline with the aim of a credit ratings upgrade. Another out-of-benchmark allocation – preferred equity – also contributed to relative performance.

Detracting from relative performance was our yield curve positioning within mortgage-backed securities (MBS). Rate volatility early in the period impacted MBS performance as mixed economic data and lack of clarity on the timing of the Fed's initial rate hike made it difficult for investors to gauge prepayment risks on these securities. Toward the end of the period, we slightly increased our positioning in MBS. We view this asset class as portfolio ballast, and emphasize generic agency pass-throughs with high coupons, high loan-to-value (LTV), and pre-payment resistant characteristics.

Also detracting from performance was yield curve positioning within Treasurys. The front-end of the Treasury yield curve steepened during the period as the market anticipated an eventual interest rate hike by the Fed. Treasury duration is a tool utilized to adjust the overall duration of the Portfolio in a liquid and cost-effective manner. While lowering Portfolio duration to a level below the benchmark during the year, we raised it to slightly above the benchmark by the end of the period. We view our allocation to intermediate and longer dated Treasurys as a buffer against volatility in risk assets while short-term Treasurys provide liquidity.

Spread carry and security selection within banking contributed to relative performance. The prospect of rising rates caused many to project that banks would soon be able to generating higher operating margins. Our overweight positioning, along with spread carry, in brokerages, asset managers and exchanges aided results for similar reasons. The credit sectors that weighed most on relative performance were independent and midstream energy. After having stabilized during the first half of 2015, global energy prices resumed their downward slide through the end of the period.

Please see the Derivatives Instruments section in the "Notes to Financial Statements" for a discussion of derivatives used by the Portfolio.

## OUTLOOK

While valuations in some large-cap growth companies are higher after the fourth quarter and the Fed is finally raising interest rates, we believe the backdrop for U.S. equities is still positive. While much attention has been paid to the rate hike, we believe it is important to put interest rates into perspective. Rates are still very low from a historical perspective and most economic data, especially U.S. employment levels, indicate that a gradual rate hike is warranted.

Looking across sectors, we continue to see some opportunities to add positions to our portfolio. While the outlook for oil prices remains subdued and we still do not believe it is time to step in and buy energy stocks broadly, we see potential opportunities with select industrial companies that may have been overly punished for their exposure to the energy sector. We also see opportunity within the consumer discretionary sector, where companies are benefiting from improved U.S. consumer spending power at a broad level, and at the company level, select companies are also benefiting from value-creating innovation.

We believe that many of the clouds that hung over fixed income markets in 2015 remain with us. As such, we consider it prudent to maintain a defensive stance within our portfolios. Yes, the Fed removed lingering uncertainty about whether it would raise interest rates, but the timing of future hikes is a matter of debate. It is our view that neither the economic growth nor the four 0.25% increases that the Fed projects such growth merits in 2016 will come to fruition.

While the change in nonfarm payrolls rebounded after subpar late-summer readings, and the unemployment rate, at 5%, is roughly what the Fed considers optimal, the other part of its dual mandate – inflation – remains frustratingly low. We expect the downward pressure exerted on year over year headline data will soon roll off, but more-resilient core data remains well below the central bank's target of 2%.

Company developments, we believe, validate our view that we are in the later stages of the credit cycle. Shareholder-friendly activities continue and balance sheet strength has become more fleeting across a range of sectors, most notably energy. A chief concern is that much of the financial engineering that has occurred is aimed at compensating for lower revenue growth. With economic acceleration remaining elusive and rates still low, we expect management teams to continue to purchase growth, with these acquisitions often financed by debt issuance. We see less room for margin expansion, and with extended balance sheets, suboptimal results may be met with harsh market reaction.

Given this environment, we have minimized our exposure to the riskiest tiers of high-yield credit as we suspect the market may experience an uptick in defaults. Instead, we have focused on high-yield issuers with higher ratings.

By utilizing our Treasury allocation, we ended the period with the Portfolio's duration slightly above that of the benchmark. We believe that our increased exposure to longer dated Treasurys may counteract the volatility we expect risk assets to experience over the coming quarters. At the same time, our exposure to shorter dated Treasurys stands to be a source of liquidity, which may enable us to capitalize on attractive buying opportunities.

Despite the Fed's move away from its zero-interest-rate policy, fixed income markets are no less fraught with risks. The potential price dislocations associated with illiquid markets becomes more of a threat as stretched balance sheets and low growth may lead to earnings misses and investor redemptions. We believe that security avoidance will be a central driver of performance as the asymmetric risk of holding risky credits far outweighs the potential upside.

Thank you for your investment in the Janus Aspen Balanced Portfolio.

*Returns quoted are past performance and do not guarantee future results; current performance may be lower or higher. Investment returns and principal value will vary; there may be a gain or loss when shares are sold. For the most recent month-end performance call 877.33JANUS(52687) or visit janus.com/variable-insurance.*

*A Portfolio's performance may be affected by risks that include those associated with nondiversification, non-investment grade debt securities, high-yield/high-risk securities, undervalued or overlooked companies, investments in specific industries or countries and potential conflicts of interest. Additional risks to a Portfolio may also include, but are not limited to, those associated with investing in foreign securities, emerging markets, initial public offerings, real estate investment trusts (REITs), derivatives, short sales, commodity-linked investments and companies with relatively small market capitalizations. Each Portfolio has different risks. Please see a Janus prospectus for more information about risks, Portfolio holdings and other details.*

*Fixed income securities are subject to interest rate, inflation, credit and default risk. The bond market is volatile. As interest rates rise, bond prices usually fall, and vice versa. The return of principal is not guaranteed, and prices may decline if an issuer fails to make timely payments or its credit strength weakens.*

These returns do not reflect the charges and expenses of any particular insurance product or qualified plan. Returns shown would have been lower had they included insurance charges.

Returns include reinvestment of all dividends and distributions and do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or redemptions of Portfolio shares. The returns do not include adjustments in accordance with generally accepted accounting principles required at the period end for financial reporting purposes.

Returns shown for Service Shares for periods prior to December 31, 1999 are derived from the historical performance of Institutional Shares, adjusted to reflect the higher operating expenses of Service Shares.

Ranking is for the share class shown only; other classes may have different performance characteristics.

There is no assurance that the investment process will consistently lead to successful investing.

*See important disclosures on the next page.*

## Performance

See Notes to Schedule of Investments and Other Information for index definitions.

A Portfolio's holdings may differ significantly from the securities held in an index. An index is unmanaged and not available for direct investment; therefore, its performance does not reflect the expenses associated with the active management of an actual portfolio.

See "Useful Information About Your Portfolio Report."

Effective December 31, 2015, Jeremiah Buckley, Marc Pinto, Mayur Saigal, Gibson Smith and Darrell Watters are Co-Portfolio Managers of the Portfolio.

*The Portfolio's inception date – September 13, 1993

# Janus Aspen Balanced Portfolio (unaudited)
## Expense Examples

As a shareholder of the Portfolio, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees; 12b-1 distribution and shareholder servicing fees (applicable to Service Shares only); transfer agent fees and expenses payable pursuant to the Transfer Agency Agreement; and other Portfolio expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. The example is based upon an investment of $1,000 invested at the beginning of the period and held for the six-months indicated, unless noted otherwise in the table and footnotes below.

### Actual Expenses

The information in the table under the heading “Actual” provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = 8.6), then multiply the result by the number in the appropriate column for your share class under the heading entitled “Expenses Paid During Period” to estimate the expenses you paid on your account during the period.

### Hypothetical Example for Comparison Purposes

The information in the table under the heading “Hypothetical (5% return before expenses)” provides information about hypothetical account values and hypothetical expenses based upon the Portfolio’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. Additionally, for an analysis of the fees associated with an investment in either share class or other similar funds, please visit www.finra.org/fundanalyzer.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs, such as any charges at the separate account level or contract level. These fees are fully described in the Portfolio’s prospectuses. Therefore, the hypothetical examples are useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transaction costs were included, your costs would have been higher.

| | Actual | | | Hypothetical (5% return before expenses) | | | |
|---|---|---|---|---|---|---|---|
| | Beginning Account Value (7/1/15) | Ending Account Value (12/31/15) | Expenses Paid During Period (7/1/15 - 12/31/15)† | Beginning Account Value (7/1/15) | Ending Account Value (12/31/15) | Expenses Paid During Period (7/1/15 - 12/31/15)† | Net Annualized Expense Ratio (7/1/15 - 12/31/15) |
| Institutional Shares | $1,000.00 | $999.50 | $2.97 | $1,000.00 | $1,022.23 | $3.01 | 0.59% |
| Service Shares | $1,000.00 | $998.30 | $4.28 | $1,000.00 | $1,020.92 | $4.33 | 0.85% |

† Expenses Paid During Period are equal to the Net Annualized Expense Ratio multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period). Expenses in the examples include the effect of applicable fee waivers and/or expense reimbursements, if any. Had such waivers and/or reimbursements not been in effect, your expenses would have been higher. Please refer to the Notes to Financial Statements or the Portfolio’s prospectuses for more information regarding waivers and/or reimbursements.

## Notes to Schedule of Investments and Other Information

| | |
|---|---|
| Balanced Index | An internally-calculated, hypothetical combination of total returns from the S&P 500® Index (55%) and the Barclays U.S. Aggregate Bond Index (45%). |
| Barclays U.S. Aggregate Bond Index | A broad-based measure of the investment grade, US dollar-denominated, fixed-rate taxable bond market. |
| S&P 500® Index | Measures broad U.S. equity performance. |
| ADR | American Depositary Receipt |
| LLC | Limited Liability Company |
| LP | Limited Partnership |
| PLC | Public Limited Company |
| ULC | Unlimited Liability Company |

144A Securities sold under Rule 144A of the Securities Act of 1933, as amended, are subject to legal and/or contractual restrictions on resale and may not be publicly sold without registration under the 1933 Act. These securities have been determined to be liquid under guidelines established by the Board of Trustees. The total value of 144A securities as of the year ended December 31, 2015 is $112,548,451, which represents 4.9% of net assets.

* Non-income producing security.

(a) All or a portion of this position has not settled, or is not funded. Upon settlement or funding date, interest rates for unsettled or unfunded amounts will be determined. Interest and dividends will not be accrued until time of settlement or funding.

‡ The interest rate on floating rate notes is based on an index or market interest rates and is subject to change. Rate in the security description is as of December 31, 2015.

ºº Rate shown is the 7-day yield as of December 31, 2015.

µ This variable rate security is a perpetual bond. Perpetual bonds have no contractual maturity date, are not redeemable, and pay an indefinite stream of interest. The coupon rate shown represents the current interest rate.

£ The Portfolio may invest in certain securities that are considered affiliated companies. As defined by the Investment Company Act of 1940, as amended, an affiliated company is one in which the Portfolio owns 5% or more of the outstanding voting securities, or a company which is under common ownership or control. Based on the Portfolio's relative ownership, the following securities were considered affiliated companies for all or some portion of the year ended December 31, 2015. Unless otherwise indicated, all information in the table is for the year ended December 31, 2015.

| **Other Financial Instruments(a):** | | | |
| *Forward Currency Contracts* | $ - | $ 289,719 | $ - |
| **Total Assets** | $ 1,366,644,832 | $ 901,821,056 | $ 6,591,619 |

(a) Other financial instruments include forward currency, futures, written options, and swap contracts. Forward currency contracts are reported at their unrealized appreciation/(depreciation) at measurement date, which represents the change in the contract's value from trade date. Futures are reported at their variation margin at measurement date, which represents the amount due to/from the Portfolio at that date. Options and swap contracts are reported at their market value at measurement date.

# Janus Aspen Balanced Portfolio
## Notes to Financial Statements

### 1. Organization and Significant Accounting Policies

Janus Aspen Balanced Portfolio (the "Portfolio") is a series fund. The Portfolio is part of Janus Aspen Series (the "Trust"), which is organized as a Delaware statutory trust and is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company, and therefore has applied the specialized accounting and reporting guidance in Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 946. The Trust offers twelve Portfolios which include multiple series of shares, with differing investment objectives and policies. The Portfolio invests in a combination of equity securities selected for growth potential and fixed-income securities selected for income potential. The Portfolio is classified as diversified, as defined in the 1940 Act.

The Portfolio currently offers two classes of shares: Institutional Shares and Service Shares. Each class represents an interest in the same portfolio of investments. Institutional Shares are offered only in connection with investment in and payments under variable insurance contracts as well as certain qualified retirement plans. Service Shares are offered only in connection with investment in and payments under variable insurance contracts as well as certain qualified retirement plans that require a fee from Portfolio assets to procure distribution and administrative services to contract owners and plan participants.

Shareholders, including other portfolios, participating insurance companies, as well as accounts, may from time to time own (beneficially or of record) a significant percentage of the Portfolio's Shares and can be considered to "control" the Portfolio when that ownership exceeds 25% of the Portfolio's assets (and which may differ from control as determined in accordance with accounting principles generally accepted in the United States of America).

The following accounting policies have been followed by the Portfolio and are in conformity with accounting principles generally accepted in the United States of America.

#### Investment Valuation

Securities held by the Portfolio are valued in accordance with policies and procedures established by and under the supervision of the Trustees (the "Valuation Procedures"). Equity securities traded on a domestic securities exchange are generally valued at the closing prices on the primary market or exchange on which they trade. If such price is lacking for the trading period immediately preceding the time of determination, such securities are valued at their current bid price. Equity securities that are traded on a foreign exchange are generally valued at the closing prices on such markets. In the event that there is no current trading volume on a particular security in such foreign exchange, the bid price from the primary exchange is generally used to value the security. Securities that are traded on the over-the-counter ("OTC") markets are generally valued at their closing or latest bid prices as available. Foreign securities and currencies are converted to U.S. dollars using the applicable exchange rate in effect at the close of the New York Stock Exchange ("NYSE"). The Portfolio will determine the market value of individual securities held by it by using prices provided by one or more approved professional pricing services or, as needed, by obtaining market quotations from independent broker-dealers. Most debt securities are valued in accordance with the evaluated bid price supplied by the pricing service that is intended to reflect market value. The evaluated bid price supplied by the pricing service is an evaluation that may consider factors such as security prices, yields, maturities and ratings. Certain short-term securities maturing within 60 days or less may be evaluated and valued on an amortized cost basis provided that the amortized cost determined approximates market value. Securities for which market quotations or evaluated prices are not readily available or deemed unreliable are valued at fair value determined in good faith under the Valuation Procedures. Circumstances in which fair value pricing may be utilized include, but are not limited to: (i) a significant event that may affect the securities of a single issuer, such as a merger, bankruptcy, or significant issuer-specific development; (ii) an event that may affect an entire market, such as a natural disaster or significant governmental action; (iii) a nonsignificant event such as a market closing early or not opening, or a security trading halt; and (iv) pricing of a nonvalued security and a restricted or nonpublic security. Special valuation considerations may apply with respect to "odd-lot" fixed-income transactions which, due to their small size, may receive evaluated prices by pricing services which reflect a large block trade and not what actually could be obtained for the odd-lot position. The Portfolio uses systematic fair valuation models provided by independent third parties to value international equity securities in order to adjust for stale pricing, which may occur between the close of certain foreign exchanges and the close of the NYSE.

#### Valuation Inputs Summary

FASB ASC 820, Fair Value Measurements and Disclosures ("ASC 820"), defines fair value, establishes a framework for measuring fair value, and expands disclosure requirements regarding fair value measurements. This standard emphasizes that fair value is a market-based measurement that should be determined based on the assumptions that market participants would use in pricing an asset or liability and establishes a hierarchy that prioritizes inputs to valuation techniques used to measure fair value. These inputs are summarized into three broad levels:

Level 1 – Unadjusted quoted prices in active markets the Portfolio has the ability to access for identical assets or liabilities.

Level 2 – Observable inputs other than unadjusted quoted prices included in Level 1 that are observable for the asset or liability either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

Assets or liabilities categorized as Level 2 in the hierarchy generally include: debt securities fair valued in accordance with the evaluated bid or ask prices supplied by a pricing service; securities traded on OTC markets and listed securities for which no sales are reported that are fair valued at the latest bid price (or yield equivalent thereof) obtained from one or more dealers transacting in a market for such securities or by a pricing service approved by the Portfolio's Trustees; certain short-term debt securities with maturities of 60 days or less that are fair valued at amortized cost; and equity securities of foreign issuers whose fair value is determined by using systematic fair valuation models provided by independent third parties in order to adjust for stale pricing which may occur between the close of certain foreign exchanges and the close of the NYSE. Other securities that may be categorized as Level 2 in the hierarchy include, but are not limited to, preferred stocks, bank loans, swaps, investments in unregistered investment companies, options, and forward contracts.

Level 3 – Unobservable inputs for the asset or liability to the extent that relevant observable inputs are not available, representing the Portfolio's own assumptions about the assumptions that a market participant would use in valuing the asset or liability, and that would be based on the best information available.

There have been no significant changes in valuation techniques used in valuing any such positions held by the Portfolio since the beginning of the fiscal year.

The inputs or methodology used for fair valuing securities are not necessarily an indication of the risk associated with investing in those securities. The summary of inputs used as of December 31, 2015 to fair value the Portfolio's investments in securities and other financial instruments is included in the "Valuation Inputs Summary" in the Notes to Schedule of Investments and Other Information.

The Portfolio did not hold a significant amount of Level 3 securities as of December 31, 2015.

The Portfolio recognizes transfers between the levels as of the beginning of the fiscal year. The following describes the amounts of transfers between Level 1, Level 2 and Level 3 of the fair value hierarchy during the year.

Financial assets of $22,167,011 were transferred out of Level 2 to Level 1 since certain foreign equity prices were applied a fair valuation adjustment factor at the end of the prior fiscal year and no factor was applied at the end of the current period.

### Investment Transactions and Investment Income

Investment transactions are accounted for as of the date purchased or sold (trade date). Dividend income is recorded on the ex-dividend date. Certain dividends from foreign securities will be recorded as soon as the Portfolio is informed of the dividend, if such information is obtained subsequent to the ex-dividend date. Dividends from foreign securities may be subject to withholding taxes in foreign jurisdictions. Interest income is recorded on the accrual basis and includes amortization of premiums and accretion of discounts. Gains and losses are determined on the identified cost basis, which is the same basis used for federal income tax purposes. Income, as well as gains and losses, both realized and unrealized, are allocated daily to each class of shares based upon the ratio of net assets represented by each class as a percentage of total net assets.

### Expenses

The Portfolio bears expenses incurred specifically on its behalf, as well as a portion of general expenses, which may be allocated pro rata to the Portfolio. Each class of shares bears a portion of general expenses, which are allocated daily to each class of shares based upon the ratio of net assets represented by each class as a percentage of total net assets. Expenses directly attributable to a specific class of shares are charged against the operations of such class.

**Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

**Indemnifications**

In the normal course of business, the Portfolio may enter into contracts that contain provisions for indemnification of other parties against certain potential liabilities. The Portfolio's maximum exposure under these arrangements is unknown, and would involve future claims that may be made against the Portfolio that have not yet occurred. Currently, the risk of material loss from such claims is considered remote.

**Foreign Currency Translations**

The Portfolio does not isolate that portion of the results of operations resulting from the effect of changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held at the date of the financial statements. Net unrealized appreciation or depreciation of investments and foreign currency translations arise from changes in the value of assets and liabilities, including investments in securities held at the date of the financial statements, resulting from changes in the exchange rates and changes in market prices of securities held.

Currency gains and losses are also calculated on payables and receivables that are denominated in foreign currencies. The payables and receivables are generally related to foreign security transactions and income translations.

Foreign currency-denominated assets and forward currency contracts may involve more risks than domestic transactions, including currency risk, counterparty risk, political and economic risk, regulatory risk and equity risk. Risks may arise from unanticipated movements in the value of foreign currencies relative to the U.S. dollar.

**Dividends and Distributions**

The Portfolio may make semiannual distributions of substantially all of its investment income and an annual distribution of its net realized capital gains (if any).

The Portfolio may make certain investments in real estate investment trusts ("REITs") which pay dividends to their shareholders based upon funds available from operations. It is quite common for these dividends to exceed the REITs' taxable earnings and profits, resulting in the excess portion of such dividends being designated as a return of capital. If the Portfolio distributes such amounts, such distributions could constitute a return of capital to shareholders for federal income tax purposes.

**Federal Income Taxes**

The Portfolio intends to continue to qualify as a regulated investment company and distribute all of its taxable income in accordance with the requirements of Subchapter M of the Internal Revenue Code. Management has analyzed the Portfolio's tax positions taken for all open federal income tax years, generally a three-year period, and has concluded that no provision for federal income tax is required in the Portfolio's financial statements. The Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

## 2. Derivative Instruments

The Portfolio may invest in various types of derivatives, which may at times result in significant derivative exposure. A derivative is a financial instrument whose performance is derived from the performance of another asset. The Portfolio may invest in derivative instruments including, but not limited to: futures contracts, put options, call options, options on future contracts, options on foreign currencies, options on recovery locks, options on security and commodity indices, swaps, forward contracts, structured investments, and other equity-linked derivatives. Each derivative instrument that was held by the Portfolio during the year ended December 31, 2015 is discussed in further detail below. A summary of derivative activity by the Portfolio is reflected in the tables at the end of this section.

The Portfolio may use derivative instruments for hedging purposes (to offset risks associated with an investment, currency exposure, or market conditions), to adjust currency exposure relative to a benchmark index, or for speculative purposes (to earn income and seek to enhance returns). When the Portfolio invests in a derivative for speculative purposes, the Portfolio will be fully exposed to the risks of loss of that derivative, which may sometimes be greater than the derivative's cost. The Portfolio may not use any derivative to gain exposure to an asset or class of assets that it would be prohibited by its investment restrictions from purchasing directly. The Portfolio's ability to use derivative instruments may also be limited by tax considerations.

Investments in derivatives in general are subject to market risks that may cause their prices to fluctuate over time. Investments in derivatives may not directly correlate with the price movements of the underlying instrument. As a result, the use of derivatives may expose the Portfolio to additional risks that it would not be subject to if it invested directly in the securities underlying those derivatives. The use of derivatives may result in larger losses or smaller gains than otherwise would be the case. Derivatives can be volatile and may involve significant risks.

In pursuit of its investment objective, the Portfolio may seek to use derivatives to increase or decrease exposure to the following market risk factors:

- **Commodity Risk** – the risk related to the change in value of commodities or commodity-linked investments due to changes in the overall market movements, volatility of the underlying benchmark, changes in interest rates, or other factors affecting a particular industry of commodity such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political, and regulatory developments.
- **Counterparty Risk** – the risk that the counterparty (the party on the other side of the transaction) on a derivative transaction will be unable to honor its financial obligation to the Portfolio.
- **Credit Risk** – the risk an issuer will be unable to make principal and interest payments when due, or will default on its obligations.
- **Currency Risk** – the risk that changes in the exchange rate between currencies will adversely affect the value (in U.S. dollar terms) of an investment.
- **Equity Risk** – the risk related to the change in value of equity securities as they relate to increases or decreases in the general market.
- **Index Risk** – if the derivative is linked to the performance of an index, it will be subject to the risks associated with changes in that index. If the index changes, the Portfolio could receive lower interest payments or experience a reduction in the value of the derivative to below what the Portfolio paid. Certain indexed securities, including inverse securities (which move in an opposite direction to the index), may create leverage, to the extent that they increase or decrease in value at a rate that is a multiple of the changes in the applicable index.
- **Interest Rate Risk** – the risk that the value of fixed-income securities will generally decline as prevailing interest rates rise, which may cause the Portfolio's NAV to likewise decrease.
- **Leverage Risk** – the risk associated with certain types of leveraged investments or trading strategies pursuant to which relatively small market movements may result in large changes in the value of an investment. The Portfolio creates leverage by investing in instruments, including derivatives, where the investment loss can exceed the original amount invested. Certain investments or trading strategies, such as short sales, that involve leverage can result in losses that greatly exceed the amount originally invested.
- **Liquidity Risk** – the risk that certain securities may be difficult or impossible to sell at the time that the seller would like or at the price that the seller believes the security is currently worth.

Derivatives may generally be traded OTC or on an exchange. Derivatives traded OTC are agreements that are individually negotiated between parties and can be tailored to meet a purchaser's needs. OTC derivatives are not guaranteed by a clearing agency and may be subject to increased credit risk.

In an effort to mitigate credit risk associated with derivatives traded OTC, the Portfolio may enter into collateral agreements with certain counterparties whereby, subject to certain minimum exposure requirements, the Portfolio may require the counterparty to post collateral if the Portfolio has a net aggregate unrealized gain on all OTC derivative contracts with a particular counterparty. There is no guarantee that counterparty exposure is reduced and these arrangements are dependent on Janus Capital's ability to establish and maintain appropriate systems and trading.

**Forward Foreign Currency Exchange Contracts**
A forward foreign currency exchange contract ("forward currency contract") is an obligation to buy or sell a specified currency at a future date at a negotiated rate (which may be U.S. dollars or a foreign currency). The Portfolio may enter

into forward currency contracts for hedging purposes, including, but not limited to, reducing exposure to changes in foreign currency exchange rates on foreign portfolio holdings and locking in the U.S. dollar cost of firm purchase and sale commitments for securities denominated in or exposed to foreign currencies. The Portfolio may also invest in forward currency contracts for nonhedging purposes such as seeking to enhance returns. The Portfolio is subject to currency risk and counterparty risk in the normal course of pursuing its investment objective through its investments in forward currency contracts.

Forward currency contracts are valued by converting the foreign value to U.S. dollars by using the current spot U.S. dollar exchange rate and/or forward rate for that currency. Exchange and forward rates as of the close of the NYSE shall be used to value the forward currency contracts. The unrealized appreciation/(depreciation) for forward currency contracts is reported in the Statement of Assets and Liabilities as a receivable or payable and in the Statement of Operations for the change in unrealized net appreciation/depreciation (if applicable). The gain or loss arising from the difference between the U.S. dollar cost of the original contract and the value of the foreign currency in U.S. dollars upon closing a forward currency contract is reported on the Statement of Operations (if applicable).

During the year, the Portfolio entered into forward currency contracts with the obligation to sell foreign currencies in the future at an agreed upon rate in order to decrease exposure to currency risk associated with foreign currency denominated securities held by the Portfolio.

During the year ended December 31, 2015, the average ending monthly currency value amounts on sold forward currency contracts is $12,962,882.

The following table, grouped by derivative type, provides information about the fair value and location of derivatives within the Statement of Assets and Liabilities as of December 31, 2015.

**Fair Value of Derivative Instruments (not accounted for as hedging instruments) as of December 31, 2015**

| | *Currency Contracts* |
|---|---|
| *Asset Derivatives:* | |
| Forward currency contracts | $ 289,719 |

The following tables provide information about the effect of derivatives and hedging activities on the Portfolio's Statement of Operations for the year ended December 31, 2015.

**The effect of Derivative Instruments (not accounted for as hedging instruments) on the Statement of Operations for the year ended December 31, 2015**

*Amount of Realized Gain/(Loss) Recognized on Derivatives*

| *Derivative* | *Currency Contracts* |
|---|---|
| Investments and foreign currency transactions | $ 363,148 |

*Amount of Change in Unrealized Appreciation/Depreciation Recognized on Derivatives*

| *Derivative* | *Currency Contracts* |
|---|---|
| Investments, foreign currency translations and non-interested Trustees' deferred compensation | $ 222,597 |

Please see the Portfolio's Statement of Operations for the Portfolio's "Net Realized and Unrealized Gain/(Loss) on Investments."

### 3. Other Investments and Strategies

**Additional Investment Risk**

The Portfolio may be invested in lower-rated debt securities that have a higher risk of default or loss of value since these securities may be sensitive to economic changes, political changes, or adverse developments specific to the issuer.

The financial crisis in both the U.S. and global economies over the past several years has resulted, and may continue to result, in a significant decline in the value and liquidity of many securities of issuers worldwide in the equity and fixed-income/credit markets. In response to the crisis, the United States and certain foreign governments, along with the U.S. Federal Reserve and certain foreign central banks, took steps to support the financial markets. The withdrawal of this support, a failure of measures put in place to respond to the crisis, or investor perception that such efforts were not sufficient could each negatively affect financial markets generally, and the value and liquidity of specific securities. In addition, policy and legislative changes in the United States and in other countries continue to impact many aspects of financial regulation. The effect of these changes on the markets, and the practical implications for market participants, including the Portfolio, may not be fully known for some time. As a result, it may also be unusually difficult to identify both investment risks and opportunities, which could limit or preclude the Portfolio's ability to achieve its investment objective. Therefore, it is important to understand that the value of your investment may fall, sometimes sharply, and you could lose money.

The enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") provided for widespread regulation of financial institutions, consumer financial products and services, broker-dealers, OTC derivatives, investment advisers, credit rating agencies, and mortgage lending, which expanded federal oversight in the financial sector, including the investment management industry. Many provisions of the Dodd-Frank Act remain pending and will be implemented through future rulemaking. Therefore, the ultimate impact of the Dodd-Frank Act and the regulations under the Dodd-Frank Act on the Portfolio and the investment management industry as a whole, is not yet certain.

A number of countries in the European Union ("EU") have experienced, and may continue to experience, severe economic and financial difficulties. In particular, many EU nations are susceptible to economic risks associated with high levels of debt, notably due to investments in sovereign debt of countries such as Greece, Italy, Spain, Portugal, and Ireland. Many non-governmental issuers, and even certain governments, have defaulted on, or been forced to restructure, their debts. Many other issuers have faced difficulties obtaining credit or refinancing existing obligations. Financial institutions have in many cases required government or central bank support, have needed to raise capital, and/or have been impaired in their ability to extend credit. As a result, financial markets in the EU experienced extreme volatility and declines in asset values and liquidity. Responses to these financial problems by European governments, central banks, and others, including austerity measures and reforms, may not work, may result in social unrest, and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and others of their debt could have additional adverse effects on economies, financial markets, and asset valuations around the world. Greece, Ireland, and Portugal have already received one or more "bailouts" from other Eurozone member states, and it is unclear how much additional funding they will require or if additional Eurozone member states will require bailouts in the future. One or more countries may abandon the euro and/or withdraw from the EU, placing its currency and banking system in jeopardy.

Certain areas of the world have historically been prone to and economically sensitive to environmental events such as, but not limited to, hurricanes, earthquakes, typhoons, flooding, tidal waves, tsunamis, erupting volcanoes, wildfires or droughts, tornadoes, mudslides, or other weather-related phenomena. Such disasters, and the resulting physical or economic damage, could have a severe and negative impact on the Portfolio's investment portfolio and, in the longer term, could impair the ability of issuers in which the Portfolio invests to conduct their businesses as they would under normal conditions. Adverse weather conditions may also have a particularly significant negative effect on issuers in the agricultural sector and on insurance companies that insure against the impact of natural disasters.

**Counterparties**

Portfolio transactions involving a counterparty are subject to the risk that the counterparty or a third party will not fulfill its obligation to the Portfolio ("counterparty risk"). Counterparty risk may arise because of the counterparty's financial condition (i.e., financial difficulties, bankruptcy, or insolvency), market activities and developments, or other reasons, whether foreseen or not. A counterparty's inability to fulfill its obligation may result in significant financial loss to the

Portfolio. The Portfolio may be unable to recover its investment from the counterparty or may obtain a limited recovery, and/or recovery may be delayed. The extent of the Portfolio's exposure to counterparty risk with respect to financial assets and liabilities approximates its carrying value. See the "Offsetting Assets and Liabilities" section of this Note for further details.

The Portfolio may be exposed to counterparty risk through participation in various programs, including, but not limited to, lending its securities to third parties, cash sweep arrangements whereby the Portfolio's cash balance is invested in one or more types of cash management vehicles, as well as investments in, but not limited to, repurchase agreements, debt securities, and derivatives, including various types of swaps, futures and options. The Portfolio intends to enter into financial transactions with counterparties that Janus Capital believes to be creditworthy at the time of the transaction. There is always the risk that Janus Capital's analysis of a counterparty's creditworthiness is incorrect or may change due to market conditions. To the extent that the Portfolio focuses its transactions with a limited number of counterparties, it will have greater exposure to the risks associated with one or more counterparties.

**Loans**

The Portfolio may invest in various commercial loans, including bank loans, bridge loans, debtor-in-possession ("DIP") loans, mezzanine loans, and other fixed and floating rate loans. These loans may be acquired through loan participations and assignments or on a when-issued basis. Commercial loans will comprise no more than 20% of the Portfolio's total assets. Below are descriptions of the types of loans held by the Portfolio as of December 31, 2015.

- **Bank Loans -** Bank loans are obligations of companies or other entities entered into in connection with recapitalizations, acquisitions, and refinancings. The Portfolio's investments in bank loans are generally acquired as a participation interest in, or assignment of, loans originated by a lender or other financial institution. These investments may include institutionally-traded floating and fixed-rate debt securities.

- **Floating Rate Loans –** Floating rate loans are debt securities that have floating interest rates, that adjust periodically, and are tied to a benchmark lending rate, such as London Interbank Offered Rate ("LIBOR"). In other cases, the lending rate could be tied to the prime rate offered by one or more major U.S. banks or the rate paid on large certificates of deposit traded in the secondary markets. If the benchmark lending rate changes, the rate payable to lenders under the loan will change at the next scheduled adjustment date specified in the loan agreement. Floating rate loans are typically issued to companies ("borrowers") in connection with recapitalizations, acquisitions, and refinancings. Floating rate loan investments are generally below investment grade. Senior floating rate loans are secured by specific collateral of a borrower and are senior in the borrower's capital structure. The senior position in the borrower's capital structure generally gives holders of senior loans a claim on certain of the borrower's assets that is senior to subordinated debt and preferred and common stock in the case of a borrower's default. Floating rate loan investments may involve foreign borrowers, and investments may be denominated in foreign currencies. Floating rate loans often involve borrowers whose financial condition is troubled or uncertain and companies that are highly leveraged. The Portfolio may invest in obligations of borrowers who are in bankruptcy proceedings. While the Portfolio generally expects to invest in fully funded term loans, certain of the loans in which the Portfolio may invest include revolving loans, bridge loans, and delayed draw term loans.

  Purchasers of floating rate loans may pay and/or receive certain fees. The Portfolio may receive fees such as covenant waiver fees or prepayment penalty fees. The Portfolio may pay fees such as facility fees. Such fees may affect the Portfolio's return.

- **Mezzanine Loans -** Mezzanine loans are secured by the stock of the company that owns the assets. Mezzanine loans are a hybrid of debt and equity financing that is typically used to fund the expansion of existing companies. A mezzanine loan is composed of debt capital that gives the lender the right to convert to an ownership or equity interest in the company if the loan is not paid back in time and in full. Mezzanine loans typically are the most subordinated debt obligation in an issuer's capital structure.

### Mortgage- and Asset-Backed Securities

Mortgage- and asset-backed securities represent interests in "pools" of commercial or residential mortgages or other assets, including consumer loans or receivables. The Portfolio may purchase fixed or variable rate commercial or residential mortgage-backed securities issued by the Government National Mortgage Association ("Ginnie Mae"), the Federal National Mortgage Association ("Fannie Mae"), the Federal Home Loan Mortgage Corporation ("Freddie Mac"), or other governmental or government-related entities. Ginnie Mae's guarantees are backed by the full faith and credit of the U.S. Government, which means that the U.S. Government guarantees that the interest and principal will be paid when due. Fannie Mae and Freddie Mac securities are not backed by the full faith and credit of the U.S. Government. In September 2008, the Federal Housing Finance Agency ("FHFA"), an agency of the U.S. Government, placed Fannie Mae and Freddie Mac under conservatorship. Since that time, Fannie Mae and Freddie Mac have received capital support through U.S. Treasury preferred stock purchases, and Treasury and Federal Reserve purchases of their mortgage-backed securities. The FHFA and the U.S. Treasury have imposed strict limits on the size of these entities' mortgage portfolios. The FHFA has the power to cancel any contract entered into by Fannie Mae and Freddie Mac prior to FHFA's appointment as conservator or receiver, including the guarantee obligations of Fannie Mae and Freddie Mac.

The Portfolio may also purchase other mortgage- and asset-backed securities through single- and multi-seller conduits, collateralized debt obligations, structured investment vehicles, and other similar securities. Asset-backed securities may be backed by various consumer obligations, including automobile loans, equipment leases, credit card receivables, or other collateral. In the event the underlying loans are not paid, the securities' issuer could be forced to sell the assets and recognize losses on such assets, which could impact the Portfolio's yield and your return. Unlike traditional debt instruments, payments on these securities include both interest and a partial payment of principal. Mortgage and asset-backed securities are subject to both extension risk, where borrowers pay off their debt obligations more slowly in times of rising interest rates, and prepayment risk, where borrowers pay off their debt obligations sooner than expected in times of declining interest rates. These risks may reduce the Portfolio's returns. In addition, investments in mortgage- and asset backed securities, including those comprised of subprime mortgages, may be subject to a higher degree of credit risk, valuation risk, and liquidity risk than various other types of fixed-income securities. Additionally, although mortgage-backed securities are generally supported by some form of government or private guarantee and/or insurance, there is no assurance that guarantors or insurers will meet their obligations.

### Offsetting Assets and Liabilities

The Portfolio presents gross and net information about transactions that are either offset in the financial statements or subject to an enforceable master netting arrangement or similar agreement with a designated counterparty, regardless of whether the transactions are actually offset in the Statement of Assets and Liabilities.

In order to better define its contractual rights and to secure rights that will help the Portfolio mitigate its counterparty risk, the Portfolio may enter into an International Swaps and Derivatives Association, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement with its derivative contract counterparties. An ISDA Master Agreement is a bilateral agreement between the Portfolio and a counterparty that governs OTC derivatives and forward foreign currency exchange contracts and typically contains, among other things, collateral posting terms and netting provisions in the event of a default and/or termination event. Under an ISDA Master Agreement, in the event of a default and/or termination event, the Portfolio may offset with each counterparty certain derivative financial instruments' payables and/or receivables with collateral held and/or posted and create one single net payment. For financial reporting purposes, the Portfolio does not offset certain derivative financial instruments' payables and receivables and related collateral on the Statement of Assets and Liabilities.

The following table presents gross amounts of recognized assets and/or liabilities and the net amounts after deducting collateral that has been pledged by counterparties or has been pledged to counterparties (if applicable). For corresponding information grouped by type of instrument, see either the "Fair Value of Derivative Instruments as of December 31, 2015" table located in Note 2 of these Notes to Financial Statements and/or the Portfolio's Schedule of Investments.

**Offsetting of Financial Assets and Derivative Assets**

| *Counterparty* | *Gross Amounts of Recognized Assets* | *Offsetting Asset or Liability*(a) | *Collateral Pledged*(b) | *Net Amount* |
|---|---|---|---|---|
| Bank of America | $ 117,460 | $ - | $ - | $ 117,460 |
| Credit Suisse International | 19,246 | - | - | 19,246 |
| HSBC Securities (USA), Inc. | 98,395 | - | - | 98,395 |
| JPMorgan Chase & Co. | 45,948 | - | - | 45,948 |
| RBC Capital Markets Corp. | 8,670 | - | - | 8,670 |
| Total | $ 289,719 | $ - | $ - | $ 289,719 |

(a) Represents the amount of assets or liabilities that could be offset with the same counterparty under master netting or similar agreements that management elects not to offset on the Statement of Assets and Liabilities.

(b) Collateral pledged is limited to the net outstanding amount due to/from an individual counterparty. The actual collateral amounts pledged may exceed these amounts and may fluctuate in value.

The Portfolio does not exchange collateral on its forward currency contracts with its counterparties; however, the Portfolio may segregate cash or high-grade securities in an amount at all times equal to or greater than the Portfolio's commitment with respect to these contracts. Such segregated assets, if with the Portfolio's custodian, are denoted on the accompanying Schedule of Investments and are evaluated daily to ensure their market value equals or exceeds the current market value of the Portfolio's corresponding forward currency contracts.

### Real Estate Investing

The Portfolio may invest in equity and debt securities of real estate-related companies. Such companies may include those in the real estate industry or real estate-related industries. These securities may include common stocks, corporate bonds, preferred stocks, and other equity securities, including, but not limited to, mortgage-backed securities, real estate-backed securities, securities of REITs and similar REIT-like entities. A REIT is a trust that invests in real estate-related projects, such as properties, mortgage loans, and construction loans. REITs are generally categorized as equity, mortgage, or hybrid REITs. A REIT may be listed on an exchange or traded OTC.

### Restricted Security Transactions

Restricted securities held by the Portfolio may not be sold except in exempt transactions or in a public offering registered under the Securities Act of 1933, as amended. The risk of investing in such securities is generally greater than the risk of investing in the securities of widely held, publicly traded companies. Lack of a secondary market and resale restrictions may result in the inability of the Portfolio to sell a security at a fair price and may substantially delay the sale of the security. In addition, these securities may exhibit greater price volatility than securities for which secondary markets exist.

### Sovereign Debt

The Portfolio may invest in U.S. and foreign government debt securities ("sovereign debt"). Investments in U.S. sovereign debt are considered low risk. However, investments in non-U.S. sovereign debt can involve a high degree of risk, including the risk that the governmental entity that controls the repayment of sovereign debt may not be willing or able to repay the principal and/or to pay the interest on its sovereign debt in a timely manner. A sovereign debtor's willingness or ability to satisfy its debt obligation may be affected by various factors, including its cash flow situation, the extent of its foreign currency reserves, the availability of foreign exchange when a payment is due, the relative size of its debt position in relation to its economy as a whole, the sovereign debtor's policy toward international lenders, and local political constraints to which the governmental entity may be subject. Sovereign debtors may also be dependent on expected disbursements from foreign governments, multilateral agencies, and other entities. The failure of a sovereign debtor to implement economic reforms, achieve specified levels of economic performance, or repay principal or interest when due may result in the cancellation of third party commitments to lend funds to the sovereign debtor, which may further impair such debtor's ability or willingness to timely service its debts. The Portfolio may be requested to participate in the rescheduling of such sovereign debt and to extend further loans to governmental entities, which may adversely affect the Portfolio's holdings. In the event of default, there may be limited or no legal remedies for collecting sovereign debt and there may be no bankruptcy proceedings through which the Portfolio may collect all or part of the sovereign debt that a governmental entity has not repaid.

**When-Issued and Delayed Delivery Securities**
The Portfolio may purchase or sell securities on a when-issued or delayed delivery basis. When-issued and delayed delivery securities in which the Portfolio may invest include U.S. Treasury Securities, municipal bonds, bank loans, and other similar instruments. The price of the underlying securities and date when the securities will be delivered and paid for are fixed at the time the transaction is negotiated. Losses may arise due to changes in the market value of the securities or from the inability of counterparties to meet the terms of the contract. In connection with such purchases, the Portfolio may hold liquid assets as collateral with the Portfolio's custodian sufficient to cover the purchase price.

## 4. Investment Advisory Agreements and Other Transactions with Affiliates

The Portfolio pays Janus Capital an investment advisory fee which is calculated daily and paid monthly. The Portfolio's contractual investment advisory fee rate (expressed as an annual rate) is 0.55%.

Janus Services LLC ("Janus Services"), a wholly-owned subsidiary of Janus Capital, is the Portfolio's transfer agent. In addition, Janus Services provides or arranges for the provision of certain other administrative services including, but not limited to, recordkeeping, accounting, order processing, and other shareholder services for the Portfolio. Janus Services is not compensated for its services related to the shares, except for out-of-pocket costs. These amounts are disclosed as "Other transfer agent fees and expenses" on the Statement of Operations.

Under a distribution and shareholder servicing plan (the "Plan") adopted in accordance with Rule 12b-1 under the 1940 Act, the Service Shares may pay the Trust's distributor, Janus Distributors LLC ("Janus Distributors"), a wholly-owned subsidiary of Janus Capital, a fee for the sale and distribution and/or shareholder servicing of the Service Shares at an annual rate of up to 0.25% of the average daily net assets of the Service Shares. Under the terms of the Plan, the Trust is authorized to make payments to Janus Distributors for remittance to insurance companies and qualified plan service providers as compensation for distribution and/or shareholder services performed by such entities. These amounts are disclosed as "12b-1 Distribution and shareholder servicing fees" on the Statement of Operations. Payments under the Plan are not tied exclusively to actual 12b-1 distribution and servicing fees, and the payments may exceed 12b-1 distribution and servicing fees actually incurred. If any of the Portfolio's actual 12b-1 distribution and servicing fees incurred during a calendar year are less than the payments made during a calendar year, the Portfolio will be refunded the difference. Refunds, if any, are included in "12b-1 Distribution fees and shareholder servicing fees" in the Statement of Operations.

Janus Capital furnishes certain administration, compliance, and accounting services for the Portfolio and is reimbursed by the Portfolio for certain of its costs in providing those services (to the extent Janus Capital seeks reimbursement and such costs are not otherwise waived). The Portfolio also pays for salaries, fees, and expenses of certain Janus Capital employees and Portfolio officers, with respect to certain specified administration functions they perform on behalf of the Portfolio. The Portfolio pays these costs based on out-of-pocket expenses incurred by Janus Capital, and these costs are separate and apart from advisory fees and other expenses paid in connection with the investment advisory services Janus Capital provides to the Portfolio. These amounts are disclosed as "Portfolio administration fees" on the Statement of Operations. In addition, employees of Janus Capital and/or its affiliates may serve as officers of the Trust. Some expenses related to compensation payable to the Portfolio's Chief Compliance Officer and compliance staff are shared with the Portfolio. Total compensation of $43,224 was paid to the Chief Compliance Officer and certain compliance staff by the Trust during the year ended December 31, 2015. The Portfolio's portion is reported as part of "Other expenses" on the Statement of Operations.

The Board of Trustees has adopted a deferred compensation plan (the "Deferred Plan") for independent Trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from the Portfolio. All deferred fees are credited to an account established in the name of the Trustees. The amounts credited to the account then increase or decrease, as the case may be, in accordance with the performance of one or more of the Janus funds that are selected by the Trustees. The account balance continues to fluctuate in accordance with the performance of the selected fund or funds until final payment of all amounts are credited to the account. The fluctuation of the account balance is recorded by the Portfolio as unrealized appreciation/(depreciation) and is included as of December 31, 2015 on the Statement of Assets and Liabilities in the asset, "Non-interested Trustees' deferred compensation," and liability, "Non-interested Trustees' deferred compensation fees." Additionally, the recorded unrealized appreciation/(depreciation) is included in "Unrealized net appreciation/(depreciation) of investments, foreign currency translations and non-interested Trustees' deferred compensation" on the Statement of Assets and Liabilities. Deferred compensation expenses for the year ended December 31, 2015 are included in "Non-interested Trustees' fees and expenses" on the Statement of Operations. Trustees are allowed to change their designation of mutual funds from time to time. Amounts will be deferred until distributed in accordance with the Deferred Plan. Deferred fees of $317,200 were paid by the Trust to a Trustee under the Deferred Plan during the year ended December 31, 2015.

Pursuant to the provisions of the 1940 Act and related rules, the Portfolio may participate in an affiliated or nonaffiliated cash sweep program. In the cash sweep program, uninvested cash balances of the Portfolio may be used to purchase shares of affiliated or nonaffiliated money market funds or cash management pooled investment vehicles. The Portfolio is eligible to participate in the cash sweep program (the "Investing Funds"). As adviser, Janus Capital has an inherent conflict of interest because of its fiduciary duties to the affiliated money market funds or cash management pooled investment vehicles and the Investing Funds. Janus Cash Liquidity Fund LLC is an affiliated unregistered cash management pooled investment vehicle that invests primarily in highly-rated short-term fixed-income securities. Janus Cash Liquidity Fund LLC currently maintains a NAV of $1.00 per share and distributes income daily in a manner consistent with a registered product compliant with Rule 2a-7 under the 1940 Act. There are no restrictions on the Portfolio's ability to withdraw investments from Janus Cash Liquidity Fund LLC at will, and there are no unfunded capital commitments due from the Portfolio to Janus Cash Liquidity Fund LLC. The units of Janus Cash Liquidity Fund LLC are not charged any management fee, sales charge or service fee.

Any purchases and sales, realized gains/losses and recorded dividends from affiliated investments during the year ended December 31, 2015 can be found in a table located in the Notes to Schedule of Investments and Other Information.

The Portfolio is permitted to purchase or sell securities ("cross-trade") between itself and other funds or accounts managed by Janus Capital Management LLC in accordance with Rule 17a-7 under the Investment Company Act of 1940 ("Rule 17a-7"), when the transaction is consistent with the investment objectives and policies of the Portfolio and in accordance with the Internal Cross Trade Procedures adopted by the Trust's Board of Trustees. These procedures have been designed to ensure that any cross-trade of securities by the Portfolio from or to another fund or account that is or could be considered an affiliate of the Portfolio under certain limited circumstances by virtue of having a common investment adviser, common Officer, or common Trustee complies with Rule 17a-7. Under these procedures, each cross-trade is effected at the current market price to save costs where allowed. During the year ended December 31, 2015, the Portfolio engaged in cross trades amounting to $127,604,144 in purchases and $42,902,477 in sales, resulting in a net realized gain of $451,027. The net realized gain is included in "Investments and foreign currency transactions" within the "Net Realized and Unrealized Gain/(Loss) on Investments" section of the Portfolio's Statement of Operations.

### 5. Federal Income Tax

The tax components of capital shown in the table below represent: (1) distribution requirements the Portfolio must satisfy under the income tax regulations; (2) losses or deductions the Portfolio may be able to offset against income and gains realized in future years; and (3) unrealized appreciation or depreciation of investments for federal income tax purposes.

Other book to tax differences primarily consist of deferred compensation, derivatives, and foreign currency contract adjustments. The Portfolio has elected to treat gains and losses on forward foreign currency contracts as capital gains and losses, if applicable. Other foreign currency gains and losses on debt instruments are treated as ordinary income for federal income tax purposes pursuant to Section 988 of the Internal Revenue Code.

| | | | *Loss Deferrals* | | | *Net Tax* |
|---|---|---|---|---|---|---|
| *Undistributed Ordinary Income* | *Undistributed Long-Term Gains* | *Accumulated Capital Losses* | *Late-Year Ordinary Loss* | *Post-October Capital Loss* | *Other Book to Tax Differences* | *Appreciation/ (Depreciation)* |
| $ 20,153,467 | $ 29,093,502 | $ - | $ - | $ - | $ (41,952) | $227,271,002 |

The aggregate cost of investments and the composition of unrealized appreciation and depreciation of investment securities for federal income tax purposes as of December 31, 2015 are noted below.

Unrealized appreciation and unrealized depreciation in the table below exclude appreciation/depreciation on foreign currency translations. The primary differences between book and tax appreciation or depreciation of investments are wash sale loss deferrals and investments in partnerships.

| *Federal Tax Cost* | *Unrealized Appreciation* | *Unrealized (Depreciation)* | *Net Tax Appreciation/ (Depreciation)* |
|---|---|---|---|
| $ 2,047,496,786 | $250,613,165 | $(23,342,163) | $ 227,271,002 |

Income and capital gains distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. These differences are due to differing treatments for items such as net short-term gains, deferral of wash sale losses, foreign currency transactions, net investment losses, and capital loss carryovers. Certain permanent differences such as tax returns of capital and net investment losses noted below have been reclassified to capital.

*For the year ended December 31, 2015*

| *Distributions* | | | |
|---|---|---|---|
| *From Ordinary Income* | *From Long-Term Capital Gains* | *Tax Return of Capital* | *Net Investment Loss* |
| $ 37,052,217 | $ 64,669,597 | $ - | $ - |

*For the year ended December 31, 2014*

| *Distributions* | | | |
|---|---|---|---|
| *From Ordinary Income* | *From Long-Term Capital Gains* | *Tax Return of Capital* | *Net Investment Loss* |
| $ 24,218,232 | $ 37,448,205 | $ - | $ - |

Permanent book to tax basis differences may result in reclassifications between the components of net assets. These differences have no impact on the results of operations or net assets. The following reclassifications have been made to the Portfolio:

| *Increase/(Decrease) to Capital* | *Increase/(Decrease) to Undistributed Net Investment Income/Loss* | *Increase/(Decrease) to Undistributed Net Realized Gain/Loss* |
|---|---|---|
| $ - | $ 1,297,648 | $ (1,297,648) |

## 6. Capital Share Transactions

| | *Year ended December 31, 2015* | | *Year ended December 31, 2014* | |
|---|---|---|---|---|
| | *Shares* | *Amount* | *Shares* | *Amount* |
| Institutional Shares: | | | | |
| Shares sold | 1,101,594 | $ 34,376,815 | 915,113 | $ 28,106,105 |
| Reinvested dividends and distributions | 760,784 | 23,355,236 | 675,377 | 20,652,516 |
| Shares repurchased | (2,228,010) | (68,749,424) | (2,148,096) | (65,968,474) |
| Net Increase/(Decrease) | (365,632) | $ (11,017,373) | (557,606) | $ (17,209,853) |
| Service Shares: | | | | |
| Shares sold | 22,759,501 | $746,923,739 | 12,324,980 | $398,303,471 |
| Reinvested dividends and distributions | 2,428,045 | 78,366,578 | 1,277,515 | 41,013,921 |
| Shares repurchased | (4,476,788) | (145,175,742) | (3,565,814) | (114,711,837) |
| Net Increase/(Decrease) | 20,710,758 | $680,114,575 | 10,036,681 | $324,605,555 |

### 7. Purchases and Sales of Investment Securities

For the year ended December 31, 2015, the aggregate cost of purchases and proceeds from sales of investment securities (excluding any short-term securities, short-term options contracts, and in-kind transactions) was as follows:

| *Purchases of Securities* | *Proceeds from Sales of Securities* | *Purchases of Long-Term U.S. Government Obligations* | *Proceeds from Sales of Long-Term U.S. Government Obligations* |
|---|---|---|---|
| $1,340,128,770 | $ 749,002,135 | $ 723,752,843 | $ 755,371,449 |

### 8. Subsequent Event

Management has evaluated whether any events or transactions occurred subsequent to December 31, 2015 and through the date of issuance of the Portfolio's financial statements and determined that there were material events or transactions that would require recognition or disclosure in the Portfolio's financial statements, as discussed below.

Effective May 1, 2016, the Portfolio pays Janus Services a fee at an annual rate of up to 0.05% of the average daily net assets of the Portfolio's Institutional Shares and Service Shares to compensate insurance companies for services provided to contract owners. Any unused portion will be reimbursed back to the respective share class.

# Janus Aspen Balanced Portfolio
## Report of Independent Registered Public Accounting Firm

To the Board of Trustees of Janus Aspen Series and Shareholders of Janus Aspen Balanced Portfolio:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Janus Aspen Balanced Portfolio (one of the portfolios constituting Janus Aspen Series, hereafter referred to as the "Portfolio") at December 31, 2015, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Portfolio's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2015 by correspondence with the custodian, brokers and transfer agent, provide a reasonable basis for our opinion.

## Additional Information (unaudited)

**Proxy Voting Policies and Voting Record**
A description of the policies and procedures that the Portfolio uses to determine how to vote proxies relating to its portfolio securities is available without charge: (i) upon request, by calling 1-800-525-0020 (toll free); (ii) on the Portfolio's website at janus.com/proxyvoting; and (iii) on the SEC's website at http://www.sec.gov. Additionally, information regarding the Portfolio's proxy voting record for the most recent twelve-month period ended June 30 is also available, free of charge, through janus.com/ proxyvoting and from the SEC's website at http://www.sec.gov.

**Quarterly Portfolio Holdings**
The Portfolio files its complete portfolio holdings (schedule of investments) with the SEC for the first and third quarters of each fiscal year on Form N-Q within 60 days of the end of such fiscal quarter. The Portfolio's Form N-Q: (i) is available on the SEC's website at http://www.sec.gov; (ii) may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. (information on the Public Reference Room may be obtained by calling 1-800-SEC-0330); and (iii) is available without charge, upon request, by calling Janus at 1-800-525-0020 (toll free).

### APPROVAL OF ADVISORY AGREEMENTS DURING THE PERIOD

The Trustees of Janus Investment Fund and Janus Aspen Series, each of whom serves as an "independent" Trustee (the "Trustees"), oversee the management of each Fund of Janus Investment Fund and each Portfolio of Janus Aspen Series (each, a "Fund" and collectively, the "Funds"), and as required by law, determine annually whether to continue the investment advisory agreement for each Fund and the subadvisory agreements for the 16 Funds that utilize subadvisers.

In connection with their most recent consideration of those agreements for each Fund, the Trustees received and reviewed information provided by Janus Capital and the respective subadvisers in response to requests of the Trustees and their independent legal counsel. They also received and reviewed information and analysis provided by, and in response to requests of, their independent fee consultant. Throughout their consideration of the agreements, the Trustees were advised by their independent legal counsel. The Trustees met with management to consider the agreements, and also met separately in executive session with their independent legal counsel and their independent fee consultant.

At a meeting held on December 9, 2015, based on the Trustees' evaluation of the information provided by Janus Capital, the subadvisers, and the independent fee consultant, as well as other information, the Trustees determined that the overall arrangements between each Fund and Janus Capital and each subadviser, as applicable, were fair and reasonable in light of the nature, extent and quality of the services provided by Janus Capital, its affiliates and the subadvisers, the fees charged for those services, and other matters that the Trustees considered relevant in the exercise of their business judgment. At that meeting, the Trustees unanimously approved the continuation of the investment advisory agreement for each Fund, and the subadvisory agreement for each subadvised Fund, for the period from either January 1 or February 1, 2016 through January 1 or February 1, 2017, respectively, subject to earlier termination as provided for in each agreement.

In considering the continuation of those agreements, the Trustees reviewed and analyzed various factors that they determined were relevant, including the factors described below, none of which by itself was considered dispositive. However, the material factors and conclusions that formed the basis for the Trustees' determination to approve the continuation of the agreements are discussed separately below. Also included is a summary of the independent fee consultant's conclusions and opinions that arose during, and were included as part of, the Trustees' consideration of the agreements. "Management fees," as used herein, reflect actual annual advisory fees and any administration fees (excluding out of pocket costs), net of any waivers.

***Nature, Extent and Quality of Services***

The Trustees reviewed the nature, extent and quality of the services provided by Janus Capital and the subadvisers to the Funds, taking into account the investment objective, strategies and policies of each Fund, and the knowledge the Trustees gained from their regular meetings with management on at least a quarterly basis and their ongoing review of information related to the Funds. In addition, the Trustees reviewed the resources and key personnel of Janus Capital and each subadviser, particularly noting those employees who provide investment and risk management services to the Funds. The Trustees also considered other services provided to the Funds by Janus Capital or the subadvisers, such as managing the execution of portfolio transactions and the selection of broker-dealers for those transactions. The Trustees considered Janus Capital's role as administrator to the Funds, noting that Janus Capital does not receive a fee

for its services but is reimbursed for its out-of-pocket costs. The Trustees considered the role of Janus Capital in monitoring adherence to the Funds' investment restrictions, providing support services for the Trustees and Trustee committees, and overseeing communications with shareholders and the activities of other service providers, including monitoring compliance with various policies and procedures of the Funds and with applicable securities laws and regulations.

In this regard, the independent fee consultant noted that Janus Capital provides a number of different services for the Funds and Fund shareholders, ranging from investment management services to various other servicing functions, and that, in its opinion, Janus Capital is a capable provider of those services. The independent fee consultant also provided its belief that Janus Capital has developed a number of institutional competitive advantages that should enable it to provide superior investment and service performance over the long term.

The Trustees concluded that the nature, extent and quality of the services provided by Janus Capital or the subadviser to each Fund were appropriate and consistent with the terms of the respective advisory and subadvisory agreements, and that, taking into account steps taken to address those Funds whose performance lagged that of their peers for certain periods, the Funds were likely to benefit from the continued provision of those services. They also concluded that Janus Capital and each subadviser had sufficient personnel, with the appropriate education and experience, to serve the Funds effectively and had demonstrated its ability to attract well-qualified personnel.

***Performance of the Funds***

The Trustees considered the performance results of each Fund over various time periods. They noted that they considered Fund performance data throughout the year, including periodic meetings with each Fund's portfolio manager(s), and also reviewed information comparing each Fund's performance with the performance of comparable funds and peer groups identified by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent data provider, and with the Fund's benchmark index. In this regard, the independent fee consultant found that the overall Funds' performance has been strong: for the 36 months ended September 30, 2015, approximately 70% of the Funds were in the top two Broadridge quartiles of performance, and for the 12 months ended September 30, 2015, approximately 61% of the Funds were in the top two Broadridge quartiles of performance.

The Trustees considered the performance of each Fund, noting that performance may vary by share class, and noted the following:

***<u>Fixed-Income Funds and Money Market Funds</u>***

- For Janus Flexible Bond Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Global Bond Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Unconstrained Bond Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, the steps Janus Capital had taken or was taking to improve performance, and its limited performance history.
- For Janus High-Yield Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Multi-Sector Income Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Real Return Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.

- For Janus Short-Term Bond Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Government Money Market Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance.
- For Janus Money Market Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance.

***Asset Allocation Funds***

- For Janus Global Allocation Fund – Conservative, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Allocation Fund – Growth, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Global Allocation Fund – Moderate, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.

***Alternative Fund***

- For Janus Diversified Alternatives Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 12 months ended May 31, 2015.

***Value Funds***

- For Perkins International Value Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 12 months ended May 31, 2015.
- For Perkins Global Value Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital and Perkins had taken or were taking to improve performance.
- For Perkins Large Cap Value Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital and Perkins had taken or were taking to improve performance.
- For Perkins Mid Cap Value Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital and Perkins had taken or were taking to improve performance.
- For Perkins Select Value Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, the steps Janus Capital and Perkins had taken or were taking to improve performance, and that the performance trend was improving.

- For Perkins Small Cap Value Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, the steps Janus Capital and Perkins had taken or were taking to improve performance, and that the performance trend was improving.
- For Perkins Value Plus Income Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.

***Mathematical Funds***

- For INTECH Emerging Markets Managed Volatility Fund, the Trustees noted that, due to limited performance for the Fund, performance history was not a material factor.
- For INTECH Global Income Managed Volatility Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.
- For INTECH International Managed Volatility Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital and INTECH had taken or were taking to improve performance.
- For INTECH U.S. Core Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.
- For INTECH U.S. Managed Volatility Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.

***Growth and Core Funds***

- For Janus Balanced Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Contrarian Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Enterprise Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Forty Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Growth and Income Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and in the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Research Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.

- For Janus Triton Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Twenty Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Venture Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.

***Global and International Funds***

- For Janus Asia Equity Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, the steps Janus Capital had taken or was taking to improve performance, and that the performance trend was improving.
- For Janus Emerging Markets Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Life Sciences Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Real Estate Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Research Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Select Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Technology Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus International Equity Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Overseas Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital had taken or was taking to improve performance.

***Janus Aspen Series***

- For Janus Aspen Balanced Portfolio, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Enterprise Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Flexible Bond Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Forty Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Global Allocation Portfolio – Moderate, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Global Research Portfolio, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile-for the 12 months ended May 31, 2015.
- For Janus Aspen Global Technology Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Global Unconstrained Bond Portfolio, the Trustees noted that, due to limited performance for the Fund, performance history was not a material factor.
- For Janus Aspen INTECH U.S. Low Volatility Portfolio, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Janus Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Overseas Portfolio, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Aspen Perkins Mid Cap Value Portfolio, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital and Perkins had taken or were taking to improve performance.

In consideration of each Fund's performance, the Trustees concluded that, taking into account the factors relevant to performance, as well as other considerations, including steps taken to improve performance, the Fund's performance warranted continuation of the Fund's investment advisory and subadvisory agreement(s).

***Costs of Services Provided***

The Trustees examined information regarding the fees and expenses of each Fund in comparison to similar information for other comparable funds as provided by Broadridge, an independent data provider. They also reviewed an analysis of that information provided by their independent fee consultant and noted that the rate of management (investment advisory and any administration, but excluding out-of-pocket costs) fees for many of the Funds, after applicable waivers,

was below the mean management fee rate of the respective peer group of funds selected by an independent data provider. The Trustees also examined information regarding the subadvisory fees charged for subadvisory services, as applicable, noting that all such fees were paid by Janus Capital out of its management fees collected from such Fund.

The independent fee consultant provided its belief that the management fees charged by Janus Capital to each of the Funds under the current investment advisory and administration agreements are reasonable in relation to the services provided by Janus Capital. The independent fee consultant found: (1) the total expenses and management fees of the Funds to be reasonable relative to other mutual funds; (2) total expenses, on average, were 14% below the mean total expenses of their respective Broadridge Expense Group peers and 24% below the mean total expenses for their Broadridge Expense Universes; (3) management fees for the Funds, on average, were 15% below the mean management fees for their Expense Groups and 19% below the mean for their Expense Universes; and (4) Fund expenses at the functional level for each asset and share class category were reasonable. The Trustees also considered the total expenses for each share class of each Fund compared to the mean total expenses for its Broadridge Expense Group peers and to mean total expenses for its Broadridge Expense Universe.

The independent fee consultant concluded that, based on its strategic review of expenses at the complex, category and individual fund level, Fund expenses were found to be reasonable relative to both Expense Group and Expense Universe benchmarks. Further, for certain Funds, the independent fee consultant also performed a systematic "focus list" analysis of expenses in the context of the performance or service delivered to each set of investors in each share class in each selected Fund. Based on this analysis, the independent fee consultant found that the combination of service quality/performance and expenses on these individual Funds and share classes were reasonable in light of performance trends, performance histories, and existence of performance fees, breakpoints, and expense waivers on such Funds.

The Trustees considered the methodology used by Janus Capital and each subadviser in determining compensation payable to portfolio managers, the competitive environment for investment management talent, and the competitive market for mutual funds in different distribution channels.

The Trustees also reviewed management fees charged by Janus Capital and each subadviser to comparable separate account clients and to comparable non-affiliated funds subadvised by Janus Capital or by a subadviser (for which Janus Capital or the subadviser provides only or primarily portfolio management services). Although in most instances subadvisory and separate account fee rates for various investment strategies were lower than management fee rates for Funds having a similar strategy, the Trustees considered that Janus Capital noted that, under the terms of the management agreements with the Funds, Janus Capital performs significant additional services for the Funds that it does not provide to those other clients, including administration services, oversight of the Funds' other service providers, trustee support, regulatory compliance and numerous other services, and that, in serving the Funds, Janus Capital assumes many legal risks and other costs that it does not assume in servicing its other clients. Moreover, they noted that the independent fee consultant found that: (1) the management fees Janus Capital charges to the Funds are reasonable in relation to the management fees Janus Capital charges to its institutional and subadvised accounts; (2) these institutional and subadvised accounts have different service and infrastructure needs; (3) the average spread between management fees charged to the Funds and those charged to Janus Capital's institutional accounts is reasonable relative to the average spreads seen in the industry; and (4) by one estimation methodology, the fee margins implied by Janus Capital's subadvised fees when compared to its mutual fund fees are reasonable relative to the estimated fee margins in the industry and relative to estimated fee margins of fund managers using Janus Capital as a subadviser.

The Trustees considered the fees for each Fund for its fiscal year ended in 2014, and noted the following with regard to each Fund's total expenses, net of applicable fee waivers (the Fund's "total expenses"):

***Fixed-Income Funds and Money Market Funds***

- For Janus Flexible Bond Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.

- For Janus Global Bond Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Global Unconstrained Bond Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus High-Yield Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Multi-Sector Income Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus has contractually agreed to limit the Fund's expenses.
- For Janus Real Return Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for all share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Short-Term Bond Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for all share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Government Money Market Fund, the Trustees noted that the Fund's total expenses exceeded the peer group mean for both share classes. The Trustees considered that management fees for this Fund are higher than the peer group mean due to the Fund's management fee including other costs, such as custody and transfer agent services, while many funds in the peer group pay these expenses separately from their management fee. In addition, the Trustees considered that Janus Capital voluntarily waives one-half of its advisory fee and other expenses in order to maintain a positive yield.
- For Janus Money Market Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes. In addition, the Trustees considered that Janus Capital voluntarily waives one-half of its advisory fee and other expenses in order to maintain a positive yield.

***Asset Allocation Funds***

- For Janus Global Allocation Fund – Conservative, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Allocation Fund – Growth, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Allocation Fund – Moderate, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.

***Alternative Fund***

- For Janus Diversified Alternatives Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.

***Value Funds***

- For Perkins International Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Perkins Global Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable.

- For Perkins Large Cap Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Perkins Mid Cap Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Perkins Select Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Perkins Small Cap Value Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Perkins Value Plus Income Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses.

***Mathematical Funds***

- For INTECH Emerging Markets Managed Volatility Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For INTECH Global Income Managed Volatility Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For INTECH International Managed Volatility Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For INTECH U.S. Core Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For INTECH U.S. Managed Volatility Fund, the Trustees noted that the Fund's total expenses exceeded the peer group mean for one share class. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses.

***Growth and Core Funds***

- For Janus Balanced Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Contrarian Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Enterprise Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Forty Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.

- For Janus Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Growth and Income Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Research Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Triton Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Twenty Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Venture Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.

***Global and International Funds***

- For Janus Asia Equity Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Emerging Markets Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Global Life Sciences Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Real Estate Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Global Research Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Select Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Technology Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus International Equity Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Overseas Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.

***Janus Aspen Series***

- For Janus Aspen Balanced Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.

- For Janus Aspen Enterprise Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Flexible Bond Portfolio, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses.
- For Janus Aspen Forty Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Global Allocation Portfolio - Moderate, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for both share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Aspen Global Research Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Global Technology Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Global Unconstrained Bond Portfolio, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for both share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses.
- For Janus Aspen INTECH U.S. Low Volatility Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for its sole share class.
- For Janus Aspen Janus Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Overseas Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Perkins Mid Cap Value Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.

The Trustees reviewed information on the profitability to Janus Capital and its affiliates of their relationships with each Fund, as well as an explanation of the methodology utilized by Janus Capital when allocating various expenses of Janus Capital and its affiliates with respect to contractual relationships with the Funds and other clients. The Trustees also reviewed the financial statements and corporate structure of Janus Capital's parent company. In their review, the Trustees considered whether Janus Capital and each subadviser receive adequate incentives and resources to manage the Funds effectively. The Trustees recognized that profitability comparisons among fund managers are difficult because very little comparative information is publicly available, and the profitability of any fund manager is affected by numerous factors, including the organizational structure of the particular fund manager, the types of funds and other accounts it manages, possible other lines of business, the methodology for allocating expenses, and the fund manager's capital structure and cost of capital. However, taking into account those factors and the analysis provided by the Trustees' independent fee consultant, and based on the information available, the Trustees concluded that Janus Capital's profitability with respect to each Fund in relation to the services rendered was reasonable.

The independent fee consultant found that, while assessing the reasonableness of expenses in light of Janus Capital's profits is dependent on comparisons with other publicly-traded mutual fund advisers, and that these comparisons are limited in accuracy by differences in complex size, business mix, institutional account orientation, and other factors, after accepting these limitations, the level of profit earned by Janus Capital from managing the Funds is reasonable.

The Trustees concluded that the management fees payable by each Fund to Janus Capital and its affiliates, as well as the fees paid by Janus Capital to the subadvisers of subadvised Funds, were reasonable in relation to the nature, extent, and quality of the services provided, taking into account the fees charged by other advisers for managing comparable mutual funds with similar strategies, the fees Janus Capital and the subadvisers charge to other clients, and, as applicable, the impact of fund performance on management fees payable by the Funds. The Trustees also concluded that each Fund's total expenses were reasonable, taking into account the size of the Fund, the quality of services

provided by Janus Capital and any subadviser, the investment performance of the Fund, and any expense limitations agreed to or provided by Janus Capital.

***Economies of Scale***

The Trustees considered information about the potential for Janus Capital to realize economies of scale as the assets of the Funds increase. They noted that their independent fee consultant provided an analysis of economies of scale, which included discussion of analysis from prior years. They also noted that, although many Funds pay advisory fees at a base fixed rate as a percentage of net assets, without any breakpoints, their independent fee consultant concluded that 85% of these Funds have contractual management fees (gross of waivers) below their Broadridge expense group averages and, overall, 80% of the Funds are below their respective expense group averages for contractual management fees. They also noted that for those Funds whose expenses are being reduced by the contractual expense limitations of Janus Capital, Janus Capital is subsidizing the Funds because they have not reached adequate scale. Moreover, as the assets of some of the Funds have declined in the past few years, certain Funds have benefited from having advisory fee rates that have remained constant rather than increasing as assets declined. In addition, performance fee structures have been implemented for various Funds that have caused the effective rate of advisory fees payable by such a Fund to vary depending on the investment performance of the Fund relative to its benchmark index over the measurement period; and a few Funds have fee schedules with breakpoints and reduced fee rates above certain asset levels. The Trustees also noted that the Funds share directly in economies of scale through the lower charges of third-party service providers that are based in part on the combined scale of all of the Funds. Based on all of the information they reviewed, including research and analysis conducted by the Trustees' independent fee consultant, the Trustees concluded that the current fee structure of each Fund was reasonable and that the current rates of fees do reflect a sharing between Janus Capital and the Fund of any economies of scale that may be present at the current asset level of the Fund.

The independent fee consultant concluded that, given the limitations of various analytical approaches to economies of scale considered in prior years, and their conflicting results, its analyses could not confirm or deny the existence of economies of scale in the Janus complex. Further, the independent fee consultant provided its belief that Fund investors are well-served by the fee levels and performance fee structures in place on the Funds in light of any economies of scale that may be present at Janus Capital.

***Other Benefits to Janus Capital***

The Trustees also considered benefits that accrue to Janus Capital and its affiliates and subadvisers to the Funds from their relationships with the Funds. They recognized that two affiliates of Janus Capital separately serve the Funds as transfer agent and distributor, respectively, and the transfer agent receives compensation directly from the non-money market funds for services provided. The Trustees also considered Janus Capital's past and proposed use of commissions paid by the Funds on portfolio brokerage transactions to obtain proprietary and third-party research products and services benefiting the Fund and/or other clients of Janus Capital and/or Janus Capital, and/or a subadviser to a Fund. The Trustees concluded that Janus Capital's and the subadvisers' use of these types of client commission arrangements to obtain proprietary and third-party research products and services was consistent with regulatory requirements and guidelines and was likely to benefit each Fund. The Trustees also concluded that, other than the services provided by Janus Capital and its affiliates and subadvisers pursuant to the agreements and the fees to be paid by each Fund therefor, the Funds and Janus Capital and the subadvisers may potentially benefit from their relationship with each other in other ways. They concluded that Janus Capital and/or the subadvisers benefits from the receipt of research products and services acquired through commissions paid on portfolio transactions of the Funds and that the Funds benefit from Janus Capital's and/or the subadvisers' receipt of those products and services as well as research products and services acquired through commissions paid by other clients of Janus Capital and/or other clients of the subadvisers. They further concluded that the success of any Fund could attract other business to Janus Capital, the subadvisers or other Janus funds, and that the success of Janus Capital and the subadvisers could enhance Janus Capital's and the subadvisers' ability to serve the Funds.

### Management Commentary

The Management Commentary in this report includes valuable insight as well as statistical information to help you understand how your Portfolio's performance and characteristics stack up against those of comparable indices.

If the Portfolio invests in foreign securities, this report may include information about country exposure. Country exposure is based primarily on the country of risk. A company may be allocated to a country based on other factors such as location of the company's principal office, the location of the principal trading market for the company's securities, or the country where a majority of the company's revenues are derived.

Please keep in mind that the opinions expressed in the Management Commentary are just that: opinions. They are a reflection based on best judgment at the time this report was compiled, which was December 31, 2015. As the investing environment changes, so could opinions. These views are unique and are not necessarily shared by fellow employees or by Janus in general.

### Performance Overviews

Performance overview graphs compare the performance of a hypothetical $10,000 investment in the Portfolio with one or more widely used market indices. When comparing the performance of the Portfolio with an index, keep in mind that market indices are not available for investment and do not reflect deduction of expenses.

Average annual total returns are quoted for a Portfolio with more than one year of performance history. Average annual total return is calculated by taking the growth or decline in value of an investment over a period of time, including reinvestment of dividends and distributions, then calculating the annual compounded percentage rate that would have produced the same result had the rate of growth been constant throughout the period. Average annual total return does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or redemptions of Portfolio shares.

Cumulative total returns are quoted for a Portfolio with less than one year of performance history. Cumulative total return is the growth or decline in value of an investment over time, independent of the period of time involved. Cumulative total return does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or redemptions of Portfolio shares.

Pursuant to federal securities rules, expense ratios shown in the performance chart reflect subsidized (if applicable) and unsubsidized ratios. The total annual fund operating expenses ratio is gross of any fee waivers, reflecting the Portfolio's unsubsidized expense ratio. The net annual fund operating expenses ratio (if applicable) includes contractual waivers of Janus Capital and reflects the Portfolio's subsidized expense ratio. Ratios may be higher or lower than those shown in the "Financial Highlights" in this report.

### Schedule of Investments

Following the performance overview section is the Portfolio's Schedule of Investments. This schedule reports the types of securities held in the Portfolio on the last day of the reporting period. Securities are usually listed by type (common stock, corporate bonds, U.S. Government obligations, etc.) and by industry classification (banking, communications, insurance, etc.). Holdings are subject to change without notice.

The value of each security is quoted as of the last day of the reporting period. The value of securities denominated in foreign currencies is converted into U.S. dollars.

If the Portfolio invests in foreign securities, it will also provide a summary of investments by country. This summary reports the Portfolio exposure to different countries by providing the percentage of securities invested in each country. The country of each security represents the country of risk. The Portfolio's Schedule of Investments relies upon the industry group and country classifications published by Barclays and/or MSCI Inc.

Tables listing details of individual forward currency contracts, futures, written options, and swaps follow the Portfolio's Schedule of Investments (if applicable).

### Statement of Assets and Liabilities

This statement is often referred to as the "balance sheet." It lists the assets and liabilities of the Portfolio on the last day of the reporting period.

# Janus Aspen Balanced Portfolio
## Useful Information About Your Portfolio Report (unaudited)

The Portfolio's assets are calculated by adding the value of the securities owned, the receivable for securities sold but not yet settled, the receivable for dividends declared but not yet received on securities owned, and the receivable for Portfolio shares sold to investors but not yet settled. The Portfolio's liabilities include payables for securities purchased but not yet settled, Portfolio shares redeemed but not yet paid, and expenses owed but not yet paid. Additionally, there may be other assets and liabilities such as unrealized gain or loss on forward currency contracts.

The section entitled "Net Assets Consist of" breaks down the components of the Portfolio's net assets. Because the Portfolio must distribute substantially all earnings, you will notice that a significant portion of net assets is shareholder capital.

The last section of this statement reports the net asset value ("NAV") per share on the last day of the reporting period. The NAV is calculated by dividing the Portfolio's net assets for each share class (assets minus liabilities) by the number of shares outstanding.

**Statement of Operations**

This statement details the Portfolio's income, expenses, realized gains and losses on securities and currency transactions, and changes in unrealized appreciation or depreciation of Portfolio holdings.

The first section in this statement, entitled "Investment Income," reports the dividends earned from securities and interest earned from interest-bearing securities in the Portfolio.

The next section reports the expenses incurred by the Portfolio, including the advisory fee paid to the investment adviser, transfer agent fees and expenses, and printing and postage for mailing statements, financial reports and prospectuses. Expense offsets and expense reimbursements, if any, are also shown.

The last section lists the amounts of realized gains or losses from investment and foreign currency transactions, and changes in unrealized appreciation or depreciation of investments and foreign currency-denominated assets and liabilities. The Portfolio will realize a gain (or loss) when it sells its position in a particular security. A change in unrealized gain (or loss) refers to the change in net appreciation or depreciation of the Portfolio during the reporting period. "Net Realized and Unrealized Gain/(Loss) on Investments" is affected both by changes in the market value of Portfolio holdings and by gains (or losses) realized during the reporting period.

**Statements of Changes in Net Assets**

These statements report the increase or decrease in the Portfolio's net assets during the reporting period. Changes in the Portfolio's net assets are attributable to investment operations, dividends and distributions to investors, and capital share transactions. This is important to investors because it shows exactly what caused the Portfolio's net asset size to change during the period.

The first section summarizes the information from the Statement of Operations regarding changes in net assets due to the Portfolio's investment operations. The Portfolio's net assets may also change as a result of dividend and capital gains distributions to investors. If investors receive their dividends and/or distributions in cash, money is taken out of the Portfolio to pay the dividend and/or distribution. If investors reinvest their dividends and/or distributions, the Portfolio's net assets will not be affected. If you compare the Portfolio's "Net Decrease from Dividends and Distributions" to "Reinvested Dividends and Distributions," you will notice that dividends and distributions have little effect on the Portfolio's net assets. This is because the majority of the Portfolio's investors reinvest their dividends and/or distributions.

The reinvestment of dividends and distributions is included under "Capital Share Transactions." "Capital Shares" refers to the money investors contribute to the Portfolio through purchases or withdrawals via redemptions. The Portfolio's net assets will increase and decrease in value as investors purchase and redeem shares from the Portfolio.

**Financial Highlights**

This schedule provides a per-share breakdown of the components that affect the Portfolio's NAV for current and past reporting periods as well as total return, asset size, ratios, and portfolio turnover rate.

The first line in the table reflects the NAV per share at the beginning of the reporting period. The next line reports the net investment income/(loss) per share. Following is the per share total of net gains/(losses), realized and unrealized. Per share dividends and distributions to investors are then subtracted to arrive at the NAV per share at the end of the period. The next line reflects the total return for the period. The total return may include adjustments in accordance with

generally accepted accounting principles required at the period end for financial reporting purposes. The total return does not include any charges at the separate account level or contract level. As a result, the total return may differ from the total return reflected for individual shareholder transactions. Also included are ratios of expenses and net investment income to average net assets.

The Portfolio's expenses may be reduced through expense offsets and expense reimbursements. The ratios shown reflect expenses before and after any such offsets and reimbursements.

The ratio of net investment income/(loss) summarizes the income earned less expenses, divided by the average net assets of the Portfolio during the reporting period. Do not confuse this ratio with the Portfolio's yield. The net investment income ratio is not a true measure of the Portfolio's yield because it does not take into account the dividends distributed to the Portfolio's investors.

The next figure is the portfolio turnover rate, which measures the buying and selling activity in the Portfolio. Portfolio turnover is affected by market conditions, changes in the asset size of the Portfolio, fluctuating volume of shareholder purchase and redemption orders, the nature of the Portfolio's investments, and the investment style and/or outlook of the portfolio manager(s) and/or investment personnel. A 100% rate implies that an amount equal to the value of the entire portfolio was replaced once during the fiscal year; a 50% rate means that an amount equal to the value of half the portfolio is traded in a year; and a 200% rate means that an amount equal to the value of the entire portfolio is traded every six months.

# Janus Aspen Balanced Portfolio
## Designation Requirements (unaudited)

For federal income tax purposes, the Portfolio designated the following for the year ended December 31, 2015:

| | |
|---|---|
| Capital Gain Distributions | $64,669,597 |
| Dividends Received Deduction Percentage | 50% |

# Janus Aspen Balanced Portfolio
## Trustees and Officers (unaudited)

The Portfolio's Statement of Additional Information includes additional information about the Trustees and officers and is available, without charge, by calling 1-877-335-2687

The following are the Trustees and officers of the Trust, together with a brief description of their principal occupations during the last five years (principal occupations for certain Trustees may include periods over five years).

Each Trustee has served in that capacity since he or she was originally elected or appointed. The Trustees do not serve a specified term of office. Each Trustee will hold office until the termination of the Trust or his or her earlier death, resignation, retirement, incapacity, or removal. Under the Portfolio's Governance Procedures and Guidelines, the policy is for Trustees to retire no later than the end of the calendar year in which the Trustee turns 75. The Trustees review the Portfolio's Governance Procedures and Guidelines from time to time and may make changes they deem appropriate. The Portfolio's Nominating and Governance Committee will consider nominees for the position of Trustee recommended by shareholders. Shareholders may submit the name of a candidate for consideration by the Committee by submitting their recommendations to the Trust's Secretary. Each Trustee is currently a Trustee of one other registered investment company advised by Janus Capital: Janus Investment Fund. Collectively, these two registered investment companies consist of 58 series or funds.

The Trust's officers are elected annually by the Trustees for a one-year term. Certain officers also serve as officers of Janus Investment Fund. Certain officers of the Portfolio may also be officers and/or directors of Janus Capital. Portfolio officers receive no compensation from the Portfolio, except for the Portfolio's Chief Compliance Officer, as authorized by the Trustees.

## Janus provides access to a wide range of investment disciplines.

**Alternative**
Janus alternative funds seek to deliver strong risk-adjusted returns over a full market cycle with lower correlation to equity markets than traditional investments.

**Asset Allocation**
Janus' asset allocation funds utilize our fundamental, bottom-up research to balance risk over the long term. From fund options that meet investors' risk tolerance and objectives to a method that incorporates non-traditional investment choices to seek non-correlated sources of risk and return, Janus' asset allocation funds aim to allocate risk more effectively.

**Fixed Income**
Janus fixed income funds attempt to provide less risk relative to equities while seeking to deliver a competitive total return through high current income and appreciation. Janus money market funds seek capital preservation and liquidity with current income as a secondary objective.

**Global & International**
Janus global and international funds seek to leverage Janus' research capabilities by taking advantage of inefficiencies in foreign markets, where accurate information and analytical insight are often at a premium.

**Growth & Core**
Janus growth funds focus on companies believed to be the leaders in their respective industries, with solid management teams, expanding market share, margins and efficiencies. Janus core funds seek investments in more stable and predictable companies. Our core funds look for a strategic combination of steady growth and, for certain funds, some degree of income.

**Mathematical**
Our mathematical funds seek to outperform their respective indices while maintaining a risk profile equal to or lower than the index itself. Managed by INTECH® (a Janus subsidiary), these funds use a mathematical process in an attempt to build a more "efficient" portfolio than the index.

**Value**
Our value funds, managed by Perkins® (a Janus subsidiary), seek to identify companies with favorable reward to risk characteristics by conducting rigorous downside analysis before determining upside potential.

**PORTFOLIO SNAPSHOT**

We believe that investing in companies with sustainable growth and high return on invested capital can drive consistent returns and allow us to outperform our benchmark and peers over time with moderate risk. We seek to identify mid-cap companies with high-quality management teams that wisely allocate capital to fund and drive growth over time.

Brian Demain
portfolio manager

## PERFORMANCE OVERVIEW

During the 12 months ended December 31, 2015, Janus Aspen Enterprise Portfolio's Institutional Shares and Service Shares returned 4.03% and 3.77%, respectively. Meanwhile, the Portfolio's benchmark, the Russell Midcap Growth Index, returned -0.20%.

## INVESTMENT ENVIRONMENT

Mid-cap growth stocks ended the year with modest losses. A low interest rate environment and signs of a strengthening economy helped lift stocks in the first half of the year. Concerns about slow global economic growth, particularly in emerging markets, and a weakening energy sector led stocks down in the second half of the year. The energy, utilities and materials sectors suffered the steepest losses during the calendar year. The consumer staples and health care sectors were the top performers within the index.

## PERFORMANCE DISCUSSION

The portfolio outperformed its benchmark, the Russell Midcap Growth Index, during the year. Our portfolio tends to emphasize companies that have high returns on invested capital (ROIC), and often have more predictable business models, recurring revenue streams and strong competitive positioning that allows the companies to take market share and experience sustainable, long-term growth, even when the economy is less strong. We believe this focus should help the portfolio outperform when markets are down and the economy is weak, driving relative outperformance over full market cycles. Over the course of the year, our portfolio performed as we would have expected, with much of our relative outperformance coming in the back half of the year when the economic outlook was less certain, markets were more volatile and higher quality stocks returned to favor.

Strong stock selection in the technology and financial sectors were large contributors to relative performance during the year. Within the technology sector, we held a number of companies that put up impressive results that demonstrated the durability of their earnings streams.

Within the financial sector, two stocks, MSCI Inc. and Crown Castle, were large contributors to performance. MSCI was up after an activist investor became involved with the company; urging it to either split its two businesses or make other changes that allow its high-margin index business to become a greater source of profitability for the company. We like the sticky revenue streams associated with its two core businesses, an investment index business and also a risk management and analytics business. Once investment managers are given an index to compare their investment products against, it is very hard to shift away from that index. MSCI's analytics business is also a steady source of revenue, as these tools are increasingly important to the investment process.

Crown Castle International Corp., an owner of wireless communication towers, was another large contributor to performance. Concerns about a slowdown in infrastructure spending by a major wireless carrier had been negatively impacting the stock. However, comments by Crown Castle's management team toward the end of the year helped the market refocus on the company's long-term growth potential, which helped the stock rebound. Over the long term, we think Crown Castle is uniquely positioned to benefit from the increasing demand for data transmission.

Outside the financial sector, Pharmacyclics was one of the Portfolio's top contributors. The stock was up significantly this quarter after it was announced that AbbVie had won a bidding war to acquire the company. The high interest Pharmacyclics received from other companies validated our view that its blood cancer treatments offer significant growth potential.

While pleased with the results of many companies in our portfolio, we did own others that produced disappointing results. Potash Corporation of Saskatchewan was our largest detractor. A weak pricing environment for potash has negatively impacted the company but the stock remains a small holding in our portfolio, as we like the company's position as a low cost producer of potash.

Rexnord was another detractor. The company produces parts involved in process and motion control for manufacturers, mines and aerospace clients. Declining demand from mining customers who use Rexnord machinery to move ore has been a headwind for the company. However, these losses were partially offset by Rexnord's commercial plumbing business, which has benefited from a rebound in commercial construction. We believe Rexnord is positioned for steady growth in both businesses in the months ahead, and is likely to benefit from management's efforts to cut costs and expand operating margins. We also expect Rexnord to generate value through strategic acquisitions as it improves the operations of the companies it acquires.

Wolverine World Wide was another detractor. The company owns and distributes a number of shoe brands and sales for some of its largest brands have admittedly been disappointing this year. However, we have done extensive research on the company and believe its brands still resonate with consumers and have strong competitive positioning.

Please see the Derivative Instruments section in the "Notes to Financial Statements" for a discussion of derivatives used by the Portfolio.

## OUTLOOK

While broad economic growth looks more challenging in the coming months, we still see opportunity in equity markets. We see a great deal of innovation and disruption in today's marketplace, creating a high level of dispersion between what's happening at the macroeconomic level and the individual company level, in our view. This dispersion creates opportunity for stock pickers.

As we move into 2016, one item that will bear watching will be how companies handle rising interest rates. A number of companies that have accessed cheap debt markets in recent years may find it harder to fund their growth initiatives as the cost of capital increases. We think such an environment should favor those companies with more established growth profiles because they can rely on free cash flow, rather than access to cheap debt markets, to carry out their business plans.

Thank you for your investment in Janus Aspen Enterprise Portfolio.

*Returns quoted are past performance and do not guarantee future results; current performance may be lower or higher. Investment returns and principal value will vary; there may be a gain or loss when shares are sold. For the most recent month-end performance call 877.33JANUS(52687) or visit janus.com/variable-insurance.*

A Portfolio's performance may be affected by risks that include those associated with nondiversification, non-investment grade debt securities, high-yield/high-risk securities, undervalued or overlooked companies, investments in specific industries or countries and potential conflicts of interest. Additional risks to a Portfolio may also include, but are not limited to, those associated with investing in foreign securities, emerging markets, initial public offerings, real estate investment trusts (REITs), derivatives, short sales, commodity-linked investments and companies with relatively small market capitalizations. Each Portfolio has different risks. Please see a Janus prospectus for more information about risks, Portfolio holdings and other details.

Foreign securities are subject to additional risks including currency fluctuations, political and economic uncertainty, increased volatility, lower liquidity and differing financial and information reporting standards, all of which are magnified in emerging markets.

These returns do not reflect the charges and expenses of any particular insurance product or qualified plan. Returns shown would have been lower had they included insurance charges.

Returns include reinvestment of all dividends and distributions and do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or redemptions of Portfolio shares. The returns do not include adjustments in accordance with generally accepted accounting principles required at the period end for financial reporting purposes.

Returns shown for Service Shares for periods prior to December 31, 1999 are derived from the historical performance of Institutional Shares, adjusted to reflect the higher operating expenses of Service Shares.

Ranking is for the share class shown only; other classes may have different performance characteristics.

There is no assurance that the investment process will consistently lead to successful investing.

See Notes to Schedule of Investments and Other Information for index definitions.

A Portfolio's holdings may differ significantly from the securities held in an index. An index is unmanaged and not available for direct investment; therefore, its performance does not reflect the expenses associated with the active management of an actual portfolio.

## Expense Examples

As a shareholder of the Portfolio, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees; 12b-1 distribution and shareholder servicing fees (applicable to Service Shares only); transfer agent fees and expenses payable pursuant to the Transfer Agency Agreement; and other Portfolio expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. The example is based upon an investment of $1,000 invested at the beginning of the period and held for the six-months indicated, unless noted otherwise in the table and footnotes below.

### Actual Expenses

The information in the table under the heading "Actual" provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = 8.6), then multiply the result by the number in the appropriate column for your share class under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during the period.

### Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based upon the Portfolio's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. Additionally, for an analysis of the fees associated with an investment in either share class or other similar funds, please visit www.finra.org/fundanalyzer.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs, such as any charges at the separate account level or contract level. These fees are fully described in the Portfolio's prospectuses. Therefore, the hypothetical examples are useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transaction costs were included, your costs would have been higher.

| | Actual | | | Hypothetical (5% return before expenses) | | | |
|---|---|---|---|---|---|---|---|
| | Beginning Account Value (7/1/15) | Ending Account Value (12/31/15) | Expenses Paid During Period (7/1/15 - 12/31/15)† | Beginning Account Value (7/1/15) | Ending Account Value (12/31/15) | Expenses Paid During Period (7/1/15 - 12/31/15)† | Net Annualized Expense Ratio (7/1/15 - 12/31/15) |
| Institutional Shares | $1,000.00 | $980.70 | $3.44 | $1,000.00 | $1,021.73 | $3.52 | 0.69% |
| Service Shares | $1,000.00 | $979.20 | $4.74 | $1,000.00 | $1,020.42 | $4.84 | 0.95% |

† Expenses Paid During Period are equal to the Net Annualized Expense Ratio multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period). Expenses in the examples include the effect of applicable fee waivers and/or expense reimbursements, if any. Had such waivers and/or reimbursements not been in effect, your expenses would have been higher. Please refer to the Notes to Financial Statements or the Portfolio's prospectuses for more information regarding waivers and/or reimbursements.

## Notes to Schedule of Investments and Other Information

| | |
|---|---|
| Russell Midcap® Growth Index | Measures the performance of those Russell Midcap® Index companies with higher price-to-book ratios and higher forecasted growth values. |
| ADR | American Depositary Receipt |
| LLC | Limited Liability Company |
| PLC | Public Limited Company |
| U.S. Shares | Securities of foreign companies trading on an American stock exchange. |

* Non-income producing security.

† A portion of this security has been segregated to cover margin or segregation requirements on open futures contracts, forward currency contracts, options contracts, short sales, swap agreements, and/or securities with extended settlement dates, the value of which, as of December 31, 2015, is $18,451,200.

ºº Rate shown is the 7-day yield as of December 31, 2015.

# Loaned security; a portion of the security is on loan at December 31, 2015.

£ The Portfolio may invest in certain securities that are considered affiliated companies. As defined by the Investment Company Act of 1940, as amended, an affiliated company is one in which the Portfolio owns 5% or more of the outstanding voting securities, or a company which is under common ownership or control. Based on the Portfolio's relative ownership, the following securities were considered affiliated companies for all or some portion of the year ended December 31, 2015. Unless otherwise indicated, all information in the table is for the year ended December 31, 2015.

| | *Share Balance at 12/31/14* | *Purchases* | *Sales* | *Share Balance at 12/31/15* | *Dividend Income* | *Value at 12/31/15* |
|---|---|---|---|---|---|---|
| Janus Cash Collateral Fund LLC | 22,171,100 | 231,558,738 | (210,299,448) | 43,430,390 | $ 194,990(1) | $ 43,430,390 |
| Janus Cash Liquidity Fund LLC | 22,265,533 | 137,965,421 | (130,025,000) | 30,205,954 | 27,982 | 30,205,954 |
| Total | | | | | $ 222,972 | $ 73,636,344 |

(1) Net of income paid to the securities lending agent and rebates paid to the borrowing counterparties.

## Notes to Schedule of Investments and Other Information

The following is a summary of the inputs that were used to value the Portfolio's investments in securities and other financial instruments as of December 31, 2015. See Notes to Financial Statements for more information.

### Valuation Inputs Summary

| | Level 1 - Quoted Prices | Level 2 - Other Significant Observable Inputs | Level 3 - Significant Unobservable Inputs |
|---|---|---|---|
| **Assets** | | | |
| **Investments in Securities:** | | | |
| *Common Stocks* | $ 712,966,876 | $ - | $ - |
| *Investment Companies* | - | 73,636,344 | - |
| Total Investments in Securities | $ 712,966,876 | $ 73,636,344 | $ - |
| **Other Financial Instruments[(a)]:** | | | |
| *Forward Currency Contracts* | $ - | $ 192,690 | $ - |
| **Total Assets** | $ 712,966,876 | $ 73,829,034 | $ - |
| **Liabilities** | | | |
| **Other Financial Instruments[(a)]:** | | | |
| *Forward Currency Contracts* | $ - | $ 9,349 | $ - |

(a) Other financial instruments include forward currency, futures, written options, and swap contracts. Forward currency contracts are reported at their unrealized appreciation/(depreciation) at measurement date, which represents the change in the contract's value from trade date. Futures are reported at their variation margin at measurement date, which represents the amount due to/from the Fund at that date. Options and swap contracts are reported at their market value at measurement date.

* Total return not annualized for periods of less than one full year.
** Annualized for periods of less than one full year.
(1) Per share amounts are calculated based on average shares outstanding during the year or period.

See Notes to Financial Statements.

## 1. Organization and Significant Accounting Policies

Janus Aspen Enterprise Portfolio (the "Portfolio") is a series fund. The Portfolio is part of Janus Aspen Series (the "Trust"), which is organized as a Delaware statutory trust and is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company, and therefore has applied the specialized accounting and reporting guidance in Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 946. The Trust offers twelve Portfolios which include multiple series of shares, with differing investment objectives and policies. The Portfolio invests primarily in common stocks. The Portfolio is classified as diversified, as defined in the 1940 Act.

The Portfolio currently offers two classes of shares: Institutional Shares and Service Shares. Each class represents an interest in the same portfolio of investments. Institutional Shares are offered only in connection with investment in and payments under variable insurance contracts as well as certain qualified retirement plans. Service Shares are offered only in connection with investment in and payments under variable insurance contracts as well as certain qualified retirement plans that require a fee from Portfolio assets to procure distribution and administrative services to contract owners and plan participants.

Shareholders, including other portfolios, participating insurance companies, as well as accounts, may from time to time own (beneficially or of record) a significant percentage of the Portfolio's Shares and can be considered to "control" the Portfolio when that ownership exceeds 25% of the Portfolio's assets (and which may differ from control as determined in accordance with accounting principles generally accepted in the United States of America).

The following accounting policies have been followed by the Portfolio and are in conformity with accounting principles generally accepted in the United States of America.

### Investment Valuation

Securities held by the Portfolio are valued in accordance with policies and procedures established by and under the supervision of the Trustees (the "Valuation Procedures"). Equity securities traded on a domestic securities exchange are generally valued at the closing prices on the primary market or exchange on which they trade. If such price is lacking for the trading period immediately preceding the time of determination, such securities are valued at their current bid price. Equity securities that are traded on a foreign exchange are generally valued at the closing prices on such markets. In the event that there is no current trading volume on a particular security in such foreign exchange, the bid price from the primary exchange is generally used to value the security. Securities that are traded on the over-the-counter ("OTC") markets are generally valued at their closing or latest bid prices as available. Foreign securities and currencies are converted to U.S. dollars using the applicable exchange rate in effect at the close of the New York Stock Exchange ("NYSE"). The Portfolio will determine the market value of individual securities held by it by using prices provided by one or more approved professional pricing services or, as needed, by obtaining market quotations from independent broker-dealers. Most debt securities are valued in accordance with the evaluated bid price supplied by the pricing service that is intended to reflect market value. The evaluated bid price supplied by the pricing service is an evaluation that may consider factors such as security prices, yields, maturities and ratings. Certain short-term securities maturing within 60 days or less may be evaluated and valued on an amortized cost basis provided that the amortized cost determined approximates market value. Securities for which market quotations or evaluated prices are not readily available or deemed unreliable are valued at fair value determined in good faith under the Valuation Procedures. Circumstances in which fair value pricing may be utilized include, but are not limited to: (i) a significant event that may affect the securities of a single issuer, such as a merger, bankruptcy, or significant issuer-specific development; (ii) an event that may affect an entire market, such as a natural disaster or significant governmental action; (iii) a nonsignificant event such as a market closing early or not opening, or a security trading halt; and (iv) pricing of a nonvalued security and a restricted or nonpublic security. Special valuation considerations may apply with respect to "odd-lot" fixed-income transactions which, due to their small size, may receive evaluated prices by pricing services which reflect a large block trade and not what actually could be obtained for the odd-lot position. The Portfolio uses systematic fair valuation models provided by independent third parties to value international equity securities in order to adjust for stale pricing, which may occur between the close of certain foreign exchanges and the close of the NYSE.

### Valuation Inputs Summary

FASB ASC 820, Fair Value Measurements and Disclosures ("ASC 820"), defines fair value, establishes a framework for measuring fair value, and expands disclosure requirements regarding fair value measurements. This standard emphasizes that fair value is a market-based measurement that should be determined based on the assumptions that market participants would use in pricing an asset or liability and establishes a hierarchy that prioritizes inputs to valuation techniques used to measure fair value. These inputs are summarized into three broad levels:

Level 1 – Unadjusted quoted prices in active markets the Portfolio has the ability to access for identical assets or liabilities.

Level 2 – Observable inputs other than unadjusted quoted prices included in Level 1 that are observable for the asset or liability either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

Assets or liabilities categorized as Level 2 in the hierarchy generally include: debt securities fair valued in accordance with the evaluated bid or ask prices supplied by a pricing service; securities traded on OTC markets and listed securities for which no sales are reported that are fair valued at the latest bid price (or yield equivalent thereof) obtained from one or more dealers transacting in a market for such securities or by a pricing service approved by the Portfolio's Trustees; certain short-term debt securities with maturities of 60 days or less that are fair valued at amortized cost; and equity securities of foreign issuers whose fair value is determined by using systematic fair valuation models provided by independent third parties in order to adjust for stale pricing which may occur between the close of certain foreign exchanges and the close of the NYSE. Other securities that may be categorized as Level 2 in the hierarchy include, but are not limited to, preferred stocks, bank loans, swaps, investments in unregistered investment companies, options, and forward contracts.

Level 3 – Unobservable inputs for the asset or liability to the extent that relevant observable inputs are not available, representing the Portfolio's own assumptions about the assumptions that a market participant would use in valuing the asset or liability, and that would be based on the best information available.

There have been no significant changes in valuation techniques used in valuing any such positions held by the Portfolio since the beginning of the fiscal year.

The inputs or methodology used for fair valuing securities are not necessarily an indication of the risk associated with investing in those securities. The summary of inputs used as of December 31, 2015 to fair value the Portfolio's investments in securities and other financial instruments is included in the "Valuation Inputs Summary" in the Notes to Schedule of Investments and Other Information.

The Portfolio recognizes transfers between the levels as of the beginning of the fiscal year. The following describes the amounts of transfers between Level 1, Level 2 and Level 3 of the fair value hierarchy during the year.

Financial assets of $11,858,563 were transferred out of Level 2 to Level 1 since certain foreign equity prices were applied a fair valuation adjustment factor at the end of the prior fiscal year and no factor was applied at the end of the current period.

**Investment Transactions and Investment Income**
Investment transactions are accounted for as of the date purchased or sold (trade date). Dividend income is recorded on the ex-dividend date. Certain dividends from foreign securities will be recorded as soon as the Portfolio is informed of the dividend, if such information is obtained subsequent to the ex-dividend date. Dividends from foreign securities may be subject to withholding taxes in foreign jurisdictions. Interest income is recorded on the accrual basis and includes amortization of premiums and accretion of discounts. Gains and losses are determined on the identified cost basis, which is the same basis used for federal income tax purposes. Income, as well as gains and losses, both realized and unrealized, are allocated daily to each class of shares based upon the ratio of net assets represented by each class as a percentage of total net assets.

**Expenses**
The Portfolio bears expenses incurred specifically on its behalf, as well as a portion of general expenses, which may be allocated pro rata to the Portfolio. Each class of shares bears a portion of general expenses, which are allocated daily to each class of shares based upon the ratio of net assets represented by each class as a percentage of total net assets. Expenses directly attributable to a specific class of shares are charged against the operations of such class.

**Estimates**
The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and

liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

**Indemnifications**
In the normal course of business, the Portfolio may enter into contracts that contain provisions for indemnification of other parties against certain potential liabilities. The Portfolio's maximum exposure under these arrangements is unknown, and would involve future claims that may be made against the Portfolio that have not yet occurred. Currently, the risk of material loss from such claims is considered remote.

**Foreign Currency Translations**
The Portfolio does not isolate that portion of the results of operations resulting from the effect of changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held at the date of the financial statements. Net unrealized appreciation or depreciation of investments and foreign currency translations arise from changes in the value of assets and liabilities, including investments in securities held at the date of the financial statements, resulting from changes in the exchange rates and changes in market prices of securities held.

Currency gains and losses are also calculated on payables and receivables that are denominated in foreign currencies. The payables and receivables are generally related to foreign security transactions and income translations.

Foreign currency-denominated assets and forward currency contracts may involve more risks than domestic transactions, including currency risk, counterparty risk, political and economic risk, regulatory risk and equity risk. Risks may arise from unanticipated movements in the value of foreign currencies relative to the U.S. dollar.

**Dividends and Distributions**
The Portfolio may make semiannual distributions of substantially all of its investment income and an annual distribution of its net realized capital gains (if any).

The Portfolio may make certain investments in real estate investment trusts ("REITs") which pay dividends to their shareholders based upon funds available from operations. It is quite common for these dividends to exceed the REITs' taxable earnings and profits, resulting in the excess portion of such dividends being designated as a return of capital. If the Portfolio distributes such amounts, such distributions could constitute a return of capital to shareholders for federal income tax purposes.

**Federal Income Taxes**
The Portfolio intends to continue to qualify as a regulated investment company and distribute all of its taxable income in accordance with the requirements of Subchapter M of the Internal Revenue Code. Management has analyzed the Portfolio's tax positions taken for all open federal income tax years, generally a three-year period, and has concluded that no provision for federal income tax is required in the Portfolio's financial statements. The Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

### 2. Derivative Instruments

The Portfolio may invest in various types of derivatives, which may at times result in significant derivative exposure. A derivative is a financial instrument whose performance is derived from the performance of another asset. The Portfolio may invest in derivative instruments including, but not limited to: futures contracts, put options, call options, options on future contracts, options on foreign currencies, options on recovery locks, options on security and commodity indices, swaps, forward contracts, structured investments, and other equity-linked derivatives. Each derivative instrument that was held by the Portfolio during the year ended December 31, 2015 is discussed in further detail below. A summary of derivative activity by the Portfolio is reflected in the tables at the end of this section.

The Portfolio may use derivative instruments for hedging purposes (to offset risks associated with an investment, currency exposure, or market conditions), to adjust currency exposure relative to a benchmark index, or for speculative purposes (to earn income and seek to enhance returns). When the Portfolio invests in a derivative for speculative purposes, the Portfolio will be fully exposed to the risks of loss of that derivative, which may sometimes be greater than the derivative's cost. The Portfolio may not use any derivative to gain exposure to an asset or class of assets that it would be prohibited by its investment restrictions from purchasing directly. The Portfolio's ability to use derivative instruments may also be limited by tax considerations.

Investments in derivatives in general are subject to market risks that may cause their prices to fluctuate over time. Investments in derivatives may not directly correlate with the price movements of the underlying instrument. As a result, the use of derivatives may expose the Portfolio to additional risks that it would not be subject to if it invested directly in the securities underlying those derivatives. The use of derivatives may result in larger losses or smaller gains than otherwise would be the case. Derivatives can be volatile and may involve significant risks.

In pursuit of its investment objective, the Portfolio may seek to use derivatives to increase or decrease exposure to the following market risk factors:

- **Commodity Risk** – the risk related to the change in value of commodities or commodity-linked investments due to changes in the overall market movements, volatility of the underlying benchmark, changes in interest rates, or other factors affecting a particular industry of commodity such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political, and regulatory developments.
- **Counterparty Risk** – the risk that the counterparty (the party on the other side of the transaction) on a derivative transaction will be unable to honor its financial obligation to the Portfolio.
- **Credit Risk** – the risk an issuer will be unable to make principal and interest payments when due, or will default on its obligations.
- **Currency Risk** – the risk that changes in the exchange rate between currencies will adversely affect the value (in U.S. dollar terms) of an investment.
- **Equity Risk** – the risk related to the change in value of equity securities as they relate to increases or decreases in the general market.
- **Index Risk** – if the derivative is linked to the performance of an index, it will be subject to the risks associated with changes in that index. If the index changes, the Portfolio could receive lower interest payments or experience a reduction in the value of the derivative to below what the Portfolio paid. Certain indexed securities, including inverse securities (which move in an opposite direction to the index), may create leverage, to the extent that they increase or decrease in value at a rate that is a multiple of the changes in the applicable index.
- **Interest Rate Risk** – the risk that the value of fixed-income securities will generally decline as prevailing interest rates rise, which may cause the Portfolio's NAV to likewise decrease.
- **Leverage Risk** – the risk associated with certain types of leveraged investments or trading strategies pursuant to which relatively small market movements may result in large changes in the value of an investment. The Portfolio creates leverage by investing in instruments, including derivatives, where the investment loss can exceed the original amount invested. Certain investments or trading strategies, such as short sales, that involve leverage can result in losses that greatly exceed the amount originally invested.
- **Liquidity Risk** – the risk that certain securities may be difficult or impossible to sell at the time that the seller would like or at the price that the seller believes the security is currently worth.

Derivatives may generally be traded OTC or on an exchange. Derivatives traded OTC are agreements that are individually negotiated between parties and can be tailored to meet a purchaser's needs. OTC derivatives are not guaranteed by a clearing agency and may be subject to increased credit risk.

In an effort to mitigate credit risk associated with derivatives traded OTC, the Portfolio may enter into collateral agreements with certain counterparties whereby, subject to certain minimum exposure requirements, the Portfolio may require the counterparty to post collateral if the Portfolio has a net aggregate unrealized gain on all OTC derivative contracts with a particular counterparty. There is no guarantee that counterparty exposure is reduced and these arrangements are dependent on Janus Capital's ability to establish and maintain appropriate systems and trading.

**Forward Foreign Currency Exchange Contracts**
A forward foreign currency exchange contract ("forward currency contract") is an obligation to buy or sell a specified currency at a future date at a negotiated rate (which may be U.S. dollars or a foreign currency). The Portfolio may enter into forward currency contracts for hedging purposes, including, but not limited to, reducing exposure to changes in foreign currency exchange rates on foreign portfolio holdings and locking in the U.S. dollar cost of firm purchase and sale commitments for securities denominated in or exposed to foreign currencies. The Portfolio may also invest in

forward currency contracts for nonhedging purposes such as seeking to enhance returns. The Portfolio is subject to currency risk and counterparty risk in the normal course of pursuing its investment objective through its investments in forward currency contracts.

Forward currency contracts are valued by converting the foreign value to U.S. dollars by using the current spot U.S. dollar exchange rate and/or forward rate for that currency. Exchange and forward rates as of the close of the NYSE shall be used to value the forward currency contracts.

The unrealized appreciation/(depreciation) for forward currency contracts is reported in the Statement of Assets and Liabilities as a receivable or payable and in the Statement of Operations for the change in unrealized net appreciation/depreciation (if applicable). The gain or loss arising from the difference between the U.S. dollar cost of the original contract and the value of the foreign currency in U.S. dollars upon closing a forward currency contract is reported on the Statement of Operations (if applicable).

During the year, the Portfolio entered into forward currency contracts with the obligation to sell foreign currencies in the future at an agreed upon rate in order to decrease exposure to currency risk associated with foreign currency denominated securities held by the Portfolio.

During the year ended December 31, 2015, the average ending monthly currency value amounts on sold forward currency contracts $22,797,892.

The following table, grouped by derivative type, provides information about the fair value and location of derivatives within the Statement of Assets and Liabilities as of December 31, 2015.

**Fair Value of Derivative Instruments (not accounted for as hedging instruments) as of December 31, 2015**

| | *Currency Contracts* |
|---|---|
| *Asset Derivatives:* | |
| Forward currency contracts | $ 192,690 |
| *Liability Derivatives:* | |
| Forward currency contracts | $ 9,349 |

The following tables provide information about the effect of derivatives and hedging activities on the Portfolio's Statement of Operations for the year ended December 31, 2015.

**The effect of Derivative Instruments (not accounted for as hedging instruments) on the Statement of Operations for the year ended December 31, 2015**

*Amount of Realized Gain/(Loss) Recognized on Derivatives*

| *Derivative* | *Currency Contracts* |
|---|---|
| Investments and foreign currency transactions | $ 3,040,097 |

*Amount of Change in Unrealized Appreciation/Depreciation Recognized on Derivatives*

| *Derivative* | *Currency Contracts* |
|---|---|
| Investments, foreign currency translations and non-interested Trustees' deferred compensation | $ (400,266) |

Please see the Portfolio's Statement of Operations for the Portfolio's "Net Realized and Unrealized Gain/(Loss) on Investments."

### 3. Other Investments and Strategies

**Additional Investment Risk**

The financial crisis in both the U.S. and global economies over the past several years has resulted, and may continue to result, in a significant decline in the value and liquidity of many securities of issuers worldwide in the equity and fixed-income/credit markets. In response to the crisis, the United States and certain foreign governments, along with the U.S. Federal Reserve and certain foreign central banks, took steps to support the financial markets. The withdrawal of this support, a failure of measures put in place to respond to the crisis, or investor perception that such efforts were not sufficient could each negatively affect financial markets generally, and the value and liquidity of specific securities. In addition, policy and legislative changes in the United States and in other countries continue to impact many aspects of financial regulation. The effect of these changes on the markets, and the practical implications for market participants, including the Portfolio, may not be fully known for some time. As a result, it may also be unusually difficult to identify both investment risks and opportunities, which could limit or preclude the Portfolio's ability to achieve its investment objective. Therefore, it is important to understand that the value of your investment may fall, sometimes sharply, and you could lose money.

The enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") provided for widespread regulation of financial institutions, consumer financial products and services, broker-dealers, OTC derivatives, investment advisers, credit rating agencies, and mortgage lending, which expanded federal oversight in the financial sector, including the investment management industry. Many provisions of the Dodd-Frank Act remain pending and will be implemented through future rulemaking. Therefore, the ultimate impact of the Dodd-Frank Act and the regulations under the Dodd-Frank Act on the Portfolio and the investment management industry as a whole, is not yet certain.

A number of countries in the European Union ("EU") have experienced, and may continue to experience, severe economic and financial difficulties. In particular, many EU nations are susceptible to economic risks associated with high levels of debt, notably due to investments in sovereign debt of countries such as Greece, Italy, Spain, Portugal, and Ireland. Many non-governmental issuers, and even certain governments, have defaulted on, or been forced to restructure, their debts. Many other issuers have faced difficulties obtaining credit or refinancing existing obligations. Financial institutions have in many cases required government or central bank support, have needed to raise capital, and/or have been impaired in their ability to extend credit. As a result, financial markets in the EU experienced extreme volatility and declines in asset values and liquidity. Responses to these financial problems by European governments, central banks, and others, including austerity measures and reforms, may not work, may result in social unrest, and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and others of their debt could have additional adverse effects on economies, financial markets, and asset valuations around the world. Greece, Ireland, and Portugal have already received one or more "bailouts" from other Eurozone member states, and it is unclear how much additional funding they will require or if additional Eurozone member states will require bailouts in the future. One or more countries may abandon the euro and/or withdraw from the EU, placing its currency and banking system in jeopardy.

Certain areas of the world have historically been prone to and economically sensitive to environmental events such as, but not limited to, hurricanes, earthquakes, typhoons, flooding, tidal waves, tsunamis, erupting volcanoes, wildfires or droughts, tornadoes, mudslides, or other weather-related phenomena. Such disasters, and the resulting physical or economic damage, could have a severe and negative impact on the Portfolio's investment portfolio and, in the longer term, could impair the ability of issuers in which the Portfolio invests to conduct their businesses as they would under normal conditions. Adverse weather conditions may also have a particularly significant negative effect on issuers in the agricultural sector and on insurance companies that insure against the impact of natural disasters.

**Counterparties**

Portfolio transactions involving a counterparty are subject to the risk that the counterparty or a third party will not fulfill its obligation to the Portfolio ("counterparty risk"). Counterparty risk may arise because of the counterparty's financial condition (i.e., financial difficulties, bankruptcy, or insolvency), market activities and developments, or other reasons, whether foreseen or not. A counterparty's inability to fulfill its obligation may result in significant financial loss to the Portfolio. The Portfolio may be unable to recover its investment from the counterparty or may obtain a limited recovery, and/or recovery may be delayed. The extent of the Portfolio's exposure to counterparty risk with respect to financial assets and liabilities approximates its carrying value. See the "Offsetting Assets and Liabilities" section of this Note for further details.

The Portfolio may be exposed to counterparty risk through participation in various programs, including, but not limited to, lending its securities to third parties, cash sweep arrangements whereby the Portfolio's cash balance is invested in one or more types of cash management vehicles, as well as investments in, but not limited to, repurchase agreements, debt securities, and derivatives, including various types of swaps, futures and options. The Portfolio intends to enter into financial transactions with counterparties that Janus Capital believes to be creditworthy at the time of the transaction. There is always the risk that Janus Capital's analysis of a counterparty's creditworthiness is incorrect or may change due to market conditions. To the extent that the Portfolio focuses its transactions with a limited number of counterparties, it will have greater exposure to the risks associated with one or more counterparties.

### Offsetting Assets and Liabilities

The Portfolio presents gross and net information about transactions that are either offset in the financial statements or subject to an enforceable master netting arrangement or similar agreement with a designated counterparty, regardless of whether the transactions are actually offset in the Statement of Assets and Liabilities.

In order to better define its contractual rights and to secure rights that will help the Portfolio mitigate its counterparty risk, the Portfolio may enter into an International Swaps and Derivatives Association, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement with its derivative contract counterparties. An ISDA Master Agreement is a bilateral agreement between the Portfolio and a counterparty that governs OTC derivatives and forward foreign currency exchange contracts and typically contains, among other things, collateral posting terms and netting provisions in the event of a default and/or termination event. Under an ISDA Master Agreement, in the event of a default and/or termination event, the Portfolio may offset with each counterparty certain derivative financial instruments' payables and/or receivables with collateral held and/or posted and create one single net payment. For financial reporting purposes, the Portfolio does not offset certain derivative financial instruments' payables and receivables and related collateral on the Statement of Assets and Liabilities.

The following tables present gross amounts of recognized assets and/or liabilities and the net amounts after deducting collateral that has been pledged by counterparties or has been pledged to counterparties (if applicable). For corresponding information grouped by type of instrument, see either the "Fair Value of Derivative Instruments as of December 31, 2015" table located in Note 2 of these Notes to Financial Statements and/or the Portfolio's Schedule of Investments.

**Offsetting of Financial Assets and Derivative Assets**

| *Counterparty* | *Gross Amounts of Recognized Assets* | *Offsetting Asset or Liability*[(a)] | *Collateral Pledged*[(b)] | *Net Amount* |
|---|---|---|---|---|
| Bank of America | $ 49,626 | $ - | $ - | $ 49,626 |
| Citibank NA | 62,271 | (1,541) | - | 60,730 |
| Credit Suisse International | 2,361 | - | - | 2,361 |
| Deutsche Bank AG | 42,458,143 | - | (42,458,143) | - |
| HSBC Securities (USA,) Inc. | 52,223 | - | - | 52,223 |
| JPMorgan Chase & Co. | 4,590 | - | - | 4,590 |
| RBC Capital Markets Corp. | 21,619 | (7,808) | - | 13,811 |
| Total | $ 42,650,833 | $ (9,349) | $ (42,458,143) | $ 183,341 |

**Offsetting of Financial Liabilities and Derivative Liabilities**

| *Counterparty* | *Gross Amounts of Recognized Liabilities* | *Offsetting Asset or Liability*[(a)] | *Collateral Pledged*[(b)] | *Net Amount* |
|---|---|---|---|---|
| Citibank NA | $ 1,541 | $ (1,541) | $ - | $ - |
| RBC Capital Markets Corp. | 7,808 | (7,808) | - | - |
| Total | $ 9,349 | $ (9,349) | $ - | $ - |

(a) Represents the amount of assets or liabilities that could be offset with the same counterparty under master netting or similar agreements that management elects not to offset on the Statement of Assets and Liabilities.

(b) Collateral pledged is limited to the net outstanding amount due to/from an individual counterparty. The actual collateral amounts pledged may exceed these amounts and may fluctuate in value.

Deutsche Bank AG acts as securities lending agent and a limited purpose custodian or subcustodian to receive and disburse cash balances and cash collateral, hold short-term investments, hold collateral, and perform other custodian functions. Securities on loan will be continuously secured by collateral which may consist of cash, U.S. Government securities, domestic and foreign short-term debt instruments, letters of credit, time deposits, repurchase agreements, money market mutual funds or other money market accounts, or such other collateral as permitted by the SEC. The value of the collateral must be at least 102% of the market value of the loaned securities that are denominated in U.S. dollars and 105% of the market value of the loaned securities that are not denominated in U.S. dollars. Upon receipt of cash collateral, Janus Capital intends to invest the cash collateral in a cash management vehicle for which Janus Capital serves as investment adviser, Janus Cash Collateral Fund LLC. Loaned securities and related collateral are marked-to-market each business day based upon the market value of the loaned securities at the close of business, employing the most recent available pricing information. Collateral levels are then adjusted based on this mark-to-market evaluation.

The Portfolio does not exchange collateral on its forward currency contracts with its counterparties; however, the Portfolio may segregate cash or high-grade securities in an amount at all times equal to or greater than the Portfolio's commitment with respect to these contracts. Such segregated assets, if with the Portfolio's custodian, are denoted on the accompanying Schedule of Investments and are evaluated daily to ensure their market value equals or exceeds the current market value of the Portfolio's corresponding forward currency contracts.

**Real Estate Investing**
The Portfolio may invest in equity and debt securities of real estate-related companies. Such companies may include those in the real estate industry or real estate-related industries. These securities may include common stocks, corporate bonds, preferred stocks, and other equity securities, including, but not limited to, mortgage-backed securities, real estate-backed securities, securities of REITs and similar REIT-like entities. A REIT is a trust that invests in real estate-related projects, such as properties, mortgage loans, and construction loans. REITs are generally categorized as equity, mortgage, or hybrid REITs. A REIT may be listed on an exchange or traded OTC.

**Securities Lending**
Under procedures adopted by the Trustees, the Portfolio may seek to earn additional income by lending securities to qualified parties. Deutsche Bank AG acts as securities lending agent and a limited purpose custodian or subcustodian to receive and disburse cash balances and cash collateral, hold short-term investments, hold collateral, and perform other custodian functions. The Portfolio may lend portfolio securities in an amount equal to up to 1/3 of its total assets as determined at the time of the loan origination. There is the risk of delay in recovering a loaned security or the risk of loss in collateral rights if the borrower fails financially. In addition, Janus Capital makes efforts to balance the benefits and risks from granting such loans. All loans will be continuously secured by collateral which may consist of cash, U.S. Government securities, domestic and foreign short-term debt instruments, letters of credit, time deposits, repurchase agreements, money market mutual funds or other money market accounts, or such other collateral as permitted by the SEC. If the Portfolio is unable to recover a security on loan, the Portfolio may use the collateral to purchase replacement securities in the market. There is a risk that the value of the collateral could decrease below the cost of the replacement security by the time the replacement investment is made, resulting in a loss to the Portfolio.

Upon receipt of cash collateral, Janus Capital may invest it in affiliated or non-affiliated cash management vehicles, whether registered or unregistered entities, as permitted by the 1940 Act and rules promulgated thereunder. Janus Capital currently intends to invest the cash collateral in a cash management vehicle for which Janus Capital serves as investment adviser, Janus Cash Collateral Fund LLC. An investment in Janus Cash Collateral Fund LLC is generally subject to the same risks that shareholders experience when investing in similarly structured vehicles, such as the potential for significant fluctuations in assets as a result of the purchase and redemption activity of the securities lending program, a decline in the value of the collateral, and possible liquidity issues. Such risks may delay the return of the cash collateral and cause the Portfolio to violate its agreement to return the cash collateral to a borrower in a timely manner. As adviser to the Portfolio and Janus Cash Collateral Fund LLC, Janus Capital has an inherent conflict of interest as a result of its fiduciary duties to both the Portfolio and Janus Cash Collateral Fund LLC. Additionally, Janus Capital receives an investment advisory fee of 0.05% for managing Janus Cash Collateral Fund LLC, but it may not receive a fee for managing certain other affiliated cash management vehicles in which the Portfolio may invest, and therefore may have an incentive to allocate preferred investment opportunities to investment vehicles for which it is receiving a fee.

The value of the collateral must be at least 102% of the market value of the loaned securities that are denominated in U.S. dollars and 105% of the market value of the loaned securities that are not denominated in U.S. dollars. Loaned securities and related collateral are marked-to-market each business day based upon the market value of the loaned securities at the close of business, employing the most recent available pricing information. Collateral levels are then adjusted based on this mark-to-market evaluation.

The cash collateral invested by Janus Capital is disclosed in the Schedule of Investments. Income earned from the investment of the cash collateral, net of rebates paid to, or fees paid by, borrowers and less the fees paid to the lending agent are included as “Affiliated securities lending income, net” on the Statement of Operations. As of December 31, 2015, securities lending transactions accounted for as secured borrowings with an overnight and continuous contractual maturity are $42,458,143 in equity securities. Gross amounts of recognized liabilities for securities lending (collateral received) as of December 31, 2015 is $43,430,390, resulting in the net amount due to the counterparty of $972,247.

### 4. Investment Advisory Agreements and Other Transactions with Affiliates

The Portfolio pays Janus Capital an investment advisory fee which is calculated daily and paid monthly. The Portfolio’s contractual investment advisory fee rate (expressed as an annual rate) is 0.64%.

Janus Services LLC (“Janus Services”), a wholly-owned subsidiary of Janus Capital, is the Portfolio’s transfer agent. In addition, Janus Services provides or arranges for the provision of certain other administrative services including, but not limited to, recordkeeping, accounting, order processing, and other shareholder services for the Portfolio. Janus Services is not compensated for its services related to the shares, except for out-of-pocket costs. These amounts are disclosed as “Other transfer agent fees and expenses” on the Statement of Operations.

Under a distribution and shareholder servicing plan (the “Plan”) adopted in accordance with Rule 12b-1 under the 1940 Act, the Service Shares may pay the Trust’s distributor, Janus Distributors LLC (“Janus Distributors”), a wholly-owned subsidiary of Janus Capital, a fee for the sale and distribution and/or shareholder servicing of the Service Shares at an annual rate of up to 0.25% of the average daily net assets of the Service Shares. Under the terms of the Plan, the Trust is authorized to make payments to Janus Distributors for remittance to insurance companies and qualified plan service providers as compensation for distribution and/or shareholder services performed by such entities. These amounts are disclosed as “12b-1 Distribution and shareholder servicing fees” on the Statement of Operations. Payments under the Plan are not tied exclusively to actual 12b-1 distribution and servicing fees, and the payments may exceed 12b-1 distribution and servicing fees actually incurred. If any of the Portfolio’s actual 12b-1 distribution and servicing fees incurred during a calendar year are less than the payments made during a calendar year, the Portfolio will be refunded the difference. Refunds, if any, are included in “12b-1 Distribution fees and shareholder servicing fees” in the Statement of Operations.

Janus Capital furnishes certain administration, compliance, and accounting services for the Portfolio and is reimbursed by the Portfolio for certain of its costs in providing those services (to the extent Janus Capital seeks reimbursement and such costs are not otherwise waived). The Portfolio also pays for salaries, fees, and expenses of certain Janus Capital employees and Portfolio officers, with respect to certain specified administration functions they perform on behalf of the Portfolio. The Portfolio pays these costs based on out-of-pocket expenses incurred by Janus Capital, and these costs are separate and apart from advisory fees and other expenses paid in connection with the investment advisory services Janus Capital provides to the Portfolio. These amounts are disclosed as “Portfolio administration fees” on the Statement of Operations. In addition, employees of Janus Capital and/or its affiliates may serve as officers of the Trust. Some expenses related to compensation payable to the Portfolio's Chief Compliance Officer and compliance staff are shared with the Portfolio. Total compensation of $43,224 was paid to the Chief Compliance Officer and certain compliance staff by the Trust during the year ended December 31, 2015. The Portfolio's portion is reported as part of “Other expenses” on the Statement of Operations.

The Board of Trustees has adopted a deferred compensation plan (the “Deferred Plan”) for independent Trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from the Portfolio. All deferred fees are credited to an account established in the name of the Trustees. The amounts credited to the account then increase or decrease, as the case may be, in accordance with the performance of one or more of the Janus funds that are selected by the Trustees. The account balance continues to fluctuate in accordance with the performance of the selected fund or funds until final payment of all amounts are credited to the account. The fluctuation of the account balance is recorded by the Portfolio as unrealized appreciation/(depreciation) and is included as of December 31, 2015 on the Statement of Assets and Liabilities in the asset, "Non-interested Trustees' deferred compensation," and liability, "Non-interested Trustees' deferred compensation fees." Additionally, the recorded unrealized appreciation/(depreciation) is included in "Unrealized net appreciation/(depreciation) of investments, foreign currency translations and non-interested Trustees' deferred compensation" on the Statement of Assets and Liabilities. Deferred compensation expenses for the year ended December 31, 2015 are included in "Non-interested Trustees' fees and expenses" on the Statement of Operations. Trustees are allowed to change their designation of mutual funds from time to time. Amounts will be deferred until distributed in accordance with the Deferred Plan. Deferred fees of $317,200 were paid by the Trust to a Trustee under the Deferred Plan during the year ended December 31, 2015.

Pursuant to the provisions of the 1940 Act and related rules, the Portfolio may participate in an affiliated or nonaffiliated cash sweep program. In the cash sweep program, uninvested cash balances of the Portfolio may be used to purchase shares of affiliated or nonaffiliated money market funds or cash management pooled investment vehicles. The Portfolio is eligible to participate in the cash sweep program (the "Investing Funds"). As adviser, Janus Capital has an inherent conflict of interest because of its fiduciary duties to the affiliated money market funds or cash management pooled investment vehicles and the Investing Funds. Janus Cash Liquidity Fund LLC is an affiliated unregistered cash management pooled investment vehicle that invests primarily in highly-rated short-term fixed-income securities. Janus Cash Liquidity Fund LLC currently maintains a NAV of $1.00 per share and distributes income daily in a manner consistent with a registered product compliant with Rule 2a-7 under the 1940 Act. There are no restrictions on the Portfolio's ability to withdraw investments from Janus Cash Liquidity Fund LLC at will, and there are no unfunded capital commitments due from the Portfolio to Janus Cash Liquidity Fund LLC. The units of Janus Cash Liquidity Fund LLC are not charged any management fee, sales charge or service fee.

Any purchases and sales, realized gains/losses and recorded dividends from affiliated investments during the year ended December 31, 2015 can be found in a table located in the Notes to Schedule of Investments and Other Information.

The Portfolio is permitted to purchase or sell securities ("cross-trade") between itself and other funds or accounts managed by Janus Capital Management LLC in accordance with Rule 17a-7 under the Investment Company Act of 1940 ("Rule 17a-7"), when the transaction is consistent with the investment objectives and policies of the Portfolio and in accordance with the Internal Cross Trade Procedures adopted by the Trust's Board of Trustees. These procedures have been designed to ensure that any cross-trade of securities by the Portfolio from or to another fund or account that is or could be considered an affiliate of the Portfolio under certain limited circumstances by virtue of having a common investment adviser, common Officer, or common Trustee complies with Rule 17a-7. Under these procedures, each cross-trade is effected at the current market price to save costs where allowed. During the year ended December 31, 2015, the Portfolio engaged in cross trades amounting to $1,614,472 in purchases.

### 5. Federal Income Tax

The tax components of capital shown in the table below represent: (1) distribution requirements the Portfolio must satisfy under the income tax regulations; (2) losses or deductions the Portfolio may be able to offset against income and gains realized in future years; and (3) unrealized appreciation or depreciation of investments for federal income tax purposes.

Other book to tax differences primarily consist of deferred compensation, derivatives, and foreign currency contract adjustments. The Portfolio has elected to treat gains and losses on forward foreign currency contracts as capital gains and losses, if applicable. Other foreign currency gains and losses on debt instruments are treated as ordinary income for federal income tax purposes pursuant to Section 988 of the Internal Revenue Code.

| | | | Loss Deferrals | | | Net Tax |
|---|---|---|---|---|---|---|
| *Undistributed Ordinary Income* | *Undistributed Long-Term Gains* | *Accumulated Capital Losses* | *Late-Year Ordinary Loss* | *Post-October Capital Loss* | *Other Book to Tax Differences* | *Appreciation/ (Depreciation)* |
| $ 5,730,971 | $ 60,185,274 | $ - | $ - | $ - | $ (13,290) | $246,918,468 |

The aggregate cost of investments and the composition of unrealized appreciation and depreciation of investment securities for federal income tax purposes as of December 31, 2015 are noted below.

Unrealized appreciation and unrealized depreciation in the table below exclude appreciation/depreciation on foreign currency translations. The primary differences between book and tax appreciation or depreciation of investments are wash sale loss deferrals and investments in partnerships.

| Federal Tax Cost | Unrealized Appreciation | Unrealized (Depreciation) | Net Tax Appreciation/ (Depreciation) |
|---|---|---|---|
| $ 539,684,752 | $268,486,764 | $(21,568,296) | $ 246,918,468 |

Income and capital gains distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. These differences are due to differing treatments for items such as net short-term gains. Certain permanent differences such as tax returns of capital and net investment losses noted below have been reclassified to capital.

*For the year ended December 31, 2015*

| Distributions | | | |
|---|---|---|---|
| From Ordinary Income | From Long-Term Capital Gains | Tax Return of Capital | Net Investment Loss |
| $ 6,036,918 | $ 76,074,658 | $ - | $ - |

*For the year ended December 31, 2014*

| Distributions | | | |
|---|---|---|---|
| From Ordinary Income | From Long-Term Capital Gains | Tax Return of Capital | Net Investment Loss |
| $ 729,588 | $ 45,995,459 | $ - | $ - |

Permanent book to tax basis differences may result in reclassifications between the components of net assets. These differences have no impact on the results of operations or net assets. The following reclassifications have been made to the Portfolio:

| Increase/(Decrease) to Capital | Increase/(Decrease) to Undistributed Net Investment Income/Loss | Increase/(Decrease) to Undistributed Net Realized Gain/Loss |
|---|---|---|
| $ - | $ 2,420 | $ (2,420) |

## 6. Capital Share Transactions

| | Year ended December 31, 2015 | | Year ended December 31, 2014 | |
|---|---|---|---|---|
| | Shares | Amount | Shares | Amount |
| Institutional Shares: | | | | |
| Shares sold | 814,112 | $49,077,557 | 378,818 | $22,332,377 |
| Reinvested dividends and distributions | 789,910 | 47,529,145 | 487,573 | 28,050,096 |
| Shares repurchased | (1,076,851) | (65,573,433) | (1,003,722) | (59,205,592) |
| Net Increase/(Decrease) | 527,171 | $31,033,269 | (137,331) | $ (8,823,119) |
| Service Shares: | | | | |
| Shares sold | 1,538,508 | $89,152,188 | 824,572 | $46,862,838 |
| Reinvested dividends and distributions | 602,094 | 34,582,431 | 337,825 | 18,674,951 |
| Shares repurchased | (955,872) | (55,853,548) | (1,056,210) | (59,958,407) |
| Net Increase/(Decrease) | 1,184,730 | $67,881,071 | 106,187 | $ 5,579,382 |

### 7. Purchases and Sales of Investment Securities

For the year ended December 31, 2015, the aggregate cost of purchases and proceeds from sales of investment securities (excluding any short-term securities, short-term options contracts, and in-kind transactions) was as follows:

| *Purchases of Securities* | *Proceeds from Sales of Securities* | *Purchases of Long-Term U.S. Government Obligations* | *Proceeds from Sales of Long-Term U.S. Government Obligations* |
|---|---|---|---|
| $170,823,249 | $ 157,575,058 | $ - | $ - |

### 8. Subsequent Event

Management has evaluated whether any events or transactions occurred subsequent to December 31, 2015 and through the date of issuance of the Portfolio's financial statements and determined that there were material events or transactions that would require recognition or disclosure in the Portfolio's financial statements, as discussed below.

Effective May 1, 2016, the Portfolio pays Janus Services a fee at an annual rate of up to 0.05% of the average daily net assets of the Portfolio's Institutional Shares and Service Shares to compensate insurance companies for services provided to contract owners. Any unused portion will be reimbursed back to the respective share class.

# Janus Aspen Enterprise Portfolio
## Report of Independent Registered Public Accounting Firm

To the Board of Trustees of Janus Aspen Series and Shareholders of Janus Aspen Enterprise Portfolio:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Janus Aspen Enterprise Portfolio (one of the portfolios constituting Janus Aspen Series, hereafter referred to as the "Portfolio") at December 31, 2015, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Portfolio's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2015 by correspondence with the custodian, brokers and transfer agent, provide a reasonable basis for our opinion.

## Additional Information (unaudited)

**Proxy Voting Policies and Voting Record**
A description of the policies and procedures that the Portfolio uses to determine how to vote proxies relating to its portfolio securities is available without charge: (i) upon request, by calling 1-800-525-0020 (toll free); (ii) on the Portfolio's website at janus.com/proxyvoting; and (iii) on the SEC's website at http://www.sec.gov. Additionally, information regarding the Portfolio's proxy voting record for the most recent twelve-month period ended June 30 is also available, free of charge, through janus.com/ proxyvoting and from the SEC's website at http://www.sec.gov.

**Quarterly Portfolio Holdings**
The Portfolio files its complete portfolio holdings (schedule of investments) with the SEC for the first and third quarters of each fiscal year on Form N-Q within 60 days of the end of such fiscal quarter. The Portfolio's Form N-Q: (i) is available on the SEC's website at http://www.sec.gov; (ii) may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. (information on the Public Reference Room may be obtained by calling 1-800-SEC-0330); and (iii) is available without charge, upon request, by calling Janus at 1-800-525-0020 (toll free).

**APPROVAL OF ADVISORY AGREEMENTS DURING THE PERIOD**

The Trustees of Janus Investment Fund and Janus Aspen Series, each of whom serves as an "independent" Trustee (the "Trustees"), oversee the management of each Fund of Janus Investment Fund and each Portfolio of Janus Aspen Series (each, a "Fund" and collectively, the "Funds"), and as required by law, determine annually whether to continue the investment advisory agreement for each Fund and the subadvisory agreements for the 16 Funds that utilize subadvisers.

In connection with their most recent consideration of those agreements for each Fund, the Trustees received and reviewed information provided by Janus Capital and the respective subadvisers in response to requests of the Trustees and their independent legal counsel. They also received and reviewed information and analysis provided by, and in response to requests of, their independent fee consultant. Throughout their consideration of the agreements, the Trustees were advised by their independent legal counsel. The Trustees met with management to consider the agreements, and also met separately in executive session with their independent legal counsel and their independent fee consultant.

At a meeting held on December 9, 2015, based on the Trustees' evaluation of the information provided by Janus Capital, the subadvisers, and the independent fee consultant, as well as other information, the Trustees determined that the overall arrangements between each Fund and Janus Capital and each subadviser, as applicable, were fair and reasonable in light of the nature, extent and quality of the services provided by Janus Capital, its affiliates and the subadvisers, the fees charged for those services, and other matters that the Trustees considered relevant in the exercise of their business judgment. At that meeting, the Trustees unanimously approved the continuation of the investment advisory agreement for each Fund, and the subadvisory agreement for each subadvised Fund, for the period from either January 1 or February 1, 2016 through January 1 or February 1, 2017, respectively, subject to earlier termination as provided for in each agreement.

In considering the continuation of those agreements, the Trustees reviewed and analyzed various factors that they determined were relevant, including the factors described below, none of which by itself was considered dispositive. However, the material factors and conclusions that formed the basis for the Trustees' determination to approve the continuation of the agreements are discussed separately below. Also included is a summary of the independent fee consultant's conclusions and opinions that arose during, and were included as part of, the Trustees' consideration of the agreements. "Management fees," as used herein, reflect actual annual advisory fees and any administration fees (excluding out of pocket costs), net of any waivers.

***Nature, Extent and Quality of Services***

The Trustees reviewed the nature, extent and quality of the services provided by Janus Capital and the subadvisers to the Funds, taking into account the investment objective, strategies and policies of each Fund, and the knowledge the Trustees gained from their regular meetings with management on at least a quarterly basis and their ongoing review of information related to the Funds. In addition, the Trustees reviewed the resources and key personnel of Janus Capital and each subadviser, particularly noting those employees who provide investment and risk management services to the Funds. The Trustees also considered other services provided to the Funds by Janus Capital or the subadvisers, such as managing the execution of portfolio transactions and the selection of broker-dealers for those transactions. The Trustees considered Janus Capital's role as administrator to the Funds, noting that Janus Capital does not receive a fee

for its services but is reimbursed for its out-of-pocket costs. The Trustees considered the role of Janus Capital in monitoring adherence to the Funds' investment restrictions, providing support services for the Trustees and Trustee committees, and overseeing communications with shareholders and the activities of other service providers, including monitoring compliance with various policies and procedures of the Funds and with applicable securities laws and regulations.

In this regard, the independent fee consultant noted that Janus Capital provides a number of different services for the Funds and Fund shareholders, ranging from investment management services to various other servicing functions, and that, in its opinion, Janus Capital is a capable provider of those services. The independent fee consultant also provided its belief that Janus Capital has developed a number of institutional competitive advantages that should enable it to provide superior investment and service performance over the long term.

The Trustees concluded that the nature, extent and quality of the services provided by Janus Capital or the subadviser to each Fund were appropriate and consistent with the terms of the respective advisory and subadvisory agreements, and that, taking into account steps taken to address those Funds whose performance lagged that of their peers for certain periods, the Funds were likely to benefit from the continued provision of those services. They also concluded that Janus Capital and each subadviser had sufficient personnel, with the appropriate education and experience, to serve the Funds effectively and had demonstrated its ability to attract well-qualified personnel.

***Performance of the Funds***

The Trustees considered the performance results of each Fund over various time periods. They noted that they considered Fund performance data throughout the year, including periodic meetings with each Fund's portfolio manager(s), and also reviewed information comparing each Fund's performance with the performance of comparable funds and peer groups identified by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent data provider, and with the Fund's benchmark index. In this regard, the independent fee consultant found that the overall Funds' performance has been strong: for the 36 months ended September 30, 2015, approximately 70% of the Funds were in the top two Broadridge quartiles of performance, and for the 12 months ended September 30, 2015, approximately 61% of the Funds were in the top two Broadridge quartiles of performance.

The Trustees considered the performance of each Fund, noting that performance may vary by share class, and noted the following:

***Fixed-Income Funds and Money Market Funds***

- For Janus Flexible Bond Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Global Bond Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Unconstrained Bond Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, the steps Janus Capital had taken or was taking to improve performance, and its limited performance history.
- For Janus High-Yield Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Multi-Sector Income Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Real Return Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.

- For Janus Short-Term Bond Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Government Money Market Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance.
- For Janus Money Market Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance.

***Asset Allocation Funds***

- For Janus Global Allocation Fund – Conservative, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Allocation Fund – Growth, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Global Allocation Fund – Moderate, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.

***Alternative Fund***

- For Janus Diversified Alternatives Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 12 months ended May 31, 2015.

***Value Funds***

- For Perkins International Value Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 12 months ended May 31, 2015.
- For Perkins Global Value Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital and Perkins had taken or were taking to improve performance.
- For Perkins Large Cap Value Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital and Perkins had taken or were taking to improve performance.
- For Perkins Mid Cap Value Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital and Perkins had taken or were taking to improve performance.
- For Perkins Select Value Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, the steps Janus Capital and Perkins had taken or were taking to improve performance, and that the performance trend was improving.

- For Perkins Small Cap Value Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, the steps Janus Capital and Perkins had taken or were taking to improve performance, and that the performance trend was improving.
- For Perkins Value Plus Income Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.

***Mathematical Funds***

- For INTECH Emerging Markets Managed Volatility Fund, the Trustees noted that, due to limited performance for the Fund, performance history was not a material factor.
- For INTECH Global Income Managed Volatility Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.
- For INTECH International Managed Volatility Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital and INTECH had taken or were taking to improve performance.
- For INTECH U.S. Core Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.
- For INTECH U.S. Managed Volatility Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.

***Growth and Core Funds***

- For Janus Balanced Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Contrarian Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Enterprise Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Forty Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Growth and Income Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and in the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Research Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.

- For Janus Triton Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Twenty Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Venture Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.

***Global and International Funds***

- For Janus Asia Equity Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, the steps Janus Capital had taken or was taking to improve performance, and that the performance trend was improving.
- For Janus Emerging Markets Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Life Sciences Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Real Estate Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Research Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Select Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Technology Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus International Equity Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Overseas Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital had taken or was taking to improve performance.

***Janus Aspen Series***

- For Janus Aspen Balanced Portfolio, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Enterprise Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Flexible Bond Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Forty Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Global Allocation Portfolio – Moderate, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Global Research Portfolio, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile-for the 12 months ended May 31, 2015.
- For Janus Aspen Global Technology Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Global Unconstrained Bond Portfolio, the Trustees noted that, due to limited performance for the Fund, performance history was not a material factor.
- For Janus Aspen INTECH U.S. Low Volatility Portfolio, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Janus Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Overseas Portfolio, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Aspen Perkins Mid Cap Value Portfolio, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital and Perkins had taken or were taking to improve performance.

In consideration of each Fund's performance, the Trustees concluded that, taking into account the factors relevant to performance, as well as other considerations, including steps taken to improve performance, the Fund's performance warranted continuation of the Fund's investment advisory and subadvisory agreement(s).

***Costs of Services Provided***

The Trustees examined information regarding the fees and expenses of each Fund in comparison to similar information for other comparable funds as provided by Broadridge, an independent data provider. They also reviewed an analysis of that information provided by their independent fee consultant and noted that the rate of management (investment advisory and any administration, but excluding out-of-pocket costs) fees for many of the Funds, after applicable waivers,

was below the mean management fee rate of the respective peer group of funds selected by an independent data provider. The Trustees also examined information regarding the subadvisory fees charged for subadvisory services, as applicable, noting that all such fees were paid by Janus Capital out of its management fees collected from such Fund.

The independent fee consultant provided its belief that the management fees charged by Janus Capital to each of the Funds under the current investment advisory and administration agreements are reasonable in relation to the services provided by Janus Capital. The independent fee consultant found: (1) the total expenses and management fees of the Funds to be reasonable relative to other mutual funds; (2) total expenses, on average, were 14% below the mean total expenses of their respective Broadridge Expense Group peers and 24% below the mean total expenses for their Broadridge Expense Universes; (3) management fees for the Funds, on average, were 15% below the mean management fees for their Expense Groups and 19% below the mean for their Expense Universes; and (4) Fund expenses at the functional level for each asset and share class category were reasonable. The Trustees also considered the total expenses for each share class of each Fund compared to the mean total expenses for its Broadridge Expense Group peers and to mean total expenses for its Broadridge Expense Universe.

The independent fee consultant concluded that, based on its strategic review of expenses at the complex, category and individual fund level, Fund expenses were found to be reasonable relative to both Expense Group and Expense Universe benchmarks. Further, for certain Funds, the independent fee consultant also performed a systematic "focus list" analysis of expenses in the context of the performance or service delivered to each set of investors in each share class in each selected Fund. Based on this analysis, the independent fee consultant found that the combination of service quality/performance and expenses on these individual Funds and share classes were reasonable in light of performance trends, performance histories, and existence of performance fees, breakpoints, and expense waivers on such Funds.

The Trustees considered the methodology used by Janus Capital and each subadviser in determining compensation payable to portfolio managers, the competitive environment for investment management talent, and the competitive market for mutual funds in different distribution channels.

The Trustees also reviewed management fees charged by Janus Capital and each subadviser to comparable separate account clients and to comparable non-affiliated funds subadvised by Janus Capital or by a subadviser (for which Janus Capital or the subadviser provides only or primarily portfolio management services). Although in most instances subadvisory and separate account fee rates for various investment strategies were lower than management fee rates for Funds having a similar strategy, the Trustees considered that Janus Capital noted that, under the terms of the management agreements with the Funds, Janus Capital performs significant additional services for the Funds that it does not provide to those other clients, including administration services, oversight of the Funds' other service providers, trustee support, regulatory compliance and numerous other services, and that, in serving the Funds, Janus Capital assumes many legal risks and other costs that it does not assume in servicing its other clients. Moreover, they noted that the independent fee consultant found that: (1) the management fees Janus Capital charges to the Funds are reasonable in relation to the management fees Janus Capital charges to its institutional and subadvised accounts; (2) these institutional and subadvised accounts have different service and infrastructure needs; (3) the average spread between management fees charged to the Funds and those charged to Janus Capital's institutional accounts is reasonable relative to the average spreads seen in the industry; and (4) by one estimation methodology, the fee margins implied by Janus Capital's subadvised fees when compared to its mutual fund fees are reasonable relative to the estimated fee margins in the industry and relative to estimated fee margins of fund managers using Janus Capital as a subadviser.

The Trustees considered the fees for each Fund for its fiscal year ended in 2014, and noted the following with regard to each Fund's total expenses, net of applicable fee waivers (the Fund's "total expenses"):

***Fixed-Income Funds and Money Market Funds***

- For Janus Flexible Bond Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.

- For Janus Global Bond Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Global Unconstrained Bond Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus High-Yield Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Multi-Sector Income Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus has contractually agreed to limit the Fund's expenses.
- For Janus Real Return Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for all share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Short-Term Bond Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for all share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Government Money Market Fund, the Trustees noted that the Fund's total expenses exceeded the peer group mean for both share classes. The Trustees considered that management fees for this Fund are higher than the peer group mean due to the Fund's management fee including other costs, such as custody and transfer agent services, while many funds in the peer group pay these expenses separately from their management fee. In addition, the Trustees considered that Janus Capital voluntarily waives one-half of its advisory fee and other expenses in order to maintain a positive yield.
- For Janus Money Market Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes. In addition, the Trustees considered that Janus Capital voluntarily waives one-half of its advisory fee and other expenses in order to maintain a positive yield.

***Asset Allocation Funds***

- For Janus Global Allocation Fund – Conservative, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Allocation Fund – Growth, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Allocation Fund – Moderate, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.

***Alternative Fund***

- For Janus Diversified Alternatives Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.

***Value Funds***

- For Perkins International Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Perkins Global Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable.

- For Perkins Large Cap Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Perkins Mid Cap Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Perkins Select Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Perkins Small Cap Value Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Perkins Value Plus Income Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses.

***Mathematical Funds***

- For INTECH Emerging Markets Managed Volatility Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For INTECH Global Income Managed Volatility Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For INTECH International Managed Volatility Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For INTECH U.S. Core Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For INTECH U.S. Managed Volatility Fund, the Trustees noted that the Fund's total expenses exceeded the peer group mean for one share class. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses.

***Growth and Core Funds***

- For Janus Balanced Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Contrarian Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Enterprise Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Forty Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.

- For Janus Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Growth and Income Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Research Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Triton Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Twenty Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Venture Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.

***Global and International Funds***

- For Janus Asia Equity Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Emerging Markets Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Global Life Sciences Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Real Estate Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Global Research Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Select Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Technology Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus International Equity Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Overseas Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.

***Janus Aspen Series***

- For Janus Aspen Balanced Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.

- For Janus Aspen Enterprise Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Flexible Bond Portfolio, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses.
- For Janus Aspen Forty Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Global Allocation Portfolio - Moderate, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for both share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Aspen Global Research Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Global Technology Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Global Unconstrained Bond Portfolio, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for both share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses.
- For Janus Aspen INTECH U.S. Low Volatility Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for its sole share class.
- For Janus Aspen Janus Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Overseas Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Perkins Mid Cap Value Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.

The Trustees reviewed information on the profitability to Janus Capital and its affiliates of their relationships with each Fund, as well as an explanation of the methodology utilized by Janus Capital when allocating various expenses of Janus Capital and its affiliates with respect to contractual relationships with the Funds and other clients. The Trustees also reviewed the financial statements and corporate structure of Janus Capital's parent company. In their review, the Trustees considered whether Janus Capital and each subadviser receive adequate incentives and resources to manage the Funds effectively. The Trustees recognized that profitability comparisons among fund managers are difficult because very little comparative information is publicly available, and the profitability of any fund manager is affected by numerous factors, including the organizational structure of the particular fund manager, the types of funds and other accounts it manages, possible other lines of business, the methodology for allocating expenses, and the fund manager's capital structure and cost of capital. However, taking into account those factors and the analysis provided by the Trustees' independent fee consultant, and based on the information available, the Trustees concluded that Janus Capital's profitability with respect to each Fund in relation to the services rendered was reasonable.

The independent fee consultant found that, while assessing the reasonableness of expenses in light of Janus Capital's profits is dependent on comparisons with other publicly-traded mutual fund advisers, and that these comparisons are limited in accuracy by differences in complex size, business mix, institutional account orientation, and other factors, after accepting these limitations, the level of profit earned by Janus Capital from managing the Funds is reasonable.

The Trustees concluded that the management fees payable by each Fund to Janus Capital and its affiliates, as well as the fees paid by Janus Capital to the subadvisers of subadvised Funds, were reasonable in relation to the nature, extent, and quality of the services provided, taking into account the fees charged by other advisers for managing comparable mutual funds with similar strategies, the fees Janus Capital and the subadvisers charge to other clients, and, as applicable, the impact of fund performance on management fees payable by the Funds. The Trustees also concluded that each Fund's total expenses were reasonable, taking into account the size of the Fund, the quality of services

provided by Janus Capital and any subadviser, the investment performance of the Fund, and any expense limitations agreed to or provided by Janus Capital.

***Economies of Scale***

The Trustees considered information about the potential for Janus Capital to realize economies of scale as the assets of the Funds increase. They noted that their independent fee consultant provided an analysis of economies of scale, which included discussion of analysis from prior years. They also noted that, although many Funds pay advisory fees at a base fixed rate as a percentage of net assets, without any breakpoints, their independent fee consultant concluded that 85% of these Funds have contractual management fees (gross of waivers) below their Broadridge expense group averages and, overall, 80% of the Funds are below their respective expense group averages for contractual management fees. They also noted that for those Funds whose expenses are being reduced by the contractual expense limitations of Janus Capital, Janus Capital is subsidizing the Funds because they have not reached adequate scale. Moreover, as the assets of some of the Funds have declined in the past few years, certain Funds have benefited from having advisory fee rates that have remained constant rather than increasing as assets declined. In addition, performance fee structures have been implemented for various Funds that have caused the effective rate of advisory fees payable by such a Fund to vary depending on the investment performance of the Fund relative to its benchmark index over the measurement period; and a few Funds have fee schedules with breakpoints and reduced fee rates above certain asset levels. The Trustees also noted that the Funds share directly in economies of scale through the lower charges of third-party service providers that are based in part on the combined scale of all of the Funds. Based on all of the information they reviewed, including research and analysis conducted by the Trustees' independent fee consultant, the Trustees concluded that the current fee structure of each Fund was reasonable and that the current rates of fees do reflect a sharing between Janus Capital and the Fund of any economies of scale that may be present at the current asset level of the Fund.

The independent fee consultant concluded that, given the limitations of various analytical approaches to economies of scale considered in prior years, and their conflicting results, its analyses could not confirm or deny the existence of economies of scale in the Janus complex. Further, the independent fee consultant provided its belief that Fund investors are well-served by the fee levels and performance fee structures in place on the Funds in light of any economies of scale that may be present at Janus Capital.

***Other Benefits to Janus Capital***

The Trustees also considered benefits that accrue to Janus Capital and its affiliates and subadvisers to the Funds from their relationships with the Funds. They recognized that two affiliates of Janus Capital separately serve the Funds as transfer agent and distributor, respectively, and the transfer agent receives compensation directly from the non-money market funds for services provided. The Trustees also considered Janus Capital's past and proposed use of commissions paid by the Funds on portfolio brokerage transactions to obtain proprietary and third-party research products and services benefiting the Fund and/or other clients of Janus Capital and/or Janus Capital, and/or a subadviser to a Fund. The Trustees concluded that Janus Capital's and the subadvisers' use of these types of client commission arrangements to obtain proprietary and third-party research products and services was consistent with regulatory requirements and guidelines and was likely to benefit each Fund. The Trustees also concluded that, other than the services provided by Janus Capital and its affiliates and subadvisers pursuant to the agreements and the fees to be paid by each Fund therefor, the Funds and Janus Capital and the subadvisers may potentially benefit from their relationship with each other in other ways. They concluded that Janus Capital and/or the subadvisers benefits from the receipt of research products and services acquired through commissions paid on portfolio transactions of the Funds and that the Funds benefit from Janus Capital's and/or the subadvisers' receipt of those products and services as well as research products and services acquired through commissions paid by other clients of Janus Capital and/or other clients of the subadvisers. They further concluded that the success of any Fund could attract other business to Janus Capital, the subadvisers or other Janus funds, and that the success of Janus Capital and the subadvisers could enhance Janus Capital's and the subadvisers' ability to serve the Funds.

## Useful Information About Your Portfolio Report (unaudited)

### Management Commentary

The Management Commentary in this report includes valuable insight as well as statistical information to help you understand how your Portfolio's performance and characteristics stack up against those of comparable indices.

If the Portfolio invests in foreign securities, this report may include information about country exposure. Country exposure is based primarily on the country of risk. A company may be allocated to a country based on other factors such as location of the company's principal office, the location of the principal trading market for the company's securities, or the country where a majority of the company's revenues are derived.

Please keep in mind that the opinions expressed in the Management Commentary are just that: opinions. They are a reflection based on best judgment at the time this report was compiled, which was December 31, 2015. As the investing environment changes, so could opinions. These views are unique and are not necessarily shared by fellow employees or by Janus in general.

### Performance Overviews

Performance overview graphs compare the performance of a hypothetical $10,000 investment in the Portfolio with one or more widely used market indices. When comparing the performance of the Portfolio with an index, keep in mind that market indices are not available for investment and do not reflect deduction of expenses.

Average annual total returns are quoted for a Portfolio with more than one year of performance history. Average annual total return is calculated by taking the growth or decline in value of an investment over a period of time, including reinvestment of dividends and distributions, then calculating the annual compounded percentage rate that would have produced the same result had the rate of growth been constant throughout the period. Average annual total return does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or redemptions of Portfolio shares.

Cumulative total returns are quoted for a Portfolio with less than one year of performance history. Cumulative total return is the growth or decline in value of an investment over time, independent of the period of time involved. Cumulative total return does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or redemptions of Portfolio shares.

Pursuant to federal securities rules, expense ratios shown in the performance chart reflect subsidized (if applicable) and unsubsidized ratios. The total annual fund operating expenses ratio is gross of any fee waivers, reflecting the Portfolio's unsubsidized expense ratio. The net annual fund operating expenses ratio (if applicable) includes contractual waivers of Janus Capital and reflects the Portfolio's subsidized expense ratio. Ratios may be higher or lower than those shown in the "Financial Highlights" in this report.

### Schedule of Investments

Following the performance overview section is the Portfolio's Schedule of Investments. This schedule reports the types of securities held in the Portfolio on the last day of the reporting period. Securities are usually listed by type (common stock, corporate bonds, U.S. Government obligations, etc.) and by industry classification (banking, communications, insurance, etc.). Holdings are subject to change without notice.

The value of each security is quoted as of the last day of the reporting period. The value of securities denominated in foreign currencies is converted into U.S. dollars.

If the Portfolio invests in foreign securities, it will also provide a summary of investments by country. This summary reports the Portfolio exposure to different countries by providing the percentage of securities invested in each country. The country of each security represents the country of risk. The Portfolio's Schedule of Investments relies upon the industry group and country classifications published by Barclays and/or MSCI Inc.

Tables listing details of individual forward currency contracts, futures, written options, and swaps follow the Portfolio's Schedule of Investments (if applicable).

### Statement of Assets and Liabilities

This statement is often referred to as the "balance sheet." It lists the assets and liabilities of the Portfolio on the last day of the reporting period.

# Janus Aspen Enterprise Portfolio
## Useful Information About Your Portfolio Report (unaudited)

The Portfolio's assets are calculated by adding the value of the securities owned, the receivable for securities sold but not yet settled, the receivable for dividends declared but not yet received on securities owned, and the receivable for Portfolio shares sold to investors but not yet settled. The Portfolio's liabilities include payables for securities purchased but not yet settled, Portfolio shares redeemed but not yet paid, and expenses owed but not yet paid. Additionally, there may be other assets and liabilities such as unrealized gain or loss on forward currency contracts.

The section entitled "Net Assets Consist of" breaks down the components of the Portfolio's net assets. Because the Portfolio must distribute substantially all earnings, you will notice that a significant portion of net assets is shareholder capital.

The last section of this statement reports the net asset value ("NAV") per share on the last day of the reporting period. The NAV is calculated by dividing the Portfolio's net assets for each share class (assets minus liabilities) by the number of shares outstanding.

**Statement of Operations**

This statement details the Portfolio's income, expenses, realized gains and losses on securities and currency transactions, and changes in unrealized appreciation or depreciation of Portfolio holdings.

The first section in this statement, entitled "Investment Income," reports the dividends earned from securities and interest earned from interest-bearing securities in the Portfolio.

The next section reports the expenses incurred by the Portfolio, including the advisory fee paid to the investment adviser, transfer agent fees and expenses, and printing and postage for mailing statements, financial reports and prospectuses. Expense offsets and expense reimbursements, if any, are also shown.

The last section lists the amounts of realized gains or losses from investment and foreign currency transactions, and changes in unrealized appreciation or depreciation of investments and foreign currency-denominated assets and liabilities. The Portfolio will realize a gain (or loss) when it sells its position in a particular security. A change in unrealized gain (or loss) refers to the change in net appreciation or depreciation of the Portfolio during the reporting period. "Net Realized and Unrealized Gain/(Loss) on Investments" is affected both by changes in the market value of Portfolio holdings and by gains (or losses) realized during the reporting period.

**Statements of Changes in Net Assets**

These statements report the increase or decrease in the Portfolio's net assets during the reporting period. Changes in the Portfolio's net assets are attributable to investment operations, dividends and distributions to investors, and capital share transactions. This is important to investors because it shows exactly what caused the Portfolio's net asset size to change during the period.

The first section summarizes the information from the Statement of Operations regarding changes in net assets due to the Portfolio's investment operations. The Portfolio's net assets may also change as a result of dividend and capital gains distributions to investors. If investors receive their dividends and/or distributions in cash, money is taken out of the Portfolio to pay the dividend and/or distribution. If investors reinvest their dividends and/or distributions, the Portfolio's net assets will not be affected. If you compare the Portfolio's "Net Decrease from Dividends and Distributions" to "Reinvested Dividends and Distributions," you will notice that dividends and distributions have little effect on the Portfolio's net assets. This is because the majority of the Portfolio's investors reinvest their dividends and/or distributions.

The reinvestment of dividends and distributions is included under "Capital Share Transactions." "Capital Shares" refers to the money investors contribute to the Portfolio through purchases or withdrawals via redemptions. The Portfolio's net assets will increase and decrease in value as investors purchase and redeem shares from the Portfolio.

**Financial Highlights**

This schedule provides a per-share breakdown of the components that affect the Portfolio's NAV for current and past reporting periods as well as total return, asset size, ratios, and portfolio turnover rate.

The first line in the table reflects the NAV per share at the beginning of the reporting period. The next line reports the net investment income/(loss) per share. Following is the per share total of net gains/(losses), realized and unrealized. Per share dividends and distributions to investors are then subtracted to arrive at the NAV per share at the end of the period. The next line reflects the total return for the period. The total return may include adjustments in accordance with

generally accepted accounting principles required at the period end for financial reporting purposes. The total return does not include any charges at the separate account level or contract level. As a result, the total return may differ from the total return reflected for individual shareholder transactions. Also included are ratios of expenses and net investment income to average net assets.

The Portfolio's expenses may be reduced through expense offsets and expense reimbursements. The ratios shown reflect expenses before and after any such offsets and reimbursements.

The ratio of net investment income/(loss) summarizes the income earned less expenses, divided by the average net assets of the Portfolio during the reporting period. Do not confuse this ratio with the Portfolio's yield. The net investment income ratio is not a true measure of the Portfolio's yield because it does not take into account the dividends distributed to the Portfolio's investors.

The next figure is the portfolio turnover rate, which measures the buying and selling activity in the Portfolio. Portfolio turnover is affected by market conditions, changes in the asset size of the Portfolio, fluctuating volume of shareholder purchase and redemption orders, the nature of the Portfolio's investments, and the investment style and/or outlook of the portfolio manager(s) and/or investment personnel. A 100% rate implies that an amount equal to the value of the entire portfolio was replaced once during the fiscal year; a 50% rate means that an amount equal to the value of half the portfolio is traded in a year; and a 200% rate means that an amount equal to the value of the entire portfolio is traded every six months.

## Designation Requirements (unaudited)

For federal income tax purposes, the Portfolio designated the following for the year ended December 31, 2015:

| | |
|---|---|
| Capital Gain Distributions | $76,074,658 |
| Dividends Received Deduction Percentage | 85% |

# Janus Aspen Enterprise Portfolio
## Trustees and Officers (unaudited)

The Portfolio's Statement of Additional Information includes additional information about the Trustees and officers and is available, without charge, by calling 1-877-335-2687

The following are the Trustees and officers of the Trust, together with a brief description of their principal occupations during the last five years (principal occupations for certain Trustees may include periods over five years).

Each Trustee has served in that capacity since he or she was originally elected or appointed. The Trustees do not serve a specified term of office. Each Trustee will hold office until the termination of the Trust or his or her earlier death, resignation, retirement, incapacity, or removal. Under the Portfolio's Governance Procedures and Guidelines, the policy is for Trustees to retire no later than the end of the calendar year in which the Trustee turns 75. The Trustees review the Portfolio's Governance Procedures and Guidelines from time to time and may make changes they deem appropriate. The Portfolio's Nominating and Governance Committee will consider nominees for the position of Trustee recommended by shareholders. Shareholders may submit the name of a candidate for consideration by the Committee by submitting their recommendations to the Trust's Secretary. Each Trustee is currently a Trustee of one other registered investment company advised by Janus Capital: Janus Investment Fund. Collectively, these two registered investment companies consist of 58 series or funds.

The Trust's officers are elected annually by the Trustees for a one-year term. Certain officers also serve as officers of Janus Investment Fund. Certain officers of the Portfolio may also be officers and/or directors of Janus Capital. Portfolio officers receive no compensation from the Portfolio, except for the Portfolio's Chief Compliance Officer, as authorized by the Trustees.

## Notes

## Notes

## Janus provides access to a wide range of investment disciplines.

**Alternative**
Janus alternative funds seek to deliver strong risk-adjusted returns over a full market cycle with lower correlation to equity markets than traditional investments.

**Asset Allocation**
Janus' asset allocation funds utilize our fundamental, bottom-up research to balance risk over the long term. From fund options that meet investors' risk tolerance and objectives to a method that incorporates non-traditional investment choices to seek non-correlated sources of risk and return, Janus' asset allocation funds aim to allocate risk more effectively.

**Fixed Income**
Janus fixed income funds attempt to provide less risk relative to equities while seeking to deliver a competitive total return through high current income and appreciation. Janus money market funds seek capital preservation and liquidity with current income as a secondary objective.

**Global & International**
Janus global and international funds seek to leverage Janus' research capabilities by taking advantage of inefficiencies in foreign markets, where accurate information and analytical insight are often at a premium.

**Growth & Core**
Janus growth funds focus on companies believed to be the leaders in their respective industries, with solid management teams, expanding market share, margins and efficiencies. Janus core funds seek investments in more stable and predictable companies. Our core funds look for a strategic combination of steady growth and, for certain funds, some degree of income.

**Mathematical**
Our mathematical funds seek to outperform their respective indices while maintaining a risk profile equal to or lower than the index itself. Managed by INTECH® (a Janus subsidiary), these funds use a mathematical process in an attempt to build a more "efficient" portfolio than the index.

**Value**
Our value funds, managed by Perkins® (a Janus subsidiary), seek to identify companies with favorable reward to risk characteristics by conducting rigorous downside analysis before determining upside potential.

# Janus Aspen Forty Portfolio (unaudited)

**PORTFOLIO SNAPSHOT**

We believe constructing a concentrated portfolio of quality growth companies will allow us to outperform our benchmark over time. We define quality as companies that enjoy sustainable "moats" around their businesses, potentially allowing companies to grow faster, with higher returns, than their competitors. We believe the market often underestimates these companies' sustainable competitive advantage periods.

Doug Rao
portfolio manager

## PERFORMANCE OVERVIEW

For the 12-month period ended December 31, 2015, Janus Aspen Forty Portfolio's Institutional Shares and Service Shares returned 12.22% and 11.94%, respectively, versus a return of 5.67% for the Portfolio's primary benchmark, the Russell 1000 Growth Index. The Portfolio's secondary benchmark, the S&P 500 Index, returned 1.38% for the period.

## INVESTMENT ENVIRONMENT

The multi-year equities rally encountered significant turbulence during 2015. Cooling growth, weak commodities prices, a surging U.S. dollar and a shift in monetary policy were some of the factors investors had to consider when valuing stock portfolios. Volatility began early in the year as the slide in crude prices started being considered a potential harbinger for sagging demand rather than solely a consequence of overproduction. Global volatility was in the minds of Federal Reserve (Fed) officials when they chose to delay raising interest rates at their September meeting. However, improving U.S. employment data later led to a consensus that rates would indeed rise by the end of the year, and investors digested their first hike in nearly a decade with relative ease. Although markets were again roiled late year by energy prices coming under renewed pressure, bringing back the prospect that global growth may fall short of projections, large caps ended the year up.

## PERFORMANCE DISCUSSION

The Portfolio outperformed both its primary benchmark, the Russell 1000 Growth Index, and its secondary benchmark, the S&P 500 Index, during the period. As part of our investment strategy, we seek companies that have built clear, sustainable competitive moats around their businesses, which should help them grow market share within their respective industries over time. Important competitive advantages could include a strong brand, network effects from a product or service that would be hard for a competitor to replicate, a lower cost structure than competitors in the industry, a distribution advantage or patent protection over valuable intellectual property. We think emphasizing these sustainable competitive advantages can be a meaningful driver of outperformance over longer time horizons because the market often underestimates the duration of growth for these companies and the long-term potential return to shareholders. During the year, we saw a number of companies in our portfolio put up impressive results, further validating our view that they are well positioned to grow in excess of the market.

Amazon was the largest individual contributor to performance. The company benefited as its gross merchandise volume (GMV) sales accelerated. Continued improvements in operating leverage in its core retail business also aided results. We believe Amazon is a good example of the types of competitively advantaged companies we tend to seek in our portfolio. Amazon has already rewritten the rules for retail shopping and we believe it will continue to gain consumers' wallet share as more shopping moves from physical stores to online and mobile purchases. Meanwhile, Amazon's cloud business, Amazon Web Services, has come to market with scale and a disruptive pricing model for businesses seeking cloud-based services, and has continued to experience rapid growth.

Alphabet Inc., formerly known as Google, was also a strong contributor to performance. The company continued to benefit from the acceleration of its core business. Strong earnings also continued to indicate that the company is well positioned to consolidate advertising spending as advertising becomes increasingly connected and personalized, and as it transitions from offline channels such as print and television to more measurable online channels such as mobile and online video. The market continued to be encouraged by the new CFO's focus on expense discipline. The stock also benefited from increased visibility of the monetization of YouTube after the completion of Google's restructuring under

Alphabet. As the network effects around Alphabet's advertising business and Android ecosystem grow, we believe it further deepens the company's competitive moat and enables it to better understand users' context and intent and connect those users with suppliers of products and services.

Pharmacyclics was another top contributor to performance during the period. The stock was up significantly in the first quarter after it was announced that AbbVie had won a bidding war to acquire the company. The high interest Pharmacyclics received from other companies bidding for it validated our view that its blood cancer treatments are truly innovative and offer significant growth potential. We sold the stock after the announcement.

While pleased with our performance during the year, we did hold companies that detracted from performance. Canadian Pacific Railway was a large detractor. Softer rail volumes due to a weaker commodity market had a broad impact on the railroad industry, and Canadian Pacific was not immune to the slowdown. However, we continue to have a high level of conviction in the long-term potential of the company. We believe Canadian Pacific's railroad network across Canada and the U.S. is a valuable asset that would be nearly impossible for other transportation and logistics companies to replicate. The company also has a significant cost advantage over the trucking industry. Going forward, we believe Canadian Pacific can continue to grow revenues and railroad volumes as it improves execution around its railroad network. The company has made substantial investments to improve its service and reliability to customers, and as service improves, which should drive more shippers to use Canadian Pacific instead of trucking services.

Chipotle Mexican Grill also detracted after news about food-related illnesses created volatility and headwinds for the company during the period. However, we continue to like the stock; we believe Chipotle's higher throughput rates, which have led to higher unit economics at each store, still separate it from most competitors in the fast-food or fast-casual industry. We believe that, in time, the company will be able to re-establish its reputation for food integrity.

Alibaba also detracted. The Chinese e-commerce company provides consumer-to-consumer, business-to-consumer and business-to-business sales services via Web and mobile platforms. The weakness of the Chinese economy weighed on the stock's performance and we exited our position during the period.

## OUTLOOK

We believe that volatility will stay elevated amid continuing questions about global economic growth. While household balance sheets are strong and improving employment and early signs of wage growth are supportive of U.S consumer spending, the modern consumer is also sober minded, as shown by their long-term focus on using savings from cheaper gas and utilities to build up their personal savings. We expect this mindset to continue for the foreseeable future.

While there are concerns about the global economy, we think it underscores the importance of finding those select companies with truly sustainable competitive advantages that can take market share and continue to grow earnings, even without the backdrop of a strong global economy. Such companies are more appreciated in a world where growth is harder to come by, as they can create their own path to creating value.

Thank you for your investment in Janus Aspen Forty Portfolio.

Additional risks to a Portfolio may also include, but are not limited to, those associated with investing in foreign securities, emerging markets, initial public offerings, real estate investment trusts (REITs), derivatives, short sales, commodity-linked investments and companies with relatively small market capitalizations. Each Portfolio has different risks. Please see a Janus prospectus for more information about risks, Portfolio holdings and other details.*

*Foreign securities are subject to additional risks including currency fluctuations, political and economic uncertainty, increased volatility, lower liquidity and differing financial and information reporting standards, all of which are magnified in emerging markets.*

These returns do not reflect the charges and expenses of any particular insurance product or qualified plan. Returns shown would have been lower had they included insurance charges.

Returns include reinvestment of all dividends and distributions and do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or redemptions of Portfolio shares. The returns do not include adjustments in accordance with generally accepted accounting principles required at the period end for financial reporting purposes.

Returns shown for Service Shares for periods prior to December 31, 1999 are derived from the historical performance of Institutional Shares, adjusted to reflect the higher operating expenses of Service Shares.

Ranking is for the share class shown only; other classes may have different performance characteristics.

There is no assurance that the investment process will consistently lead to successful investing.

See Notes to Schedule of Investments and Other Information for index definitions.

## Performance

A Portfolio's holdings may differ significantly from the securities held in an index. An index is unmanaged and not available for direct investment; therefore, its performance does not reflect the expenses associated with the active management of an actual portfolio.

See "Useful Information About Your Portfolio Report."

*The Portfolio's inception date – May 1, 1997

# Janus Aspen Forty Portfolio (unaudited)
## Expense Examples

As a shareholder of the Portfolio, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees; 12b-1 distribution and shareholder servicing fees (applicable to Service Shares only); transfer agent fees and expenses payable pursuant to the Transfer Agency Agreement; and other Portfolio expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. The example is based upon an investment of $1,000 invested at the beginning of the period and held for the six-months indicated, unless noted otherwise in the table and footnotes below.

### Actual Expenses

The information in the table under the heading “Actual” provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = 8.6), then multiply the result by the number in the appropriate column for your share class under the heading entitled “Expenses Paid During Period” to estimate the expenses you paid on your account during the period.

### Hypothetical Example for Comparison Purposes

The information in the table under the heading “Hypothetical (5% return before expenses)” provides information about hypothetical account values and hypothetical expenses based upon the Portfolio’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. Additionally, for an analysis of the fees associated with an investment in either share class or other similar funds, please visit www.finra.org/fundanalyzer.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs, such as any charges at the separate account level or contract level. These fees are fully described in the Portfolio’s prospectuses. Therefore, the hypothetical examples are useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transaction costs were included, your costs would have been higher.

| | Actual | | | Hypothetical (5% return before expenses) | | | |
|---|---|---|---|---|---|---|---|
| | **Beginning Account Value (7/1/15)** | **Ending Account Value (12/31/15)** | **Expenses Paid During Period (7/1/15 - 12/31/15)†** | **Beginning Account Value (7/1/15)** | **Ending Account Value (12/31/15)** | **Expenses Paid During Period (7/1/15 - 12/31/15)†** | **Net Annualized Expense Ratio (7/1/15 - 12/31/15)** |
| Institutional Shares | $1,000.00 | $1,038.50 | $3.55 | $1,000.00 | $1,021.73 | $3.52 | 0.69% |
| Service Shares | $1,000.00 | $1,037.30 | $4.88 | $1,000.00 | $1,020.42 | $4.84 | 0.95% |

† Expenses Paid During Period are equal to the Net Annualized Expense Ratio multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period). Expenses in the examples include the effect of applicable fee waivers and/or expense reimbursements, if any. Had such waivers and/or reimbursements not been in effect, your expenses would have been higher. Please refer to the Notes to Financial Statements or the Portfolio’s prospectuses for more information regarding waivers and/or reimbursements.

* Total return not annualized for periods of less than one full year.
** Annualized for periods of less than one full year.
(1) Per share amounts are calculated based on average shares outstanding during the year or period.
(2) Less than $0.005 on a per share basis.

See Notes to Financial Statements.

### 1. Organization and Significant Accounting Policies

Janus Aspen Forty Portfolio (the "Portfolio") is a series fund. The Portfolio is part of Janus Aspen Series (the "Trust"), which is organized as a Delaware statutory trust and is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company, and therefore has applied the specialized accounting and reporting guidance in Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 946. The Trust offers twelve Portfolios which include multiple series of shares, with differing investment objectives and policies. The Portfolio invests primarily in common stocks. The Portfolio is classified as nondiversified, as defined in the 1940 Act.

The Portfolio currently offers two classes of shares: Institutional Shares and Service Shares. Each class represents an interest in the same portfolio of investments. Institutional Shares are offered only in connection with investment in and payments under variable insurance contracts as well as certain qualified retirement plans. Service Shares are offered only in connection with investment in and payments under variable insurance contracts as well as certain qualified retirement plans that require a fee from Portfolio assets to procure distribution and administrative services to contract owners and plan participants.

Shareholders, including other portfolios, participating insurance companies, as well as accounts, may from time to time own (beneficially or of record) a significant percentage of the Portfolio's Shares and can be considered to "control" the Portfolio when that ownership exceeds 25% of the Portfolio's assets (and which may differ from control as determined in accordance with accounting principles generally accepted in the United States of America).

The following accounting policies have been followed by the Portfolio and are in conformity with accounting principles generally accepted in the United States of America.

#### Investment Valuation

Securities held by the Portfolio are valued in accordance with policies and procedures established by and under the supervision of the Trustees (the "Valuation Procedures"). Equity securities traded on a domestic securities exchange are generally valued at the closing prices on the primary market or exchange on which they trade. If such price is lacking for the trading period immediately preceding the time of determination, such securities are valued at their current bid price. Equity securities that are traded on a foreign exchange are generally valued at the closing prices on such markets. In the event that there is no current trading volume on a particular security in such foreign exchange, the bid price from the primary exchange is generally used to value the security. Securities that are traded on the over-the-counter ("OTC") markets are generally valued at their closing or latest bid prices as available. Foreign securities and currencies are converted to U.S. dollars using the applicable exchange rate in effect at the close of the New York Stock Exchange ("NYSE"). The Portfolio will determine the market value of individual securities held by it by using prices provided by one or more approved professional pricing services or, as needed, by obtaining market quotations from independent broker-dealers. Most debt securities are valued in accordance with the evaluated bid price supplied by the pricing service that is intended to reflect market value. The evaluated bid price supplied by the pricing service is an evaluation that may consider factors such as security prices, yields, maturities and ratings. Certain short-term securities maturing within 60 days or less may be evaluated and valued on an amortized cost basis provided that the amortized cost determined approximates market value. Securities for which market quotations or evaluated prices are not readily available or deemed unreliable are valued at fair value determined in good faith under the Valuation Procedures. Circumstances in which fair value pricing may be utilized include, but are not limited to: (i) a significant event that may affect the securities of a single issuer, such as a merger, bankruptcy, or significant issuer-specific development; (ii) an event that may affect an entire market, such as a natural disaster or significant governmental action; (iii) a nonsignificant event such as a market closing early or not opening, or a security trading halt; and (iv) pricing of a nonvalued security and a restricted or nonpublic security. Special valuation considerations may apply with respect to "odd-lot" fixed-income transactions which, due to their small size, may receive evaluated prices by pricing services which reflect a large block trade and not what actually could be obtained for the odd-lot position. The Portfolio uses systematic fair valuation models provided by independent third parties to value international equity securities in order to adjust for stale pricing, which may occur between the close of certain foreign exchanges and the close of the NYSE.

#### Valuation Inputs Summary

FASB ASC 820, Fair Value Measurements and Disclosures ("ASC 820"), defines fair value, establishes a framework for measuring fair value, and expands disclosure requirements regarding fair value measurements. This standard emphasizes that fair value is a market-based measurement that should be determined based on the assumptions that market participants would use in pricing an asset or liability and establishes a hierarchy that prioritizes inputs to valuation techniques used to measure fair value. These inputs are summarized into three broad levels:

Level 1 – Unadjusted quoted prices in active markets the Portfolio has the ability to access for identical assets or liabilities.

Level 2 – Observable inputs other than unadjusted quoted prices included in Level 1 that are observable for the asset or liability either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

Assets or liabilities categorized as Level 2 in the hierarchy generally include: debt securities fair valued in accordance with the evaluated bid or ask prices supplied by a pricing service; securities traded on OTC markets and listed securities for which no sales are reported that are fair valued at the latest bid price (or yield equivalent thereof) obtained from one or more dealers transacting in a market for such securities or by a pricing service approved by the Portfolio's Trustees; certain short-term debt securities with maturities of 60 days or less that are fair valued at amortized cost; and equity securities of foreign issuers whose fair value is determined by using systematic fair valuation models provided by independent third parties in order to adjust for stale pricing which may occur between the close of certain foreign exchanges and the close of the NYSE. Other securities that may be categorized as Level 2 in the hierarchy include, but are not limited to, preferred stocks, bank loans, swaps, investments in unregistered investment companies, options, and forward contracts.

Level 3 – Unobservable inputs for the asset or liability to the extent that relevant observable inputs are not available, representing the Portfolio's own assumptions about the assumptions that a market participant would use in valuing the asset or liability, and that would be based on the best information available.

There have been no significant changes in valuation techniques used in valuing any such positions held by the Portfolio since the beginning of the fiscal year.

The inputs or methodology used for fair valuing securities are not necessarily an indication of the risk associated with investing in those securities. The summary of inputs used as of December 31, 2015 to fair value the Portfolio's investments in securities and other financial instruments is included in the "Valuation Inputs Summary" in the Notes to Schedule of Investments and Other Information.

There were no transfers between Level 1, Level 2 and Level 3 of the fair value hierarchy during the year. The Portfolio recognizes transfers between the levels as of the beginning of the fiscal year.

### Investment Transactions and Investment Income

Investment transactions are accounted for as of the date purchased or sold (trade date). Dividend income is recorded on the ex-dividend date. Certain dividends from foreign securities will be recorded as soon as the Portfolio is informed of the dividend, if such information is obtained subsequent to the ex-dividend date. Dividends from foreign securities may be subject to withholding taxes in foreign jurisdictions. Interest income is recorded on the accrual basis and includes amortization of premiums and accretion of discounts. Gains and losses are determined on the identified cost basis, which is the same basis used for federal income tax purposes. Income, as well as gains and losses, both realized and unrealized, are allocated daily to each class of shares based upon the ratio of net assets represented by each class as a percentage of total net assets.

### Expenses

The Portfolio bears expenses incurred specifically on its behalf, as well as a portion of general expenses, which may be allocated pro rata to the Portfolio. Each class of shares bears a portion of general expenses, which are allocated daily to each class of shares based upon the ratio of net assets represented by each class as a percentage of total net assets. Expenses directly attributable to a specific class of shares are charged against the operations of such class.

### Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

**Indemnifications**
In the normal course of business, the Portfolio may enter into contracts that contain provisions for indemnification of other parties against certain potential liabilities. The Portfolio's maximum exposure under these arrangements is unknown, and would involve future claims that may be made against the Portfolio that have not yet occurred. Currently, the risk of material loss from such claims is considered remote.

**Foreign Currency Translations**
The Portfolio does not isolate that portion of the results of operations resulting from the effect of changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held at the date of the financial statements. Net unrealized appreciation or depreciation of investments and foreign currency translations arise from changes in the value of assets and liabilities, including investments in securities held at the date of the financial statements, resulting from changes in the exchange rates and changes in market prices of securities held.

Currency gains and losses are also calculated on payables and receivables that are denominated in foreign currencies. The payables and receivables are generally related to foreign security transactions and income translations.

Foreign currency-denominated assets and forward currency contracts may involve more risks than domestic transactions, including currency risk, counterparty risk, political and economic risk, regulatory risk and equity risk. Risks may arise from unanticipated movements in the value of foreign currencies relative to the U.S. dollar.

**Dividends and Distributions**
The Portfolio may make semiannual distributions of substantially all of its investment income and an annual distribution of its net realized capital gains (if any).

The Portfolio may make certain investments in real estate investment trusts ("REITs") which pay dividends to their shareholders based upon funds available from operations. It is quite common for these dividends to exceed the REITs' taxable earnings and profits, resulting in the excess portion of such dividends being designated as a return of capital. If the Portfolio distributes such amounts, such distributions could constitute a return of capital to shareholders for federal income tax purposes.

**Federal Income Taxes**
The Portfolio intends to continue to qualify as a regulated investment company and distribute all of its taxable income in accordance with the requirements of Subchapter M of the Internal Revenue Code. Management has analyzed the Portfolio's tax positions taken for all open federal income tax years, generally a three-year period, and has concluded that no provision for federal income tax is required in the Portfolio's financial statements. The Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

## 2. Other Investments and Strategies

**Additional Investment Risk**
The financial crisis in both the U.S. and global economies over the past several years has resulted, and may continue to result, in a significant decline in the value and liquidity of many securities of issuers worldwide in the equity and fixed-income/credit markets. In response to the crisis, the United States and certain foreign governments, along with the U.S. Federal Reserve and certain foreign central banks, took steps to support the financial markets. The withdrawal of this support, a failure of measures put in place to respond to the crisis, or investor perception that such efforts were not sufficient could each negatively affect financial markets generally, and the value and liquidity of specific securities. In addition, policy and legislative changes in the United States and in other countries continue to impact many aspects of financial regulation. The effect of these changes on the markets, and the practical implications for market participants, including the Portfolio, may not be fully known for some time. As a result, it may also be unusually difficult to identify both investment risks and opportunities, which could limit or preclude the Portfolio's ability to achieve its investment objective. Therefore, it is important to understand that the value of your investment may fall, sometimes sharply, and you could lose money.

The enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") provided for widespread regulation of financial institutions, consumer financial products and services, broker-dealers, OTC derivatives, investment advisers, credit rating agencies, and mortgage lending, which expanded federal oversight in the financial sector, including the investment management industry. Many provisions of the Dodd-Frank Act remain pending and will be implemented through future rulemaking. Therefore, the ultimate impact of the Dodd-Frank Act and the regulations under the Dodd-Frank Act on the Portfolio and the investment management industry as a whole, is not yet certain.

A number of countries in the European Union ("EU") have experienced, and may continue to experience, severe economic and financial difficulties. In particular, many EU nations are susceptible to economic risks associated with high levels of debt, notably due to investments in sovereign debt of countries such as Greece, Italy, Spain, Portugal, and Ireland. Many non-governmental issuers, and even certain governments, have defaulted on, or been forced to restructure, their debts. Many other issuers have faced difficulties obtaining credit or refinancing existing obligations. Financial institutions have in many cases required government or central bank support, have needed to raise capital, and/or have been impaired in their ability to extend credit. As a result, financial markets in the EU experienced extreme volatility and declines in asset values and liquidity. Responses to these financial problems by European governments, central banks, and others, including austerity measures and reforms, may not work, may result in social unrest, and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and others of their debt could have additional adverse effects on economies, financial markets, and asset valuations around the world. Greece, Ireland, and Portugal have already received one or more "bailouts" from other Eurozone member states, and it is unclear how much additional funding they will require or if additional Eurozone member states will require bailouts in the future. One or more countries may abandon the euro and/or withdraw from the EU, placing its currency and banking system in jeopardy.

Certain areas of the world have historically been prone to and economically sensitive to environmental events such as, but not limited to, hurricanes, earthquakes, typhoons, flooding, tidal waves, tsunamis, erupting volcanoes, wildfires or droughts, tornadoes, mudslides, or other weather-related phenomena. Such disasters, and the resulting physical or economic damage, could have a severe and negative impact on the Portfolio's investment portfolio and, in the longer term, could impair the ability of issuers in which the Portfolio invests to conduct their businesses as they would under normal conditions. Adverse weather conditions may also have a particularly significant negative effect on issuers in the agricultural sector and on insurance companies that insure against the impact of natural disasters.

**Real Estate Investing**

The Portfolio may invest in equity and debt securities of real estate-related companies. Such companies may include those in the real estate industry or real estate-related industries. These securities may include common stocks, corporate bonds, preferred stocks, and other equity securities, including, but not limited to, mortgage-backed securities, real estate-backed securities, securities of REITs and similar REIT-like entities. A REIT is a trust that invests in real estate-related projects, such as properties, mortgage loans, and construction loans. REITs are generally categorized as equity, mortgage, or hybrid REITs. A REIT may be listed on an exchange or traded OTC.

## 3. Investment Advisory Agreements and Other Transactions with Affiliates

The Portfolio pays Janus Capital an investment advisory fee which is calculated daily and paid monthly. The Portfolio's "base" fee rate prior to any performance adjustment (expressed as an annual rate) is 0.64%.

The investment advisory fee rate is determined by calculating a base fee and applying a performance adjustment. The base fee rate is the same as the contractual investment advisory fee rate. The performance adjustment either increases or decreases the base fee depending on how well the Portfolio has performed relative to its benchmark index. The Portfolio's benchmark index used in the calculation is the Russell 1000® Growth Index.

The calculation of the performance adjustment applies as follows:

Investment Advisory Fee = Base Fee Rate +/- Performance Adjustment

The investment advisory fee rate paid to Janus Capital by the Portfolio consists of two components: (1) a base fee calculated by applying the contractual fixed rate of the advisory fee to the Portfolio's average daily net assets during the previous month ("Base Fee Rate"), plus or minus (2) a performance-fee adjustment ("Performance Adjustment") calculated by applying a variable rate of up to 0.15% (positive or negative) to the Portfolio's average daily net assets during the applicable performance measurement period, which is generally the previous 36 months.

The Portfolio's prospectuses and statement(s) of additional information contain additional information about performance-based fees. The amount shown as advisory fees on the Statement of Operations reflects the Base Fee

Rate plus/minus any Performance Adjustment. For the year ended December 31, 2015, the performance adjusted investment advisory fee rate before any waivers and/or reimbursements of expenses is 0.65%.

Janus Services LLC ("Janus Services"), a wholly-owned subsidiary of Janus Capital, is the Portfolio's transfer agent. In addition, Janus Services provides or arranges for the provision of certain other administrative services including, but not limited to, recordkeeping, accounting, order processing, and other shareholder services for the Portfolio. Janus Services is not compensated for its services related to the shares, except for out-of-pocket costs. These amounts are disclosed as "Other transfer agent fees and expenses" on the Statement of Operations.

Under a distribution and shareholder servicing plan (the "Plan") adopted in accordance with Rule 12b-1 under the 1940 Act, the Service Shares may pay the Trust's distributor, Janus Distributors LLC ("Janus Distributors"), a wholly-owned subsidiary of Janus Capital, a fee for the sale and distribution and/or shareholder servicing of the Service Shares at an annual rate of up to 0.25% of the average daily net assets of the Service Shares. Under the terms of the Plan, the Trust is authorized to make payments to Janus Distributors for remittance to insurance companies and qualified plan service providers as compensation for distribution and/or shareholder services performed by such entities. These amounts are disclosed as "12b-1 Distribution and shareholder servicing fees" on the Statement of Operations. Payments under the Plan are not tied exclusively to actual 12b-1 distribution and servicing fees, and the payments may exceed 12b-1 distribution and servicing fees actually incurred. If any of the Portfolio's actual 12b-1 distribution and servicing fees incurred during a calendar year are less than the payments made during a calendar year, the Portfolio will be refunded the difference. Refunds, if any, are included in "12b-1 Distribution fees and shareholder servicing fees" in the Statement of Operations.

Janus Capital furnishes certain administration, compliance, and accounting services for the Portfolio and is reimbursed by the Portfolio for certain of its costs in providing those services (to the extent Janus Capital seeks reimbursement and such costs are not otherwise waived). The Portfolio also pays for salaries, fees, and expenses of certain Janus Capital employees and Portfolio officers, with respect to certain specified administration functions they perform on behalf of the Portfolio. The Portfolio pays these costs based on out-of-pocket expenses incurred by Janus Capital, and these costs are separate and apart from advisory fees and other expenses paid in connection with the investment advisory services Janus Capital provides to the Portfolio. These amounts are disclosed as "Portfolio administration fees" on the Statement of Operations. In addition, employees of Janus Capital and/or its affiliates may serve as officers of the Trust. Some expenses related to compensation payable to the Portfolio's Chief Compliance Officer and compliance staff are shared with the Portfolio. Total compensation of $43,224 was paid to the Chief Compliance Officer and certain compliance staff by the Trust during the year ended December 31, 2015. The Portfolio's portion is reported as part of "Other expenses" on the Statement of Operations.

The Board of Trustees has adopted a deferred compensation plan (the "Deferred Plan") for independent Trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from the Portfolio. All deferred fees are credited to an account established in the name of the Trustees. The amounts credited to the account then increase or decrease, as the case may be, in accordance with the performance of one or more of the Janus funds that are selected by the Trustees. The account balance continues to fluctuate in accordance with the performance of the selected fund or funds until final payment of all amounts are credited to the account. The fluctuation of the account balance is recorded by the Portfolio as unrealized appreciation/(depreciation) and is included as of December 31, 2015 on the Statement of Assets and Liabilities in the asset, "Non-interested Trustees' deferred compensation," and liability, "Non-interested Trustees' deferred compensation fees." Additionally, the recorded unrealized appreciation/(depreciation) is included in "Unrealized net appreciation/(depreciation) of investments, foreign currency translations and non-interested Trustees' deferred compensation" on the Statement of Assets and Liabilities. Deferred compensation expenses for the year ended December 31, 2015 are included in "Non-interested Trustees' fees and expenses" on the Statement of Operations. Trustees are allowed to change their designation of mutual funds from time to time. Amounts will be deferred until distributed in accordance with the Deferred Plan. Deferred fees of $317,200 were paid by the Trust to a Trustee under the Deferred Plan during the year ended December 31, 2015.

Pursuant to the provisions of the 1940 Act and related rules, the Portfolio may participate in an affiliated or nonaffiliated cash sweep program. In the cash sweep program, uninvested cash balances of the Portfolio may be used to purchase shares of affiliated or nonaffiliated money market funds or cash management pooled investment vehicles. The Portfolio is eligible to participate in the cash sweep program (the "Investing Funds"). As adviser, Janus Capital has an inherent conflict of interest because of its fiduciary duties to the affiliated money market funds or cash management pooled investment vehicles and the Investing Funds. Janus Cash Liquidity Fund LLC is an affiliated unregistered cash management pooled investment vehicle that invests primarily in highly-rated short-term fixed-income securities. Janus Cash Liquidity Fund LLC currently maintains a NAV of $1.00 per share and distributes income daily in a manner consistent with a registered product compliant with Rule 2a-7 under the 1940 Act. There are no restrictions on the Portfolio's ability to withdraw investments from Janus Cash Liquidity Fund LLC at will, and there are no unfunded capital commitments due from the Portfolio to Janus Cash Liquidity Fund LLC. The units of Janus Cash Liquidity Fund LLC are not charged any management fee, sales charge or service fee.

Any purchases and sales, realized gains/losses and recorded dividends from affiliated investments during the year ended December 31, 2015 can be found in a table located in the Notes to Schedule of Investments and Other Information.

The Portfolio is permitted to purchase or sell securities ("cross-trade") between itself and other funds or accounts managed by Janus Capital Management LLC in accordance with Rule 17a-7 under the Investment Company Act of 1940 ("Rule 17a-7"), when the transaction is consistent with the investment objectives and policies of the Portfolio and in accordance with the Internal Cross Trade Procedures adopted by the Trust's Board of Trustees. These procedures have been designed to ensure that any cross-trade of securities by the Portfolio from or to another fund or account that is or could be considered an affiliate of the Portfolio under certain limited circumstances by virtue of having a common investment adviser, common Officer, or common Trustee complies with Rule 17a-7. Under these procedures, each cross-trade is effected at the current market price to save costs where allowed. During the year ended December 31, 2015, the Portfolio engaged in cross trades amounting to $30,619,365 in sales, resulting in a net realized gain/loss of $5,861,179. The net realized gain/loss is included in "Investments and foreign currency transactions" within the "Net Realized and Unrealized Gain/(Loss) on Investments" section of the Portfolio's Statement of Operations.

### 4. Federal Income Tax

The tax components of capital shown in the table below represent: (1) distribution requirements the Portfolio must satisfy under the income tax regulations; (2) losses or deductions the Portfolio may be able to offset against income and gains realized in future years; and (3) unrealized appreciation or depreciation of investments for federal income tax purposes.

Other book to tax differences primarily consist of deferred compensation and foreign currency contract adjustments. The Portfolio has elected to treat gains and losses on forward foreign currency contracts as capital gains and losses, if applicable. Other foreign currency gains and losses on debt instruments are treated as ordinary income for federal income tax purposes pursuant to Section 988 of the Internal Revenue Code.

| | | | *Loss Deferrals* | | | *Net Tax* |
|---|---|---|---|---|---|---|
| *Undistributed Ordinary Income* | *Undistributed Long-Term Gains* | *Accumulated Capital Losses* | *Late-Year Ordinary Loss* | *Post-October Capital Loss* | *Other Book to Tax Differences* | *Appreciation/ (Depreciation)* |
| $ 6,437,226 | $ 95,750,642 | $ - | $ - | $ - | $ (18,380) | $170,009,875 |

The aggregate cost of investments and the composition of unrealized appreciation and depreciation of investment securities for federal income tax purposes as of December 31, 2015 are noted below.

Unrealized appreciation and unrealized depreciation in the table below exclude appreciation/depreciation on foreign currency translations. The primary differences between book and tax appreciation or depreciation of investments is wash sale loss deferrals

| *Federal Tax Cost* | *Unrealized Appreciation* | *Unrealized (Depreciation)* | *Net Tax Appreciation/ (Depreciation)* |
|---|---|---|---|
| $ 627,176,527 | $183,969,994 | $(13,960,119) | $ 170,009,875 |

# Janus Aspen Forty Portfolio
## Notes to Financial Statements

Income and capital gains distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. These differences are due to differing treatments for items such as net short-term gains, deferral of wash sale losses, foreign currency transactions, net investment losses, and capital loss carryovers. Certain permanent differences such as tax returns of capital and net investment losses noted below have been reclassified to capital.

*For the year ended December 31, 2015*

| *Distributions* | | | |
|---|---|---|---|
| *From Ordinary Income* | *From Long-Term Capital Gains* | *Tax Return of Capital* | *Net Investment Loss* |
| $ 9,606,802 | $ 150,393,129 | $ - | $ - |

*For the year ended December 31, 2014*

| *Distributions* | | | |
|---|---|---|---|
| *From Ordinary Income* | *From Long-Term Capital Gains* | *Tax Return of Capital* | *Net Investment Loss* |
| $ 658,647 | $ 246,020,735 | $ - | $ - |

Permanent book to tax basis differences may result in reclassifications between the components of net assets. These differences have no impact on the results of operations or net assets. The following reclassifications have been made to the Portfolio:

| *Increase/(Decrease) to Capital* | *Increase/(Decrease) to Undistributed Net Investment Income/Loss* | *Increase/(Decrease) to Undistributed Net Realized Gain/Loss* |
|---|---|---|
| $ - | $ 1,217,136 | $ (1,217,136) |

### 5. Capital Share Transactions

| | *Year ended December 31, 2015* | | *Year ended December 31, 2014* | |
|---|---|---|---|---|
| | *Shares* | *Amount* | *Shares* | *Amount* |
| Institutional Shares: | | | | |
| Shares sold | 1,146,883 | $ 44,193,370 | 438,521 | $19,546,852 |
| Reinvested dividends and distributions | 1,601,927 | 57,445,111 | 2,552,786 | 93,789,365 |
| Shares repurchased | (2,057,242) | (82,810,292) | (2,216,104) | (99,632,827) |
| Net Increase/(Decrease) | 691,568 | $ 18,828,189 | 775,203 | $13,703,390 |
| Service Shares: | | | | |
| Shares sold | 1,444,396 | $ 53,479,766 | 568,799 | $25,026,559 |
| Reinvested dividends and distributions | 2,961,444 | 102,554,820 | 4,268,286 | 152,890,017 |
| Shares repurchased | (2,680,089) | (101,224,018) | (2,338,393) | (98,791,422) |
| Net Increase/(Decrease) | 1,725,751 | $ 54,810,568 | 2,498,692 | $79,125,154 |

### 6. Purchases and Sales of Investment Securities

For the year ended December 31, 2015, the aggregate cost of purchases and proceeds from sales of investment securities (excluding any short-term securities, short-term options contracts, and in-kind transactions) was as follows:

| *Purchases of Securities* | *Proceeds from Sales of Securities* | *Purchases of Long-Term U.S. Government Obligations* | *Proceeds from Sales of Long-Term U.S. Government Obligations* |
|---|---|---|---|
| $423,573,271 | $ 516,653,749 | $ - | $ - |

### 7. Subsequent Event

Management has evaluated whether any events or transactions occurred subsequent to December 31, 2015 and through the date of issuance of the Portfolio's financial statements and determined that there were material events or transactions that would require recognition or disclosure in the Portfolio's financial statements, as discussed below.

Effective May 1, 2016, the Portfolio pays Janus Services a fee at an annual rate of up to 0.05% of the average daily net assets of the Portfolio's Institutional Shares and Service Shares to compensate insurance companies for services provided to contract owners. Any unused portion will be reimbursed back to the respective share class.

# Janus Aspen Forty Portfolio
## Independent Auditor's Report

To the Board of Trustees of Janus Aspen Series and Shareholders of Janus Aspen Forty Portfolio:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Janus Aspen Forty Portfolio (one of the portfolios constituting Janus Aspen Series, hereafter referred to as the "Portfolio") at December 31, 2015, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Portfolio's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2015 by correspondence with the custodian and transfer agent, provide a reasonable basis for our opinion.

PricewaterhouseCoopers LLP

### Proxy Voting Policies and Voting Record

A description of the policies and procedures that the Portfolio uses to determine how to vote proxies relating to its portfolio securities is available without charge: (i) upon request, by calling 1-800-525-0020 (toll free); (ii) on the Portfolio's website at janus.com/proxyvoting; and (iii) on the SEC's website at http://www.sec.gov. Additionally, information regarding the Portfolio's proxy voting record for the most recent twelve-month period ended June 30 is also available, free of charge, through janus.com/ proxyvoting and from the SEC's website at http://www.sec.gov.

### Quarterly Portfolio Holdings

The Portfolio files its complete portfolio holdings (schedule of investments) with the SEC for the first and third quarters of each fiscal year on Form N-Q within 60 days of the end of such fiscal quarter. The Portfolio's Form N-Q: (i) is available on the SEC's website at http://www.sec.gov; (ii) may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. (information on the Public Reference Room may be obtained by calling 1-800-SEC-0330); and (iii) is available without charge, upon request, by calling Janus at 1-800-525-0020 (toll free).

## APPROVAL OF ADVISORY AGREEMENTS DURING THE PERIOD

The Trustees of Janus Investment Fund and Janus Aspen Series, each of whom serves as an "independent" Trustee (the "Trustees"), oversee the management of each Fund of Janus Investment Fund and each Portfolio of Janus Aspen Series (each, a "Fund" and collectively, the "Funds"), and as required by law, determine annually whether to continue the investment advisory agreement for each Fund and the subadvisory agreements for the 16 Funds that utilize subadvisers.

In connection with their most recent consideration of those agreements for each Fund, the Trustees received and reviewed information provided by Janus Capital and the respective subadvisers in response to requests of the Trustees and their independent legal counsel. They also received and reviewed information and analysis provided by, and in response to requests of, their independent fee consultant. Throughout their consideration of the agreements, the Trustees were advised by their independent legal counsel. The Trustees met with management to consider the agreements, and also met separately in executive session with their independent legal counsel and their independent fee consultant.

At a meeting held on December 9, 2015, based on the Trustees' evaluation of the information provided by Janus Capital, the subadvisers, and the independent fee consultant, as well as other information, the Trustees determined that the overall arrangements between each Fund and Janus Capital and each subadviser, as applicable, were fair and reasonable in light of the nature, extent and quality of the services provided by Janus Capital, its affiliates and the subadvisers, the fees charged for those services, and other matters that the Trustees considered relevant in the exercise of their business judgment. At that meeting, the Trustees unanimously approved the continuation of the investment advisory agreement for each Fund, and the subadvisory agreement for each subadvised Fund, for the period from either January 1 or February 1, 2016 through January 1 or February 1, 2017, respectively, subject to earlier termination as provided for in each agreement.

In considering the continuation of those agreements, the Trustees reviewed and analyzed various factors that they determined were relevant, including the factors described below, none of which by itself was considered dispositive. However, the material factors and conclusions that formed the basis for the Trustees' determination to approve the continuation of the agreements are discussed separately below. Also included is a summary of the independent fee consultant's conclusions and opinions that arose during, and were included as part of, the Trustees' consideration of the agreements. "Management fees," as used herein, reflect actual annual advisory fees and any administration fees (excluding out of pocket costs), net of any waivers.

### *Nature, Extent and Quality of Services*

The Trustees reviewed the nature, extent and quality of the services provided by Janus Capital and the subadvisers to the Funds, taking into account the investment objective, strategies and policies of each Fund, and the knowledge the Trustees gained from their regular meetings with management on at least a quarterly basis and their ongoing review of information related to the Funds. In addition, the Trustees reviewed the resources and key personnel of Janus Capital and each subadviser, particularly noting those employees who provide investment and risk management services to the Funds. The Trustees also considered other services provided to the Funds by Janus Capital or the subadvisers, such as managing the execution of portfolio transactions and the selection of broker-dealers for those transactions. The Trustees considered Janus Capital's role as administrator to the Funds, noting that Janus Capital does not receive a fee

for its services but is reimbursed for its out-of-pocket costs. The Trustees considered the role of Janus Capital in monitoring adherence to the Funds' investment restrictions, providing support services for the Trustees and Trustee committees, and overseeing communications with shareholders and the activities of other service providers, including monitoring compliance with various policies and procedures of the Funds and with applicable securities laws and regulations.

In this regard, the independent fee consultant noted that Janus Capital provides a number of different services for the Funds and Fund shareholders, ranging from investment management services to various other servicing functions, and that, in its opinion, Janus Capital is a capable provider of those services. The independent fee consultant also provided its belief that Janus Capital has developed a number of institutional competitive advantages that should enable it to provide superior investment and service performance over the long term.

The Trustees concluded that the nature, extent and quality of the services provided by Janus Capital or the subadviser to each Fund were appropriate and consistent with the terms of the respective advisory and subadvisory agreements, and that, taking into account steps taken to address those Funds whose performance lagged that of their peers for certain periods, the Funds were likely to benefit from the continued provision of those services. They also concluded that Janus Capital and each subadviser had sufficient personnel, with the appropriate education and experience, to serve the Funds effectively and had demonstrated its ability to attract well-qualified personnel.

***Performance of the Funds***

The Trustees considered the performance results of each Fund over various time periods. They noted that they considered Fund performance data throughout the year, including periodic meetings with each Fund's portfolio manager(s), and also reviewed information comparing each Fund's performance with the performance of comparable funds and peer groups identified by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent data provider, and with the Fund's benchmark index. In this regard, the independent fee consultant found that the overall Funds' performance has been strong: for the 36 months ended September 30, 2015, approximately 70% of the Funds were in the top two Broadridge quartiles of performance, and for the 12 months ended September 30, 2015, approximately 61% of the Funds were in the top two Broadridge quartiles of performance.

The Trustees considered the performance of each Fund, noting that performance may vary by share class, and noted the following:

***Fixed-Income Funds and Money Market Funds***

- For Janus Flexible Bond Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Global Bond Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Unconstrained Bond Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, the steps Janus Capital had taken or was taking to improve performance, and its limited performance history.
- For Janus High-Yield Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Multi-Sector Income Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Real Return Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.

- For Janus Short-Term Bond Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Government Money Market Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance.
- For Janus Money Market Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance.

***Asset Allocation Funds***

- For Janus Global Allocation Fund – Conservative, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Allocation Fund – Growth, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Global Allocation Fund – Moderate, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.

***Alternative Fund***

- For Janus Diversified Alternatives Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 12 months ended May 31, 2015.

***Value Funds***

- For Perkins International Value Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 12 months ended May 31, 2015.
- For Perkins Global Value Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital and Perkins had taken or were taking to improve performance.
- For Perkins Large Cap Value Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital and Perkins had taken or were taking to improve performance.
- For Perkins Mid Cap Value Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital and Perkins had taken or were taking to improve performance.
- For Perkins Select Value Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, the steps Janus Capital and Perkins had taken or were taking to improve performance, and that the performance trend was improving.

- For Perkins Small Cap Value Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, the steps Janus Capital and Perkins had taken or were taking to improve performance, and that the performance trend was improving.
- For Perkins Value Plus Income Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.

***Mathematical Funds***

- For INTECH Emerging Markets Managed Volatility Fund, the Trustees noted that, due to limited performance for the Fund, performance history was not a material factor.
- For INTECH Global Income Managed Volatility Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.
- For INTECH International Managed Volatility Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital and INTECH had taken or were taking to improve performance.
- For INTECH U.S. Core Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.
- For INTECH U.S. Managed Volatility Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.

***Growth and Core Funds***

- For Janus Balanced Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Contrarian Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Enterprise Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Forty Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Growth and Income Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and in the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Research Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.

- For Janus Triton Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Twenty Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Venture Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.

***Global and International Funds***

- For Janus Asia Equity Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, the steps Janus Capital had taken or was taking to improve performance, and that the performance trend was improving.
- For Janus Emerging Markets Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Life Sciences Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Real Estate Fund, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Research Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Select Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Global Technology Fund, the Trustees noted that the Fund's performance was in the third Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance and the steps Janus Capital had taken or was taking to improve performance.
- For Janus International Equity Fund, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Overseas Fund, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital had taken or was taking to improve performance.

***Janus Aspen Series***

- For Janus Aspen Balanced Portfolio, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Enterprise Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Flexible Bond Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Forty Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Global Allocation Portfolio – Moderate, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Global Research Portfolio, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 36 months ended May 31, 2015 and the second Broadridge quartile-for the 12 months ended May 31, 2015.
- For Janus Aspen Global Technology Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the third Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Global Unconstrained Bond Portfolio, the Trustees noted that, due to limited performance for the Fund, performance history was not a material factor.
- For Janus Aspen INTECH U.S. Low Volatility Portfolio, the Trustees noted that the Fund's performance was in the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Janus Portfolio, the Trustees noted that the Fund's performance was in the second Broadridge quartile for the 36 months ended May 31, 2015 and the first Broadridge quartile for the 12 months ended May 31, 2015.
- For Janus Aspen Overseas Portfolio, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital had taken or was taking to improve performance.
- For Janus Aspen Perkins Mid Cap Value Portfolio, the Trustees noted that the Fund's performance was in the bottom Broadridge quartile for the 36 months ended May 31, 2015 and the bottom Broadridge quartile for the 12 months ended May 31, 2015. The Trustees noted the reasons for the Fund's underperformance, noting that the Fund has a performance fee structure that results in lower management fees during periods of underperformance, and the steps Janus Capital and Perkins had taken or were taking to improve performance.

In consideration of each Fund's performance, the Trustees concluded that, taking into account the factors relevant to performance, as well as other considerations, including steps taken to improve performance, the Fund's performance warranted continuation of the Fund's investment advisory and subadvisory agreement(s).

***Costs of Services Provided***

The Trustees examined information regarding the fees and expenses of each Fund in comparison to similar information for other comparable funds as provided by Broadridge, an independent data provider. They also reviewed an analysis of that information provided by their independent fee consultant and noted that the rate of management (investment advisory and any administration, but excluding out-of-pocket costs) fees for many of the Funds, after applicable waivers,

was below the mean management fee rate of the respective peer group of funds selected by an independent data provider. The Trustees also examined information regarding the subadvisory fees charged for subadvisory services, as applicable, noting that all such fees were paid by Janus Capital out of its management fees collected from such Fund.

The independent fee consultant provided its belief that the management fees charged by Janus Capital to each of the Funds under the current investment advisory and administration agreements are reasonable in relation to the services provided by Janus Capital. The independent fee consultant found: (1) the total expenses and management fees of the Funds to be reasonable relative to other mutual funds; (2) total expenses, on average, were 14% below the mean total expenses of their respective Broadridge Expense Group peers and 24% below the mean total expenses for their Broadridge Expense Universes; (3) management fees for the Funds, on average, were 15% below the mean management fees for their Expense Groups and 19% below the mean for their Expense Universes; and (4) Fund expenses at the functional level for each asset and share class category were reasonable. The Trustees also considered the total expenses for each share class of each Fund compared to the mean total expenses for its Broadridge Expense Group peers and to mean total expenses for its Broadridge Expense Universe.

The independent fee consultant concluded that, based on its strategic review of expenses at the complex, category and individual fund level, Fund expenses were found to be reasonable relative to both Expense Group and Expense Universe benchmarks. Further, for certain Funds, the independent fee consultant also performed a systematic "focus list" analysis of expenses in the context of the performance or service delivered to each set of investors in each share class in each selected Fund. Based on this analysis, the independent fee consultant found that the combination of service quality/performance and expenses on these individual Funds and share classes were reasonable in light of performance trends, performance histories, and existence of performance fees, breakpoints, and expense waivers on such Funds.

The Trustees considered the methodology used by Janus Capital and each subadviser in determining compensation payable to portfolio managers, the competitive environment for investment management talent, and the competitive market for mutual funds in different distribution channels.

The Trustees also reviewed management fees charged by Janus Capital and each subadviser to comparable separate account clients and to comparable non-affiliated funds subadvised by Janus Capital or by a subadviser (for which Janus Capital or the subadviser provides only or primarily portfolio management services). Although in most instances subadvisory and separate account fee rates for various investment strategies were lower than management fee rates for Funds having a similar strategy, the Trustees considered that Janus Capital noted that, under the terms of the management agreements with the Funds, Janus Capital performs significant additional services for the Funds that it does not provide to those other clients, including administration services, oversight of the Funds' other service providers, trustee support, regulatory compliance and numerous other services, and that, in serving the Funds, Janus Capital assumes many legal risks and other costs that it does not assume in servicing its other clients. Moreover, they noted that the independent fee consultant found that: (1) the management fees Janus Capital charges to the Funds are reasonable in relation to the management fees Janus Capital charges to its institutional and subadvised accounts; (2) these institutional and subadvised accounts have different service and infrastructure needs; (3) the average spread between management fees charged to the Funds and those charged to Janus Capital's institutional accounts is reasonable relative to the average spreads seen in the industry; and (4) by one estimation methodology, the fee margins implied by Janus Capital's subadvised fees when compared to its mutual fund fees are reasonable relative to the estimated fee margins in the industry and relative to estimated fee margins of fund managers using Janus Capital as a subadviser.

The Trustees considered the fees for each Fund for its fiscal year ended in 2014, and noted the following with regard to each Fund's total expenses, net of applicable fee waivers (the Fund's "total expenses"):

***Fixed-Income Funds and Money Market Funds***

- For Janus Flexible Bond Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.

- For Janus Global Bond Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Global Unconstrained Bond Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus High-Yield Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Multi-Sector Income Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus has contractually agreed to limit the Fund's expenses.
- For Janus Real Return Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for all share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Short-Term Bond Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for all share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Government Money Market Fund, the Trustees noted that the Fund's total expenses exceeded the peer group mean for both share classes. The Trustees considered that management fees for this Fund are higher than the peer group mean due to the Fund's management fee including other costs, such as custody and transfer agent services, while many funds in the peer group pay these expenses separately from their management fee. In addition, the Trustees considered that Janus Capital voluntarily waives one-half of its advisory fee and other expenses in order to maintain a positive yield.
- For Janus Money Market Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes. In addition, the Trustees considered that Janus Capital voluntarily waives one-half of its advisory fee and other expenses in order to maintain a positive yield.

***Asset Allocation Funds***

- For Janus Global Allocation Fund – Conservative, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Allocation Fund – Growth, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Allocation Fund – Moderate, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.

***Alternative Fund***

- For Janus Diversified Alternatives Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.

***Value Funds***

- For Perkins International Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Perkins Global Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable.

- For Perkins Large Cap Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Perkins Mid Cap Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Perkins Select Value Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Perkins Small Cap Value Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Perkins Value Plus Income Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses.

***Mathematical Funds***

- For INTECH Emerging Markets Managed Volatility Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For INTECH Global Income Managed Volatility Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For INTECH International Managed Volatility Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For INTECH U.S. Core Fund, the Trustees noted that although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For INTECH U.S. Managed Volatility Fund, the Trustees noted that the Fund's total expenses exceeded the peer group mean for one share class. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses.

***Growth and Core Funds***

- For Janus Balanced Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Contrarian Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Enterprise Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Forty Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.

- For Janus Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Growth and Income Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Research Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Triton Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Twenty Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Venture Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.

***Global and International Funds***

- For Janus Asia Equity Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Emerging Markets Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for certain share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Global Life Sciences Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Real Estate Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Global Research Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Select Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus Global Technology Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.
- For Janus International Equity Fund, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses, although this limit did not apply because the Fund's total expenses were already below the applicable fee limit.
- For Janus Overseas Fund, the Trustees noted that the Fund's total expenses were below the peer group mean for all share classes.

***Janus Aspen Series***

- For Janus Aspen Balanced Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.

- For Janus Aspen Enterprise Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Flexible Bond Portfolio, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for one share class, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses.
- For Janus Aspen Forty Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Global Allocation Portfolio - Moderate, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for both share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital has contractually agreed to limit the Fund's expenses.
- For Janus Aspen Global Research Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Global Technology Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Global Unconstrained Bond Portfolio, the Trustees noted that, although the Fund's total expenses exceeded the peer group mean for both share classes, overall the Fund's total expenses were reasonable. The Trustees also noted that Janus Capital had contractually agreed to limit the Fund's expenses.
- For Janus Aspen INTECH U.S. Low Volatility Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for its sole share class.
- For Janus Aspen Janus Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Overseas Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.
- For Janus Aspen Perkins Mid Cap Value Portfolio, the Trustees noted that the Fund's total expenses were below the peer group mean for both share classes.

The Trustees reviewed information on the profitability to Janus Capital and its affiliates of their relationships with each Fund, as well as an explanation of the methodology utilized by Janus Capital when allocating various expenses of Janus Capital and its affiliates with respect to contractual relationships with the Funds and other clients. The Trustees also reviewed the financial statements and corporate structure of Janus Capital's parent company. In their review, the Trustees considered whether Janus Capital and each subadviser receive adequate incentives and resources to manage the Funds effectively. The Trustees recognized that profitability comparisons among fund managers are difficult because very little comparative information is publicly available, and the profitability of any fund manager is affected by numerous factors, including the organizational structure of the particular fund manager, the types of funds and other accounts it manages, possible other lines of business, the methodology for allocating expenses, and the fund manager's capital structure and cost of capital. However, taking into account those factors and the analysis provided by the Trustees' independent fee consultant, and based on the information available, the Trustees concluded that Janus Capital's profitability with respect to each Fund in relation to the services rendered was reasonable.

The independent fee consultant found that, while assessing the reasonableness of expenses in light of Janus Capital's profits is dependent on comparisons with other publicly-traded mutual fund advisers, and that these comparisons are limited in accuracy by differences in complex size, business mix, institutional account orientation, and other factors, after accepting these limitations, the level of profit earned by Janus Capital from managing the Funds is reasonable.

The Trustees concluded that the management fees payable by each Fund to Janus Capital and its affiliates, as well as the fees paid by Janus Capital to the subadvisers of subadvised Funds, were reasonable in relation to the nature, extent, and quality of the services provided, taking into account the fees charged by other advisers for managing comparable mutual funds with similar strategies, the fees Janus Capital and the subadvisers charge to other clients, and, as applicable, the impact of fund performance on management fees payable by the Funds. The Trustees also concluded that each Fund's total expenses were reasonable, taking into account the size of the Fund, the quality of services

provided by Janus Capital and any subadviser, the investment performance of the Fund, and any expense limitations agreed to or provided by Janus Capital.

***Economies of Scale***

The Trustees considered information about the potential for Janus Capital to realize economies of scale as the assets of the Funds increase. They noted that their independent fee consultant provided an analysis of economies of scale, which included discussion of analysis from prior years. They also noted that, although many Funds pay advisory fees at a base fixed rate as a percentage of net assets, without any breakpoints, their independent fee consultant concluded that 85% of these Funds have contractual management fees (gross of waivers) below their Broadridge expense group averages and, overall, 80% of the Funds are below their respective expense group averages for contractual management fees. They also noted that for those Funds whose expenses are being reduced by the contractual expense limitations of Janus Capital, Janus Capital is subsidizing the Funds because they have not reached adequate scale. Moreover, as the assets of some of the Funds have declined in the past few years, certain Funds have benefited from having advisory fee rates that have remained constant rather than increasing as assets declined. In addition, performance fee structures have been implemented for various Funds that have caused the effective rate of advisory fees payable by such a Fund to vary depending on the investment performance of the Fund relative to its benchmark index over the measurement period; and a few Funds have fee schedules with breakpoints and reduced fee rates above certain asset levels. The Trustees also noted that the Funds share directly in economies of scale through the lower charges of third-party service providers that are based in part on the combined scale of all of the Funds. Based on all of the information they reviewed, including research and analysis conducted by the Trustees' independent fee consultant, the Trustees concluded that the current fee structure of each Fund was reasonable and that the current rates of fees do reflect a sharing between Janus Capital and the Fund of any economies of scale that may be present at the current asset level of the Fund.

The independent fee consultant concluded that, given the limitations of various analytical approaches to economies of scale considered in prior years, and their conflicting results, its analyses could not confirm or deny the existence of economies of scale in the Janus complex. Further, the independent fee consultant provided its belief that Fund investors are well-served by the fee levels and performance fee structures in place on the Funds in light of any economies of scale that may be present at Janus Capital.

***Other Benefits to Janus Capital***

The Trustees also considered benefits that accrue to Janus Capital and its affiliates and subadvisers to the Funds from their relationships with the Funds. They recognized that two affiliates of Janus Capital separately serve the Funds as transfer agent and distributor, respectively, and the transfer agent receives compensation directly from the non-money market funds for services provided. The Trustees also considered Janus Capital's past and proposed use of commissions paid by the Funds on portfolio brokerage transactions to obtain proprietary and third-party research products and services benefiting the Fund and/or other clients of Janus Capital and/or Janus Capital, and/or a subadviser to a Fund. The Trustees concluded that Janus Capital's and the subadvisers' use of these types of client commission arrangements to obtain proprietary and third-party research products and services was consistent with regulatory requirements and guidelines and was likely to benefit each Fund. The Trustees also concluded that, other than the services provided by Janus Capital and its affiliates and subadvisers pursuant to the agreements and the fees to be paid by each Fund therefor, the Funds and Janus Capital and the subadvisers may potentially benefit from their relationship with each other in other ways. They concluded that Janus Capital and/or the subadvisers benefits from the receipt of research products and services acquired through commissions paid on portfolio transactions of the Funds and that the Funds benefit from Janus Capital's and/or the subadvisers' receipt of those products and services as well as research products and services acquired through commissions paid by other clients of Janus Capital and/or other clients of the subadvisers. They further concluded that the success of any Fund could attract other business to Janus Capital, the subadvisers or other Janus funds, and that the success of Janus Capital and the subadvisers could enhance Janus Capital's and the subadvisers' ability to serve the Funds.

## Useful Information About Your Portfolio Report (unaudited)

### Management Commentary

The Management Commentary in this report includes valuable insight as well as statistical information to help you understand how your Portfolio's performance and characteristics stack up against those of comparable indices.

If the Portfolio invests in foreign securities, this report may include information about country exposure. Country exposure is based primarily on the country of risk. A company may be allocated to a country based on other factors such as location of the company's principal office, the location of the principal trading market for the company's securities, or the country where a majority of the company's revenues are derived.

Please keep in mind that the opinions expressed in the Management Commentary are just that: opinions. They are a reflection based on best judgment at the time this report was compiled, which was December 31, 2015. As the investing environment changes, so could opinions. These views are unique and are not necessarily shared by fellow employees or by Janus in general.

### Performance Overviews

Performance overview graphs compare the performance of a hypothetical $10,000 investment in the Portfolio with one or more widely used market indices. When comparing the performance of the Portfolio with an index, keep in mind that market indices are not available for investment and do not reflect deduction of expenses.

Average annual total returns are quoted for a Portfolio with more than one year of performance history. Average annual total return is calculated by taking the growth or decline in value of an investment over a period of time, including reinvestment of dividends and distributions, then calculating the annual compounded percentage rate that would have produced the same result had the rate of growth been constant throughout the period. Average annual total return does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or redemptions of Portfolio shares.

Cumulative total returns are quoted for a Portfolio with less than one year of performance history. Cumulative total return is the growth or decline in value of an investment over time, independent of the period of time involved. Cumulative total return does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or redemptions of Portfolio shares.

Pursuant to federal securities rules, expense ratios shown in the performance chart reflect subsidized (if applicable) and unsubsidized ratios. The total annual fund operating expenses ratio is gross of any fee waivers, reflecting the Portfolio's unsubsidized expense ratio. The net annual fund operating expenses ratio (if applicable) includes contractual waivers of Janus Capital and reflects the Portfolio's subsidized expense ratio. Ratios may be higher or lower than those shown in the "Financial Highlights" in this report.

### Schedule of Investments

Following the performance overview section is the Portfolio's Schedule of Investments. This schedule reports the types of securities held in the Portfolio on the last day of the reporting period. Securities are usually listed by type (common stock, corporate bonds, U.S. Government obligations, etc.) and by industry classification (banking, communications, insurance, etc.). Holdings are subject to change without notice.

The value of each security is quoted as of the last day of the reporting period. The value of securities denominated in foreign currencies is converted into U.S. dollars.

If the Portfolio invests in foreign securities, it will also provide a summary of investments by country. This summary reports the Portfolio exposure to different countries by providing the percentage of securities invested in each country. The country of each security represents the country of risk. The Portfolio's Schedule of Investments relies upon the industry group and country classifications published by Barclays and/or MSCI Inc.

Tables listing details of individual forward currency contracts, futures, written options, and swaps follow the Portfolio's Schedule of Investments (if applicable).

### Statement of Assets and Liabilities

This statement is often referred to as the "balance sheet." It lists the assets and liabilities of the Portfolio on the last day of the reporting period.

# Janus Aspen Forty Portfolio
## Useful Information About Your Portfolio Report (unaudited)

The Portfolio's assets are calculated by adding the value of the securities owned, the receivable for securities sold but not yet settled, the receivable for dividends declared but not yet received on securities owned, and the receivable for Portfolio shares sold to investors but not yet settled. The Portfolio's liabilities include payables for securities purchased but not yet settled, Portfolio shares redeemed but not yet paid, and expenses owed but not yet paid. Additionally, there may be other assets and liabilities such as unrealized gain or loss on forward currency contracts.

The section entitled "Net Assets Consist of" breaks down the components of the Portfolio's net assets. Because the Portfolio must distribute substantially all earnings, you will notice that a significant portion of net assets is shareholder capital.

The last section of this statement reports the net asset value ("NAV") per share on the last day of the reporting period. The NAV is calculated by dividing the Portfolio's net assets for each share class (assets minus liabilities) by the number of shares outstanding.

**Statement of Operations**

This statement details the Portfolio's income, expenses, realized gains and losses on securities and currency transactions, and changes in unrealized appreciation or depreciation of Portfolio holdings.

The first section in this statement, entitled "Investment Income," reports the dividends earned from securities and interest earned from interest-bearing securities in the Portfolio.

The next section reports the expenses incurred by the Portfolio, including the advisory fee paid to the investment adviser, transfer agent fees and expenses, and printing and postage for mailing statements, financial reports and prospectuses. Expense offsets and expense reimbursements, if any, are also shown.

The last section lists the amounts of realized gains or losses from investment and foreign currency transactions, and changes in unrealized appreciation or depreciation of investments and foreign currency-denominated assets and liabilities. The Portfolio will realize a gain (or loss) when it sells its position in a particular security. A change in unrealized gain (or loss) refers to the change in net appreciation or depreciation of the Portfolio during the reporting period. "Net Realized and Unrealized Gain/(Loss) on Investments" is affected both by changes in the market value of Portfolio holdings and by gains (or losses) realized during the reporting period.

**Statements of Changes in Net Assets**

These statements report the increase or decrease in the Portfolio's net assets during the reporting period. Changes in the Portfolio's net assets are attributable to investment operations, dividends and distributions to investors, and capital share transactions. This is important to investors because it shows exactly what caused the Portfolio's net asset size to change during the period.

The first section summarizes the information from the Statement of Operations regarding changes in net assets due to the Portfolio's investment operations. The Portfolio's net assets may also change as a result of dividend and capital gains distributions to investors. If investors receive their dividends and/or distributions in cash, money is taken out of the Portfolio to pay the dividend and/or distribution. If investors reinvest their dividends and/or distributions, the Portfolio's net assets will not be affected. If you compare the Portfolio's "Net Decrease from Dividends and Distributions" to "Reinvested Dividends and Distributions," you will notice that dividends and distributions have little effect on the Portfolio's net assets. This is because the majority of the Portfolio's investors reinvest their dividends and/or distributions.

The reinvestment of dividends and distributions is included under "Capital Share Transactions." "Capital Shares" refers to the money investors contribute to the Portfolio through purchases or withdrawals via redemptions. The Portfolio's net assets will increase and decrease in value as investors purchase and redeem shares from the Portfolio.

**Financial Highlights**

This schedule provides a per-share breakdown of the components that affect the Portfolio's NAV for current and past reporting periods as well as total return, asset size, ratios, and portfolio turnover rate.

The first line in the table reflects the NAV per share at the beginning of the reporting period. The next line reports the net investment income/(loss) per share. Following is the per share total of net gains/(losses), realized and unrealized. Per share dividends and distributions to investors are then subtracted to arrive at the NAV per share at the end of the period. The next line reflects the total return for the period. The total return may include adjustments in accordance with

generally accepted accounting principles required at the period end for financial reporting purposes. The total return does not include any charges at the separate account level or contract level. As a result, the total return may differ from the total return reflected for individual shareholder transactions. Also included are ratios of expenses and net investment income to average net assets.

The Portfolio's expenses may be reduced through expense offsets and expense reimbursements. The ratios shown reflect expenses before and after any such offsets and reimbursements.

The ratio of net investment income/(loss) summarizes the income earned less expenses, divided by the average net assets of the Portfolio during the reporting period. Do not confuse this ratio with the Portfolio's yield. The net investment income ratio is not a true measure of the Portfolio's yield because it does not take into account the dividends distributed to the Portfolio's investors.

The next figure is the portfolio turnover rate, which measures the buying and selling activity in the Portfolio. Portfolio turnover is affected by market conditions, changes in the asset size of the Portfolio, fluctuating volume of shareholder purchase and redemption orders, the nature of the Portfolio's investments, and the investment style and/or outlook of the portfolio manager(s) and/or investment personnel. A 100% rate implies that an amount equal to the value of the entire portfolio was replaced once during the fiscal year; a 50% rate means that an amount equal to the value of half the portfolio is traded in a year; and a 200% rate means that an amount equal to the value of the entire portfolio is traded every six months.

# Janus Aspen Forty Portfolio
## Designation Requirements (unaudited)

For federal income tax purposes, the Portfolio designated the following for the year ended December 31, 2015:

| | |
|---|---|
| Capital Gain Distributions | $150,393,129 |
| Dividends Received Deduction Percentage | 39% |

# Janus Aspen Forty Portfolio
## Trustees and Officers (unaudited)

The Portfolio's Statement of Additional Information includes additional information about the Trustees and officers and is available, without charge, by calling 1-877-335-2687

The following are the Trustees and officers of the Trust, together with a brief description of their principal occupations during the last five years (principal occupations for certain Trustees may include periods over five years).

Each Trustee has served in that capacity since he or she was originally elected or appointed. The Trustees do not serve a specified term of office. Each Trustee will hold office until the termination of the Trust or his or her earlier death, resignation, retirement, incapacity, or removal. Under the Portfolio's Governance Procedures and Guidelines, the policy is for Trustees to retire no later than the end of the calendar year in which the Trustee turns 75. The Trustees review the Portfolio's Governance Procedures and Guidelines from time to time and may make changes they deem appropriate. The Portfolio's Nominating and Governance Committee will consider nominees for the position of Trustee recommended by shareholders. Shareholders may submit the name of a candidate for consideration by the Committee by submitting their recommendations to the Trust's Secretary. Each Trustee is currently a Trustee of one other registered investment company advised by Janus Capital: Janus Investment Fund. Collectively, these two registered investment companies consist of 58 series or funds.

The Trust's officers are elected annually by the Trustees for a one-year term. Certain officers also serve as officers of Janus Investment Fund. Certain officers of the Portfolio may also be officers and/or directors of Janus Capital. Portfolio officers receive no compensation from the Portfolio, except for the Portfolio's Chief Compliance Officer, as authorized by the Trustees.

## Janus Aspen Forty Portfolio
### Notes

## Janus provides access to a wide range of investment disciplines.

**Alternative**
Janus alternative funds seek to deliver strong risk-adjusted returns over a full market cycle with lower correlation to equity markets than traditional investments.

**Asset Allocation**
Janus' asset allocation funds utilize our fundamental, bottom-up research to balance risk over the long term. From fund options that meet investors' risk tolerance and objectives to a method that incorporates non-traditional investment choices to seek non-correlated sources of risk and return, Janus' asset allocation funds aim to allocate risk more effectively.

**Fixed Income**
Janus fixed income funds attempt to provide less risk relative to equities while seeking to deliver a competitive total return through high current income and appreciation. Janus money market funds seek capital preservation and liquidity with current income as a secondary objective.

**Global & International**
Janus global and international funds seek to leverage Janus' research capabilities by taking advantage of inefficiencies in foreign markets, where accurate information and analytical insight are often at a premium.

**Growth & Core**
Janus growth funds focus on companies believed to be the leaders in their respective industries, with solid management teams, expanding market share, margins and efficiencies. Janus core funds seek investments in more stable and predictable companies. Our core funds look for a strategic combination of steady growth and, for certain funds, some degree of income.

**Mathematical**
Our mathematical funds seek to outperform their respective indices while maintaining a risk profile equal to or lower than the index itself. Managed by INTECH® (a Janus subsidiary), these funds use a mathematical process in an attempt to build a more "efficient" portfolio than the index.

**Value**
Our value funds, managed by Perkins® (a Janus subsidiary), seek to identify companies with favorable reward to risk characteristics by conducting rigorous downside analysis before determining upside potential.

PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged)

This brochure contains the following documents:

- Recent prospectus supplements relating to the above fund(s)
- The Annual Report dated December 31, 2015 (following the supplement(s))

(THIS PAGE INTENTIONALLY LEFT BLANK)

**PIMCO Variable Insurance Trust**

**Supplement Dated November 6, 2015 to the Administrative Class Prospectus, Institutional Class Prospectus, and Advisor and Class M Prospectus, each dated April 30, 2015, each as supplemented (the "Prospectuses")**

**Disclosure Related to the PIMCO Foreign Bond Portfolio (Unhedged), PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged) and PIMCO Global Bond Portfolio (Unhedged)**

***PIMCO Foreign Bond Portfolio (Unhedged)***

*Effective December 1, 2015, the broad-based benchmark index of the PIMCO Foreign Bond Portfolio (Unhedged) is the Barclays Global Aggregate ex-USD (USD Unhedged) Index. Accordingly, the following changes are made.*

*Effective December 1, 2015, the second sentence of the second paragraph of the "Principal Investment Strategies" section of the PIMCO Foreign Bond Portfolio (Unhedged)'s Portfolio Summary in the Prospectuses is deleted in its entirety and replaced with the following:*

The average portfolio duration of this Portfolio normally varies within three years (plus or minus) of the portfolio duration of the securities comprising the Barclays Global Aggregate ex-USD (USD Unhedged) Index, as calculated by PIMCO, which as of September 30, 2015 was 7.39 years.

*Additionally, effective December 1, 2015, the second paragraph of the "Performance Information" section of the PIMCO Foreign Bond Portfolio (Unhedged)'s Portfolio Summary in the Prospectuses is deleted in its entirety and replaced with the following:*

Effective December 1, 2015, the Portfolio's broad-based securities market index is the Barclays Global Aggregate ex-USD (USD Unhedged) Index. The Barclays Global Aggregate ex-USD (USD Unhedged) Index provides a broad-based measure of the global investment-grade fixed income markets, excluding USD. The two major components of this index are the Pan-European Aggregate and the Asian-Pacific Aggregate Indices. The index also includes Euro-Yen corporate bonds and Canadian Government securities. It is not possible to invest directly in an unmanaged index. The Portfolio's new broad-based securities market index was selected as its use is more closely aligned with the Portfolio's principal investment strategies. Prior to December 1, 2015, the Portfolio's primary benchmark was the JPMorgan GBI Global ex-US FX NY Index Unhedged in USD. The JPMorgan GBI Global ex-U.S. FX NY Index Unhedged in USD is an unmanaged market index representative of the total return performance in U.S. dollars on an unhedged basis of major non-U.S. bond markets.

*Additionally, effective December 1, 2015, the following disclosure is added above the row relating to the JPMorgan GBI Global ex-US FX NY Index Unhedged in USD in the Average Annual Total Returns table in the "Performance Information" section of the PIMCO Foreign Bond Portfolio (Unhedged)'s Portfolio Summary in the* ***Administrative Class Prospectus****:*

| | 1 Year | 5 Years | Since Inception (04/30/2008) |
|---|---|---|---|
| Barclays Global Aggregate ex-USD (USD Unhedged) Index (reflects no deductions for fees, expenses or taxes) | -3.08% | 1.38% | 1.88% |

*Additionally, effective December 1, 2015, the following disclosure is added above the row relating to the JPMorgan GBI Global ex-US FX NY Index Unhedged in USD in the Average Annual Total Returns table in the*

***PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged)***

*Effective December 1, 2015, the broad-based benchmark index of the PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged) is the Barclays Global Aggregate ex-USD (USD Hedged) Index. Accordingly, the following changes are made.*

*Effective December 1, 2015, the third sentence of the second paragraph of the "Principal Investment Strategies" section of the PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged)'s Portfolio Summary in the Prospectuses is deleted in its entirety and replaced with the following:*

The average portfolio duration of this Portfolio normally varies within three years (plus or minus) of the portfolio duration of the securities comprising the Barclays Global Aggregate ex-USD (USD Hedged) Index, as calculated by PIMCO, which as of September 30, 2015 was 7.39 years.

*Additionally, effective December 1, 2015, the second paragraph of the "Performance Information" section of the PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged)'s Portfolio Summary in the Prospectuses is deleted in its entirety and replaced with the following:*

Effective December 1, 2015, the Portfolio's broad-based securities market index is the Barclays Global Aggregate ex-USD (USD Hedged) Index. The Barclays Global Aggregate ex-USD (USD Hedged) Index provides a broad-based measure of the global investment-grade fixed income markets, excluding USD. The two major components of this index are the Pan-European Aggregate and the Asian-Pacific Aggregate Indices. The index also includes Euro-Yen corporate bonds and Canadian Government securities. It is not possible to invest directly in an unmanaged index. The Portfolio's new broad-based securities market index was selected as its use is more closely aligned with the Portfolio's principal investment strategies. Prior to December 1, 2015, the Portfolio's primary benchmark was the JPMorgan GBI Global ex-U.S. Index Hedged in USD. The JPMorgan GBI Global ex-U.S. Index Hedged in USD is an unmanaged market index representative of the total return performance in U.S. dollars of major non-U.S. bond markets.

*Additionally, effective December 1, 2015, the following disclosure is added above the row relating to the JPMorgan GBI Global ex-U.S. Index Hedged in USD in the Average Annual Total Returns table in the "Performance Information" section of the PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged)'s Portfolio Summary in the Prospectuses:*

| | **1 Year** | **5 Years** | **10 Years** |
|---|---|---|---|
| Barclays Global Aggregate ex-USD (USD Hedged) Index (reflects no deductions for fees, expenses or taxes) | 8.79% | 4.70% | 4.65% |

***PIMCO Global Bond Portfolio (Unhedged)***

*Effective December 1, 2015, the broad-based benchmark index of the PIMCO Global Bond Portfolio (Unhedged) is the Barclays Global Aggregate (USD Unhedged) Index. Accordingly, the following changes are made.*

*Effective December 1, 2015, the fourth sentence of the second paragraph of the "Principal Investment Strategies" section of the PIMCO Global Bond Portfolio (Unhedged)'s Portfolio Summary in the Prospectuses is deleted in its entirety and replaced with the following:*

The average portfolio duration of this Portfolio normally varies within three years (plus or minus) of the portfolio duration of the securities comprising the Barclays Global Aggregate (USD Unhedged) Index, as calculated by PIMCO, which as of September 30, 2015 was 6.42 years.

*Additionally, effective December 1, 2015, the second paragraph of the "Performance Information" section of the PIMCO Global Bond Portfolio (Unhedged)'s Portfolio Summary in the Prospectuses is deleted in its entirety and replaced with the following:*

Effective December 1, 2015, the Portfolio's broad-based securities market index is the Barclays Global Aggregate (USD Unhedged) Index. The Barclays Global Aggregate (USD Unhedged) Index provides a broad-based measure of the global investment-grade fixed income markets. The three major components of this index are the U.S. Aggregate, the Pan-European Aggregate, and the Asian-Pacific Aggregate Indices. The index also includes Eurodollar and Euro-Yen corporate bonds, Canadian Government securities, and USD investment grade 144A securities. It is not possible to invest directly in an unmanaged index. The Portfolio's new broad-based securities market index was selected as its use is more closely aligned with the Portfolio's principal investment strategies. Prior to December 1, 2015, the Portfolio's primary benchmark was the JPMorgan GBI Global FX NY Index Unhedged in USD. The JPMorgan GBI Global FX NY Index Unhedged in USD is an unmanaged market index representative of the total return performance in U.S. dollars on an unhedged basis of major world bond markets.

*Additionally, effective December 1, 2015, the following disclosure is added above the row relating to the JPMorgan GBI Global FX NY Index Unhedged in USD in the Average Annual Total Returns table in the "Performance Information" section of the PIMCO Global Bond Portfolio (Unhedged)'s Portfolio Summary in the* ***Administrative Class Prospectus****:*

## Dear PIMCO Variable Insurance Trust Shareholder,

Please find enclosed the Annual Report for the PIMCO Variable Insurance Trust covering the twelve-month reporting period ended December 31, 2015. The following pages contain specific details about the Portfolio's investment performance and a discussion of the factors that most affected performance over the reporting period.

Heightened market volatility throughout the reporting period was sparked by a mix of investor concerns including geopolitical developments, monetary policy and the potential for slowing global economic growth, which generally contributed to dampened investor sentiment. In particular, increasing concern over the outlook for Chinese growth sent commodity prices and inflation expectations lower, while also negatively impacting prices of emerging market ("EM") debt and equities. In addition, the Chinese equity market began a strong decline in June 2015, which prompted the Chinese government to prop-up equity share prices and devalue the Chinese yuan. Volatility in Chinese equity markets continued into January 2016 on renewed concern over slowing Chinese economic growth. Furthermore, rising tension in the Middle East and the continued debt crisis in Greece also contributed to investor unease throughout the reporting period.

Economic data in the U.S. continued to confirm a healthy economy, particularly labor market indicators such as employment and wages. Still, signs of caution remained, particularly as U.S. consumers appeared to be more selective in their spending and chose to save rather than spend their windfall from lower gas prices. Additionally, consumer sentiment and certain housing indicators softened towards the end of the reporting period, and December 2015 U.S. manufacturing data indicated the fastest contraction in six years. Within the Eurozone, volatility increased despite gradual improvement in the underlying economies. Eurozone economic data also showed generally positive signs of an early recovery but were tempered slightly by sluggish inflation.

The theme of divergent global central bank monetary policy continued throughout the reporting period. The European Central Bank ("ECB") expressed its commitment to increase quantitative easing (or large-scale asset purchases), along with the Bank of Japan and the People's Bank of China who also indicated their intent to accelerate such measures. The Federal Reserve ("Fed"), on the other hand, moved on December 16 to raise the Federal Funds Rate by 0.25% to a new range of 0.25% - 0.50%, marking its first rate hike in nine years. However, the Fed noted that future increases in its target rate would be "gradual" and in-line with their previous projections, which helped to ease investor concerns. Outside of the reporting period on January 27, the Fed opted to leave the Federal Funds Rate unchanged, noting their intent to closely monitor how the global economy and markets influence the U.S. economic outlook.

Highlights of the financial markets during the twelve-month fiscal reporting period include:

- U.S. Treasuries, as represented by the Barclays U.S. Treasury Index, returned 0.84% for the reporting period as yields generally rose slightly across the Treasury yield curve. The benchmark ten-year U.S. Treasury note yielded 2.27% at the end of the reporting period, up from 2.17% on December 31, 2014. The Barclays U.S. Aggregate Index, a widely used index of U.S. investment-grade bonds, returned 0.55% for the reporting period.
- U.S. Treasury Inflation-Protected Securities ("TIPS"), as represented by the Barclays U.S. TIPS Index, declined 1.44% over the reporting period. U.S. TIPS were pressured over the year as breakeven inflation levels, a proxy for inflation expectations, declined in-line with commodity markets. Global inflation-linked bonds ("ILBs") were also down overall during the reporting period, as the slide in energy and other commodities impacted inflation expectations globally. Despite this headwind, European ILBs fared better than other developed countries and posted marginal gains in local currencies as real yields benefited from the ECB's quantitative easing support.
- Prices on broad commodities were down over the reporting period, led lower primarily by energy and industrial metal prices. Crude oil prices faced increasing pressure from a persisting inventory glut and production growth, especially from the Organization of the Petroleum Exporting Countries ("OPEC"). Towards the end of the reporting period, seasonally warm weather put further pressure on oil prices, which ended the year considerably

lower. Diversified commodities, as represented by the Bloomberg Commodity Index Total Return, declined 24.66% over the reporting period.

- Agency mortgage-backed securities ("MBS"), as represented by the Barclays U.S. MBS Fixed Rate Index, returned 1.51% over the reporting period. Non-Agency MBS prices were mixed amid weakness in the broader credit markets, although underlying collateral performance has generally been in-line with investor expectations and continues to gradually improve over the long-term.
- U.S. investment grade credit, as represented by the Barclays U.S. Credit Index, declined 0.77% over the reporting period. Investment grade credit valuations cheapened as a record $1.15 trillion of new issuance came to market and commodity prices continued to fall given worries over slowing Chinese growth. Developed market global high yield bonds, as measured by the BofA Merrill Lynch Developed Markets High Yield Constrained Index, declined 3.05% over the reporting period. Weakness in the commodity-oriented sectors including energy and metals & mining, weighed on returns as oil and other commodity prices fell. Overall, global high yield spreads and yields rose throughout the reporting period and ended higher.
- EM external debt, as represented by the JPMorgan Emerging Markets Bond Index (EMBI) Global, returned 1.23% over the reporting period. EM local bonds, as represented by the JPMorgan Government Bond Index-Emerging Markets Global Diversified Index (Unhedged), declined 14.92% over the reporting period. Idiosyncratic forces remained a dominant theme. China, for example, continued to expand its accommodative measures as both growth and inflation showed signs of further moderation. In addition, the Russian ruble continued its recovery from 2014 weakness before stumbling toward the end of the reporting period on oil price weakness.
- Equity markets showed mixed performance globally amid a period marked by economic uncertainty, increased volatility and divergent central bank monetary policy. U.S. equities, as represented by the S&P 500 Index, returned 1.38% (on a total return basis) and developed market equities outside the U.S., as represented by the MSCI EAFE Net Dividend Index (USD Unhedged), declined 0.81% over the reporting period. However, ultra-easy monetary policy in Europe and Japan benefited European and Japanese equity markets, which generally posted positive returns. However, EM equities, as represented by the MSCI Emerging Markets Index (Net Dividends in USD), declined 14.92% over the same period, due to headwinds from a stronger U.S. dollar, falling commodity prices, concerns over slower Chinese economic growth and declining Chinese equities.

Thank you once again for the trust you have placed in us. We value your commitment and will continue to work diligently to meet your broad investment needs.

Sincerely,

Brent R. Harris

Brent R. Harris
Chairman of the Board,
PIMCO Variable Insurance Trust

February 18, 2016

# Important Information About the Portfolio

PIMCO Variable Insurance Trust (the "Trust") is an open-end management investment company currently consisting of nineteen separate investment portfolios, including the PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged) (the "Portfolio"). The Portfolio is only available as a funding vehicle under variable life insurance policies or variable annuity contracts issued by insurance companies ("Variable Contracts"). Individuals may not purchase shares of the Portfolio directly. Shares of the Portfolio also may be sold to qualified pension and retirement plans outside of the separate account context.

We believe that bond funds have an important role to play in a well diversified investment portfolio. It is important to note, however, that in an environment where interest rates may trend upward, rising rates would negatively impact the performance of most bond funds, and fixed-income securities held by the Portfolio are likely to decrease in value. A number of factors can cause interest rates to rise (e.g., central bank monetary policies, inflation rates, general economic conditions, etc.). In addition, changes in interest rates can be sudden and significant, and there is no guarantee that Fund management will anticipate such movement accurately.

As of the date of this report, interest rates in the U.S. are near historically low levels. As such, bond funds may currently face an increased exposure to the risks associated with a rising interest rate environment. This is especially true as the Fed ended its quantitative easing program and has begun, and may continue, to raise interest rates. Further, while the U.S. bond market has steadily grown over the past three decades, dealer inventories of corporate bonds have remained relatively stagnant. As a result, there has been a significant reduction in the ability of dealers to "make markets."

Bond funds and individual bonds with a longer duration (a measure used to determine the sensitivity of a security's price to changes in interest rates) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities or funds with shorter durations. All of the factors mentioned above, individually or collectively, could lead to increased volatility and/or lower liquidity in the fixed income markets or negatively impact the Portfolio's performance or cause the Portfolio to incur losses. As a result, the Portfolio may experience increased shareholder redemptions which, among other things, could further reduce the net assets of the Portfolio.

The Portfolio may be subject to various risks as described in the Portfolio's prospectus. Some of these risks may include, but are not limited to, the following: interest rate risk, call risk, credit risk, high yield risk, market risk, issuer risk, liquidity risk, derivatives risk, equity risk, mortgage-related and other asset-backed securities risk, foreign (non-U.S.) investment risk, emerging markets risk, sovereign debt risk, currency risk, issuer non-diversification risk, leveraging risk, management risk and short sale risk. A complete description of these and other risks is contained in the Portfolio's prospectus.

The Portfolio may use derivative instruments for hedging purposes or as part of an investment strategy. Use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, credit risk, leverage risk, management risk and the risk that the Portfolio may not be able to close out a position when it would be most advantageous to do so. Certain derivative transactions may have a leveraging effect on the Portfolio. For example, a small investment in a derivative instrument may have a significant impact on the Portfolio's exposure to interest rates, currency exchange rates or other investments. As a result, a relatively small price movement in an asset, instrument, or component of the index underlying a derivative instrument may cause an immediate and substantial loss or gain, which translates into heightened volatility for the Portfolio. The Portfolio may engage in such transactions regardless of whether the Portfolio owns the asset, instrument or components of the index underlying the derivative instrument. The Portfolio may invest a significant portion of its assets in these types of instruments. If it does, the Portfolio's investment exposure could far exceed the value of its portfolio securities and its investment performance could be primarily dependent upon securities it does not own. Investing in foreign (non-U.S.) securities may entail risk due to foreign (non-U.S.) economic and political developments; this risk may be increased when investing in emerging markets. For example, if the Portfolio invests in emerging market debt, it may face increased exposure to interest rate, liquidity, volatility, and redemption risk due to the specific economic, political, geographical, or legal background of the foreign (non-U.S.) issuer.

High-yield bonds typically have a lower credit rating than other bonds. Lower-rated bonds generally involve a greater risk to principal than higher-rated bonds. Further, markets for lower-rated bonds are typically less liquid than for higher-rated bonds, and public information is usually less abundant in such markets. Thus, high yield investments increase the chance that the Portfolio will lose money. The credit quality of a particular security or group of securities does not ensure the stability or safety of the overall portfolio. Mortgage- and Asset-Backed Securities represent ownership interests in "pools" of mortgages or other assets such as consumer loans or receivables. As a general matter, Mortgage- and Asset-Backed Securities are subject to interest rate risk, extension risk, prepayment risk, and credit risk. These risks largely stem from the fact that returns on Mortgage- and Asset-Backed Securities depend on the ability of the underlying assets to generate cash flow.

The geographical classification of foreign (non-U.S.) securities in this report are classified by the country of incorporation of a holding. In certain instances, a security's country of incorporation may be different from its country of economic exposure.

On the Portfolio Summary page in this Shareholder Report, the Average Annual Total Return table and Cumulative Returns chart measure performance assuming that any dividend and capital gain distributions were reinvested. The Cumulative Returns chart reflects only Administrative Class performance. Performance for Institutional Class, Class M and Advisor Class shares, if applicable, may be higher or lower based on each class's expense ratios. The Portfolio's total annual operating expense ratios on the Portfolio Summary page are as of the currently effective prospectus, as supplemented to date. The Portfolio measures its performance against a broad-based securities market index ("benchmark index"). The benchmark index does not take into account fees, expenses, or taxes. The Portfolio's past performance, before and after taxes, is not necessarily an indication of how the Portfolio will perform in the future.

The following table discloses the inception dates of the Portfolio and its respective share classes along with the Portfolio's diversification status as of period end:

| Portfolio Name | Portfolio Inception | Institutional Class | Class M | Administrative Class | Advisor Class | Diversification Status |
|---|---|---|---|---|---|---|
| PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged) | 2/16/99 | 4/10/00 | — | 2/16/99 | 4/30/14 | Non-diversified |

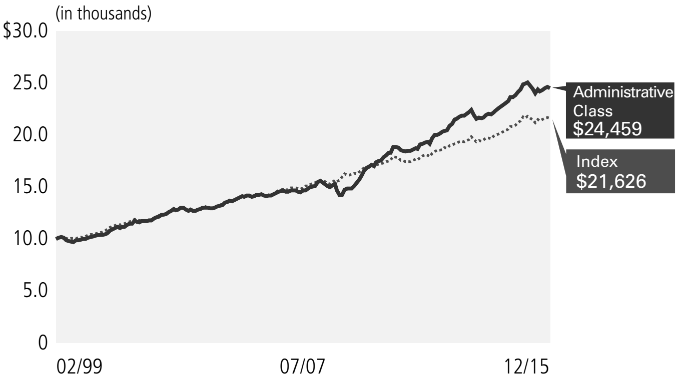
An investment in the Portfolio is not a deposit of a bank and is not guaranteed or insured by the Federal Deposit Insurance Corporation or any other government agency. It is possible to lose money on investments in the Portfolio.

The Trustees are responsible generally for overseeing the management of the Trust. The Trustees authorize the Trust to enter into service agreements with the Adviser, the Distributor, the Administrator and other service providers in order to provide, and in some cases authorize service providers to procure through other parties, necessary or desirable services on behalf of the Trust and the Portfolio. Shareholders are not parties to or third-party beneficiaries of such service agreements. Neither this Portfolio's prospectus nor summary prospectus, the Trust's Statement of Additional Information ("SAI"), any contracts filed as exhibits to the Trust's registration statement, nor any other communications, disclosure documents or regulatory filings (including this report) from or on behalf of the Trust or the Portfolio creates a contract between or among any shareholder of the Portfolio, on the one hand, and the Trust, the Portfolio, a service provider to the Trust or the Portfolio, and/or the Trustees or officers of the Trust, on the other hand. The Trustees (or the Trust and its officers, service providers or other delegates acting under authority of the Trustees) may amend the most recent prospectus or use a new prospectus, summary prospectus or SAI with respect to the Portfolio or the Trust, and/or amend, file and/or issue any other communications, disclosure documents or regulatory filings, and may amend or enter into any contracts to which the Trust or the Portfolio is a party, and interpret the investment objective(s), policies, restrictions and contractual provisions applicable to the Portfolio, without shareholder input or approval, except in circumstances in which shareholder approval is specifically required by law (such as changes to fundamental investment policies) or where a shareholder approval requirement is specifically disclosed in the Trust's then-current prospectus or SAI.

PIMCO has adopted written proxy voting policies and procedures ("Proxy Policy") as required by Rule 206(4)-6 under the Investment Advisers Act of 1940, as amended. The Proxy Policy has been adopted by the Trust as the policies and procedures that PIMCO will use when voting proxies on behalf of the Portfolio. A description of the policies and procedures that PIMCO uses to vote proxies relating to portfolio securities of the Portfolio, and information about how the Portfolio voted proxies relating to portfolio securities held during the most recent twelve-month period ended June 30, are available without charge, upon request, by calling the Trust at (888) 87-PIMCO, on the Portfolio's website at pvit.pimco-funds.com, and on the Securities and Exchange Commission's ("SEC") website at www.sec.gov.

The Portfolio files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. A copy of the Trust's Form N-Q is available on the SEC's website at www.sec.gov and may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C., and is available without charge, upon request, by calling the Trust at (888) 87-PIMCO and on the Portfolio's website at pvit.pimco-funds.com. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

The Trust is distributed by PIMCO Investments LLC, 1633 Broadway, New York, New York 10019.



$10,000 invested at the end of the month when the Portfolio's Administrative Class commenced operations.

All Portfolio returns are net of fees and expenses.

* For class inception dates please refer to the Important Information.
** Average annual total return since 02/28/1999.
*** Prior to December 1, 2015, the Portfolio's broad-based securities market index was JPMorgan GBI FX NY Index Unhedged.

*Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Current performance may be lower or higher than performance shown. Investment return and the principal value of an investment will fluctuate. Shares may be worth more or less than original cost when redeemed. The Portfolio's performance does not reflect the deduction of additional charges and expenses imposed in connection with investing in Variable Contracts, which will reduce returns. For performance current to the most recent month-end, visit pvit.pimco-funds.com. The Portfolio's total annual operating expense ratio as stated in the Portfolio's current prospectus, as supplemented to date, is 0.76% for Institutional Class shares, 0.91% for Administrative Class shares, and 1.01% for Advisor Class shares.*

± Barclays Global Aggregate ex-USD (USD Hedged) Index provides a broad-based measure of the global investment-grade fixed income markets. The three major components of this index are the US Aggregate, the Pan-European Aggregate, and the Asian-Pacific Aggregate indices. The index also includes Eurodollar and Euro-Yen corporate bonds, Canadian government, agency and corporate securities, and USD investment grade 144A securities.

It is not possible to invest in an unmanaged index.

## Investment Objective and Strategy Overview

» The PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged) seeks maximum total return, consistent with preservation of capital and prudent investment management, by investing under normal circumstances at least 80% of its assets in Fixed Income Instruments that are economically tied to foreign (non-U.S.) countries, representing at least three foreign countries, which may be represented by forwards or derivatives such as options, futures contracts or swap agreements. "Fixed Income Instruments" include bonds, debt securities and other similar instruments issued by various U.S. and non-U.S. public- or private-sector entities. The Portfolio will normally limit its foreign currency exposure (from non-U.S. dollar-denominated securities or currencies) to 20% of its assets.

## Portfolio Insights

» An underweight to the euro and the Brazilian real contributed to relative performance, as both currencies depreciated relative to the U.S. dollar over the reporting period.

» An overweight to Australian duration during the first quarter contributed to relative performance, as yields declined over this portion of the reporting period.

» An underweight to Canadian duration detracted from relative performance, as Canadian rates declined during the reporting period.

» An overweight to Brazilian local duration detracted from relative performance, as Brazilian yields increased during the reporting period.

» Issue selection in the Brazilian emerging markets quasi-sovereign space detracted from performance, as emerging markets external spreads widened during the reporting period.

## Example

As a shareholder of the Portfolio, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees, distribution and/or service (12b-1) fees (if applicable), and other Portfolio expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds.

The Expense Example does not reflect any fees or other expenses imposed by the Variable Contracts. If it did, the expenses reflected in the Expense Example would be higher. The Example is based on an investment of $1,000 invested at the beginning of the period and held from July 1, 2015 to December 31, 2015 unless noted otherwise in the table and footnotes below.

## Actual Expenses

The information in the table under the heading "Actual" provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class, in the column titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

## Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Portfolio and other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. In addition, if these transactional costs were included, your costs would have been higher.

Expense ratios may vary period to period because of various factors, such as an increase in expenses that are not covered by the management fees such as fees and expenses of the independent trustees and their counsel, extraordinary expenses and interest expense.

| | Actual | | | Hypothetical (5% return before expenses) | | | |
|---|---|---|---|---|---|---|---|
| | Beginning Account Value (07/01/15) | Ending Account Value (12/31/15) | Expenses Paid During Period* | Beginning Account Value (07/01/15) | Ending Account Value (12/31/15) | Expenses Paid During Period* | Net Annualized Expense Ratio** |
| Institutional Class | $ 1,000.00 | $ 1,021.00 | $ 3.88 | $ 1,000.00 | $ 1,021.77 | $ 3.88 | 0.75% |
| Administrative Class | 1,000.00 | 1,020.20 | 4.66 | 1,000.00 | 1,021.01 | 4.66 | 0.90 |
| Advisor Class | 1,000.00 | 1,019.70 | 5.17 | 1,000.00 | 1,020.49 | 5.18 | 1.00 |

* Expenses Paid During Period are equal to the net annualized expense ratio for the class, multiplied by the average account value over the period, multiplied by 187/365 (to reflect the one-half year period). Overall fees and expenses of investing in the Portfolio will be higher because the example does not reflect variable contract fees and expenses.

** Net Annualized Expense Ratio is reflective of any applicable contractual fee waivers and/or expense reimbursements or voluntary fee waivers. Details regarding fee waivers can be found in Note 8 in the Notes to Financial Statements.

| Selected Per Share Data for the Year or Period Ended: | Net Asset Value Beginning of Year or Period | Net Investment Income [(a)] | Net Realized/ Unrealized Gain (Loss) | Total from Investment Operations | Dividends from Net Investment Income [(b)] | Distributions from Net Realized Capital Gains [(b)] | Total Distributions |

**(c) Perpetual maturity; date shown, if applicable, represents next contractual call date.**

## BORROWINGS AND OTHER FINANCING TRANSACTIONS

### (d) REPURCHASE AGREEMENTS:

| Counterparty | Lending Rate | Settlement Date | Maturity Date | Principal Amount | Collateralized By | Collateral (Received) | Repurchase Agreements, at Value | Repurchase Agreement Proceeds to be Received [(1)] |
|---|---|---|---|---|---|---|---|---|
| SSB | 0.010% | 12/31/2015 | 01/04/2016 | $ 1,404 | Fannie Mae 2.140% due 11/07/2022 | $ (1,432) | $ 1,404 | $ 1,404 |
| **Total Repurchase Agreements** | | | | | | **$ (1,432)** | **$ 1,404** | **$ 1,404** |

(1) Includes accrued interest.

### SHORT SALES:

### SHORT SALES ON U.S. GOVERNMENT AGENCIES*:

| Description | Coupon | Maturity Date | Principal Amount | Proceeds | Payable for Short Sales |
|---|---|---|---|---|---|
| Fannie Mae, TBA | 4.000% | 01/01/2046 | $ 3,000 | $ (3,180) | $ (3,174) |
| Fannie Mae, TBA | 4.500 | 01/01/2046 | 7,000 | (7,557) | (7,559) |
| Fannie Mae, TBA | 4.500 | 02/01/2046 | 5,000 | (5,386) | (5,391) |
| **Total Short Sales** | | | | **$ (16,123)** | **$ (16,124)** |

* Short Sales shown are To-Be-Announced (“TBA”) securities which are not subject to collateral pledging under the terms of any master agreements.

## BORROWINGS AND OTHER FINANCING TRANSACTIONS SUMMARY

**The following is a summary by counterparty of the market value of Borrowings and Other Financing Transactions and collateral (received) as of December 31, 2015:**

| Counterparty | Repurchase Agreement Proceeds to be Received | Payable for Reverse Repurchase Agreements | Payable for Sale-Buyback Transactions | Total Borrowings and Other Financing Transactions | Collateral (Received) | Net Exposure [(2)] |
|---|---|---|---|---|---|---|
| Global/Master Repurchase Agreement | | | | | | |
| SSB | $ 1,404 | $ 0 | $ 0 | $ 1,404 | $ (1,432) | $ (28) |
| **Total Borrowings and Other Financing Transactions** | **$ 1,404** | **$ 0** | **$ 0** | | | |

(2) Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from borrowings and other financing transactions can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Principal Risks, in the Notes to Financial Statements for more information regarding master netting arrangements.

### SWAP AGREEMENTS:

### CREDIT DEFAULT SWAPS ON CREDIT INDICES - SELL PROTECTION [(1)]

| Index/Tranches | Fixed Receive Rate | Maturity Date | Notional Amount [(2)] | Market Value [(3)] | Unrealized Appreciation/ (Depreciation) | Variation Margin Asset | Variation Margin Liability |
|---|---|---|---|---|---|---|---|
| CDX.HY-24 5-Year Index | 5.000% | 06/20/2020 | $ 1,683 | $ 66 | $ (52) | $ 2 | $ 0 |
| CDX.HY-25 5-Year Index | 5.000 | 12/20/2020 | 5,100 | 71 | (26) | 8 | 0 |
| CDX.IG-25 5-Year Index | 1.000 | 12/20/2020 | 18,700 | 110 | (37) | 3 | 0 |
| iTraxx Europe Main 24 5-Year Index | 1.000 | 12/20/2020 | EUR 24,100 | 302 | (61) | 10 | 0 |
| iTraxx Senior 24 5-Year Index | 1.000 | 12/20/2020 | 4,100 | 52 | 4 | 0 | (2) |
| | | | | $ 601 | $ (172) | $ 23 | $ (2) |

(1) If the Portfolio is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Portfolio will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

(2) The maximum potential amount the Portfolio could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

(3) The prices and resulting values for credit default swap agreements on credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement be closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced indices' credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

## INTEREST RATE SWAPS

| Pay/Receive Floating Rate | Floating Rate Index | Fixed Rate | Maturity Date | | Notional Amount | Market Value | Unrealized Appreciation/ (Depreciation) | Variation Margin Asset | Variation Margin Liability |

## CREDIT DEFAULT SWAPS ON CREDIT INDICES - BUY PROTECTION [1]

| Counterparty | Index/Tranches | Fixed (Pay) Rate | Maturity Date | Notional Amount [4] | Premiums Paid | Unrealized Appreciation | Swap Agreements, at Value [5] Asset | Liability |
|---|---|---|---|---|---|---|---|---|
| BOA | iTraxx Europe Subordinated 23 5-Year Index | (1.000%) | 12/20/2020 | EUR 300 | $ 7 | $ 2 | $ 9 | $ 0 |
| BPS | iTraxx Europe Subordinated 23 5-Year Index | (1.000) | 12/20/2020 | 100 | 2 | 1 | 3 | 0 |
| BRC | iTraxx Europe Subordinated 23 5-Year Index | (1.000) | 12/20/2020 | 500 | 11 | 3 | 14 | 0 |
| | | | | | $ 20 | $ 6 | $ 26 | $ 0 |

(1) If the Portfolio is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Portfolio will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

(2) If the Portfolio is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Portfolio will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

(3) Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate or sovereign issues as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

(4) The maximum potential amount the Portfolio could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

(5) The prices and resulting values for credit default swap agreements on credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement be closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced indices' credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

## CROSS-CURRENCY SWAPS

| Counterparty | Receive | Pay | Maturity Date [6] | Notional Amount of Currency Received | Notional Amount of Currency Delivered | Premiums Paid/(Received) | Unrealized Appreciation/ (Depreciation) | Swap Agreements, at Value Asset | Liability |

(7) Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from OTC financial derivative instruments can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Principal Risks, in the Notes to Financial Statements for more information regarding master netting arrangements.

## FAIR VALUE OF FINANCIAL DERIVATIVE INSTRUMENTS

**The following is a summary of the fair valuation of the Portfolio's derivative instruments categorized by risk exposure. See Note 7, Principal Risks, in the Notes to Financial Statements on risks of the Portfolio.**

**Fair Values of Financial Derivative Instruments on the Statement of Assets and Liabilities as of December 31, 2015:**

| | Derivatives not accounted for as hedging instruments | | | | | |
|---|---|---|---|---|---|---|
| | Commodity Contracts | Credit Contracts | Equity Contracts | Foreign Exchange Contracts | Interest Rate Contracts | Total |
| **Financial Derivative Instruments - Assets** | | | | | | |

## 1. ORGANIZATION

The PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged) (the "Portfolio") is a series of the PIMCO Variable Insurance Trust (the "Trust"). The Trust is registered under the Investment Company Act of 1940, as amended (the "Act"), as an open-end management investment company organized as a Delaware business trust on October 3, 1997. The Portfolio offers three classes of shares: Institutional, Administrative and Advisor. The Trust is designed to be used as an investment vehicle by separate accounts of insurance companies that fund variable annuity contracts and variable life insurance policies and by qualified pension and retirement plans. Pacific Investment Management Company LLC ("PIMCO") serves as the investment adviser (the "Adviser") for the Portfolio.

## 2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Portfolio in the preparation of its financial statements in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The Portfolio is treated as an investment company under the reporting requirements of U.S. GAAP. The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

**(a) Securities Transactions and Investment Income** Securities transactions are recorded as of the trade date for financial reporting purposes. Realized gains and losses from securities sold are recorded on the identified cost basis. Dividend income is recorded on the ex-dividend date, except certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the Portfolio is informed of the ex-dividend date. Interest income, adjusted for the accretion of discounts and amortization of premiums, is recorded on the accrual basis from settlement date, with the exception of securities with a forward starting effective date, where interest income is recorded on the accrual basis from effective date. For convertible securities, premiums attributable to the conversion feature are not amortized. Estimated tax liabilities on certain foreign securities are recorded on an accrual basis and are reflected as components of interest income or net change in unrealized appreciation (depreciation) on investments on the Statement of Operations, as appropriate. Tax liabilities realized as a result of such security sales are reflected as a component of net realized gain (loss) on investments on the Statement of Operations. Paydown gains and losses on mortgage-related and other asset-backed securities are recorded as components of interest income on the Statement of Operations. Income or short-term capital gain distributions received from registered investment companies are recorded as dividend income. Long-term capital gain distributions received from registered investment companies are recorded as realized gains.

Debt obligations may be placed on non-accrual status and related interest income may be reduced by ceasing current accruals and writing off interest receivable when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. A debt obligation is removed from non-accrual status when the issuer resumes interest payments or when collectability of interest is probable.

**(b) Cash and Foreign Currency** The functional and reporting currency for the Portfolio is the U.S. dollar. The market values of foreign securities, currency holdings and other assets and liabilities are translated into U.S. dollars based on the current exchange rates each business day. Purchases and sales of securities and income and expense items denominated in foreign currencies, if any, are translated into U.S. dollars at the exchange rate in effect on the transaction date. The Portfolio does not separately report the effects of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized gain (loss) and net change in unrealized appreciation (depreciation) from investments on the Statement of Operations. The Portfolio may invest in foreign currency-denominated securities and may engage in foreign currency transactions either on a spot (cash) basis at the rate prevailing in the currency exchange market at the time or through a forward foreign currency contract (see Financial Derivative Instruments, if any). Realized foreign exchange gains or losses arising from sales of spot foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid are included in net realized gain (loss) on foreign currency transactions on the Statement of Operations. Net unrealized foreign exchange gains and losses arising from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period are included in net change in unrealized appreciation (depreciation) on foreign currency assets and liabilities on the Statement of Operations.

**(c) Multiclass Operations** Each class offered by the Portfolio has equal rights as to assets and voting privileges (except that shareholders of a class have exclusive voting rights regarding any matter relating solely to that class of shares). Income and non-class specific expenses are allocated daily to each class on the basis of the relative net assets. Realized and unrealized capital gains and losses are allocated daily based on the relative net assets of each class of the Portfolio. Class specific expenses, where applicable, currently include supervisory and administrative and distribution and servicing fees. Under certain circumstances, the per share net asset value ("NAV") of a class of the Portfolio's shares may be different from the per share NAV of another class of shares as a result of the different daily expense accruals applicable to each class of shares.

**(d) Dividends and Distributions to Shareholders** Dividends from net investment income, if any, are declared daily and distributed to shareholders monthly. Net realized capital gains earned by the Portfolio, if any, will be distributed no less frequently than once each year.

Income dividends and capital gain distributions are determined in accordance with income tax regulations which may differ from U.S. GAAP. Differences between tax regulations and U.S. GAAP may cause timing differences between income and capital gain recognition. Examples of events that give rise to timing differences include wash sales, straddles and capital loss carryforwards. Further, the character of investment income and capital gains may be different for certain transactions under the two methods of accounting. Examples of transactions that may cause character differences include the treatment of paydowns on mortgage-backed securities, swaps, foreign currency transactions and contingent debt instruments. As a result, income dividends and capital gain distributions declared during a fiscal period may differ significantly from the net investment income (loss) and realized gains (losses) reported on the Portfolio's annual financial statements presented under U.S. GAAP.

Distributions classified as a tax basis return of capital, if any, are reflected on the Statements of Changes in Net Assets and have been recorded to paid in capital. In addition, other amounts have been reclassified between undistributed (overdistributed) net investment income (loss), accumulated undistributed (overdistributed) net realized gains (losses) and/or paid in capital to more appropriately conform financial accounting to tax characterizations of dividend distributions.

**(e) New Accounting Pronouncements** In June 2014, the Financial Accounting Standards Board ("FASB") issued an Accounting Standards Update ("ASU"), ASU 2014-11, that expanded secured borrowing accounting for certain repurchase agreements. The ASU also sets forth additional disclosure requirements for certain transactions accounted for as sales in order to provide financial statement users with information to compare to similar transactions accounted for as secured borrowings. The ASU became effective prospectively for annual periods beginning after December 15, 2014, and interim periods beginning after March 15, 2015. The Portfolio has adopted the ASU. The financial statements have been modified to provide enhanced disclosures surrounding secured borrowing transactions, if any. See the Notes to Schedule of Investments for additional details.

In August 2014, the FASB issued ASU 2014-15 requiring management to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern. The ASU is effective prospectively for annual periods ending after December 15, 2016, and interim periods thereafter. At this time, management is evaluating the implications of these changes on the financial statements.

In May 2015, the FASB issued ASU 2015-07 which removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the NAV per share practical expedient. The ASU also removes the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the NAV per share practical expedient. The ASU is effective for annual periods beginning after December 15, 2015 and interim periods within those annual periods. At this time, management is evaluating the implications of these changes on the financial statements.

## 3. INVESTMENT VALUATION AND FAIR VALUE MEASUREMENTS

**(a) Investment Valuation Policies** The price of the Portfolio's shares is based on the Portfolio's NAV. The NAV of the Portfolio, or each of its share classes, as applicable, is determined by dividing the total value of portfolio investments and other assets attributable to the Portfolio or class, less any liabilities, by the total number of shares outstanding of the Portfolio or class.

On each day that the New York Stock Exchange ("NYSE") is open, Portfolio shares are ordinarily valued as of the close of regular trading ("NYSE Close"). Information that becomes known to the Portfolio or its agents after the time as of which NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of a security or the NAV determined earlier that day. The Portfolio reserves the right to change the time its NAV is calculated if the Portfolio closes earlier, or as permitted by the SEC.

For purposes of calculating NAV, portfolio securities and other assets for which market quotes are readily available are valued at market value. Market value is generally determined on the basis of official closing prices or the last reported sales prices, or if no sales are reported, based on quotes obtained from established market makers or prices (including evaluated prices) supplied by the Portfolio's approved pricing services, quotation reporting systems and other third-party sources (together, "Pricing Services"). The Portfolio will normally use pricing data for domestic equity securities received shortly after the NYSE Close and does not normally take into account trading, clearances or settlements that take place after the NYSE Close. A foreign (non-U.S.) equity security traded on a foreign exchange or on more than one exchange is typically valued using pricing information from the exchange considered by the

Adviser to be the primary exchange. A foreign (non-U.S.) equity security will be valued as of the close of trading on the foreign exchange, or the NYSE Close, if the NYSE Close occurs before the end of trading on the foreign exchange. Domestic and foreign (non-U.S.) fixed income securities, non-exchange traded derivatives, and equity options are normally valued on the basis of quotes obtained from brokers and dealers or Pricing Services using data reflecting the earlier closing of the principal markets for those securities. Prices obtained from Pricing Services may be based on, among other things, information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Certain fixed income securities purchased on a delayed-delivery basis are marked to market daily until settlement at the forward settlement date. Exchange-traded options, except equity options, futures and options on futures are valued at the settlement price determined by the relevant exchange. Swap agreements are valued on the basis of bid quotes obtained from brokers and dealers or market-based prices supplied by Pricing Services or other pricing sources. With respect to any portion of the Portfolio's assets that are invested in one or more open-end management investment companies (other than exchange-traded funds ("ETFs")), a Portfolio's NAV will be calculated based upon the NAVs of such investments.

If a foreign (non-U.S.) equity security's value has materially changed after the close of the security's primary exchange or principal market but before the NYSE Close, the security may be valued at fair value based on procedures established and approved by the Board of Trustees of the Trust (the "Board"). Foreign (non-U.S.) equity securities that do not trade when the NYSE is open are also valued at fair value. With respect to foreign (non-U.S.) equity securities, the Portfolio may determine the fair value of investments based on information provided by Pricing Services and other third-party vendors, which may recommend fair value or adjustments with reference to other securities, indices or assets. In considering whether fair valuation is required and in determining fair values, the Portfolio may, among other things, consider significant events (which may be considered to include changes in the value of U.S. securities or securities indices) that occur after the close of the relevant market and before the NYSE Close. The Portfolio may utilize modeling tools provided by third-party vendors to determine fair values of non-U.S. securities. Foreign (non-U.S.) exchanges may permit trading in foreign (non-U.S.) equity securities on days when the Trust is not open for business, which may result in the Portfolio's portfolio investments being affected when shareholders are unable to buy or sell shares.

Senior secured floating rate loans for which an active secondary market exists to a reliable degree will be valued at the mean of the last available bid/ask prices in the market for such loans, as provided by a Pricing Service. Senior secured floating rate loans for which an active secondary market does not exist to a reliable degree will be valued at fair value, which is intended to approximate market value. In valuing a senior secured floating rate loan at fair value, the factors considered may include, but are not limited to, the following: (a) the creditworthiness of the borrower and any intermediate participants, (b) the terms of the loan, (c) recent prices in the market for similar loans, if any, and (d) recent prices in the market for instruments of similar quality, rate, period until next interest rate reset and maturity.

Investments valued in currencies other than the U.S. dollar are converted to the U.S. dollar using exchange rates obtained from Pricing Services. As a result, the value of such investments and, in turn, the NAV of the Portfolio's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of investments traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the Trust is not open for business. As a result, to the extent that the Portfolio holds foreign (non-U.S.) investments, the value of those investments may change at times when shareholders are unable to buy or sell shares and the value of such investments will be reflected in the Portfolio's next calculated NAV.

Investments for which market quotes or market based valuations are not readily available are valued at fair value as determined in good faith by the Board or persons acting at their direction. The Board has adopted methods for valuing securities and other assets in circumstances where market quotes are not readily available, and has delegated to the Adviser the responsibility for applying the fair valuation methods. In the event that market quotes or market based valuations are not readily available, and the security or asset cannot be valued pursuant to a Board approved valuation method, the value of the security or asset will be determined in good faith by the Valuation Oversight Committee of the Board ("Valuation Oversight Committee"), generally based on recommendations provided by the Adviser. Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information, bid/ask information, indicative market quotations ("Broker Quotes"), Pricing Services' prices), including where events occur after the close of the relevant market, but prior to the NYSE Close, that materially affect the values of a Portfolio's securities or assets. In addition, market quotes are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which the securities trade do not open for trading for the entire day and no other market prices are available. The Board has delegated to the Adviser the responsibility for monitoring significant events that may materially affect the values of the Portfolio's securities or assets and for determining whether the value of the applicable securities or assets should be reevaluated in light of such significant events.

When a Portfolio uses fair valuation to determine the value of a portfolio security or other asset for purposes of calculating its NAV, such investments will not be priced on the basis of quotes from the primary market in which they are traded, but rather may be priced by another method that the Board or persons acting at their direction believe reflects fair value. Fair valuation may require subjective determinations about the value of a security. While the Trust's policy is intended to result in a calculation of the Portfolio's NAV that fairly reflects security values as of the time of pricing, the Trust cannot ensure that fair values determined by the Board or persons acting at their direction would accurately reflect the price that a Portfolio could obtain for a security if it were to dispose of that security as of the time of pricing (for instance, in a forced or distressed sale). The prices used by a Portfolio may differ from the value that would be realized if the securities were sold. The Portfolio's use of fair valuation may also help to deter "stale price arbitrage" as discussed under the "Frequent or Excessive Purchases, Exchanges and Redemptions" section in the Portfolio's prospectus.

**(b) Fair Value Hierarchy** U.S. GAAP describes fair value as the price that the Portfolio would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. It establishes a fair value hierarchy that prioritizes inputs to valuation methods and requires disclosure of the fair value hierarchy, separately for each major category of assets and liabilities, that segregates fair value measurements into levels (Level 1, 2, or 3). The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Levels 1, 2, and 3 of the fair value hierarchy are defined as follows:

- Level 1 — Inputs using (unadjusted) quoted prices in active markets or exchanges for identical assets and liabilities.
- Level 2 — Significant other observable inputs, which may include, but are not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market corroborated inputs.
- Level 3 — Significant unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include assumptions made by the Board or persons acting at their direction that are used in determining the fair value of investments.

In accordance with the requirements of U.S. GAAP, the amounts of transfers between Levels 1 and 2 and transfers in and out of Level 3, if material, are disclosed in the Notes to Schedule of Investments for the Portfolio.

For fair valuations using significant unobservable inputs, U.S. GAAP requires a reconciliation of the beginning to ending balances for reported fair values that presents changes attributable to realized gain (loss), unrealized appreciation (depreciation), purchases and sales, accrued discounts (premiums), and transfers in and out of the Level 3 category during the period. The end of period timing recognition is used for the transfers between Levels of the Portfolio's assets and liabilities. Additionally, U.S. GAAP requires quantitative information regarding the significant unobservable inputs used in the determination of fair value of assets or liabilities categorized as Level 3 in the fair value hierarchy. In accordance with the requirements of U.S. GAAP, a fair value hierarchy, and if material, a Level 3 reconciliation and details of significant unobservable inputs, have been included in the Notes to Schedule of Investments for the Portfolio.

**(c) Valuation Techniques and the Fair Value Hierarchy**

**Level 1 and Level 2 trading assets and trading liabilities, at fair value** The valuation methods (or "techniques") and significant inputs used in determining the fair values of portfolio securities or other assets and liabilities categorized as Level 1 and Level 2 of the fair value hierarchy are as follows:

Fixed income securities including corporate, convertible and municipal bonds and notes, U.S. government agencies, U.S. treasury obligations, sovereign issues, bank loans, convertible preferred securities and non-U.S. bonds are normally valued on the basis of quotes obtained from brokers and dealers or Pricing Services that use broker-dealer quotations, reported trades or valuation estimates from their internal pricing models. The Pricing Services' internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Fixed income securities purchased on a delayed-delivery basis or as a repurchase commitment in a sale-buyback transaction are marked to market daily until settlement at the forward settlement date and are categorized as Level 2 of the fair value hierarchy.

Mortgage-related and asset-backed securities are usually issued as separate tranches, or classes, of securities within each deal. These securities are also normally valued by Pricing Services that use broker-dealer quotations, reported trades or valuation estimates from their internal pricing models. The pricing models for these securities usually consider tranche-level attributes, current market data, estimated cash flows and market-based yield spreads for each tranche, and incorporate deal collateral performance, as available. Mortgage-related and asset-backed securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Common stocks, ETFs, exchange-traded notes and financial derivative instruments, such as futures contracts, rights and warrants, or options on futures that are traded on a national securities exchange, are stated at the last reported sale or settlement price on the day of valuation. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized as Level 1 of the fair value hierarchy.

Valuation adjustments may be applied to certain securities that are solely traded on a foreign exchange to account for the market movement between the close of the foreign market and the NYSE Close. These securities are valued using Pricing Services that consider the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments. Securities using these valuation adjustments are categorized as Level 2 of the fair value hierarchy. Preferred securities and other equities traded on inactive markets or valued by reference to similar instruments are also categorized as Level 2 of the fair value hierarchy.

Investments in registered open-end investment companies (other than ETFs) will be valued based upon the NAVs of such investments and are categorized as Level 1 of the fair value hierarchy. Investments in unregistered open-end investment companies will be calculated based upon the NAVs of such investments and are considered Level 1 provided that the NAVs are observable, calculated daily and are the value at which both purchases and sales will be conducted. Investments in privately held investment funds with significant restrictions on redemption where the inputs to the NAVs are observable will be valued based upon the NAVs of such investments and are categorized as Level 2 of the fair value hierarchy.

Short-term debt instruments (such as commercial paper) having a remaining maturity of 60 days or less may be valued at amortized cost, so long as the amortized cost of such short-term debt instrument is approximately the same as the fair value of the instrument as determined without the use of amortized cost valuation. Prior to July 31, 2015, short-term investments having a maturity of 60 days or less and repurchase agreements were generally valued at amortized cost which approximates fair value. Short-term debt instruments having a remaining maturity of 60 days or less are categorized as Level 2 of the fair value hierarchy.

Equity exchange-traded options and over the counter financial derivative instruments, such as foreign currency contracts, options contracts, or swap agreements, derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. Other than swap agreements, which are valued using a broker-dealer bid quotation or on market-based prices provided by Pricing Services or other pricing sources, these contracts are normally valued on the basis of quotes obtained from a quotation reporting system, established market makers or Pricing Services (normally determined as of the NYSE Close). Depending on the product and the terms of the transaction, financial derivative instruments can be valued by Pricing Services using a series of techniques, including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as quoted prices, issuer details, indices, bid/ask spreads, interest rates, implied volatilities, yield curves, dividends and exchange rates. Financial derivative instruments that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Centrally cleared swaps listed or traded on a multilateral or trade facility platform, such as a registered exchange, are valued at the daily settlement price determined by the respective exchange (if available). For centrally cleared credit default swaps, the clearing facility requires its members to provide actionable price levels across complete term structures. These levels along with external third-party prices are used to produce daily settlement prices. These securities are categorized as Level 2 of the fair value hierarchy. Centrally cleared interest rate swaps are valued using a pricing model that references the underlying rates including the overnight index swap rate and London Interbank Offered Rate ("LIBOR") forward rate to produce the daily settlement price. These securities are categorized as Level 2 of the fair value hierarchy.

**Level 3 trading assets and trading liabilities, at fair value** When a fair valuation method is applied by the Adviser that uses significant unobservable inputs, investments will be priced by a method that the Board or persons acting at their direction believe reflects fair value and are categorized as Level 3 of the fair value hierarchy.

The validity of the fair value is reviewed by the Adviser on a periodic basis and may be amended in accordance with the Trust's valuation procedures.

## 4. SECURITIES AND OTHER INVESTMENTS

### (a) Investments in Affiliates

The Portfolio may invest in the PIMCO Short-Term Floating NAV Portfolio and PIMCO Short-Term Floating NAV Portfolio III ("Central Funds") to the extent permitted by the Act and rules thereunder. The Central Funds are registered investment companies created for use solely by the series of the Trust and other series of registered investment companies advised by the Adviser, in connection with their cash management activities. The main investments of the Central Funds are money market and short maturity fixed income instruments. The Central Funds may incur expenses related to their investment activities, but do not pay Investment Advisory Fees or Supervisory and Administrative Fees to the Adviser. The Central Funds are considered to be affiliated with the Portfolio. The tables below show the Portfolio's transactions in and earnings from investments in these affiliated Funds for the period ended December 31, 2015 (amounts in thousands†):

**Investments in PIMCO Short-Term Floating NAV Portfolio***

| Market Value 12/31/2014 | Purchases at Cost | Proceeds from Sales | Net Realized Gain (Loss) | Change in Unrealized Appreciation (Depreciation) | Market Value 12/31/2015 | Dividend Income (1) | Realized Net Capital Gain Distributions (1) |
|---|---|---|---|---|---|---|---|
| $ 17 | $ 0 | $ (17) | $ 0 | $ 0 | $ 0 | $ 0 | $ 0 |

† A zero balance may reflect actual amounts rounding to less than one thousand.
* Effective July 1, 2015, the Portfolio was liquidated.
(1) A portion of this may be recharacterized to return of capital and reflected as such on tax forms mailed to shareholders on or about January 31st following each calendar year.

**Investments in PIMCO Short-Term Floating NAV Portfolio III**

| Market Value 12/31/2014 | Purchases at Cost | Proceeds from Sales | Net Realized Gain (Loss) | Change in Unrealized Appreciation (Depreciation) | Market Value 12/31/2015 | Dividend Income (1) | Realized Net Capital Gain Distributions (1) |
|---|---|---|---|---|---|---|---|
| $ 40,634 | $ 181,666 | $ (162,600) | $ (203) | $ (24) | $ 59,473 | $ 466 | $ 0 |

† A zero balance may reflect actual amounts rounding to less than one thousand.
(1) A portion of this may be recharacterized to return of capital and reflected as such on tax forms mailed to shareholders on or about January 31st following each calendar year.

### (b) Investments in Securities

Inflation-Indexed Bonds The Portfolio may invest in inflation-indexed bonds. Inflation-indexed bonds are fixed income securities whose principal value is periodically adjusted to the rate of inflation. The interest rate on these bonds is generally fixed at issuance at a rate lower than typical bonds. Over the life of an inflation-indexed bond, however, interest will be paid based on a principal value which is adjusted for inflation. Any increase or decrease in the principal amount of an inflation-indexed bond will be included as interest income on the Statement of Operations, even though investors do not receive their principal until maturity.

Loan Participations, Assignments and Originations The Portfolio may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers. The Portfolio's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties or investments in or originations of loans by a Portfolio. A loan is often administered by a bank or other financial institution (the "lender") that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. The Portfolio may invest in multiple series or tranches of a loan, which may have varying terms and carry different associated risks. When the Portfolio purchases assignments from lenders it acquires direct rights against the borrowers of the loans. These loans may include participations in bridge loans, which are loans taken out by borrowers for a short period (typically less than one year) pending arrangement of more permanent financing through, for example, the issuance of bonds, frequently high yield bonds issued for the purpose of acquisitions.

The types of loans and related investments in which the Portfolio may invest include, among others, senior loans, subordinated loans (including second lien loans, B-Notes and mezzanine loans), whole loans, commercial real estate and other commercial loans and structured loans. The Portfolio may originate loans or acquire direct interests in loans through primary loan distributions and/or in private transactions. In the case of subordinated loans, there may be significant indebtedness ranking ahead of the borrower's obligation to the holder of such a loan, including in the event of the borrower's insolvency. Mezzanine loans are typically secured by a pledge of an equity interest in the mortgage borrower that owns the real estate rather than an interest in a mortgage.

Investments in loans may include unfunded loan commitments, which are contractual obligations for funding. Unfunded loan commitments may include revolving credit facilities, which may obligate the Portfolio to supply additional cash to the borrower on demand. Unfunded loan commitments represent a future obligation in full, even though a percentage of the committed amount may not be utilized by the borrower. When investing in a loan participation, the Portfolio has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the loan agreement and only upon receipt of payments by the lender from the borrower. The Portfolio may receive a commitment fee based on the undrawn portion of the underlying line of credit portion of a loan. In certain circumstances, the Portfolio may receive a penalty fee upon the prepayment of a loan by a borrower. Fees earned or paid are recorded as a component of interest income or interest expense, respectively, on the Statement of Operations. As of December 31, 2015, the Portfolio had no unfunded loan commitments outstanding.

Mortgage-Related and Other Asset-Backed Securities The Portfolio may invest in mortgage-related and other asset-backed securities that directly or indirectly represent a participation in, or are secured by and payable from, loans on real property. Mortgage-related securities are created from pools of residential or commercial mortgage loans, including mortgage loans made by savings and loan institutions, mortgage bankers, commercial banks and others. These securities provide a monthly payment which consists of both interest and principal. Interest may be determined by fixed or adjustable rates. The rate of prepayments on underlying mortgages will affect the price and volatility of a mortgage-related security, and may have the effect of shortening or extending the effective duration of the security relative to what was anticipated at the time of purchase. The timely payment of principal and interest of certain mortgage-related securities is guaranteed with the full faith and credit of the U.S. Government. Pools created and guaranteed by non-governmental issuers, including government-sponsored corporations, may be supported by various forms of insurance or guarantees, but there can be no assurance that private insurers or guarantors can meet their obligations under the insurance policies or guarantee arrangements. Many of the risks of investing in mortgage-related securities secured by commercial mortgage loans reflect the effects of local and other economic conditions on real estate markets, the ability of tenants to make lease payments, and the ability of a property to attract and retain tenants. These securities may be less liquid and may exhibit greater price volatility than other types of mortgage-related or other asset-backed securities. Other asset-backed securities are created from many types of assets, including auto loans, credit card receivables, home equity loans, and student loans.

Collateralized Mortgage Obligations ("CMOs") are debt obligations of a legal entity that are collateralized by whole mortgage loans or private mortgage bonds and divided into classes. CMOs are structured into multiple classes, often referred to as "tranches," with each class bearing a different stated maturity and entitled to a different schedule for payments of principal and interest, including prepayments. CMOs may be less liquid and may exhibit greater price volatility than other types of mortgage-related or asset-backed securities.

Collateralized Debt Obligations ("CDOs") include Collateralized Bond Obligations ("CBOs"), Collateralized Loan Obligations ("CLOs") and other similarly structured securities. CBOs and CLOs are types of asset-backed securities. A CBO is a trust which is backed by a diversified pool of high risk, below investment grade fixed income securities. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. The risks of an investment in a CDO depend largely on the type of the collateral securities and the class of the CDO in which the Portfolio invests. In addition to the normal risks associated with fixed income securities discussed elsewhere in this report and the Portfolio's prospectus and statement of additional information (e.g., prepayment risk, credit risk, liquidity risk, market risk, structural risk, legal risk and interest rate risk (which may be exacerbated if the interest rate payable on a structured financing changes based on multiples of changes in interest rates or inversely to changes in interest rates)), CBOs, CLOs and other CDOs carry additional risks including, but not limited to, (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments, (ii) the quality of the collateral may decline in value or default, (iii) the Portfolio may invest in CBOs, CLOs, or other CDOs that are subordinate to other classes, and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Stripped Mortgage-Backed Securities ("SMBS") are derivative multi-class mortgage securities. SMBS are usually structured with two classes that receive different proportions of the interest and principal distributions on a pool of mortgage assets. An SMBS will have one class that will receive all of the interest (the interest-only or "IO" class), while the other class will receive the entire principal (the principal-only or "PO" class). Payments received for IOs are included in interest income on the Statement of Operations. Because no principal will be received at the maturity of an IO, adjustments are made to the cost of the security on a monthly basis until maturity. These adjustments are included in interest income on the Statement of Operations. Payments received for POs are treated as reductions to the cost and par value of the securities.

U.S. Government Agencies or Government-Sponsored Enterprises The Portfolio may invest in securities of U.S. Government agencies or government-sponsored enterprises. U.S. Government securities are obligations of and, in certain cases, guaranteed by, the U.S. Government, its agencies or instrumentalities. Some U.S. Government securities, such as Treasury bills, notes and bonds, and securities guaranteed by the Government National Mortgage Association ("GNMA" or "Ginnie Mae"), are supported by the full faith and credit of the U.S. Government; others, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Department of the Treasury (the "U.S. Treasury"); and others, such as those of the Federal National Mortgage Association ("FNMA" or "Fannie Mae"), are supported by the discretionary authority of the U.S. Government to purchase the agency's obligations. U.S. Government securities may include zero coupon securities. Zero coupon securities do not distribute interest on a current basis and tend to be subject to a greater risk than interest-paying securities.

Government-related guarantors (*i.e.*, not backed by the full faith and credit of the U.S. Government) include FNMA and the Federal Home Loan Mortgage Corporation ("FHLMC" or "Freddie Mac"). FNMA is a government-sponsored corporation. FNMA purchases conventional (*i.e.*, not insured or guaranteed by any government agency) residential mortgages from a list of approved seller/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. Pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA, but are not backed by the full faith and credit of the U.S. Government. FHLMC issues Participation Certificates ("PCs"), which are pass-through securities, each representing an undivided interest in a pool of residential mortgages. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but PCs are not backed by the full faith and credit of the U.S. Government.

The Portfolio may engage in strategies where it seeks to extend the expiration or maturity of a position, such as a To Be Announced ("TBA") security on an underlying asset, by closing out the position before expiration and opening a new position with respect to the same underlying asset with a later expiration date. TBA securities purchased or sold are reflected on the Statement of Assets and Liabilities as an asset or liability, respectively.

## 5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The following disclosures contain information on the Portfolio's ability to lend or borrow cash or securities to the extent permitted under the Act, which may be viewed as borrowing or financing transactions by the Portfolio. The location of these instruments is described below. For a detailed description of credit and counterparty risks that can be associated with borrowings and other financing transactions, please see Note 7, Principal Risks.

(a) Repurchase Agreements  The Portfolio may engage in repurchase agreements. Under the terms of a typical repurchase agreement, the Portfolio takes possession of an underlying debt obligation (collateral) subject to an obligation of the seller to repurchase, and the Portfolio to resell, the obligation at an agreed-upon price and time. The underlying securities for all repurchase agreements are held in safekeeping at the Portfolio's custodian or designated subcustodians under tri-party repurchase agreements. The market value of the collateral must be equal to or exceed the total amount of the repurchase obligations, including interest. Repurchase agreements, including accrued interest, are included on the Statement of Assets and Liabilities. Interest earned is recorded as a component of interest income on the Statement of Operations. In periods of increased demand for collateral, the Portfolio may pay a fee for the receipt of collateral, which may result in interest expense to the Portfolio.

(b) Short Sales  The Portfolio may enter into short sales transactions. A short sale is a transaction in which the Portfolio sells securities it may not own in anticipation of a decline in the fair value of the securities. Securities sold in short sale transactions and the interest payable on such securities, if any, are reflected as a liability on the Statement of Assets and Liabilities. The Portfolio is obligated to deliver securities at the trade price at the time the short position is covered. Possible losses from short sales may be unlimited, whereas losses from purchases cannot exceed the total amount invested.

## 6. FINANCIAL DERIVATIVE INSTRUMENTS

The following disclosures contain information on how and why the Portfolio uses financial derivative instruments, and how financial derivative instruments affect the Portfolio's financial position, results of operations and cash flows. The location and fair value amounts of these instruments on the Statement of Assets and Liabilities and the net realized gain (loss) and net change in unrealized appreciation (depreciation) on the Statement of Operations, each categorized by type of financial derivative contract and related risk exposure, are included in a table in the Notes to Schedule of Investments. The financial derivative instruments outstanding as of period end and the amounts of net realized gain (loss) and net change in unrealized appreciation (depreciation) on financial derivative instruments during the period, as disclosed in the Notes to Schedule of Investments, serve as indicators of the volume of financial derivative activity for the Portfolio.

(a) Forward Foreign Currency Contracts  The Portfolio may enter into forward foreign currency contracts in connection with settling planned purchases or sales of securities, to hedge the currency exposure associated with some or all of the Portfolio's securities or as a part of an investment strategy. A forward foreign currency contract is an agreement between two parties to buy and sell a currency at a set price on a future date. The market value of a forward foreign currency contract fluctuates with changes in foreign currency exchange rates. Forward foreign currency contracts are marked to market daily, and the change in value is recorded by the Portfolio as an unrealized gain or loss. Realized gains or losses are equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed and are recorded upon delivery or receipt of the currency. These contracts may involve market risk in excess of the unrealized gain or loss reflected on the Statement of Assets and Liabilities. In addition, the Portfolio could be exposed to risk if the counterparties are unable to meet the terms of the contracts or if the value of the currency changes unfavorably to the U.S. dollar. To mitigate such risk, cash or securities may be exchanged as collateral pursuant to the terms of the underlying contracts.

(b) Futures Contracts The Portfolio may enter into futures contracts. The Portfolio may use futures contracts to manage its exposure to the securities markets or to movements in interest rates and currency values. The primary risks associated with the use of futures contracts are the imperfect correlation between the change in market value of the securities held by the Portfolio and the prices of futures contracts and the possibility of an illiquid market. Futures contracts are valued based upon their quoted daily settlement prices. Upon entering into a futures contract, the Portfolio is required to deposit with its futures broker an amount of cash, U.S. Government and Agency Obligations, or select sovereign debt, in accordance with the initial margin requirements of the broker or exchange. Futures contracts are marked to market daily and based on such movements in the price of the contracts, an appropriate payable or receivable for the change in value may be posted or collected by the Portfolio ("Futures Variation Margin"). Gains or losses are recognized but not considered realized until the contracts expire or close. Futures contracts involve, to varying degrees, risk of loss in excess of the Futures Variation Margin included within exchange traded or centrally cleared financial derivative instruments on the Statement of Assets and Liabilities.

(c) Options Contracts The Portfolio may write or purchase options to enhance returns or to hedge an existing position or future investment. The Portfolio may write call and put options on securities and financial derivative instruments it owns or in which it may invest. Writing put options tends to increase the Portfolio's exposure to the underlying instrument. Writing call options tends to decrease the Portfolio's exposure to the underlying instrument. When the Portfolio writes a call or put, an amount equal to the premium received is recorded as a liability and subsequently marked to market to reflect the current value of the option written. These liabilities are included on the Statement of Assets and Liabilities. Premiums received from writing options which expire are treated as realized gains. Premiums received from writing options which are exercised or closed are added to the proceeds or offset against amounts paid on the underlying futures, swap, security or currency transaction to determine the realized gain or loss. Certain options may be written with premiums to be determined on a future date. The premiums for these options are based upon implied volatility parameters at specified terms. The Portfolio, as a writer of an option has no control over whether the underlying instrument may be sold ("call") or purchased ("put") and as a result bears the market risk of an unfavorable change in the price of the instrument underlying the written option. There is the risk the Portfolio may not be able to enter into a closing transaction because of an illiquid market.

The Portfolio may also purchase put and call options. Purchasing call options tends to increase the Portfolio's exposure to the underlying instrument. Purchasing put options tends to decrease the Portfolio's exposure to the underlying instrument. The Portfolio pays a premium which is included as an asset on the Statement of Assets and Liabilities and subsequently marked to market to reflect the current value of the option. Premiums paid for purchasing options which expire are treated as realized losses. Certain options may be purchased with premiums to be determined on a future date. The premiums for these options are based upon implied volatility parameters at specified terms. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying investment transaction to determine the realized gain or loss when the underlying transaction is executed.

Options on Exchange-Traded Futures Contracts The Portfolio may write or purchase options on exchange-traded futures contracts ("Futures Option") to hedge an existing position or future investment, for speculative purposes or to manage exposure to market movements. A Futures Option is an option contract in which the underlying instrument is a single futures contract.

Credit Default Swaptions The Portfolio may write or purchase credit default swaptions to hedge exposure to the credit risk of an investment without making a commitment to the underlying instrument. A credit default swaption is an option to sell or buy credit protection to a specific reference by entering into a pre-defined swap agreement by some specified date in the future.

Interest Rate Swaptions The Portfolio may write or purchase interest rate swaptions which are options to enter into a pre-defined swap agreement by some specified date in the future. The writer of the swaption becomes the counterparty to the swap if the buyer exercises. The interest rate swaption agreement will specify whether the buyer of the swaption will be a fixed-rate receiver or a fixed-rate payer upon exercise.

**Foreign Currency Options** The Portfolio may write or purchase foreign currency options. Purchasing foreign currency options gives the Portfolio the right, but not the obligation to buy or sell the currency with specified amounts of currency and a rate of exchange that may be exercised by a certain date. These options may be used as a short or long hedge against possible variations in foreign exchange rates or to gain exposure to foreign currencies.

**Options on Securities** The Portfolio may write or purchase options on securities. An option uses a specified security as the underlying instrument for the option contract. The Portfolio may write or purchase options to enhance returns or to hedge an existing position or future investment.

**(d) Swap Agreements** The Portfolio may invest in swap agreements. Swap agreements are bilaterally negotiated agreements between the Portfolio and a counterparty to exchange or swap investment cash flows, assets, foreign currencies or market-linked returns at specified, future intervals. Swap agreements may be privately negotiated in the over the counter market ("OTC swaps") or may be cleared through a third party, known as a central counterparty or derivatives clearing organization ("Centrally Cleared Swaps"). The Portfolio may enter into asset, credit default, cross-currency, interest rate, total return, variance and other forms of swap agreements to manage its exposure to credit, currency, interest rate, commodity, equity and inflation risk. In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Centrally Cleared Swaps are marked to market daily based upon valuations as determined from the underlying contract or in accordance with the requirements of the central counterparty or derivatives clearing organization. Changes in market value, if any, are reflected as a component of net change in unrealized appreciation (depreciation) on the Statement of Operations. Daily changes in valuation of centrally cleared swaps ("Swap Variation Margin"), if any, are included within centrally cleared financial derivative instruments on the Statement of Assets and Liabilities. OTC swap payments received or paid at the beginning of the measurement period are included on the Statement of Assets and Liabilities and represent premiums paid or received upon entering into the swap agreement to compensate for differences between the stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, interest rates, and other relevant factors). Upfront premiums received (paid) are initially recorded as liabilities (assets) and subsequently marked to market to reflect the current value of the swap. These upfront premiums are recorded as realized gains or losses on the Statement of Operations upon termination or maturity of the swap. A liquidation payment received or made at the termination of the swap is recorded as realized gain or loss on the Statement of Operations. Net periodic payments received or paid by the Portfolio are included as part of realized gains or losses on the Statement of Operations.

For purposes of applying the Portfolio's investment policies and restrictions, swap agreements are generally valued by the Portfolio at market value. In the case of a credit default swap (see below), however, in applying certain of the Portfolio's investment policies and restrictions, the Portfolio will value the credit default swap at its notional value or its full exposure value (i.e., the sum of the notional amount for the contract plus the market value), but may value the credit default swap at market value for purposes of applying certain of the Portfolio's other investment policies and restrictions. For example, the Portfolio may value credit default swaps at full exposure value for purposes of the Portfolio's credit quality guidelines (if any) because such value reflects the Portfolio's actual economic exposure during the term of the credit default swap agreement. In this context, both the notional amount and the market value may be positive or negative depending on whether the Portfolio is selling or buying protection through the credit default swap. The manner in which certain securities or other instruments are valued by the Portfolio for purposes of applying investment policies and restrictions may differ from the manner in which those investments are valued by other types of investors.

Entering into these agreements involves, to varying degrees, elements of interest, credit, market and documentation risk in excess of the amounts recognized on the Statement of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of contractual terms in the agreements and that there may be unfavorable changes in interest rates.

The Portfolio's maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from the counterparty over the contract's remaining life, to the extent that amount is positive. The risk is mitigated by having a master netting arrangement between the Portfolio and the counterparty and by the posting of collateral to the Portfolio to cover the Portfolio's exposure to the counterparty.

**Credit Default Swap Agreements** A Portfolio may use credit default swaps on corporate, loan, sovereign, U.S. municipal or U.S. Treasury issues to provide a measure of protection against defaults of the issuers (*i.e.*, to reduce risk where a Portfolio owns or has exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood of a particular issuer's default. Credit default swap agreements involve one party making a stream of payments (referred to as the buyer of protection) to another party (the seller of protection) in exchange for the right to receive a specified return in the event that the referenced entity, obligation or index, as specified in the swap agreement, undergoes a certain credit event. As a seller of protection on credit default swap agreements, the Portfolio will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Portfolio would effectively add leverage to its portfolio because, in addition to its total net assets, the Portfolio would be subject to investment exposure on the notional amount of the swap.

If the Portfolio is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Portfolio will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. If the Portfolio is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Portfolio will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. Recovery values are estimated by market makers considering either industry standard recovery rates or entity specific factors and considerations until a credit event occurs. If a credit event has occurred, the recovery value is determined by a facilitated auction whereby a minimum number of allowable broker bids, together with a specified valuation method, are used to calculate the settlement value. The ability to deliver other obligations may result in a cheapest-to-deliver option (the buyer of protection's right to choose the deliverable obligation with the lowest value following a credit event).

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising the credit index. A credit index is a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. These indices are made up of reference credits that are judged by a poll of dealers to be the most liquid entities in the credit default swap market based on the sector of the index. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset-backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardized terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices changes periodically, usually every six months, and for most indices, each name has an equal weight in the index. The Portfolio may use credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds, which is less expensive than it would be to buy many credit default swaps to achieve a similar effect. Credit default swaps on indices are instruments for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality.

Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate, loan, sovereign, U.S. municipal or U.S. Treasury issues as of period end, if any, are disclosed in the Notes to Schedule of Investments. They serve as an indicator of the current status of payment/performance risk and represent the likelihood or risk of default for the reference entity. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values serve as the indicator of the current status of the payment/performance risk. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

The maximum potential amount of future payments (undiscounted) that the Portfolio as a seller of protection could be required to make under a credit default swap agreement equals the notional amount of the agreement. Notional amounts of each individual credit default swap agreement outstanding as of period end for which the Portfolio is the seller of protection are disclosed in the Notes to Schedule of Investments. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Portfolio for the same referenced entity or entities.

**Cross-Currency Swap Agreements** The Portfolio may enter into cross-currency swap agreements to gain or mitigate exposure to currency risk. Cross-currency swap agreements involve two parties exchanging two different currencies with an agreement to reverse the exchange at a later date at specified exchange rates. The exchange of currencies at the inception date of the contract takes place at the current spot rate. The re-exchange at maturity may take place at the same exchange rate, a specified rate, or the then current spot rate. Interest payments, if applicable, are made between the parties based on interest rates available in the two currencies at the inception of the contract. The terms of cross-currency swap contracts may extend for many years. Cross-currency swaps are usually negotiated with commercial and investment banks. Some cross-currency swaps may not provide for exchanging principal cash flows, but only for exchanging interest cash flows.

**Interest Rate Swap Agreements** The Portfolio is subject to interest rate risk exposure in the normal course of pursuing its investment objectives. Because the Portfolio holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To help hedge against this risk and to maintain its ability to generate income at prevailing market rates, the Portfolio may enter into interest rate swap agreements. Interest rate swap agreements involve the exchange by the Portfolio with another party for their respective commitment to pay or receive interest on the notional amount of principal. Certain forms of interest rate swap agreements may include: (i) interest rate caps, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates exceed a specified rate, or "cap", (ii) interest rate floors, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates fall below a specified rate, or "floor", (iii) interest rate collars, under which a party sells a cap and purchases a floor or vice versa in an attempt to protect itself against interest rate movements exceeding given minimum or maximum levels, (iv) callable interest rate swaps, under which the buyer pays an upfront fee in consideration for the right to early terminate the swap transaction in whole, at zero cost and at a predetermined date and time prior to the maturity date, (v) spreadlocks, which allow the interest rate swap users to lock in the forward differential (or spread) between the interest rate swap rate and a specified benchmark, or (vi) basis swaps, under which two parties can exchange variable interest rates based on different segments of money markets.

**Volatility Swap Agreements** The Portfolio also may enter into forward volatility agreements, also known as volatility swaps. In a volatility swap, the counterparties agree to make payments in connection with changes in the volatility (*i.e.*, the magnitude of change over a specified period of time) of an underlying referenced instrument, such as a currency, rate, index, security or other financial instrument. Volatility swaps permit the parties to attempt to hedge volatility risk and/or take positions on the projected future volatility of an underlying referenced instrument. For example, the Portfolio may enter into a volatility swap in order to take the position that the referenced instrument's volatility will increase over a particular period of time. If the referenced instrument's volatility does increase over the specified time, the Portfolio will receive payment from its counterparty based upon the amount by which the referenced instrument's realized volatility level exceeds a volatility level agreed upon by the parties. If the referenced instrument's volatility does not increase over the specified time, the Portfolio will make a payment to the counterparty based upon the amount by which the referenced instrument's realized volatility level falls below the volatility level agreed upon by the parties. At the maturity date, a net cash flow is exchanged, where the payoff amount is equivalent to the difference between the realized price volatility of the referenced instrument and the strike multiplied by the notional amount. As a receiver of the realized price volatility, the Portfolio would receive the payoff amount when the realized price volatility of the referenced instrument is greater than the strike and would owe the payoff amount when the volatility is less than the strike. As a payer of the realized price volatility, the Portfolio would owe the payoff amount when the realized price volatility of the referenced instrument is greater than the strike and would receive the payoff amount when the volatility is less than the strike. Payments on a volatility swap will be greater if they are based upon the mathematical square of volatility (*i.e.*, the measured volatility multiplied by itself, which is referred to as "variance"). This type of volatility swap is frequently referred to as a variance swap.

## 7. PRINCIPAL RISKS

In the normal course of business, the Portfolio trades financial instruments and enters into financial transactions where risk of potential loss exists due to such things as changes in the market (market risk) or failure or inability of the other party to a transaction to perform (credit and counterparty risk). See below for a detailed description of select principal risks. For a more comprehensive list of potential risks the Portfolio may be subject to, please see the Important Information About the Portfolio.

**Market Risks** The Portfolio's investments in financial derivative instruments and other financial instruments expose the Portfolio to various risks such as, but not limited to, interest rate, foreign currency, equity and commodity risks.

Interest rate risk is the risk that fixed income securities will decline in value because of an increase in interest rates. As nominal interest rates rise, the value of certain fixed income securities held by the Portfolio is likely to decrease. A nominal interest rate can be described as the sum of a real interest rate and an expected inflation rate. Interest rate changes can be sudden and unpredictable, and the Portfolio may lose money if these changes are not anticipated by the Portfolio's management. The Portfolio may not be able to hedge against changes in interest rates or may choose not to do so for cost or other reasons. In addition, any hedges may not work as intended.

Duration is a measure of the sensitivity of a fixed income security's market price to interest rate (*i.e.*, yield) movements that incorporates a security's yield, coupon, final maturity and call features, among other characteristics. Convexity is an additional measure of interest rate sensitivity that measures the rate of change of duration in response to changes in interest rates. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. A wide variety of factors can cause interest rates to rise (e.g., central bank monetary policies, inflation rates, general economic conditions). At present, the U.S. is experiencing historically low interest rates. The Portfolio may be subject to heightened interest rate risk because the Fed has ended its quantitative easing program and has begun, and may continue, to raise interest rates. Further, while U.S. bond markets have steadily grown over the past three decades, dealer "market making" ability has remained relatively stagnant. Given the importance of intermediary "market making" in creating a robust and active market, fixed income securities are currently facing increased volatility and liquidity risks. All of these factors, collectively and/or individually, could cause the Portfolio to lose value. If the Portfolio lost enough value, the Portfolio could face increased redemptions by shareholders, which could further impair its performance.

To the extent that the Portfolio may invest in securities and instruments that are economically tied to Russia, the Portfolio is subject to various risks such as, but not limited to political, economic, legal, market and currency risks. The risks include uncertain political and economic policies, short-term market volatility, poor accounting standards, corruption and crime, an inadequate regulatory system, and unpredictable taxation. Investments in Russia are particularly subject to the risk that further economic sanctions may be imposed by the United States and/or other countries. Such sanctions — which may impact companies in many sectors, including energy, financial services and defense, among others — may negatively impact the Portfolio's performance and/or ability to achieve its investment objective. The Russian securities market, as compared to U.S. markets, has significant price volatility, less liquidity, difficulties in obtaining accurate prices, a smaller market capitalization and a smaller number of traded securities. Settlement, clearing and registration of securities transactions are subject to risks, which may result in significant delays or problems in registering the transfer of securities, including issues with foreign nominee accounts held with custodian banks. It is possible that the ownership rights of the Portfolio could be lost through fraud or negligence. In addition, it may be difficult for the Portfolio to enforce any rights it may have in the event of loss of share registration. Adverse currency exchange rates are a risk and there may be a lack of available currency hedging instruments. Investments in Russia may be subject to the risk of nationalization or expropriation of assets. Oil, natural gas, metals, and timber account for a significant portion of Russia's exports, leaving the country vulnerable to swings in world prices.

If the Portfolio invests directly in foreign (non-U.S.) currencies or in securities that trade in, and receive revenues in, foreign (non-U.S.) currencies, or in financial derivative instruments that provide exposure to foreign (non-U.S.) currencies, it will be subject to the risk that those currencies will decline in value relative to the base currency of the Portfolio, or, in the case of hedging positions, that the Portfolio's base currency will decline in value relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, intervention (or the failure to intervene) by U.S. or foreign governments, central banks or supranational entities such as the International Monetary Fund, or by the imposition of currency controls or other political developments in the United States or abroad. As a result, the Portfolio's investments in foreign currency-denominated securities may reduce the Portfolio's returns.

The market values of equities, such as common stocks and preferred securities or equity related investments such as futures and options, have historically risen and fallen in periodic cycles and may decline due to general market conditions which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They may also decline due to factors which affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Different types of equity securities may react differently to these developments. Equity securities and equity related investments generally have greater market price volatility than fixed income securities.

**Credit and Counterparty Risks** The Portfolio will be exposed to credit risk to parties with whom it trades and will also bear the risk of settlement default. The Portfolio minimizes concentrations of credit risk by undertaking transactions with a large number of customers and counterparties on recognized and reputable exchanges, where applicable. For financial derivative instruments traded on exchanges or clearinghouses, the primary credit risk is the creditworthiness of the Portfolio's clearing broker or the exchange or clearinghouse itself. The Portfolio could lose money if the issuer or guarantor of a fixed income security, or the counterparty to a financial derivative instruments contract, repurchase agreement or a loan of portfolio securities, is unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. Securities and financial derivative instruments are subject to varying degrees of credit risk, which may be reflected in credit ratings.

Similar to credit risk, the Portfolio may be exposed to counterparty risk, or the risk that an institution or other entity with which the Portfolio has unsettled or open transactions will default. PIMCO, as the Adviser, minimizes counterparty risks to the Portfolio through a number of ways. Prior to entering into transactions with a new counterparty, the PIMCO Counterparty Risk Committee conducts an extensive credit review of such counterparty and must approve the use of such counterparty. Furthermore, pursuant to the terms of the underlying contract, to the extent that unpaid amounts owed to the Portfolio exceed a predetermined threshold, such counterparty shall advance collateral to the Portfolio in the form of cash or securities equal in value to the unpaid amount owed to the Portfolio. The Portfolio may invest such collateral in securities or other instruments and will typically pay interest to the counterparty on the collateral received. If the unpaid amount owed to the Portfolio subsequently decreases, the Portfolio would be required to return to the counterparty all or a portion of the collateral previously advanced.

All transactions in listed securities are settled/paid for upon delivery using approved counterparties. The risk of default is considered minimal, as delivery of securities sold is only made once the Portfolio has received payment. Payment is made on a purchase once the securities have been delivered by the counterparty. The trade will fail if either party fails to meet its obligation.

Master Netting Arrangements The Portfolio may be subject to various netting arrangements ("Master Agreements") with select counterparties. Master Agreements govern the terms of certain transactions, and reduce the counterparty risk associated with relevant transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Each type of Master Agreement governs certain types of transactions. Different types of transactions may be traded out of different legal entities or affiliates of a particular organization, resulting in the need for multiple agreements with a single counterparty. As the Master Agreements are specific to unique operations of different asset types, they allow the Portfolio to close out and net its total exposure to a counterparty in the event of a default with respect to all the transactions governed under a single Master Agreement with a counterparty. For financial reporting purposes the Statement of Assets and Liabilities generally presents derivative assets and liabilities on a gross basis, which reflects the full risks and exposures prior to netting.

Master Agreements can also help limit counterparty risk by specifying collateral posting arrangements at pre-arranged exposure levels. Under most Master Agreements, collateral is routinely transferred if the total net exposure to certain transactions (net of existing collateral already in place) governed under the relevant Master Agreement with a counterparty in a given account exceeds a specified threshold, which typically ranges from zero to $250,000 depending on the counterparty and the type of Master Agreement. United States Treasury Bills and U.S. dollar cash are generally the preferred forms of collateral, although other forms of AAA rated paper or sovereign securities may be used depending on the terms outlined in the applicable Master Agreement. Securities and cash pledged as collateral are reflected as assets on the Statement of Assets and Liabilities as either a component of Investments at value (securities) or Deposits with counterparty. Cash collateral received is not typically held in a segregated account and as such is reflected as a liability on the Statement of Assets and Liabilities as Deposits from counterparty. The market value of any securities received as collateral is not reflected as a component of NAV. The Portfolio's overall exposure to counterparty risk can change substantially within a short period, as it is affected by each transaction subject to the relevant Master Agreement.

Master Repurchase Agreements and Global Master Repurchase Agreements (individually and collectively "Master Repo Agreements") govern repurchase, reverse repurchase, and sale-buyback transactions between the Portfolio and select counterparties. Master Repo Agreements maintain provisions for, among other things, initiation, income payments, events of default, and maintenance of collateral. The market value of transactions under the Master Repo Agreement, collateral pledged or received, and the net exposure by counterparty as of period end are disclosed in the Notes to Schedule of Investments.

Master Securities Forward Transaction Agreements ("Master Forward Agreements") govern certain forward settling transactions, such as To-Be-Announced securities, delayed-delivery or sale-buyback transactions by and between the Portfolio and select counterparties. The Master Forward Agreements maintain provisions for, among other things, initiation and confirmation, payment and transfer, events of default, termination, and maintenance of collateral. The market value of forward settling transactions, collateral pledged or received, and the net exposure by counterparty as of period end is disclosed in the Notes to Schedule of Investments.

Customer Account Agreements and related addenda govern cleared derivatives transactions such as futures, options on futures, and cleared over the counter ("OTC") derivatives. Such transactions require posting of initial margin as determined by each relevant clearing agency which is segregated in an account at a futures commission merchant ("FCM") registered with the Commodity Futures Trading Commission ("CFTC"). In the United States, counterparty risk is significantly reduced as creditors of an FCM cannot have a claim to Portfolio assets in the segregated account. Additionally, portability of exposure in the event of an FCM default scenario further reduces risk to the Portfolio. Variation margin, or changes in market value, are exchanged daily, but may not be netted between futures and cleared OTC derivatives. The market value or accumulated unrealized appreciation (depreciation), initial margin posted, and any unsettled variation margin as of period end is disclosed in the Notes to Schedule of Investments.

International Swaps and Derivatives Association, Inc. Master Agreements and Credit Support Annexes ("ISDA Master Agreements") govern bilateral OTC derivative transactions entered into by the Portfolio with select counterparties. ISDA Master Agreements maintain provisions for general obligations, representations, agreements, collateral and events of default or termination. Events of termination include conditions that may entitle counterparties to elect to terminate early and cause settlement of all outstanding transactions under the applicable ISDA Master Agreement. Any election to terminate early could be material to the financial statements. In limited circumstances, the ISDA Master Agreement may contain additional provisions that add counterparty protection beyond coverage of existing daily exposure if the counterparty has a decline in credit quality below a predefined level. These amounts, if any, may be segregated with a third-party custodian. The market value of OTC financial derivative instruments, collateral received or pledged, and net exposure by counterparty as of period end are disclosed in the Notes to Schedule of Investments.

## 8. FEES AND EXPENSES

**(a) Investment Advisory Fee** PIMCO is a majority-owned subsidiary of Allianz Asset Management of America L.P. ("Allianz Asset Management") and serves as the Adviser to the Trust, pursuant to an investment advisory contract. The Adviser receives a monthly fee from the Portfolio at an annual rate based on average daily net assets (the "Investment Advisory Fee"). The Investment Advisory Fee for all classes is charged at an annual rate of 0.25%.

**(b) Supervisory and Administrative Fee** PIMCO serves as administrator (the "Administrator") and provides supervisory and administrative services to the Trust for which it receives a monthly supervisory and administrative fee based on each share class's average daily net assets (the "Supervisory and Administrative Fee"). As the Administrator, PIMCO bears the costs of various third-party services, including audit, custodial, portfolio accounting, legal, transfer agency and printing costs. The Supervisory and Administrative Fee for all classes is charged at the annual rate of 0.50%.

**(c) Distribution and Servicing Fees** PIMCO Investments LLC ("PI"), a wholly-owned subsidiary of PIMCO, serves as the distributor ("Distributor") of the Trust's shares. The Trust has adopted an Administrative Services Plan with respect to the Administrative Class shares of the Portfolio pursuant to Rule 12b-1 under the Act (the "Administrative Plan"). Under the terms of the Administrative Plan, the Trust is permitted to compensate the Distributor, out of the Administrative Class assets of the Portfolio, in an amount up to 0.15% on an annual basis of the average daily net assets of that class, for providing or procuring through financial intermediaries administrative, recordkeeping and investor services for Administrative Class shareholders of the Portfolio.

The Trust has adopted a separate Distribution and Servicing Plan for the Advisor Class shares of the Portfolio (the "Distribution and Servicing Plan"). The Distribution and Servicing Plan has been adopted pursuant to Rule 12b-1 under the Act. The Distribution and Servicing Plan permits the Portfolio to compensate the Distributor for providing or procuring through financial intermediaries distribution, administrative, recordkeeping, shareholder and/or related services with respect to Advisor Class shares. The Distribution and Servicing Plan permits the Portfolio to make total payments at an annual rate of up to 0.25% of its average daily net assets attributable to its Advisor Class shares.

**(d) Portfolio Expenses** PIMCO provides or procures supervisory and administrative services for shareholders and also bears the costs of various third-party services required by the Portfolios, including audit, custodial, portfolio accounting, legal, transfer agency and printing costs. The Trust is responsible for the following expenses: (i) taxes and governmental fees; (ii) brokerage fees and commissions and other portfolio transaction expenses; (iii) the costs of borrowing money, including interest expense; (iv) fees and expenses of the Trustees who are not "interested persons" of PIMCO or the Trust, and any counsel retained exclusively for their benefit; (v) extraordinary expense, including costs of litigation and indemnification expenses; (vi) organizational expenses; and (vii) any expenses allocated or allocable to a specific class of shares, which include service fees payable with respect to the Administrative Class Shares, and may include certain other expenses as permitted by the Trust's Multi-Class Plan adopted pursuant to Rule 18f-3 under the Act and subject to review and approval by the Trustees. The ratio of expenses to average net assets per share class, as disclosed on the Financial Highlights, may differ from the annual portfolio operating expenses per share class.

Each Trustee, other than those affiliated with PIMCO or its affiliates, receives an annual retainer of $35,000, plus $3,600 for each Board meeting attended in person, $750 for each committee meeting attended and $750 for each Board meeting attended telephonically, plus reimbursement of related expenses. In addition, the audit committee chair receives an additional annual retainer of $5,000, the valuation oversight committee lead receives an additional annual retainer of $3,250 (to the extent there are co-leads of the valuation oversight committee, the annual retainer will be split evenly between the co-leads) and the governance committee chair receives an additional annual retainer of $1,500.

These expenses are allocated on a pro rata basis to the various portfolios of the Trust according to their respective net assets except PIMCO All Asset Portfolio, which does not bear any Trustee Fees. The Trust pays no compensation directly to any Trustee or any other officer who is affiliated with the Administrator, all of whom receive remuneration for their services to the Trust from the Administrator or its affiliates.

## 9. RELATED PARTY TRANSACTIONS

The Adviser, Administrator, and Distributor are related parties. Fees payable to these parties are disclosed in Note 8 and the accrued related party fee amounts are disclosed on the Statement of Assets and Liabilities.

The Portfolio is permitted to purchase or sell securities from or to certain related affiliated portfolios under specified conditions outlined in procedures adopted by the Board. The procedures have been designed to ensure that any purchase or sale of securities by the Portfolio from or to another fund or portfolio that are, or could be, considered an affiliate by virtue of having a common investment adviser (or affiliated investment advisers), common Trustees and/or common officers complies with Rule 17a-7 under the Act. Further, as defined under the procedures, each transaction is effected at the current market price. During the period ended December 31, 2015, the Portfolio engaged in purchases and sales of securities pursuant to Rule 17a-7 under the Act (amounts in thousands):

| Purchases | Sales |
|---|---|
| $ 19,533 | $ 842 |

## 10. GUARANTEES AND INDEMNIFICATIONS

Under the Trust's organizational documents, each Trustee, officer, employee or other agent of the Trust (including the Trust's investment manager) is indemnified, to the extent permitted by the Act, against certain liabilities that may arise out of performance of their duties to the Portfolio. Additionally, in the normal course of business, the Portfolio enters into contracts that contain a variety of indemnification clauses. The Portfolio's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Portfolio that have not yet occurred. However, the Portfolio has not had prior claims or losses pursuant to these contracts.

## 11. PURCHASES AND SALES OF SECURITIES

The length of time the Portfolio has held a particular security is not generally a consideration in investment decisions. A change in the securities held by the Portfolio is known as "portfolio turnover." The Portfolio may engage in frequent and active trading of portfolio securities to achieve its investment objective, particularly during periods of volatile market movements. High portfolio turnover may involve correspondingly greater transaction costs to the Portfolio, including brokerage commissions or dealer mark-ups and other transaction costs on the sale of securities and reinvestments in other securities. Such sales may also result in realization of taxable capital gains, including short-term capital gains (which are generally taxed at ordinary income tax rates). The transaction costs and tax effects associated with portfolio turnover may adversely affect the Portfolio's performance. The portfolio turnover rates are reported in the Financial Highlights.

Purchases and sales of securities (excluding short-term investments) for the period ended December 31, 2015, were as follows (amounts in thousands):

| U.S. Government/Agency | | All Other | |
|---|---|---|---|
| Purchases | Sales | Purchases | Sales |
| $ 430,557 | $ 405,138 | $ 220,296 | $ 100,580 |

## 12. SHARES OF BENEFICIAL INTEREST

The Portfolio may issue an unlimited number of shares of beneficial interest with a $0.001 par value. Changes in shares of beneficial interest were as follows (shares and amounts in thousands):

| | Year Ended 12/31/2015 | | Year Ended 12/31/2014 | |
|---|---|---|---|---|
| | Shares | Amount | Shares | Amount |
| **Receipts for shares sold** | | | | |
| Institutional Class | 215 | $ 2,352 | 83 | $ 884 |
| Administrative Class | 4,371 | 48,158 | 5,383 | 56,686 |
| Advisor Class | 13,971 | 152,491 | 6,335 | 67,757 |
| **Issued as reinvestment of distributions** | | | | |
| Institutional Class | 10 | 102 | 1 | 10 |
| Administrative Class | 251 | 2,680 | 185 | 1,966 |
| Advisor Class | 677 | 7,198 | 61 | 665 |
| **Cost of shares redeemed** | | | | |
| Institutional Class | (21) | (230) | (5) | (55) |
| Administrative Class | (5,865) | (64,356) | (3,956) | (41,731) |
| Advisor Class | (38) | (409) | (1) | (10) |
| **Net increase (decrease) resulting from Portfolio share transactions** | 13,571 | $ 147,986 | 8,086 | $ 86,172 |

As of December 31, 2015, one shareholder owned 10% or more of the Portfolio’s total outstanding shares comprising 75% of the Portfolio.

## 13. REGULATORY AND LITIGATION MATTERS

The Portfolio is not named as a defendant in any material litigation or arbitration proceedings and is not aware of any material litigation or claim pending or threatened against it.

PIMCO has received a Wells Notice from the staff of the U.S. Securities and Exchange Commission (“SEC”) that relates to the PIMCO Total Return Active Exchange-Traded Fund (“BOND”), a series of PIMCO ETF Trust. The notice indicates the staff’s preliminary determination to recommend that the SEC commence a civil action against PIMCO stemming from a non-public investigation relating to BOND. A Wells Notice is neither a formal allegation of wrongdoing nor a finding that any law was violated.

This matter principally pertains to the valuation of smaller sized positions in non-agency mortgage-backed securities purchased by BOND between its inception on February 29, 2012 and June 30, 2012, BOND’s performance disclosures for that period, and PIMCO’s compliance policies and procedures related to these matters.

The Wells process provides PIMCO with the opportunity to demonstrate to the SEC staff why it believes its conduct was appropriate, in keeping with industry standards, and that no action should be taken. PIMCO believes that this matter is unlikely to have a material adverse effect on any Portfolio or on PIMCO’s ability to provide investment management services to any Portfolio.

The foregoing speaks only as of the date of this report.

## 14. FEDERAL INCOME TAX MATTERS

The Portfolio intends to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code (the “Code”) and distribute all of its taxable income and net realized gains, if applicable, to shareholders. Accordingly, no provision for Federal income taxes has been made.

The Portfolio may be subject to local withholding taxes, including those imposed on realized capital gains. Any applicable foreign capital gains tax is accrued daily based upon net unrealized gains, and may be payable following the sale of any applicable investments.

In accordance with U.S. GAAP, the Adviser has reviewed the Portfolio’s tax positions for all open tax years. As of December 31, 2015, the Portfolio has recorded no liability for net unrecognized tax benefits relating to uncertain income tax positions it has taken or expects to take in future tax returns.

The Portfolio files U.S. tax returns. While the statute of limitations remains open to examine the Portfolio’s U.S. tax returns filed for the fiscal years ending in 2012-2014, no examinations are in progress or anticipated at this time. The Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Shares of the Portfolio currently are sold to segregated asset accounts (“Separate Accounts”) of insurance companies that fund variable annuity contracts and variable life insurance policies ("Variable Contracts"). Please refer to the prospectus for the Separate Account and Variable Contract for information regarding Federal income tax treatment of distributions to the Separate Account.

As of December 31, 2015, the components of distributable taxable earnings are as follows (amounts in thousands):

| | Undistributed Ordinary Income | Undistributed Long-Term Capital Gains | Net Tax Basis Unrealized Appreciation/ (Depreciation) (1) | Other Book-to-Tax Accounting Differences (2) | Accumulated Capital Losses (3) | Qualified Late-Year Loss Deferral— Capital (4) | Qualified Late-Year Loss Deferral— Ordinary (5) |
|---|---|---|---|---|---|---|---|
| PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged) | $ 6,472 | $ — | $ (8,587) | $ (575) | $ — | $ — | $ — |

(1) Adjusted for open wash sale loss deferrals and the accelerated recognition of unrealized gain or loss on certain futures, options and forward contracts for federal income tax purposes. Also adjusted for differences between book and tax realized and unrealized gain (loss) on swap contracts, treasury inflation-protected securities, lehman securities, convertible preferred stock and sale/buyback transactions.

(2) Represents differences in income tax regulations and financial accounting principles generally accepted in the United States of America, namely for straddle loss deferrals at fiscal year-end.

(3) Capital losses available to offset future net capital gains expire in varying amounts in the years shown below.

(4) Capital losses realized during the period November 1, 2015 through December 31, 2015 which the Portfolio elected to defer to the following taxable year pursuant to income tax regulations.

(5) Specified losses realized during the period November 1, 2015 through December 31, 2015, which the Portfolio elected to defer to the following taxable year pursuant to income tax regulations.

As of December 31, 2015, the aggregate cost and the net unrealized appreciation/(depreciation) of investments for federal income tax purposes are as follows (amounts in thousands):

| | Federal Tax Cost | Unrealized Appreciation | Unrealized (Depreciation) | Net Unrealized Appreciation/ (Depreciation) (6) |
|---|---|---|---|---|
| PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged) | $ 308,156 | $ 1,408 | $ (10,988) | $ (9,580) |

(6) Primary differences, if any, between book and tax net unrealized appreciation/(depreciation) on investments are attributable to open wash sale loss deferrals, treasury inflation-protected securities, sale/buyback transactions, lehman securities and convertible preferred stock.

For the years ended December 31, 2015 and December 31, 2014, respectively, the Portfolio made the following tax basis distributions (amounts in thousands):

| | Fiscal Year Ended | Ordinary Income Distributions (7) | Long-Term Capital Gain Distributions | Return of Capital (8) |
|---|---|---|---|---|
| PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged) | 12/31/2015 | $ 9,807 | $ 174 | $ — |
| | 12/31/2014 | $ 2,371 | $ 270 | $ — |

(7) Includes short-term capital gains, if any, distributed.

(8) A portion of the distributions made represents a tax return of capital. Return of capital distributions have been reclassified from undistributed net investment income to paid-in capital to more appropriately conform financial accounting to tax accounting.

# Report of Independent Registered Public Accounting Firm

**To the Board of Trustees of PIMCO Variable Insurance Trust and Shareholders of PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged):**

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged) (one of the portfolios constituting PIMCO Variable Insurance Trust, hereinafter referred to as the "Portfolio") at December 31, 2015, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Portfolio's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2015 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

PricewaterhouseCoopers LLP

## Federal Income Tax Information

(Unaudited)

As required by the Internal Revenue Code ("Code") and Treasury Regulations, if applicable, shareholders must be notified within 60 days of the Portfolio's fiscal year end regarding the status of qualified dividend income and the dividend received deduction.

**Qualified Dividend Income.** Under the Jobs and Growth Tax Relief Reconciliation Act of 2003 (the "Act"), the following percentage of ordinary dividends paid during the calendar year was designated as "qualified dividend income", as defined in the Act, subject to reduced tax rates in 2015:

| | |
|---|---|
| PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged) | 0.16% |

**Dividend Received Deduction.** Corporate shareholders are generally entitled to take the dividend received deduction on the portion of a Portfolio's dividend distribution that qualifies under tax law. The percentage of the following Portfolio's calendar year ordinary income dividend that qualifies for the corporate dividend received deduction is set forth below:

| | |
|---|---|
| PIMCO Foreign Bond Portfolio (U.S. Dollar-Hedged) | 0.01% |

Shareholders are advised to consult their own tax advisor with respect to the tax consequences of their investment in the Trust. However, income received by tax-exempt recipients need not be reported as taxable income.

## Management of the Trust

The charts below identify the Trustees and executive officers of the Trust. Unless otherwise indicated, the address of all persons below is 650 Newport Center Drive, Newport Beach, CA 92660.

The Portfolio's Statement of Additional Information includes more information about the Trustees and Officers. To request a free copy, call PIMCO at (888) 87-PIMCO or visit the Portfolio's website at pvit.pimco-funds.com.

# Privacy Policy[1]

The Trust[2] considers customer privacy to be a fundamental aspect of its relationships with shareholders and is committed to maintaining the confidentiality, integrity and security of its current, prospective and former shareholders' non-public personal information. The Trust has developed policies that are designed to protect this confidentiality, while allowing shareholder needs to be served.

## Obtaining Personal Information

In the course of providing shareholders with products and services, the Trust and certain service providers to the Trust, such as the Trust's investment advisers or sub-advisers ("Advisers"), may obtain non-public personal information about shareholders, which may come from sources such as account applications and other forms, from other written, electronic or verbal correspondence, from shareholder transactions, from a shareholder's brokerage or financial advisory firm, financial advisor or consultant, and/or from information captured on applicable websites.

## Respecting Your Privacy

As a matter of policy, the Trust does not disclose any non-public personal information provided by shareholders or gathered by the Trust to non-affiliated third parties, except as required or permitted by law or as necessary for such third parties to perform their agreements with respect to the Trust. As is common in the industry, non-affiliated companies may from time to time be used to provide certain services, such as preparing and mailing prospectuses, reports, account statements and other information, conducting research on shareholder satisfaction and gathering shareholder proxies. The Trust or its affiliates may also retain non-affiliated companies to market the Trust's shares or products which use the Trust's shares and enter into joint marketing arrangements with them and other companies. These companies may have access to a shareholder's personal and account information, but are permitted to use this information solely to provide the specific service or as otherwise permitted by law. In most cases, the shareholders will be clients of a third party, but the Trust may also provide a shareholder's personal and account information to the shareholder's respective brokerage or financial advisory firm and/or financial advisor or consultant.

### Sharing Information with Third Parties

The Trust reserves the right to disclose or report personal or account information to non-affiliated third parties in limited circumstances where the Trust believes in good faith that disclosure is required under law, to cooperate with regulators or law enforcement authorities, to protect its rights or property, or upon reasonable request by any fund advised by PIMCO in which a shareholder has invested. In addition, the Trust may disclose information about a shareholder or a shareholder's accounts to a non-affiliated third party at the shareholder's request or with the consent of the shareholder.

## Sharing Information with Affiliates

The Trust may share shareholder information with its affiliates in connection with servicing shareholders' accounts, and subject to applicable law may provide shareholders with information about products and services that the Trust or its Advisers, distributors or their affiliates ("Service Affiliates") believe may be of interest to such shareholders. The information that the Trust may share may include, for example, a shareholder's participation in the Trust or in other investment programs sponsored by a Service Affiliate, a shareholder's ownership of certain types of accounts (such as IRAs), information about the Trust's experiences or transactions with a shareholder, information captured on applicable websites, or other data about a shareholder's accounts, subject to applicable law. The Trust's Service Affiliates, in turn, are not permitted to share shareholder information with non-affiliated entities, except as required or permitted by law.

## Procedures to Safeguard Private Information

The Trust takes seriously the obligation to safeguard shareholder non-public personal information. In addition to this policy, the Trust has implemented procedures that are designed to restrict access to a shareholder's non-public personal information to internal personnel who need to know that information to perform their jobs, such as servicing shareholder accounts or notifying shareholders of new products or services. Physical, electronic and procedural safeguards are in place to guard a shareholder's non-public personal information.

## Information Collected from Websites

Websites maintained by the Trust or its service providers may use a variety of technologies to collect information that help the Trust and its service providers understand how the website is used. Information collected from your web browser (including small files stored on your device that are commonly referred to as "cookies") allow the websites to recognize your web browser and help to personalize and improve your user experience and enhance navigation of the website. In addition, the Trust or its Service Affiliates may use third parties to place advertisements for the Trust on other websites, including banner advertisements. Such third parties may collect anonymous information through the use of cookies or action tags (such as web beacons). The information these third parties collect is generally limited to technical and web navigation information, such as your IP address, web pages visited and browser type, and does not include personally identifiable information such as name, address, phone number or email address.

You can change your cookie preferences by changing the setting on your web browser to delete or reject cookies. If you delete or reject cookies, some website pages may not function properly.

## Changes to the Privacy Policy

From time to time, the Trust may update or revise this privacy policy. If there are changes to the terms of this privacy policy, documents containing the revised policy on the relevant website will be updated.

[1] Effective as of September 5, 2014.

[2] When distributing this Policy, the Trust may combine the distribution with any similar distribution of its investment adviser's privacy policy. The distributed, combined policy may be written in the first person (i.e., by using "we" instead of "the Trust").

Approval of Renewal of the Amended and Restated Investment Advisory Contract, Supervision and Administration Agreement and Amended and Restated Asset Allocation Sub-Advisory Agreement

At a meeting held on August 10-11, 2015, the Board of Trustees (the "Board") of PIMCO Variable Insurance Trust (the "Trust"), including all of the Trustees who are not "interested persons" of the Trust under the Investment Company Act of 1940, as amended (the "Independent Trustees"), considered and unanimously approved the Amended and Restated Investment Advisory Contract (the "Investment Advisory Contract") between the Trust, on behalf of each of the Trust's series (the "Portfolios"), and Pacific Investment Management Company LLC ("PIMCO") for an additional one-year term through August 31, 2016. The Board also considered and unanimously approved for an additional one-year term through August 31, 2016, the Supervision and Administration Agreement (together with the Investment Advisory Contract, the "Agreements") between the Trust, on behalf of the Portfolios, and PIMCO. In addition, the Board considered and unanimously approved the renewal of the Amended and Restated Asset Allocation Sub-Advisory Agreement (the "Asset Allocation Agreement") between PIMCO, on behalf of PIMCO All Asset Portfolio and PIMCO All Asset All Authority Portfolio, each a series of the Trust, and Research Affiliates, LLC ("Research Affiliates") for an additional one-year term through August 31, 2016.

The information, material factors and conclusions that formed the basis for the Board's approvals are summarized below.

## 1. INFORMATION RECEIVED

(a) Materials Reviewed: During the course of the past year, the Trustees received a wide variety of materials relating to the services provided by PIMCO and Research Affiliates to the Trust. At each of its quarterly meetings, the Board reviewed the Portfolios' investment performance and a significant amount of information relating to Portfolio operations, including shareholder services, valuation and custody, the Portfolios' compliance program and other information relating to the nature, extent and quality of services provided by PIMCO and Research Affiliates to the Trust. In considering whether to approve the renewal of the Agreements and the Asset Allocation Agreement, the Board also reviewed supplementary information, including, but not limited to, comparative industry data with regard to investment performance, advisory and supervisory and administrative fees and expenses, financial information for PIMCO and, where relevant, Research Affiliates, information regarding the profitability to PIMCO of its relationship with the Portfolios, information about the personnel providing investment management services, other advisory services and supervisory and administrative services to the Portfolios, and information about the fees charged and services provided to other clients with similar investment mandates as the Portfolios (where applicable). In addition, the Board reviewed materials provided by counsel to the Trust and the Independent Trustees, which included, among other things, memoranda outlining legal duties of the Board in considering the continuation of the Agreements and the Asset Allocation Agreement.

(b) Review Process: In connection with the renewal of the Agreements and the Asset Allocation Agreement, the Board reviewed written materials prepared by PIMCO and, where applicable, Research Affiliates in response to requests from counsel to the Trust and the Independent Trustees. The Board requested and received assistance and advice regarding applicable legal standards from counsel to the Trust and the Independent Trustees, and reviewed comparative fee and performance data prepared at the Board's request by Lipper, Inc. ("Lipper"), an independent provider of investment company performance and fee and expense data. The Board heard oral presentations on matters related to the Agreements and the Asset Allocation Agreement and met both as a full Board and in a separate session of the Independent Trustees, without management present, at the August 10-11, 2015 meeting. The Independent Trustees also conducted a telephonic meeting with counsel to the Trust and the Independent Trustees on July 30, 2015 and executive sessions on August 10, 2015 to discuss the materials presented. In addition, the Independent Trustees requested and received from PIMCO additional information including, but not limited to, information related to profitability and comparative performance information.

The approval determinations were made on the basis of each Trustee's business judgment after consideration of all the information presented. Individual Trustees may have given different weights to certain factors and assigned various degrees of materiality to information received in connection with the approval process. In deciding to approve the renewal of the Agreements and the Asset Allocation Agreement, the Board did not identify any single factor or particular information that, in isolation, was controlling. This summary describes the most important, but not all, of the factors considered by the Board.

## 2. NATURE, EXTENT AND QUALITY OF SERVICES

(a) PIMCO, Research Affiliates, their Personnel, and Resources: The Board considered the depth and quality of PIMCO's investment management process, including: the experience, capability and integrity of its senior management and other personnel; the overall financial strength and stability of its organization; and the ability of its organizational structure to address changes in assets under management. The Board also considered the various services in addition to portfolio management that PIMCO provides under the Investment Advisory Contract. The Board noted that PIMCO makes available to its investment professionals a variety of resources and systems relating to investment management, compliance, trading, performance and portfolio accounting. The Board also noted PIMCO's commitment to investing in information technology supporting investment management and compliance, as well as PIMCO's continuing efforts to attract and retain qualified personnel and to maintain and enhance its resources and systems. The Board considered

PIMCO's policies, procedures and systems to reasonably assure compliance with applicable laws and regulations and its commitment to these programs, its oversight of matters that may involve conflicts of interest between the Portfolios' investments and those of other accounts managed by PIMCO, and its efforts to keep the Trustees informed about matters relevant to the Portfolios and their shareholders. The Board also considered PIMCO's continuous investment in new disciplines and talented personnel, which has enhanced PIMCO's service to the Funds and has allowed PIMCO to introduce innovative new funds over time. In addition, the Board considered the nature and quality of services provided by PIMCO to the wholly-owned subsidiaries of applicable Portfolios.

The Trustees considered information they had received about the steps that PIMCO has taken in recent years with respect to active management of counterparty risk, such as implementing procedures requiring daily collateral adjustments and frequent communication between credit analysts and the counterparty risk committee, which oversees counterparty risk on a firm-wide basis, continually evaluating requests to add or remove approved counterparties as market needs and conditions warrant. The Trustees also considered that, over the last several years, PIMCO has continued to strengthen the process it uses to assess the financial stability of counterparties with which the Portfolios do business, to manage collateral and to protect portfolios from an unforeseen deterioration in the creditworthiness of trading counterparties. The Trustees noted that, consistent with its fiduciary duty, PIMCO executes transactions through a competitive best execution process and uses only those counterparties that meet its stringent and monitored criteria. The Trustees considered that PIMCO's collateral management team utilizes a counterparty risk system to analyze portfolio level exposure and collateral being exchanged with counterparties.

In addition, the Trustees considered new services and service enhancements that PIMCO has implemented since the Board renewed the Agreements in 2014, including, but not limited to: conducting a targeted review of quality and efficiency in the valuation process; expanding the analytical review of shareholder reports by State Street Bank and Trust Company, the Portfolios' custodian; developing a process for monthly forecasts of taxable and book income to enhance portfolio management of investment income; continuing the expansion of a proprietary performance reconciliation tool, which includes next-day comparison of daily internal performance to custodian bank performance to identify potential errors and guardrail net asset value calculations; developing and implementing the Global Process Monitor application, which includes real-time tracking and escalation protocols for critical activities; and implementing monthly cash flow reporting processes to support client and media demands for information about investor flows and assets under management data. The Trustees also considered the recent outflows from the Portfolios. The Trustees further considered whether the decline in the Portfolios' assets and the reduction in PIMCO's total assets under management materially impacted the service quality or resources available to the Portfolios. The Trustees concluded that there has been no adverse impact to service quality or resources available to the Portfolios.

Similarly, the Board considered the asset allocation services provided by Research Affiliates to the PIMCO All Asset Portfolio and PIMCO All Asset All Authority Portfolio. The Board noted that the PIMCO All Asset All Authority Portfolio recently commenced operations. The Board also considered the depth and quality of Research Affiliates' investment management and research capabilities, the experience and capabilities of its portfolio management personnel and, in particular, the experience and capabilities of Robert Arnott, Research Affiliates' principal, and the overall financial strength of the organization.

Ultimately, the Board concluded that the nature, extent and quality of services proposed to be provided by PIMCO under the Agreements and by Research Affiliates under the Asset Allocation Agreement are likely to benefit the Portfolios and their respective shareholders (as applicable).

(b) Other Services: The Board also considered the nature, extent, quality and cost of supervisory and administrative services provided by PIMCO to the Portfolios under the Supervision and Administration Agreement. The Board noted that the Supervision and Administration Agreement was approved at the August 2008 Board meeting to replace the Trust's previous Administration Agreement. The purpose of the change was to reflect the increased scope and complexity of supervisory and administrative services that PIMCO had been providing to the Trust pursuant to the Administration Agreement.

The Board considered the terms of the Supervision and Administration Agreement, under which the Trust pays for the supervisory and administrative services provided pursuant to that agreement under what is essentially an all-in fee structure (the "unified fee"). In return, PIMCO provides or procures certain supervisory and administrative services and bears the costs of various third party services required by the Portfolios, including audit, custodial, portfolio accounting, legal, transfer agency and printing costs. The Board noted that the scope and complexity of the supervisory and administrative services provided by PIMCO under the Supervision and Administration Agreement continue to increase. The Board considered PIMCO's provision of these services and its supervision of the Trust's third party service providers to assure that these service providers continue to provide a high level of service relative to alternatives available in the market.

Ultimately, the Board concluded that the nature, extent and quality of the services provided by PIMCO has benefited, and will likely continue to benefit, the Portfolios and their shareholders.

## 3. INVESTMENT PERFORMANCE

The Board received and examined information from PIMCO concerning the Portfolios' performance, as available, over short- and long-term periods ended May 31, 2015 and other performance data, as available, over short- and long-term periods ended June 30, 2015 (the "PIMCO Report") and from Lipper concerning the Portfolios' performance, as available, over short- and long-term periods ended May 31, 2015 (the "Lipper Report").

The Board considered information regarding both the short-term and long-term investment performance of each Portfolio relative to its peer group and relevant benchmark index as provided to the Board in advance of each of its quarterly meetings throughout the year, including the PIMCO Report and Lipper Report, which were provided in advance of the August 10-11, 2015 meeting. The Trustees noted that a majority of the Portfolios outperformed their respective Lipper medians over the three-year and longer periods ended May 31, 2015.

The Board also noted that, as of May 31, 2015, the Administrative Class of 44%, 79% and 92% of the Portfolios outperformed its Lipper category median on a net-of-fees basis over the three-year, five-year and ten-year periods, respectively. The Trustees considered that other classes of each Portfolio would have substantially similar performance to that of the Administrative Class of the relevant Portfolio on a relative basis because all of the classes are invested in the same portfolio of investments and that differences in performance among classes could principally be attributed to differences in the supervisory and administrative fees and distribution and servicing expenses of each class. The Board also considered that the investment objectives of certain of the Portfolios may not always be identical to those of the other funds in their respective peer groups and that the Lipper categories do not: separate funds based upon maturity or duration; account for the applicable Portfolios' hedging strategies; distinguish between enhanced index and actively managed equity strategies; include as many subsets as the Portfolios offer (i.e., Portfolios may be placed in a "catch-all" Lipper category to which they do not properly belong); or account for certain fee waivers. The Board noted that, due to these differences, performance comparisons between certain of the Portfolios and their so-called peers may not be particularly relevant to the consideration of Portfolio performance.

The Board noted that 63% or more of the assets of the Trust had outperformed their respective benchmarks on a net-of-fees basis over the three-year, five-year and ten-year periods ending May 31, 2015 (based on the performance of the Administrative Class). The Board also noted that 8 of 14 Portfolios, representing 69% of the total assets of the Trust, had outperformed their respective benchmark indexes on a net-of-fees basis over the five-year period ending May 31, 2015. The Board also noted that, while the Lipper universe comparisons provide a valuable performance comparison reference, there are certain Portfolios that do not fit neatly into their respective Lipper classifications. The Board also discussed actions that have been taken by PIMCO to attempt to improve performance and took note of PIMCO's plans to monitor performance going forward. The Board also considered that the Trust's assets were over $20 billion as of December 31, 2014.

The Board considered PIMCO's discussion of the intensive nature of managing bond funds, noting that it requires the management of a number of factors, including: varying maturities; prepayments; collateral management; counterparty management; pay-downs; credit events; workouts; derivatives; net new issuance in the bond market; and decreased market maker inventory levels. The Board noted that in addition to managing these factors, PIMCO must also balance risk controls and strategic positions in each portfolio it manages, including the Portfolios. Despite these challenges, the Board noted that PIMCO has generated "alpha" (i.e., non-market correlated excess performance) for its clients over time, including the Trust.

The Board ultimately determined, within the context of all of its considerations in connection with the Agreements, that the Trust's overall investment performance was strong, and concluded that PIMCO's performance record and process in managing the Portfolios indicates that its continued management is likely to benefit the Portfolios and their shareholders, and merits the approval of the continuation of the Agreements.

## 4. ADVISORY FEES, SUPERVISORY AND ADMINISTRATIVE FEES AND TOTAL EXPENSES

The Board considered that PIMCO seeks to price funds to scale at the outset with reference to the total expense ratios of the respective Lipper median (if available), while providing a premium for innovative investment offerings. PIMCO reported to the Board that, in proposing fees for any Portfolio or class of shares, it considers a number of factors, including the type and complexity of the services provided, the cost of providing services, the risk assumed by PIMCO in the development of products and the provision of services, the impact on potential returns from different levels of fees, the competitive marketplace for financial products, and the attractiveness of potential Portfolio returns to current and potential investors. Fees charged to or proposed for different Portfolios for advisory services and supervisory and administrative services may vary in light of these various factors. The Board also considered that PIMCO reviews the Portfolios' fee levels and carefully considers reductions where appropriate. Further, the Board noted that PIMCO believes that the growth in the Trust's assets under management over the long-term and long-term positive net flows are important indicators of proper and effective pricing.

The Board reviewed the advisory fees, supervisory and administrative fees and total expenses of the Portfolios (each as a percentage of average net assets) and compared such amounts with the average and median fee and expense levels of other similar funds. The Board also reviewed information relating to the sub-advisory fees paid to Research Affiliates with respect to applicable Portfolios, taking into account that PIMCO compensates Research Affiliates from the advisory fees paid by such Portfolios to PIMCO. With respect to advisory fees, the Board reviewed data from Lipper that compared the average and median advisory fees of other funds in a "Peer Group" of comparable funds, as well as the universe of other similar funds. The Board noted that a number of Portfolios have total expense ratios that fall below the average and median expense ratios in their Peer Group and Lipper universe. In addition, the Board noted the fee waivers in place with respect to the fees that might result from investments by applicable Portfolios in their respective wholly-owned subsidiaries.

The Board also reviewed data comparing the Portfolios' advisory fees to the standard fee rate PIMCO charges to separate accounts and as sub-adviser to other investment companies with a similar investment strategy, including differences in advisory services provided. The Board noted that advisory fees for most Portfolios were similar to the fee rates charged to separate account strategies with the same investment strategies as the Portfolios. In cases where the fees for other clients were lower than those charged to the Portfolios, the Trustees noted that the differences in fees were attributable to various factors, including differences in the advisory and other services provided by PIMCO to the Portfolios, the manner in which similar portfolios may be managed, different requirements with respect to liquidity management and the implementation of other regulatory requirements, and the fact that separate accounts may have other contractual arrangements that justify different levels of fees.

Regarding advisory fees charged by PIMCO in its capacity as sub-adviser to third-party/unaffiliated funds, the Trustees took into account that such fees may be lower than the fees charged by PIMCO to serve as adviser to the Portfolios. The Trustees also took into account that there are various reasons for any such difference in fees, including, but not limited to, the fact that PIMCO may be subject to varying levels of entrepreneurial risk and regulatory requirements, differing legal liabilities on a contract-by-contract basis and different servicing requirements when it does not serve as the sponsor of a fund and is not principally responsible for all aspects of a fund's investment program and operations as compared to when PIMCO serves as investment adviser and sponsor.

The Board considered the Portfolios' supervisory and administrative fees, comparing them to similar funds in the report supplied by Lipper. The Board also considered that as the Portfolios' business has become increasingly complex, PIMCO has provided an increasingly broad array of fund supervisory and administrative functions. In addition, the Board considered the Trust's unified fee structure, under which the Trust pays for the supervisory and administrative services it requires for one set fee and, in return, PIMCO provides or procures supervisory and administrative services and bears the costs of various third party services required by the Portfolios, including audit, custodial, portfolio accounting, legal, transfer agency and printing costs. The Board further considered that many other funds pay for these services separately, and thus it is difficult to directly compare the Trust's unified supervisory and administrative fees with the fees paid by other funds for administrative services alone. The Board also considered that the unified supervisory and administrative fee leads to Portfolio fees that are fixed, rather than variable. The Board noted that, although the unified fee structure does not have breakpoints, it implicitly reflects economies of scale by fixing the absolute level of Portfolio fees at competitive levels even if the Portfolios' operating costs rise when assets remain flat or decrease. The Board also considered that the Portfolios' unified fee structure meant that fees were not impacted by recent outflows in certain Portfolios, unlike funds without a unified fee structure, which may see increased expense ratios when fixed costs are passed through to a smaller asset base. The Board further noted that, with few exceptions, PIMCO has generally maintained Portfolio fees at the same level as implemented when the unified fee was adopted, and has reduced fees for a number of Portfolios in prior years. The Board concluded that the Portfolios' supervisory and administrative fees were reasonable in relation to the value of the services provided, including the services provided to different classes of shareholders, and that the expenses assumed contractually by PIMCO under the Supervision and Administration Agreement represent, in effect, a cap on overall Portfolio fees, which is beneficial to the Portfolios and their shareholders.

The Board considered the Portfolios' total expenses and discussed with PIMCO those Portfolios and/or classes of Portfolios that had above median total expenses. The Board noted that several Portfolios launched in recent years have been unique products that have few peers (if any), and cannot easily be grouped with comparable funds. Upon comparing the Portfolios' total expenses to other funds in the "Peer Groups" provided by Lipper, the Board found total expenses of each Portfolio to be reasonable.

The Trustees also considered the advisory fees charged to the Portfolios that operate as funds of funds (the "Funds of Funds") and the advisory services provided in exchange for such fees. The Trustees determined that such services were in addition to the advisory services provided to the underlying funds in which the Funds of Funds may invest and, therefore, such services were not duplicative of the advisory services provided to the underlying funds. The Board also considered the various fee waiver agreements in place for the Funds of Funds.

Based on the information presented by PIMCO, Research Affiliates and Lipper, members of the Board determined, in the exercise of their business judgment, that the level of the advisory fees and supervisory and administrative fees charged by PIMCO under the Agreements, as well as the total expenses of each Portfolio, are reasonable.

## 5. ADVISER COSTS, LEVEL OF PROFITS AND ECONOMIES OF SCALE

The Board reviewed information regarding PIMCO's costs of providing services to the Portfolios as a whole, as well as the resulting level of profits to PIMCO, noting that those results were lower than in the previous year due to the impact of the Portfolios' overall outflows. To the extent applicable, the Board also reviewed information regarding the portion of a Portfolio's advisory fee retained by PIMCO, following the payment of sub-advisory fees to Research Affiliates, with respect to the Portfolio. Additionally, the Board noted that profit margins with respect to the Portfolios were within the ranges, although above the median, of publicly held investment management companies reported by Lipper and Strategic Insight (an independent provider of fund industry research). The Board noted that the PIMCO's profit margin with respect to the Trust shows that the Trust is profitable, although less so than PIMCO Funds due to payments made by PIMCO to participating insurance companies. The Board also noted that it had received information regarding the structure and manner in which PIMCO's investment professionals were compensated, and PIMCO's view of the relationship of such compensation to the attraction and retention of quality personnel. The Board considered PIMCO's need to invest in technology, cyber security, information security, shareholder privacy, business continuity planning, infrastructure and staff to reinforce and offer new services and to accommodate changing regulatory requirements.

With respect to potential economies of scale, the Board noted that PIMCO shares the benefits of economies of scale with the Portfolios and their shareholders in a number of ways, including through the pricing of Portfolios to scale from inception and the enhancement of services provided to the Portfolios in return for fees paid. The Board reviewed the history of the Portfolios' fee structure. The Board considered that the Portfolios' unified fee rates had been set competitively and/or priced to scale from inception, had been held steady at that scaled competitive rate for most Portfolios as assets grew, or as assets declined in the case of some Portfolios, and continued to be competitive compared with peers. The Board also considered that the unified fee is a transparent means of informing Portfolio shareholders of the fees associated with the Portfolios, and that the Portfolios bear certain expenses that are not covered by the advisory fee or the unified fee.

The Trustees considered that the unified fee has provided inherent economies of scale because a Portfolio maintains competitive fixed unified fees even if the particular Portfolio's assets decline and/or operating costs rise. The Trustees further considered that, in contrast, breakpoints are a proxy for charging higher fees on lower asset levels and that when a fund's assets decline, breakpoints may reverse, which causes expense ratios to increase. The Trustees also considered that, unlike the Portfolios' unified fee structure, funds with "pass through" administrative fee structures may experience increased expense ratios when fixed dollar fees are charged against declining fund assets. The Trustees also considered that the unified fee protects shareholders from a rise in operating costs that may result from, among other things, PIMCO's investments in various business enhancements and infrastructure, including those referenced above. The Trustees noted that PIMCO's investments in these areas are extensive.

The Board concluded that the Portfolios' cost structures were reasonable and that the unified fee structure inherently involves the sharing of economies of scale between PIMCO and each of the Portfolios, to the benefit of their respective shareholders.

## 6. ANCILLARY BENEFITS

The Board considered other benefits received by PIMCO and its affiliates as a result of PIMCO's relationship with the Trust, including possible ancillary benefits to PIMCO's institutional investment management business due to the reputation and market penetration of the Trust. The Board also considered that affiliates of PIMCO provide distribution and shareholder services to the Portfolios and their respective shareholders, for which they may be compensated through distribution and servicing fees paid pursuant to the Portfolios' Rule 12b-1 plans or otherwise. The Board reviewed PIMCO's soft dollar policies and procedures, noting that while PIMCO has the authority to receive the benefit of research provided by broker-dealers executing portfolio transactions on behalf of the Portfolios, it has adopted a policy not to enter into contractual soft dollar arrangements.

## 7. CONCLUSIONS

Based on their review, including their consideration of each of the factors summarized above, the Independent Trustees and the Board as a whole concluded that the nature, extent and quality of the services rendered to the Portfolios by PIMCO and Research Affiliates favored the renewal of the Agreements and the Asset Allocation Agreement. The Independent Trustees and the Board as a whole concluded that the Agreements and the Asset Allocation Agreement continued to be fair and reasonable to the Portfolios and their shareholders, that the Portfolios' shareholders received reasonable value in return for the fees paid to PIMCO by the Portfolios under the Agreements and the fees paid to Research Affiliates by PIMCO under the Asset Allocation Agreement, and that the renewal of the Agreements and the Asset Allocation Agreement was in the best interests of the Portfolios and their shareholders.

## Dear PIMCO Variable Insurance Trust Shareholder,

Please find enclosed the Annual Report for the PIMCO Variable Insurance Trust covering the twelve-month reporting period ended December 31, 2015. The following pages contain specific details about the Portfolio's investment performance and a discussion of the factors that most affected performance over the reporting period.

Heightened market volatility throughout the reporting period was sparked by a mix of investor concerns including geopolitical developments, monetary policy and the potential for slowing global economic growth, which generally contributed to dampened investor sentiment. In particular, increasing concern over the outlook for Chinese growth sent commodity prices and inflation expectations lower, while also negatively impacting prices of emerging market ("EM") debt and equities. In addition, the Chinese equity market began a strong decline in June 2015, which prompted the Chinese government to prop-up equity share prices and devalue the Chinese yuan. Volatility in Chinese equity markets continued into January 2016 on renewed concern over slowing Chinese economic growth. Furthermore, rising tension in the Middle East and the continued debt crisis in Greece also contributed to investor unease throughout the reporting period.

Economic data in the U.S. continued to confirm a healthy economy, particularly labor market indicators such as employment and wages. Still, signs of caution remained, particularly as U.S. consumers appeared to be more selective in their spending and chose to save rather than spend their windfall from lower gas prices. Additionally, consumer sentiment and certain housing indicators softened towards the end of the reporting period, and December 2015 U.S. manufacturing data indicated the fastest contraction in six years. Within the Eurozone, volatility increased despite gradual improvement in the underlying economies. Eurozone economic data also showed generally positive signs of an early recovery but were tempered slightly by sluggish inflation.

The theme of divergent global central bank monetary policy continued throughout the reporting period. The European Central Bank ("ECB") expressed its commitment to increase quantitative easing (or large-scale asset purchases), along with the Bank of Japan and the People's Bank of China who also indicated their intent to accelerate such measures. The Federal Reserve ("Fed"), on the other hand, moved on December 16 to raise the Federal Funds Rate by 0.25% to a new range of 0.25% - 0.50%, marking its first rate hike in nine years. However, the Fed noted that future increases in its target rate would be "gradual" and in-line with their previous projections, which helped to ease investor concerns. Outside of the reporting period on January 27, the Fed opted to leave the Federal Funds Rate unchanged, noting their intent to closely monitor how the global economy and markets influence the U.S. economic outlook.

Highlights of the financial markets during the twelve-month fiscal reporting period include:

- U.S. Treasuries, as represented by the Barclays U.S. Treasury Index, returned 0.84% for the reporting period as yields generally rose slightly across the Treasury yield curve. The benchmark ten-year U.S. Treasury note yielded 2.27% at the end of the reporting period, up from 2.17% on December 31, 2014. The Barclays U.S. Aggregate Index, a widely used index of U.S. investment-grade bonds, returned 0.55% for the reporting period.

- U.S. Treasury Inflation-Protected Securities ("TIPS"), as represented by the Barclays U.S. TIPS Index, declined 1.44% over the reporting period. U.S. TIPS were pressured over the year as breakeven inflation levels, a proxy for inflation expectations, declined in-line with commodity markets. Global inflation-linked bonds ("ILBs") were also down overall during the reporting period, as the slide in energy and other commodities impacted inflation expectations globally. Despite this headwind, European ILBs fared better than other developed countries and posted marginal gains in local currencies as real yields benefited from the ECB's quantitative easing support.

- Prices on broad commodities were down over the reporting period, led lower primarily by energy and industrial metal prices. Crude oil prices faced increasing pressure from a persisting inventory glut and production growth, especially from the Organization of the Petroleum Exporting Countries ("OPEC"). Towards the end of the reporting period, seasonally warm weather put further pressure on oil prices, which ended the year considerably lower. Diversified commodities, as represented by the Bloomberg Commodity Index Total Return, declined 24.66% over the reporting period.

- Agency mortgage-backed securities ("MBS"), as represented by the Barclays U.S. MBS Fixed Rate Index, returned 1.51% over the reporting period. Non-Agency MBS prices were mixed amid weakness in the broader credit markets, although underlying collateral performance has generally been in-line with investor expectations and continues to gradually improve over the long-term.
- U.S. investment grade credit, as represented by the Barclays U.S. Credit Index, declined 0.77% over the reporting period. Investment grade credit valuations cheapened as a record $1.15 trillion of new issuance came to market and commodity prices continued to fall given worries over slowing Chinese growth. Developed market global high yield bonds, as measured by the BofA Merrill Lynch Developed Markets High Yield Constrained Index, declined 3.05% over the reporting period. Weakness in the commodity-oriented sectors including energy and metals & mining, weighed on returns as oil and other commodity prices fell. Overall, global high yield spreads and yields rose throughout the reporting period and ended higher.
- EM external debt, as represented by the JPMorgan Emerging Markets Bond Index (EMBI) Global, returned 1.23% over the reporting period. EM local bonds, as represented by the JPMorgan Government Bond Index - Emerging Markets Global Diversified Index (Unhedged), declined 14.92% over the reporting period. Idiosyncratic forces remained a dominant theme. China, for example, continued to expand its accommodative measures as both growth and inflation showed signs of further moderation. In addition, the Russian ruble continued its recovery from 2014 weakness before stumbling toward the end of the reporting period on oil price weakness.
- Equity markets showed mixed performance globally amid a period marked by economic uncertainty, increased volatility and divergent central bank monetary policy. U.S. equities, as represented by the S&P 500 Index, returned 1.38% (on a total return basis) and developed market equities outside the U.S., as represented by the MSCI EAFE Net Dividend Index (USD Unhedged), declined 0.81% over the reporting period. However, ultra-easy monetary policy in Europe and Japan benefited European and Japanese equity markets, which generally posted positive returns. However, EM equities, as represented by the MSCI Emerging Markets Index (Net Dividends in USD), declined 14.92% over the same period, due to headwinds from a stronger U.S. dollar, falling commodity prices, concerns over slower Chinese economic growth and declining Chinese equities.

Thank you once again for the trust you have placed in us. We value your commitment and will continue to work diligently to meet your broad investment needs.

Sincerely,

Brent R. Harris

Brent R. Harris
Chairman of the Board,
PIMCO Variable Insurance Trust

February 18, 2016

## Important Information About the Portfolio

PIMCO Variable Insurance Trust (the "Trust") is an open-end management investment company currently consisting of nineteen separate investment portfolios, including the PIMCO Low Duration Portfolio (the "Portfolio"). The Portfolio is only available as a funding vehicle under variable life insurance policies or variable annuity contracts issued by insurance companies ("Variable Contracts"). Individuals may not purchase shares of the Portfolio directly. Shares of the Portfolio also may be sold to qualified pension and retirement plans outside of the separate account context.

We believe that bond funds have an important role to play in a well diversified investment portfolio. It is important to note, however, that in an environment where interest rates may trend upward, rising rates would negatively impact the performance of most bond funds, and fixed-income securities held by the Portfolio are likely to decrease in value. A number of factors can cause interest rates to rise (e.g., central bank monetary policies, inflation rates, general economic conditions, etc.). In addition, changes in interest rates can be sudden and significant, and there is no guarantee that Fund management will anticipate such movement accurately.

As of the date of this report, interest rates in the U.S. are near historically low levels. As such, bond funds may currently face an increased exposure to the risks associated with a rising interest rate environment. This is especially true as the Fed ended its quantitative easing program and has begun, and may continue, to raise interest rates. Further, while the U.S. bond market has steadily grown over the past three decades, dealer inventories of corporate bonds have remained relatively stagnant. As a result, there has been a significant reduction in the ability of dealers to "make markets."

Bond funds and individual bonds with a longer duration (a measure used to determine the sensitivity of a security's price to changes in interest rates) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities or funds with shorter durations. All of the factors mentioned above, individually or collectively, could lead to increased volatility and/or lower liquidity in the fixed income markets or negatively impact the Portfolio's performance or cause the Portfolio to incur losses. As a result, the Portfolio may experience increased shareholder redemptions, which, among other things, could further reduce the net assets of the Portfolio.

The Portfolio may be subject to various risks as described in the Portfolio's prospectus. Some of these risks may include, but are not limited to, the following: interest rate risk, call risk, credit risk, high yield risk, market risk, issuer risk, liquidity risk, derivatives risk, equity risk, mortgage-related and other asset-backed securities risk, foreign (non-U.S.) investment risk, emerging markets risk, sovereign debt risk, currency risk, leveraging risk, management risk and short sale risk. A complete description of these and other risks is contained in the Portfolio's prospectus.

The Portfolio may use derivative instruments for hedging purposes or as part of an investment strategy. Use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, credit risk, leverage risk, management risk and the risk that the Portfolio may not be able to close out a position when it would be most advantageous to do so. Certain derivative transactions may have a leveraging effect on the Portfolio. For example, a small investment in a derivative instrument may have a significant impact on the Portfolio's exposure to interest rates, currency exchange rates or other investments. As a result, a relatively small price movement in an asset, instrument or component of the index underlying a derivative instrument may cause an immediate and substantial loss or gain, which translates into heightened volatility for the Portfolio. The Portfolio may engage in such transactions regardless of whether the Portfolio owns the asset, instrument or components of the index underlying the derivative instrument. The Portfolio may invest a significant portion of its assets in these types of instruments. If it does, the Portfolio's investment exposure could far exceed the value of its portfolio securities and its investment performance could be primarily dependent upon securities it does not own. Investing in foreign (non-U.S.) securities may entail risk due to foreign (non-U.S.) economic and political developments; this risk may be increased when investing in emerging markets. For example, if the Portfolio invests in emerging market debt, it may face increased exposure to interest rate, liquidity, volatility, and redemption risk due to the specific economic, political, geographical, or legal background of the foreign (non-U.S.) issuer.

High-yield bonds typically have a lower credit rating than other bonds. Lower-rated bonds generally involve a greater risk to principal than higher-rated bonds. Further, markets for lower-rated bonds are typically less liquid than for higher-rated bonds, and public information is usually less abundant in such markets. Thus, high yield investments increase the chance that the Portfolio will lose money. The credit quality of a particular security or group of securities does not ensure the stability or safety of the overall portfolio. Mortgage- and Asset-Backed Securities represent ownership interests in "pools" of mortgages or other assets such as consumer loans or receivables. As a general matter, Mortgage- and Asset-Backed Securities are subject to interest rate risk, extension risk, prepayment risk, and credit risk. These risks largely stem from the fact that returns on Mortgage- and Asset-Backed Securities depend on the ability of the underlying assets to generate cash flow.

The geographical classification of foreign (non-U.S.) securities in this report are classified by the country of incorporation of a holding. In certain instances, a security's country of incorporation may be different from its country of economic exposure.

On the Portfolio Summary page in this Shareholder Report, the Average Annual Total Return table and Cumulative Returns chart measure performance assuming that any dividend and capital gain distributions were reinvested. The Cumulative Returns chart reflects only Administrative Class performance. Performance for Institutional Class, Class M and Advisor Class shares, if applicable, may be higher or lower based on each class's expense ratios. The Portfolio's total annual operating expense ratios on the Portfolio Summary page are as of the currently effective prospectus, as supplemented to date. The Portfolio measures its performance against a broad-based securities market index ("benchmark index"). The benchmark index does not take into account fees, expenses, or taxes. The Portfolio's past performance, before and after taxes, is not necessarily an indication of how the Portfolio will perform in the future.

The following table discloses the inception dates of the Portfolio and its respective share classes along with the Portfolio's diversification status as of period end:

| **Portfolio Name** | **Portfolio Inception** | **Institutional Class** | **Class M** | **Administrative Class** | **Advisor Class** | **Diversification Status** |
|---|---|---|---|---|---|---|
| PIMCO Low Duration Portfolio | 02/16/99 | 04/10/00 | — | 02/16/99 | 03/31/06 | Diversified |

An investment in the Portfolio is not a deposit of a bank and is not guaranteed or insured by the Federal Deposit Insurance Corporation or any other government agency. It is possible to lose money on investments in the Portfolio.

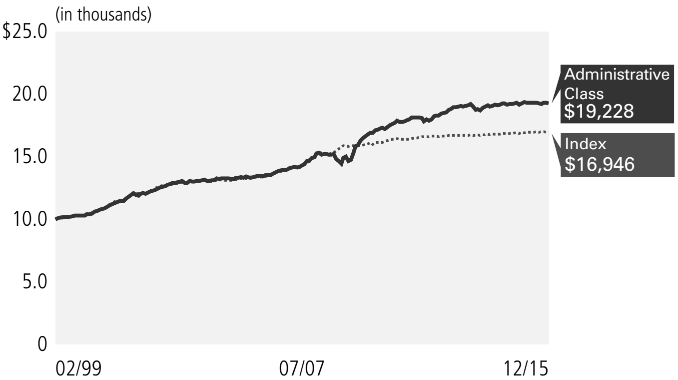
The Trustees are responsible generally for overseeing the management of the Trust. The Trustees authorize the Trust to enter into service agreements with the Adviser, the Distributor, the Administrator and other service providers in order to provide, and in some cases authorize service providers to procure through other parties, necessary or desirable services on behalf of the Trust and the Portfolio. Shareholders are not parties to or third-party beneficiaries of such service agreements. Neither this Portfolio's prospectus nor summary prospectus, the Trust's Statement of Additional Information ("SAI"), any contracts filed as exhibits to the Trust's registration statement, nor any other communications, disclosure documents or regulatory filings (including this report) from or on behalf of the Trust or the Portfolio creates a contract between or among any shareholder of the Portfolio, on the one hand, and the Trust, the Portfolio, a service provider to the Trust or the Portfolio, and/or the Trustees or officers of the Trust, on the other hand. The Trustees (or the Trust and its officers, service providers or other delegates acting under authority of the Trustees) may amend the most recent prospectus or use a new prospectus, summary prospectus or SAI with respect to the Portfolio or the Trust, and/or amend, file and/or issue any other communications, disclosure documents or regulatory filings, and may amend or enter into any contracts to which the Trust or the Portfolio is a party, and interpret the investment objective(s), policies, restrictions and contractual provisions applicable to the Portfolio, without shareholder input or approval, except in circumstances in which shareholder approval is specifically required by law (such as changes to fundamental investment policies) or where a shareholder approval requirement is specifically disclosed in the Trust's then-current prospectus or SAI.

PIMCO has adopted written proxy voting policies and procedures ("Proxy Policy") as required by Rule 206(4)-6 under the Investment Advisers Act of 1940, as amended. The Proxy Policy has been adopted by the Trust as the policies and procedures that PIMCO will use when voting proxies on behalf of the Portfolio. A description of the policies and procedures that PIMCO uses to vote proxies relating to portfolio securities of the Portfolio, and information about how the Portfolio voted proxies relating to portfolio securities held during the most recent twelve-month period ended June 30, are available without charge, upon request, by calling the Trust at (888) 87-PIMCO, on the Portfolio's website at pvit.pimco-funds.com, and on the Securities and Exchange Commission's ("SEC") website at www.sec.gov.

The Portfolio files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. A copy of the Trust's Form N-Q is available on the SEC's website at www.sec.gov and may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C., and is available without charge, upon request, by calling the Trust at (888) 87-PIMCO and on the Portfolio's website at pvit.pimco-funds.com. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

The Trust is distributed by PIMCO Investments LLC, 1633 Broadway, New York, New York 10019.

## Cumulative Returns Through December 31, 2015



$10,000 invested at the end of the month when the Portfolio's Administrative Class commenced operations.

## Allocation Breakdown†

| | |
|---|---|
| Corporate Bonds & Notes | 39.1% |
| U.S. Treasury Obligations | 14.8% |
| U.S. Government Agencies | 14.5% |
| Asset-Backed Securities | 9.7% |
| Non-Agency Mortgage-Backed Securities | 7.3% |
| Short-Term Instruments‡ | 7.2% |
| Sovereign Issues | 6.2% |
| Other | 1.2% |

† % of Investments, at value as of 12/31/15. Financial derivative instruments, if any, are excluded.

‡ Includes Central Funds used for Cash Management Purposes

## Average Annual Total Return for the period ended December 31, 2015

| | | 1 Year | 5 Years | 10 Years | Inception* |
|---|---|---|---|---|---|
| | PIMCO Low Duration Portfolio Institutional Class | 0.47% | 1.73% | 3.83% | 4.12% |
| — | PIMCO Low Duration Portfolio Administrative Class | 0.31% | 1.58% | 3.67% | 3.93% |
| | PIMCO Low Duration Portfolio Advisor Class | 0.21% | 1.47% | — | 3.65% |
| ····· | BofA Merrill Lynch 1-3 Year U.S. Treasury Index± | 0.54% | 0.70% | 2.42% | 3.17%** |

All Portfolio returns are net of fees and expenses.

* For class inception dates please refer to the Important Information.
** Average annual total return since 02/16/1999.

*Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Current performance may be lower or higher than performance shown. Investment return and the principal value of an investment will fluctuate. Shares may be worth more or less than original cost when redeemed. The Portfolio's performance does not reflect the deduction of additional charges and expenses imposed in connection with investing in Variable Contracts, which will reduce returns. For performance current to the most recent month-end, visit pvit.pimco-funds.com. The Portfolio's total annual operating expense ratio as stated in the Portfolio's current prospectus, as supplemented to date, is 0.50% for Institutional Class shares, 0.65% for Administrative Class shares, and 0.75% for Advisor Class shares.*

± The BofA Merrill Lynch 1-3 Year U.S. Treasury Index is an unmanaged index comprised of U.S. Treasury securities, other than inflation-protection securities and STRIPS, with at least $1 billion in outstanding face value and a remaining term to final maturity of at least one year and less than three years.

It is not possible to invest in an unmanaged index.

## Investment Objective and Strategy Overview

» The PIMCO Low Duration Portfolio seeks maximum total return, consistent with preservation of capital and prudent investment management, by investing under normal circumstances at least 65% of its total assets in a diversified portfolio of Fixed Income Instruments of varying maturities, which may be represented by forwards or derivatives, such as options, futures contracts or swap agreements. "Fixed Income Instruments" include bonds, debt securities and other similar instruments issued by various U.S. and non-U.S. public- or private-sector entities.

## Portfolio Insights

» Exposure to investment grade credit detracted from performance, as these securities generally posted negative total returns during the reporting period.

» Exposure to high yield credit detracted from performance, as these securities generally posted negative total returns during the reporting period.

» Holdings of U.S. Treasury Inflation-Protected Securities detracted from performance, as these securities generally posted negative total returns during the reporting period.

» Exposure to U.S. dollar-denominated emerging market bonds positively contributed to performance, as these securities generally posted positive total returns during the reporting period.

» Short exposure to the Japanese yen and the euro benefited performance, as both currencies depreciated relative to the U.S. dollar during the reporting period.

# Expense Example PIMCO Low Duration Portfolio

## Example

As a shareholder of the Portfolio, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees, distribution and/or service (12b-1) fees (if applicable), and other Portfolio expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds.

The Expense Example does not reflect any fees or other expenses imposed by the Variable Contracts. If it did, the expenses reflected in the Expense Example would be higher. The Example is based on an investment of $1,000 invested at the beginning of the period and held from July 1, 2015 to December 31, 2015 unless noted otherwise in the table and footnotes below.

## Actual Expenses

The information in the table under the heading “Actual” provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class, in the column titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

## Hypothetical Example for Comparison Purposes

The information in the table under the heading “Hypothetical (5% return before expenses)” provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Portfolio and other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading “Hypothetical (5% return before expenses)” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. In addition, if these transactional costs were included, your costs would have been higher.

Expense ratios may vary period to period because of various factors, such as an increase in expenses that are not covered by the management fees such as fees and expenses of the independent trustees and their counsel, extraordinary expenses and interest expense.

| | Actual | | | Hypothetical (5% return before expenses) | | | |
|---|---|---|---|---|---|---|---|
| | Beginning Account Value (07/01/15) | Ending Account Value (12/31/15) | Expenses Paid During Period* | Beginning Account Value (07/01/15) | Ending Account Value (12/31/15) | Expenses Paid During Period* | Net Annualized Expense Ratio** |
| Institutional Class | $ 1,000.00 | $ 996.80 | $ 2.61 | $ 1,000.00 | $ 1,023.00 | $ 2.64 | 0.51% |
| Administrative Class | 1,000.00 | 996.00 | 3.37 | 1,000.00 | 1,022.24 | 3.42 | 0.66 |
| Advisor Class | 1,000.00 | 995.50 | 3.88 | 1,000.00 | 1,021.72 | 3.94 | 0.76 |

** Expenses Paid During Period are equal to the net annualized expense ratio for the class, multiplied by the average account value over the period, multiplied by 187/365 (to reflect the one-half year period). Overall fees and expenses of investing in the Portfolio will be higher because the example does not reflect variable contract fees and expenses.*

*** Net Annualized Expense Ratio is reflective of any applicable contractual fee waivers and/or expense reimbursements or voluntary fee waivers. Details regarding fee waivers can be found in Note 8 in the Notes to Financial Statements.*

## NOTES TO SCHEDULE OF INVESTMENTS (AMOUNTS IN THOUSANDS*, EXCEPT NUMBER OF CONTRACTS):

* A zero balance may reflect actual amounts rounding to less than one thousand.

^ Security is in default.

(a) Interest only security.

(b) Security did not produce income within the last twelve months.

(c) Coupon represents a weighted average yield to maturity.

(d) Zero coupon bond.

(e) Principal amount of security is adjusted for inflation.

## BORROWINGS AND OTHER FINANCING TRANSACTIONS

### (f) REPURCHASE AGREEMENTS:

| Counterparty | Lending Rate | Settlement Date | Maturity Date | Principal Amount | Collateralized By | Collateral (Received) | Repurchase Agreements, at Value | Repurchase Agreement Proceeds to be Received [(1)] |
|---|---|---|---|---|---|---|---|---|
| SSB | 0.010% | 12/31/2015 | 01/04/2016 | $ 1,963 | Fannie Mae 2.140% due 11/07/2022 | $ (2,006) | $ 1,963 | $ 1,963 |
| **Total Repurchase Agreements** | | | | | | **$ (2,006)** | **$ 1,963** | **$ 1,963** |

(1) Includes accrued interest.

**As of December 31, 2015, there were no open reverse repurchase agreements. The average amount of borrowings outstanding during the period ended December 31, 2015 was $(25,879) at a weighted average interest rate of 0.302%.**

## SHORT SALES:

### SHORT SALES ON U.S. GOVERNMENT AGENCIES*:

| Description | Coupon | Maturity Date | Principal Amount | Proceeds | Payable for Short Sales |
|---|---|---|---|---|---|
| Fannie Mae, TBA | 5.000% | 01/01/2046 | $ 100 | $ (110) | $ (110) |
| Fannie Mae, TBA | 6.000 | 01/01/2046 | 3,000 | (3,394) | (3,390) |
| Freddie Mac, TBA | 5.000 | 01/01/2046 | 500 | (549) | (546) |
| **Total Short Sales** | | | | **$ (4,053)** | **$ (4,046)** |

* Short Sales shown are To-Be-Announced ("TBA") securities which are not subject to collateral pledging under the terms of any master agreements.

## BORROWINGS AND OTHER FINANCING TRANSACTIONS SUMMARY

**The following is a summary by counterparty of the market value of Borrowings and Other Financing Transactions and collateral (received) as of December 31, 2015:**

| Counterparty | Repurchase Agreement Proceeds to be Received | Payable for Reverse Repurchase Agreements | Payable for Sale-Buyback Transactions | Total Borrowings and Other Financing Transactions | Collateral (Received) | Net Exposure [2] |
|---|---|---|---|---|---|---|
| Global/Master Repurchase Agreement | | | | | | |
| SSB | $ 1,963 | $ 0 | $ 0 | $ 1,963 | $ (2,006) | $ (43) |
| **Total Borrowings and Other Financing Transactions** | **$ 1,963** | **$ 0** | **$ 0** | | | |

[2] Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from borrowings and other financing transactions can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Principal Risks, in the Notes to Financial Statements for more information regarding master netting arrangements.

## (g) FINANCIAL DERIVATIVE INSTRUMENTS: EXCHANGE-TRADED OR CENTRALLY CLEARED

### CREDIT DEFAULT SWAPS ON CREDIT INDICES - SELL PROTECTION [(1)]

| Counterparty | Index/Tranches | Fixed Receive Rate | Maturity Date | Notional Amount [(3)] | Premiums Paid/(Received) | Unrealized Appreciation | Swap Agreements, at Value [(4)] Asset | Swap Agreements, at Value [(4)] Liability |
|---|---|---|---|---|---|---|---|---|
| GST | CDX.IG-9 10-Year Index 30-100% | 0.548% | 12/20/2017 | $ 193 | $ 0 | $ 2 | $ 2 | $ 0 |
| JPM | CDX.IG-9 10-Year Index 30-100% | 0.553 | 12/20/2017 | 386 | 0 | 4 | 4 | 0 |
| MYC | CMBX.NA.AAA.3 Index | 0.080 | 12/13/2049 | 8,876 | (61) | 26 | 0 | (35) |
| | | | | | $ (61) | $ 32 | $ 6 | $ (35) |

(1) If the Portfolio is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Portfolio will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

(2) Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate or sovereign issues as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

(3) The maximum potential amount the Portfolio could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

(4) The prices and resulting values for credit default swap agreements on credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement be closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced indices' credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

### INTEREST RATE SWAPS

| Counterparty | Pay/Receive Floating Rate | Floating Rate Index | Fixed Rate | Maturity Date | Notional Amount | Premiums Paid/(Received) | Unrealized Appreciation | Swap Agreements, at Value Asset | Swap Agreements, at Value Liability |

(5) Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from OTC financial derivative instruments can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Principal Risks, in the Notes to Financial Statements for more information regarding master netting arrangements.

## FAIR VALUE OF FINANCIAL DERIVATIVE INSTRUMENTS

**The following is a summary of the fair valuation of the Portfolio's derivative instruments categorized by risk exposure. See Note 7, Principal Risks, in the Notes to Financial Statements on risks of the Portfolio.**

**Fair Values of Financial Derivative Instruments on the Statement of Assets and Liabilities as of December 31, 2015:**

| | Derivatives not accounted for as hedging instruments | | | | | |
|---|---|---|---|---|---|---|
| | Commodity Contracts | Credit Contracts | Equity Contracts | Foreign Exchange Contracts | Interest Rate Contracts | Total |
| **Financial Derivative Instruments - Assets** | | | | | | |
| Exchange-traded or centrally cleared | | | | | | |
| Futures | $ 0 | $ 0 | $ 0 | $ 0 | $ 328 | $ 328 |
| Swap Agreements | 0 | 0 | 0 | 0 | 394 | 394 |
| | $ 0 | $ 0 | $ 0 | $ 0 | $ 722 | $ 722 |
| Over the counter | | | | | | |
| Forward Foreign Currency Contracts | $ 0 | $ 0 | $ 0 | $ 33,781 | $ 0 | $ 33,781 |

**There were no significant transfers between Levels 1, 2, or 3 during the period ended December 31, 2015.**

## 1. ORGANIZATION

The PIMCO Low Duration Portfolio (the "Portfolio") is a series of the PIMCO Variable Insurance Trust (the "Trust"). The Trust is registered under the Investment Company Act of 1940, as amended (the "Act"), as an open-end management investment company organized as a Delaware business trust on October 3, 1997. The Portfolio offers three classes of shares: Institutional, Administrative and Advisor. The Trust is designed to be used as an investment vehicle by separate accounts of insurance companies that fund variable annuity contracts and variable life insurance policies and by qualified pension and retirement plans. Pacific Investment Management Company LLC ("PIMCO") serves as the investment adviser (the "Adviser") for the Portfolio.

## 2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Portfolio in the preparation of its financial statements in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The Portfolio is treated as an investment company under the reporting requirements of U.S. GAAP. The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

**(a) Securities Transactions and Investment Income** Securities transactions are recorded as of the trade date for financial reporting purposes. Securities purchased or sold on a when-issued or delayed-delivery basis may be settled 15 days or more after the trade date. Realized gains and losses from securities sold are recorded on the identified cost basis. Dividend income is recorded on the ex-dividend date, except certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the Portfolio is informed of the ex-dividend date. Interest income, adjusted for the accretion of discounts and amortization of premiums, is recorded on the accrual basis from settlement date, with the exception of securities with a forward starting effective date, where interest income is recorded on the accrual basis from effective date. For convertible securities, premiums attributable to the conversion feature are not amortized. Estimated tax liabilities on certain foreign securities are recorded on an accrual basis and are reflected as components of interest income or net change in unrealized appreciation (depreciation) on investments on the Statement of Operations, as appropriate. Tax liabilities realized as a result of such security sales are reflected as a component of net realized gain (loss) on investments on the Statement of Operations. Paydown gains and losses on mortgage-related and other asset-backed securities are recorded as components of interest income on the Statement of Operations. Income or short-term capital gain distributions received from registered investment companies are recorded as dividend income. Long-term capital gain distributions received from registered investment companies are recorded as realized gains.

Debt obligations may be placed on non-accrual status and related interest income may be reduced by ceasing current accruals and writing off interest receivable when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. A debt obligation is removed from non-accrual status when the issuer resumes interest payments or when collectability of interest is probable.

**(b) Cash and Foreign Currency** The functional and reporting currency for the Portfolio is the U.S. dollar. The market values of foreign securities, currency holdings and other assets and liabilities are translated into U.S. dollars based on the current exchange rates each business day. Purchases and sales of securities and income and expense items denominated in foreign currencies, if any, are translated into U.S. dollars at the exchange rate in effect on the transaction date. The Portfolio does not separately report the effects of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized gain (loss) and net change in unrealized appreciation (depreciation) from investments on the Statement of Operations. The Portfolio may invest in foreign currency-denominated securities and may engage in foreign currency transactions either on a spot (cash) basis at the rate prevailing in the currency exchange market at the time or through a forward foreign currency contract (see Financial Derivative Instruments, if any). Realized foreign exchange gains or losses arising from sales of spot foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid are included in net realized gain (loss) on foreign currency transactions on the Statement of Operations. Net unrealized foreign exchange gains and losses arising from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period are included in net change in unrealized appreciation (depreciation) on foreign currency assets and liabilities on the Statement of Operations.

**(c) Multiclass Operations** Each class offered by the Portfolio has equal rights as to assets and voting privileges (except that shareholders of a class have exclusive voting rights regarding any matter relating solely to that class of shares). Income and non-class specific expenses are allocated daily to each class on the basis of the relative net assets. Realized and unrealized capital gains and losses are allocated daily based on the relative net assets of each class of the Portfolio. Class specific expenses, where applicable, currently include supervisory and administrative and distribution and servicing fees. Under certain circumstances, the per share net asset value ("NAV") of a class of the Portfolio's shares may be different from the per share NAV of another class of shares as a result of the different daily expense accruals applicable to each class of shares.

**(d) Dividends and Distributions to Shareholders** Dividends from net investment income, if any, are declared daily and distributed to shareholders monthly. Net realized capital gains earned by the Portfolio, if any, will be distributed no less frequently than once each year.

Income dividends and capital gain distributions are determined in accordance with income tax regulations which may differ from U.S. GAAP. Differences between tax regulations and U.S. GAAP may cause timing differences between income and capital gain recognition. Examples of events that give rise to timing differences include wash sales, straddles and capital loss carryforwards. Further, the character of investment income and capital gains may be different for certain transactions under the two methods of accounting. Examples of transactions that may cause character differences include the treatment of paydowns on mortgage-backed securities, swaps, foreign currency transactions and contingent debt instruments. As a result, income dividends and capital gain distributions declared during a fiscal period may differ significantly from the net investment income (loss) and realized gains (losses) reported on the Portfolio's annual financial statements presented under U.S. GAAP.

Distributions classified as a tax basis return of capital, if any, are reflected on the Statements of Changes in Net Assets and have been recorded to paid in capital. In addition, other amounts have been reclassified between undistributed (overdistributed) net investment income (loss), accumulated undistributed (overdistributed) net realized gains (losses) and/or paid in capital to more appropriately conform financial accounting to tax characterizations of dividend distributions.

**(e) New Accounting Pronouncements** In June 2014, the Financial Accounting Standards Board ("FASB") issued an Accounting Standards Update ("ASU"), ASU 2014-11, that expanded secured borrowing accounting for certain repurchase agreements. The ASU also sets forth additional disclosure requirements for certain transactions accounted for as sales in order to provide financial statement users with information to compare to similar transactions accounted for as secured borrowings. The ASU became effective prospectively for annual periods beginning after December 15, 2014, and interim periods beginning after March 15, 2015. The Portfolio has adopted the ASU. The financial statements have been modified to provide enhanced disclosures surrounding secured borrowing transactions, if any. See the Notes to Schedule of Investments for additional details.

In August 2014, the FASB issued ASU 2014-15 requiring management to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern. The ASU is effective prospectively for annual periods ending after December 15, 2016, and interim periods thereafter. At this time, management is evaluating the implications of these changes on the financial statements.

In May 2015, the FASB issued ASU 2015-07 which removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the NAV per share practical expedient. The ASU also removes the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the NAV per share practical expedient. The ASU is effective for annual periods beginning after December 15, 2015 and interim periods within those annual periods. At this time, management is evaluating the implications of these changes on the financial statements.

## 3. INVESTMENT VALUATION AND FAIR VALUE MEASUREMENTS

**(a) Investment Valuation Policies** The price of the Portfolio's shares is based on the Portfolio's NAV. The NAV of the Portfolio, or each of its share classes, as applicable, is determined by dividing the total value of portfolio investments and other assets attributable to the Portfolio or class, less any liabilities, by the total number of shares outstanding of the Portfolio or class.

On each day that the New York Stock Exchange ("NYSE") is open, Portfolio shares are ordinarily valued as of the close of regular trading ("NYSE Close"). Information that becomes known to the Portfolio or its agents after the time as of which NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of a security or the NAV determined earlier that day. The Portfolio reserves the right to change the time its NAV is calculated if the Portfolio closes earlier, or as permitted by the SEC.

For purposes of calculating NAV, portfolio securities and other assets for which market quotes are readily available are valued at market value. Market value is generally determined on the basis of official closing prices or the last reported sales prices, or if no sales are reported, based on quotes obtained from established market makers or prices (including evaluated prices) supplied by the Portfolio's approved pricing services, quotation reporting systems and other third-party sources (together, "Pricing Services"). The Portfolio will normally use pricing data for domestic equity securities received shortly after the NYSE Close and does not normally take into account trading, clearances or settlements that take place after the NYSE Close. A foreign (non-U.S.) equity security traded on a foreign exchange or on more than one exchange is typically valued using pricing information from the exchange considered by the Adviser to be the primary exchange. A foreign (non-U.S.) equity security will be valued as of the close of trading on the foreign exchange, or the NYSE Close, if the NYSE Close occurs before the end of trading on the foreign exchange. Domestic and foreign (non-U.S.) fixed income securities, non-exchange traded derivatives, and equity options are normally valued on the basis of quotes obtained from brokers and dealers or Pricing Services using data reflecting the earlier closing of the principal markets for those securities. Prices obtained from Pricing Services may be based on, among other things, information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Certain fixed income securities purchased on a delayed-delivery basis are marked to market daily until settlement at the forward settlement date. Exchange-traded options, except equity options, futures and options on futures are valued at the settlement price determined by the relevant exchange. Swap agreements are valued on the basis of bid quotes obtained from brokers and dealers or market-based prices supplied by Pricing Services or other pricing sources. With respect to any portion of the Portfolio's assets that are invested in one or more open-end management investment companies (other than exchange-traded funds ("ETFs")), a Portfolio's NAV will be calculated based upon the NAVs of such investments.

If a foreign (non-U.S.) equity security's value has materially changed after the close of the security's primary exchange or principal market but before the NYSE Close, the security may be valued at fair value based on procedures established and approved by the Board of Trustees of the Trust (the "Board"). Foreign (non-U.S.) equity securities that do not trade when the NYSE is open are also valued at fair value. With respect to foreign (non-U.S.) equity securities, the Portfolio may determine the fair value of investments based on information provided by Pricing Services and other third-party vendors, which may recommend fair value or adjustments with reference to other securities, indices or assets. In considering whether fair valuation is required and in determining fair values, the Portfolio may, among other things, consider significant events (which may be considered to include changes in the value of U.S. securities or securities indices) that occur after the close of the relevant market and before the NYSE Close. The Portfolio may utilize modeling tools provided by third-party vendors to determine fair values of non-U.S. securities. Foreign (non-U.S.) exchanges may permit trading in foreign (non-U.S.) equity securities on days when the Trust is not open for business, which may result in the Portfolio's portfolio investments being affected when shareholders are unable to buy or sell shares.

Senior secured floating rate loans for which an active secondary market exists to a reliable degree will be valued at the mean of the last available bid/ask prices in the market for such loans, as provided by a Pricing Service. Senior secured floating rate loans for which an active secondary market does not exist to a reliable degree will be valued at fair value, which is intended to approximate market value. In valuing a senior secured floating rate loan at fair value, the factors considered may include, but are not limited to, the following: (a) the creditworthiness of the borrower and any intermediate participants, (b) the terms of the loan, (c) recent prices in the market for similar loans, if any, and (d) recent prices in the market for instruments of similar quality, rate, period until next interest rate reset and maturity.

Investments valued in currencies other than the U.S. dollar are converted to the U.S. dollar using exchange rates obtained from Pricing Services. As a result, the value of such investments and, in turn, the NAV of the Portfolio's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of investments traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the Trust is not open for business. As a result, to the extent that the Portfolio holds foreign (non-U.S.) investments, the value of those investments may change at times when shareholders are unable to buy or sell shares and the value of such investments will be reflected in the Portfolio's next calculated NAV.

Investments for which market quotes or market based valuations are not readily available are valued at fair value as determined in good faith by the Board or persons acting at their direction. The Board has adopted methods for valuing securities and other assets in circumstances where market quotes are not readily available, and has delegated to the Adviser the responsibility for applying the fair valuation methods. In the event that market quotes or market based valuations are not readily available, and the security or asset cannot be valued pursuant to a Board approved valuation method, the value of the security or asset will be determined in good faith by the Valuation Oversight Committee of the Board ("Valuation Oversight Committee"), generally based on recommendations provided by the Adviser. Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information, bid/ask information, indicative market quotations ("Broker Quotes"), Pricing Services' prices), including where events occur after the close of the relevant market, but prior to the NYSE Close, that materially affect the values of a Portfolio's securities or assets. In addition, market quotes are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which the securities trade do not open for trading for the entire day and no other market prices are available. The Board has delegated to the Adviser the responsibility for monitoring significant events that may materially affect the values of the Portfolio's securities or assets and for determining whether the value of the applicable securities or assets should be reevaluated in light of such significant events.

When a Portfolio uses fair valuation to determine the value of a portfolio security or other asset for purposes of calculating its NAV, such investments will not be priced on the basis of quotes from the primary market in which they are traded, but rather may be priced by another method that the Board or persons acting at their direction believe reflects fair value. Fair valuation may require subjective determinations about the value of a security. While the Trust's policy is intended to result in a calculation of the Portfolio's NAV that fairly reflects security values as of the time of pricing, the Trust cannot ensure that fair values determined by the Board or persons acting at their direction would accurately reflect the price that a Portfolio could obtain for a security if it were to dispose of that security as of the time of pricing (for instance, in a forced or distressed sale). The prices used by a Portfolio may differ from the value that would be realized if the securities were sold. The Portfolio's use of fair valuation may also help to deter "stale price arbitrage" as discussed under the "Frequent or Excessive Purchases, Exchanges and Redemptions" section in the Portfolio's prospectus.

**(b) Fair Value Hierarchy** U.S. GAAP describes fair value as the price that the Portfolio would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. It establishes a fair value hierarchy that prioritizes inputs to valuation methods and requires disclosure of the fair value hierarchy, separately for each major category of assets and liabilities, that segregates fair value measurements into levels (Level 1, 2, or 3). The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Levels 1, 2, and 3 of the fair value hierarchy are defined as follows:

- Level 1 — Inputs using (unadjusted) quoted prices in active markets or exchanges for identical assets and liabilities.
- Level 2 — Significant other observable inputs, which may include, but are not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market corroborated inputs.
- Level 3 — Significant unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include assumptions made by the Board or persons acting at their direction that are used in determining the fair value of investments.

In accordance with the requirements of U.S. GAAP, the amounts of transfers between Levels 1 and 2 and transfers in and out of Level 3, if material, are disclosed in the Notes to Schedule of Investments for the Portfolio.

For fair valuations using significant unobservable inputs, U.S. GAAP requires a reconciliation of the beginning to ending balances for reported fair values that presents changes attributable to realized gain (loss), unrealized appreciation (depreciation), purchases and sales, accrued discounts (premiums), and transfers in and out of the Level 3 category during the period. The end of period timing recognition is used for the transfers between Levels of the Portfolio's assets and liabilities. Additionally, U.S. GAAP requires quantitative information regarding the significant unobservable inputs used in the determination of fair value of assets or liabilities categorized as Level 3 in the fair value hierarchy. In accordance with the requirements of U.S. GAAP, a fair value hierarchy, and if material, a Level 3 reconciliation and details of significant unobservable inputs, have been included in the Notes to Schedule of Investments for the Portfolio.

**(c) Valuation Techniques and the Fair Value Hierarchy**

**Level 1 and Level 2 trading assets and trading liabilities, at fair value** The valuation methods (or "techniques") and significant inputs used in determining the fair values of portfolio securities or other assets and liabilities categorized as Level 1 and Level 2 of the fair value hierarchy are as follows:

Fixed income securities including corporate, convertible and municipal bonds and notes, U.S. government agencies, U.S. treasury obligations, sovereign issues, bank loans, convertible preferred securities and non-U.S. bonds are normally valued on the basis of quotes obtained from brokers and dealers or Pricing Services that use broker-dealer quotations, reported trades or valuation estimates from their internal pricing models. The Pricing Services' internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Fixed income securities purchased on a delayed-delivery basis or as a repurchase commitment in a sale-buyback transaction are marked to market daily until settlement at the forward settlement date and are categorized as Level 2 of the fair value hierarchy.

Mortgage-related and asset-backed securities are usually issued as separate tranches, or classes, of securities within each deal. These securities are also normally valued by Pricing Services that use broker-dealer quotations, reported trades or valuation estimates from their internal pricing models. The pricing models for these securities usually consider tranche-level attributes, current market data, estimated cash flows and market-based yield spreads for each tranche, and incorporate deal collateral performance, as available. Mortgage-related and asset-backed securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Common stocks, ETFs, exchange-traded notes and financial derivative instruments, such as futures contracts, rights and warrants, or options on futures that are traded on a national securities exchange, are stated at the last reported sale or settlement price on the day of valuation. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized as Level 1 of the fair value hierarchy.

Valuation adjustments may be applied to certain securities that are solely traded on a foreign exchange to account for the market movement between the close of the foreign market and the NYSE Close. These securities are valued using Pricing Services that consider the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments. Securities using these valuation adjustments are categorized as Level 2 of the fair value hierarchy. Preferred securities and other equities traded on inactive markets or valued by reference to similar instruments are also categorized as Level 2 of the fair value hierarchy.

Investments in registered open-end investment companies (other than ETFs) will be valued based upon the NAVs of such investments and are categorized as Level 1 of the fair value hierarchy. Investments in unregistered open-end investment companies will be calculated based upon the NAVs of such investments and are considered Level 1 provided that the NAVs are observable, calculated daily and are the value at which both purchases and sales will be conducted. Investments in privately held investment funds with significant restrictions on redemption where the inputs to the NAVs are observable will be valued based upon the NAVs of such investments and are categorized as Level 2 of the fair value hierarchy.

Short-term debt instruments (such as commercial paper) having a remaining maturity of 60 days or less may be valued at amortized cost, so long as the amortized cost of such short-term debt instrument is approximately the same as the fair value of the instrument as determined without the use of amortized cost valuation. Prior to July 31, 2015, short-term investments having a maturity of 60 days or less and repurchase agreements were generally valued at amortized cost which approximates fair value. Short-term debt instruments having a remaining maturity of 60 days or less are categorized as Level 2 of the fair value hierarchy.

Equity exchange-traded options and over the counter financial derivative instruments, such as foreign currency contracts, options contracts, or swap agreements, derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. Other than swap agreements, which are valued using a broker-dealer bid quotation or on market-based prices provided by Pricing Services or other pricing sources, these contracts are normally valued on the basis of quotes obtained from a quotation reporting system, established market makers or Pricing Services (normally determined as of the NYSE Close). Depending on the product and the terms of the transaction, financial derivative instruments can be valued by Pricing Services using a series of techniques, including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as quoted prices, issuer details, indices, bid/ask spreads, interest rates, implied volatilities, yield curves, dividends and exchange rates. Financial derivative instruments that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Centrally cleared swaps listed or traded on a multilateral or trade facility platform, such as a registered exchange, are valued at the daily settlement price determined by the respective exchange (if available). For centrally cleared credit default swaps, the clearing facility requires its members to provide actionable price levels across complete term structures. These levels along with external third-party prices are used to produce daily settlement prices. These securities are categorized as Level 2 of the fair value hierarchy. Centrally cleared interest rate swaps are valued using a pricing model that references the underlying rates including the overnight index swap rate and London Interbank Offered Rate ("LIBOR") forward rate to produce the daily settlement price. These securities are categorized as Level 2 of the fair value hierarchy.

**Level 3 trading assets and trading liabilities, at fair value** When a fair valuation method is applied by the Adviser that uses significant unobservable inputs, investments will be priced by a method that the Board or persons acting at their direction believe reflects fair value and are categorized as Level 3 of the fair value hierarchy.

The validity of the fair value is reviewed by the Adviser on a periodic basis and may be amended in accordance with the Trust's valuation procedures.

## 4. SECURITIES AND OTHER INVESTMENTS

### (a) Investments in Affiliates

The Portfolio may invest in the PIMCO Short-Term Floating NAV Portfolio III ("Central Fund") to the extent permitted by the Act and rules thereunder. The Central Fund is a registered investment company created for use solely by the series of the Trust and other series of registered investment companies advised by the Adviser, in connection with their cash management activities. The main investments of the Central Fund are money market and short maturity fixed income instruments. The Central Fund may incur expenses related to their investment activities, but do not pay Investment Advisory Fees or Supervisory and Administrative Fees to the Adviser. The Central Fund is considered to be affiliated with the Portfolio. The table below shows the Portfolio's transactions in and earnings from investments in affiliated Funds for the period ended December 31, 2015 (amounts in thousands†):

### Investments in PIMCO Short-Term Floating NAV Portfolio III

| Market Value 12/31/2014 | Purchases at Cost | Proceeds from Sales | Net Realized Gain (Loss) | Change in Unrealized Appreciation (Depreciation) | Market Value 12/31/2015 | Dividend Income [(1)] | Realized Net Capital Gain Distributions [(1)] |
|---|---|---|---|---|---|---|---|
| $ 186,362 | $ 1,026,700 | $ (1,097,800) | $ (882) | $ 488 | $ 114,868 | $ 700 | $ 0 |

† A zero balance may reflect actual amounts rounding to less than one thousand.
(1) A portion of this may be recharacterized to return of capital and reflected as such on tax forms mailed to shareholders on or about January 31st following each calendar year.

### (b) Investments in Securities

Inflation-Indexed Bonds The Portfolio may invest in inflation-indexed bonds. Inflation-indexed bonds are fixed income securities whose principal value is periodically adjusted to the rate of inflation. The interest rate on these bonds is generally fixed at issuance at a rate lower than typical bonds. Over the life of an inflation-indexed bond, however, interest will be paid based on a principal value which is adjusted for inflation. Any increase or decrease in the principal amount of an inflation-indexed bond will be included as interest income on the Statement of Operations, even though investors do not receive their principal until maturity.

Loan Participations, Assignments and Originations The Portfolio may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers. The Portfolio's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties or investments in or originations of loans by a Portfolio. A loan is often administered by a bank or other financial institution (the "lender") that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. The Portfolio may invest in multiple series or tranches of a loan, which may have varying terms and carry different associated risks. When the Portfolio purchases assignments from lenders it acquires direct rights against the borrowers of the loans. These loans may include participations in bridge loans, which are loans taken out by borrowers for a short period (typically less than one year) pending arrangement of more permanent financing through, for example, the issuance of bonds, frequently high yield bonds issued for the purpose of acquisitions.

The types of loans and related investments in which the Portfolio may invest include, among others, senior loans, subordinated loans (including second lien loans, B-Notes and mezzanine loans), whole loans, commercial real estate and other commercial loans and structured loans. The Portfolio may originate loans or acquire direct interests in loans through primary loan distributions and/or in private transactions. In the case of subordinated loans, there may be significant indebtedness ranking ahead of the borrower's obligation to the holder of such a loan, including in the event of the borrower's insolvency. Mezzanine loans are typically secured by a pledge of an equity interest in the mortgage borrower that owns the real estate rather than an interest in a mortgage.

Investments in loans may include unfunded loan commitments, which are contractual obligations for funding. Unfunded loan commitments may include revolving credit facilities, which may obligate the Portfolio to supply additional cash to the borrower on demand. Unfunded loan commitments represent a future obligation in full, even though a percentage of the committed amount may not be utilized by the borrower. When investing in a loan participation, the Portfolio has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the loan agreement and only upon receipt of payments by the lender from the borrower. The Portfolio may receive a commitment fee based on the undrawn portion of the underlying line of credit portion of a loan. In certain circumstances, the Portfolio may receive a penalty fee upon the prepayment of a loan by a borrower. Fees earned or paid are recorded as a component of interest income or interest expense, respectively, on the Statement of Operations. As of December 31, 2015, the Portfolio had no unfunded loan commitments outstanding.

Mortgage-Related and Other Asset-Backed Securities The Portfolio may invest in mortgage-related and other asset-backed securities that directly or indirectly represent a participation in, or are secured by and payable from, loans on real property. Mortgage-related securities are created from pools of residential or commercial mortgage loans, including mortgage loans made by savings and loan institutions, mortgage bankers, commercial banks and others. These securities provide a monthly payment which consists of both interest and principal. Interest may be determined by fixed or adjustable rates. The rate of prepayments on underlying mortgages will affect the price and volatility of a mortgage-related security, and may have the effect of shortening or extending the effective duration of the security relative to what was anticipated at the time of purchase. The timely payment of principal and interest of certain mortgage-related securities is guaranteed with the full faith and credit of the U.S. Government. Pools created and guaranteed by non-governmental issuers, including government-sponsored corporations, may be supported by various forms of insurance or guarantees, but there can be no assurance that private insurers or guarantors can meet their obligations under the insurance policies or guarantee arrangements. Many of the risks of investing in mortgage-related securities secured by commercial mortgage loans reflect the effects of local and other economic conditions on real estate markets, the ability of tenants to make lease payments, and the ability of a property to attract and retain tenants. These securities may be less liquid and may exhibit greater price volatility than other types of mortgage-related or other asset-backed securities. Other asset-backed securities are created from many types of assets, including auto loans, credit card receivables, home equity loans, and student loans.

Collateralized Mortgage Obligations ("CMOs") are debt obligations of a legal entity that are collateralized by whole mortgage loans or private mortgage bonds and divided into classes. CMOs are structured into multiple classes, often referred to as "tranches," with each class bearing a different stated maturity and entitled to a different schedule for payments of principal and interest, including prepayments. CMOs may be less liquid and may exhibit greater price volatility than other types of mortgage-related or asset-backed securities.

Collateralized Debt Obligations ("CDOs") include Collateralized Bond Obligations ("CBOs"), Collateralized Loan Obligations ("CLOs") and other similarly structured securities. CBOs and CLOs are types of asset-backed securities. A CBO is a trust which is backed by a diversified pool of high risk, below investment grade fixed income securities. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. The risks of an investment in a CDO depend largely on the type of the collateral securities and the class of the CDO in which the Portfolio invests. In addition to the normal risks associated with fixed income securities discussed elsewhere in this report and the Portfolio's prospectus and statement of additional information (e.g., prepayment risk, credit risk, liquidity risk, market risk, structural risk, legal risk and interest rate risk (which may be exacerbated if the interest rate payable on a structured financing changes based on multiples of changes in interest rates or inversely to changes in interest rates)), CBOs, CLOs and other CDOs carry additional risks including, but not limited to, (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments, (ii) the quality of the collateral may decline in value or default, (iii) the Portfolio may invest in CBOs, CLOs, or other CDOs that are subordinate to other classes, and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Stripped Mortgage-Backed Securities ("SMBS") are derivative multi-class mortgage securities. SMBS are usually structured with two classes that receive different proportions of the interest and principal distributions on a pool of mortgage assets. An SMBS will have one class that will receive all of the interest (the interest-only or "IO" class), while the other class will receive the entire principal (the principal-only or "PO" class). Payments received for IOs are included in interest income on the Statement of Operations. Because no principal will be received at the maturity of an IO, adjustments are made to the cost of the security on a monthly basis until maturity. These adjustments are included in interest income on the Statement of Operations. Payments received for POs are treated as reductions to the cost and par value of the securities.

U.S. Government Agencies or Government-Sponsored Enterprises The Portfolio may invest in securities of U.S. Government agencies or government-sponsored enterprises. U.S. Government securities are obligations of and, in certain cases, guaranteed by, the U.S. Government, its agencies or instrumentalities. Some U.S. Government securities, such as Treasury bills, notes and bonds, and securities guaranteed by the Government National Mortgage Association ("GNMA" or "Ginnie Mae"), are supported by the full faith and credit of the U.S. Government; others, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Department of the Treasury (the "U.S. Treasury"); and others, such as those of the Federal National Mortgage Association ("FNMA" or "Fannie Mae"), are supported by the discretionary authority of the U.S. Government to purchase the agency's obligations. U.S. Government securities may include zero coupon securities. Zero coupon securities do not distribute interest on a current basis and tend to be subject to a greater risk than interest-paying securities.

Government-related guarantors (*i.e.*, not backed by the full faith and credit of the U.S. Government) include FNMA and the Federal Home Loan Mortgage Corporation ("FHLMC" or "Freddie Mac"). FNMA is a government-sponsored corporation. FNMA purchases conventional (*i.e.*, not insured or guaranteed by any government agency) residential mortgages from a list of approved seller/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. Pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA, but are not backed by the full faith and credit of the U.S. Government. FHLMC issues Participation

Certificates ("PCs"), which are pass-through securities, each representing an undivided interest in a pool of residential mortgages. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but PCs are not backed by the full faith and credit of the U.S. Government.

The Portfolio may engage in strategies where it seeks to extend the expiration or maturity of a position, such as a To Be Announced ("TBA") security on an underlying asset, by closing out the position before expiration and opening a new position with respect to the same underlying asset with a later expiration date. TBA securities purchased or sold are reflected on the Statement of Assets and Liabilities as an asset or liability, respectively.

## 5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The following disclosures contain information on the Portfolio's ability to lend or borrow cash or securities to the extent permitted under the Act, which may be viewed as borrowing or financing transactions by the Portfolio. The location of these instruments is described below. For a detailed description of credit and counterparty risks that can be associated with borrowings and other financing transactions, please see Note 7, Principal Risks.

(a) Repurchase Agreements The Portfolio may engage in repurchase agreements. Under the terms of a typical repurchase agreement, the Portfolio takes possession of an underlying debt obligation (collateral) subject to an obligation of the seller to repurchase, and the Portfolio to resell, the obligation at an agreed-upon price and time. The underlying securities for all repurchase agreements are held in safekeeping at the Portfolio's custodian or designated subcustodians under tri-party repurchase agreements. The market value of the collateral must be equal to or exceed the total amount of the repurchase obligations, including interest. Repurchase agreements, including accrued interest, are included on the Statement of Assets and Liabilities. Interest earned is recorded as a component of interest income on the Statement of Operations. In periods of increased demand for collateral, the Portfolio may pay a fee for the receipt of collateral, which may result in interest expense to the Portfolio.

(b) Reverse Repurchase Agreements The Portfolio may enter into reverse repurchase agreements. In a reverse repurchase agreement, the Portfolio delivers a security in exchange for cash to a financial institution, the counterparty, with a simultaneous agreement to repurchase the same or substantially the same security at an agreed upon price and date. The Portfolio is entitled to receive principal and interest payments, if any, made on the security delivered to the counterparty during the term of the agreement. Cash received in exchange for securities delivered plus accrued interest payments to be made by the Portfolio to counterparties are reflected as a liability on the Statement of Assets and Liabilities. Interest payments made by the Portfolio to counterparties are recorded as a component of interest expense on the Statement of Operations. In periods of increased demand for the security, the Portfolio may receive a fee for use of the security by the counterparty, which may result in interest income to the Portfolio. The Portfolio will segregate assets determined to be liquid by the Adviser or will otherwise cover its obligations under reverse repurchase agreements.

(c) Sale-Buybacks The Portfolio may enter into financing transactions referred to as 'sale-buybacks'. A sale-buyback transaction consists of a sale of a security by the Portfolio to a financial institution, the counterparty, with a simultaneous agreement to repurchase the same or substantially the same security at an agreed-upon price and date. The Portfolio is not entitled to receive principal and interest payments, if any, made on the security sold to the counterparty during the term of the agreement. The agreed-upon proceeds for securities to be repurchased by the Portfolio are reflected as a liability on the Statement of Assets and Liabilities. The Portfolio will recognize net income represented by the price differential between the price received for the transferred security and the agreed-upon repurchase price. This is commonly referred to as the 'price drop'. A price drop consists of (i) the foregone interest and inflationary income adjustments, if any, the Portfolio would have otherwise received had the security not been sold and (ii) the negotiated financing terms between the Portfolio and counterparty. Foregone interest and inflationary income adjustments, if any, are recorded as components of interest income on the Statement of Operations. Interest payments based upon negotiated financing terms made by the Portfolio to counterparties are recorded as a component of interest expense on the Statement of Operations. In periods of increased demand for the security, the Portfolio may receive a fee for use of the security by the counterparty, which may result in interest income to the Portfolio. The Portfolio will segregate assets determined to be liquid by the Adviser or will otherwise cover its obligations under sale-buyback transactions.

(d) Short Sales The Portfolio may enter into short sales transactions. A short sale is a transaction in which the Portfolio sells securities it may not own in anticipation of a decline in the fair value of the securities. Securities sold in short sale transactions and the interest payable on such securities, if any, are reflected as a liability on the Statement of Assets and Liabilities. The Portfolio is obligated to deliver securities at the trade price at the time the short position is covered. Possible losses from short sales may be unlimited, whereas losses from purchases cannot exceed the total amount invested.

## 6. FINANCIAL DERIVATIVE INSTRUMENTS

The following disclosures contain information on how and why the Portfolio uses financial derivative instruments, and how financial derivative instruments affect the Portfolio's financial position, results of operations and cash flows. The location and fair value amounts of these instruments on the Statement of Assets and Liabilities and the net realized gain (loss) and net change in unrealized appreciation (depreciation) on the Statement of Operations, each categorized by type of financial derivative contract and related risk exposure, are included in a table in the Notes to Schedule of Investments. The financial derivative instruments outstanding as of period end and the amounts of net realized gain (loss) and net change in unrealized appreciation (depreciation) on financial derivative instruments during the period, as disclosed in the Notes to Schedule of Investments, serve as indicators of the volume of financial derivative activity for the Portfolio.

(a) Forward Foreign Currency Contracts The Portfolio may enter into forward foreign currency contracts in connection with settling planned purchases or sales of securities, to hedge the currency exposure associated with some or all of the Portfolio's securities or as a part of an investment strategy. A forward foreign currency contract is an agreement between two parties to buy and sell a currency at a set price on a future date. The market value of a forward foreign currency contract fluctuates with changes in foreign currency exchange rates. Forward foreign currency contracts are marked to market daily, and the change in value is recorded by the Portfolio as an unrealized gain or loss. Realized gains or losses are equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed and are recorded upon delivery or receipt of the currency. These contracts may involve market risk in excess of the unrealized gain or loss reflected on the Statement of Assets and Liabilities. In addition, the Portfolio could be exposed to risk if the counterparties are unable to meet the terms of the contracts or if the value of the currency changes unfavorably to the U.S. dollar. To mitigate such risk, cash or securities may be exchanged as collateral pursuant to the terms of the underlying contracts.

(b) Futures Contracts The Portfolio may enter into futures contracts. The Portfolio may use futures contracts to manage its exposure to the securities markets or to movements in interest rates and currency values. The primary risks associated with the use of futures contracts are the imperfect correlation between the change in market value of the securities held by the Portfolio and the prices of futures contracts and the possibility of an illiquid market. Futures contracts are valued based upon their quoted daily settlement prices. Upon entering into a futures contract, the Portfolio is required to deposit with its futures broker an amount of cash, U.S. Government and Agency Obligations, or select sovereign debt, in accordance with the initial margin requirements of the broker or exchange. Futures contracts are marked to market daily and based on such movements in the price of the contracts, an appropriate payable or receivable for the change in value may be posted or collected by the Portfolio ("Futures Variation Margin"). Gains or losses are recognized but not considered realized until the contracts expire or close. Futures contracts involve, to varying degrees, risk of loss in excess of the Futures Variation Margin included within exchange traded or centrally cleared financial derivative instruments on the Statement of Assets and Liabilities.

(c) Options Contracts The Portfolio may write or purchase options to enhance returns or to hedge an existing position or future investment. The Portfolio may write call and put options on securities and financial derivative instruments it owns or in which it may invest. Writing put options tends to increase the Portfolio's exposure to the underlying instrument. Writing call options tends to decrease the Portfolio's exposure to the underlying instrument. When the Portfolio writes a call or put, an amount equal to the premium received is recorded as a liability and subsequently marked to market to reflect the current value of the option written. These liabilities are included on the Statement of Assets and Liabilities. Premiums received from writing options which expire are treated as realized gains. Premiums received from writing options which are exercised or closed are added to the proceeds or offset against amounts paid on the underlying futures, swap, security or currency transaction to determine the realized gain or loss. Certain options may be written with premiums to be determined on a future date. The premiums for these options are based upon implied volatility parameters at specified terms. The Portfolio, as a writer of an option has no control over whether the underlying instrument may be sold ("call") or purchased ("put") and as a result bears the market risk of an unfavorable change in the price of the instrument underlying the written option. There is the risk the Portfolio may not be able to enter into a closing transaction because of an illiquid market.

The Portfolio may also purchase put and call options. Purchasing call options tends to increase the Portfolio's exposure to the underlying instrument. Purchasing put options tends to decrease the Portfolio's exposure to the underlying instrument. The Portfolio pays a premium which is included as an asset on the Statement of Assets and Liabilities and subsequently marked to market to reflect the current value of the option. Premiums paid for purchasing options which expire are treated as realized losses. Certain options may be purchased with premiums to be determined on a future date. The premiums for these options are based upon implied volatility parameters at specified terms. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying investment transaction to determine the realized gain or loss when the underlying transaction is executed.

Interest Rate Swaptions The Portfolio may write or purchase interest rate swaptions which are options to enter into a pre-defined swap agreement by some specified date in the future. The writer of the swaption becomes the counterparty to the swap if the buyer exercises. The interest rate swaption agreement will specify whether the buyer of the swaption will be a fixed-rate receiver or a fixed-rate payer upon exercise.

Foreign Currency Options The Portfolio may write or purchase foreign currency options. Purchasing foreign currency options gives the Portfolio the right, but not the obligation to buy or sell the currency with specified amounts of currency and a rate of exchange that may be exercised by a certain date. These options may be used as a short or long hedge against possible variations in foreign exchange rates or to gain exposure to foreign currencies.

(d) Swap Agreements The Portfolio may invest in swap agreements. Swap agreements are bilaterally negotiated agreements between the Portfolio and a counterparty to exchange or swap investment cash flows, assets, foreign currencies or market-linked returns at specified, future intervals. Swap agreements may be privately negotiated in the over the counter market ("OTC swaps") or may be cleared through a third party, known as a central counterparty or derivatives clearing organization ("Centrally Cleared Swaps"). The Portfolio may enter into asset, credit default, cross-currency, interest rate, total return, variance and other forms of swap agreements to manage its exposure to credit, currency, interest rate, commodity, equity and inflation risk. In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Centrally Cleared Swaps are marked to market daily based upon valuations as determined from the underlying contract or in accordance with the requirements of the central counterparty or derivatives clearing organization. Changes in market value, if any, are reflected as a component of net change in unrealized appreciation (depreciation) on the Statement of Operations. Daily changes in valuation of centrally cleared swaps ("Swap Variation Margin"), if any, are included within centrally cleared financial derivative instruments on the Statement of Assets and Liabilities. OTC swap payments received or paid at the beginning of the measurement period are included on the Statement of Assets and Liabilities and represent premiums paid or received upon entering into the swap agreement to compensate for differences between the stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, interest rates, and other relevant factors). Upfront premiums received (paid) are initially recorded as liabilities (assets) and subsequently marked to market to reflect the current value of the swap. These upfront premiums are recorded as realized gains or losses on the Statement of Operations upon termination or maturity of the swap. A liquidation payment received or made at the termination of the swap is recorded as realized gain or loss on the Statement of Operations. Net periodic payments received or paid by the Portfolio are included as part of realized gains or losses on the Statement of Operations.

For purposes of applying the Portfolio's investment policies and restrictions, swap agreements are generally valued by the Portfolio at market value. In the case of a credit default swap (see below), however, in applying certain of the Portfolio's investment policies and restrictions, the Portfolio will value the credit default swap at its notional value or its full exposure value (*i.e.,* the sum of the notional amount for the contract plus the market value), but may value the credit default swap at market value for purposes of applying certain of the Portfolio's other investment policies and restrictions. For example, the Portfolio may value credit default swaps at full exposure value for purposes of the Portfolio's credit quality guidelines (if any) because such value reflects the Portfolio's actual economic exposure during the term of the credit default swap agreement. In this context, both the notional amount and the market value may be positive or negative depending on whether the Portfolio is selling or buying protection through the credit default swap. The manner in which certain securities or other instruments are valued by the Portfolio for purposes of applying investment policies and restrictions may differ from the manner in which those investments are valued by other types of investors.

Entering into these agreements involves, to varying degrees, elements of interest, credit, market and documentation risk in excess of the amounts recognized on the Statement of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of contractual terms in the agreements and that there may be unfavorable changes in interest rates.

The Portfolio's maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from the counterparty over the contract's remaining life, to the extent that amount is positive. The risk is mitigated by having a master netting arrangement between the Portfolio and the counterparty and by the posting of collateral to the Portfolio to cover the Portfolio's exposure to the counterparty.

Credit Default Swap Agreements A Portfolio may use credit default swaps on corporate, loan, sovereign, U.S. municipal or U.S. Treasury issues to provide a measure of protection against defaults of the issuers (*i.e.,* to reduce risk where a Portfolio owns or has exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood of a particular issuer's default. Credit default swap agreements involve one party making a stream of payments (referred to as the buyer of protection) to another party (the seller of protection) in exchange for the right to receive a specified return in the event that the referenced entity, obligation or index, as specified in the swap agreement, undergoes a certain credit event. As a seller of protection on credit default swap agreements, the Portfolio will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Portfolio would effectively add leverage to its portfolio because, in addition to its total net assets, the Portfolio would be subject to investment exposure on the notional amount of the swap.

If the Portfolio is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Portfolio will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. If the Portfolio is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Portfolio will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. Recovery values are estimated by market makers considering either industry standard recovery rates or entity specific factors and considerations until a credit event occurs. If a credit event has occurred, the recovery value is determined by a facilitated auction whereby a minimum number of allowable broker bids, together with a specified valuation method, are used to calculate the settlement value. The ability to deliver other obligations may result in a cheapest-to-deliver option (the buyer of protection's right to choose the deliverable obligation with the lowest value following a credit event).

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising the credit index. A credit index is a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. These indices are made up of reference credits that are judged by a poll of dealers to be the most liquid entities in the credit default swap market based on the sector of the index. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset-backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardized terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices changes periodically, usually every six months, and for most indices, each name has an equal weight in the index. The Portfolio may use credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds, which is less expensive than it would be to buy many credit default swaps to achieve a similar effect. Credit default swaps on indices are instruments for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality.

Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate, loan, sovereign, U.S. municipal or U.S. Treasury issues as of period end, if any, are disclosed in the Notes to Schedule of Investments. They serve as an indicator of the current status of payment/performance risk and represent the likelihood or risk of default for the reference entity. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values serve as the indicator of the current status of the payment/performance risk. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

The maximum potential amount of future payments (undiscounted) that the Portfolio as a seller of protection could be required to make under a credit default swap agreement equals the notional amount of the agreement. Notional amounts of each individual credit default swap agreement outstanding as of period end for which the Portfolio is the seller of protection are disclosed in the Notes to Schedule of Investments. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Portfolio for the same referenced entity or entities.

Interest Rate Swap Agreements The Portfolio is subject to interest rate risk exposure in the normal course of pursuing its investment objectives. Because the Portfolio holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To help hedge against this risk and to maintain its ability to generate income at prevailing market rates, the Portfolio may enter into interest rate swap agreements. Interest rate swap agreements involve the exchange by the Portfolio with another party for their respective commitment to pay or receive interest on the notional amount of principal. Certain forms of interest rate swap agreements may include: (i) interest rate caps, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates exceed a specified rate, or "cap", (ii) interest rate floors, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates fall below a specified rate, or "floor", (iii) interest rate collars, under which a party sells a cap and purchases a floor or vice versa in an attempt to protect itself against interest rate movements exceeding given minimum or maximum levels, (iv) callable interest rate swaps, under which the buyer pays an upfront fee in consideration for the right to early terminate the swap transaction in whole, at zero cost and at a predetermined date and time prior to the maturity date, (v) spreadlocks, which allow the interest rate swap users to lock in the forward differential (or spread) between the interest rate swap rate and a specified benchmark, or (vi) basis swaps, under which two parties can exchange variable interest rates based on different segments of money markets.

## 7. PRINCIPAL RISKS

In the normal course of business, the Portfolio trades financial instruments and enters into financial transactions where risk of potential loss exists due to such things as changes in the market (market risk) or failure or inability of the other party to a transaction to perform (credit and counterparty risk). See below for a detailed description of select principal risks. For a more comprehensive list of potential risks the Portfolio may be subject to, please see the Important Information About the Portfolio.

Market Risks The Portfolio's investments in financial derivative instruments and other financial instruments expose the Portfolio to various risks such as, but not limited to, interest rate, foreign currency, equity and commodity risks.

Interest rate risk is the risk that fixed income securities will decline in value because of an increase in interest rates. As nominal interest rates rise, the value of certain fixed income securities held by the Portfolio is likely to decrease. A nominal interest rate can be described as the sum of a real interest rate and an expected inflation rate. Interest rate changes can be sudden and unpredictable, and the Portfolio may lose money if these changes are not anticipated by Portfolio management. The Portfolio may not be able to hedge against changes in interest rates or may choose not to do so for cost or other reasons. In addition, any hedges may not work as intended.

Duration is a measure of the sensitivity of a fixed income security's market price to interest rate (*i.e.*, yield) movements that incorporates a security's yield, coupon, final maturity and call features, among other characteristics. Convexity is an additional measure of interest rate sensitivity that measures the rate of change of duration in response to changes in interest rates. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. A wide variety of factors can cause interest rates to rise (e.g., central bank monetary policies, inflation rates, general economic conditions). At present, the U.S. is experiencing historically low interest rates. The Portfolio may be subject to heightened interest rate risk because the Fed has ended its quantitative easing program and has begun, and may continue, to raise interest rates. Further, while U.S. bond markets have steadily grown over the past three decades, dealer "market making" ability has remained relatively stagnant. Given the importance of intermediary "market making" in creating a robust and active market, fixed income securities are currently facing increased volatility and liquidity risks. All of these factors, collectively and/or individually, could cause the Portfolio to lose value. If the Portfolio lost enough value, the Portfolio could face increased redemptions by shareholders, which could further impair its performance.

To the extent that the Portfolio may invest in securities and instruments that are economically tied to Russia, the Portfolio is subject to various risks such as, but not limited to political, economic, legal, market and currency risks. The risks include uncertain political and economic policies, short-term market volatility, poor accounting standards, corruption and crime, an inadequate regulatory system, and unpredictable taxation. Investments in Russia are particularly subject to the risk that further economic sanctions may be imposed by the United States and/or other countries. Such sanctions — which may impact companies in many sectors, including energy, financial services and defense, among others — may negatively impact the Portfolio's performance and/or ability to achieve its investment objective. The Russian securities market, as compared to U.S. markets, has significant price volatility, less liquidity, difficulties in obtaining accurate prices, a smaller market capitalization and a smaller number of traded securities. Settlement, clearing and registration of securities transactions are subject to risks, which may result in significant delays or problems in registering the transfer of securities, including issues with foreign nominee accounts held with custodian banks. It is possible that the ownership rights of the Portfolio could be lost through fraud or negligence. In addition, it may be difficult for the Portfolio to enforce any rights it may have in the event of loss of share registration. Adverse currency exchange rates are a risk and there may be a lack of available currency hedging instruments. Investments in Russia may be subject to the risk of nationalization or expropriation of assets. Oil, natural gas, metals, and timber account for a significant portion of Russia's exports, leaving the country vulnerable to swings in world prices.

If the Portfolio invests directly in foreign (non-U.S.) currencies or in securities that trade in, and receive revenues in, foreign (non-U.S.) currencies, or in financial derivative instruments that provide exposure to foreign (non-U.S.) currencies, it will be subject to the risk that those currencies will decline in value relative to the base currency of the Portfolio, or, in the case of hedging positions, that the Portfolio's base currency will decline in value relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, intervention (or the failure to intervene) by U.S. or foreign governments, central banks or supranational entities such as the International Monetary Fund, or by the imposition of currency controls or other political developments in the United States or abroad. As a result, the Portfolio's investments in foreign currency-denominated securities may reduce the Portfolio's returns.

The market values of equities, such as common stocks and preferred securities or equity related investments such as futures and options, have historically risen and fallen in periodic cycles and may decline due to general market conditions which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They may also decline due to factors which affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Different types of equity securities may react differently to these developments. Equity securities and equity related investments generally have greater market price volatility than fixed income securities.

**Credit and Counterparty Risks** The Portfolio will be exposed to credit risk to parties with whom it trades and will also bear the risk of settlement default. The Portfolio minimizes concentrations of credit risk by undertaking transactions with a large number of customers and counterparties on recognized and reputable exchanges, where applicable. For financial derivative instruments traded on exchanges or clearinghouses, the primary credit risk is the creditworthiness of the Portfolio's clearing broker or the exchange or clearinghouse itself. The Portfolio could lose money if the issuer or guarantor of a fixed income security, or the counterparty to a financial derivative instruments contract, repurchase agreement or a loan of portfolio securities, is unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. Securities and financial derivative instruments are subject to varying degrees of credit risk, which may be reflected in credit ratings.

Similar to credit risk, the Portfolio may be exposed to counterparty risk, or the risk that an institution or other entity with which the Portfolio has unsettled or open transactions will default. PIMCO, as the Adviser, minimizes counterparty risks to the Portfolio through a number of ways. Prior to entering into transactions with a new counterparty, the PIMCO Counterparty Risk Committee conducts an extensive credit review of such counterparty and must approve the use of such counterparty. Furthermore, pursuant to the terms of the underlying contract, to the extent that unpaid amounts owed to the Portfolio exceed a predetermined threshold, such counterparty shall advance collateral to the Portfolio in the form of cash or securities equal in value to the unpaid amount owed to the Portfolio. The Portfolio may invest such collateral in securities or other instruments and will typically pay interest to the counterparty on the collateral received. If the unpaid amount owed to the Portfolio subsequently decreases, the Portfolio would be required to return to the counterparty all or a portion of the collateral previously advanced.

All transactions in listed securities are settled/paid for upon delivery using approved counterparties. The risk of default is considered minimal, as delivery of securities sold is only made once the Portfolio has received payment. Payment is made on a purchase once the securities have been delivered by the counterparty. The trade will fail if either party fails to meet its obligation.

**Master Netting Arrangements** The Portfolio may be subject to various netting arrangements ("Master Agreements") with select counterparties. Master Agreements govern the terms of certain transactions, and reduce the counterparty risk associated with relevant transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Each type of Master Agreement governs certain types of transactions. Different types of transactions may be traded out of different legal entities or affiliates of a particular organization, resulting in the need for multiple agreements with a single counterparty. As the Master Agreements are specific to unique operations of different asset types, they allow the Portfolio to close out and net its total exposure to a counterparty in the event of a default with respect to all the transactions governed under a single Master Agreement with a counterparty. For financial reporting purposes the Statement of Assets and Liabilities generally presents derivative assets and liabilities on a gross basis, which reflects the full risks and exposures prior to netting.

Master Agreements can also help limit counterparty risk by specifying collateral posting arrangements at pre-arranged exposure levels. Under most Master Agreements, collateral is routinely transferred if the total net exposure to certain transactions (net of existing collateral already in place) governed under the relevant Master Agreement with a counterparty in a given account exceeds a specified threshold, which typically ranges from zero to $250,000 depending on the counterparty and the type of Master Agreement. United States Treasury Bills and

U.S. dollar cash are generally the preferred forms of collateral, although other forms of AAA rated paper or sovereign securities may be used depending on the terms outlined in the applicable Master Agreement. Securities and cash pledged as collateral are reflected as assets on the Statement of Assets and Liabilities as either a component of Investments at value (securities) or Deposits with counterparty. Cash collateral received is not typically held in a segregated account and as such is reflected as a liability on the Statement of Assets and Liabilities as Deposits from counterparty. The market value of any securities received as collateral is not reflected as a component of NAV. The Portfolio's overall exposure to counterparty risk can change substantially within a short period, as it is affected by each transaction subject to the relevant Master Agreement.

Master Repurchase Agreements and Global Master Repurchase Agreements (individually and collectively "Master Repo Agreements") govern repurchase, reverse repurchase, and sale-buyback transactions between the Portfolio and select counterparties. Master Repo Agreements maintain provisions for, among other things, initiation, income payments, events of default, and maintenance of collateral. The market value of transactions under the Master Repo Agreement, collateral pledged or received, and the net exposure by counterparty as of period end are disclosed in the Notes to Schedule of Investments.

Master Securities Forward Transaction Agreements ("Master Forward Agreements") govern certain forward settling transactions, such as To-Be-Announced securities, delayed-delivery or sale-buyback transactions by and between the Portfolio and select counterparties. The Master Forward Agreements maintain provisions for, among other things, initiation and confirmation, payment and transfer, events of default, termination, and maintenance of collateral. The market value of forward settling transactions, collateral pledged or received, and the net exposure by counterparty as of period end is disclosed in the Notes to Schedule of Investments.

Customer Account Agreements and related addenda govern cleared derivatives transactions such as futures, options on futures, and cleared over the counter ("OTC") derivatives. Such transactions require posting of initial margin as determined by each relevant clearing agency which is segregated in an account at a futures commission merchant ("FCM") registered with the Commodity Futures Trading Commission ("CFTC"). In the United States, counterparty risk is significantly reduced as creditors of an FCM cannot have a claim to Portfolio assets in the segregated account. Additionally, portability of exposure in the event of an FCM default scenario further reduces risk to the Portfolio. Variation margin, or changes in market value, are exchanged daily, but may not be netted between futures and cleared OTC derivatives. The market value or accumulated unrealized appreciation (depreciation), initial margin posted, and any unsettled variation margin as of period end is disclosed in the Notes to Schedule of Investments.

International Swaps and Derivatives Association, Inc. Master Agreements and Credit Support Annexes ("ISDA Master Agreements") govern bilateral OTC derivative transactions entered into by the Portfolio with select counterparties. ISDA Master Agreements maintain provisions for general obligations, representations, agreements, collateral and events of default or termination. Events of termination include conditions that may entitle counterparties to elect to terminate early and cause settlement of all outstanding transactions under the applicable ISDA Master Agreement. Any election to terminate early could be material to the financial statements. In limited circumstances, the ISDA Master Agreement may contain additional provisions that add counterparty protection beyond coverage of existing daily exposure if the counterparty has a decline in credit quality below a predefined level. These amounts, if any, may be segregated with a third-party custodian. The market value of OTC financial derivative instruments, collateral received or pledged, and net exposure by counterparty as of period end are disclosed in the Notes to Schedule of Investments.

## 8. FEES AND EXPENSES

(a) Investment Advisory Fee PIMCO is a majority-owned subsidiary of Allianz Asset Management of America L.P. ("Allianz Asset Management") and serves as the Adviser to the Trust, pursuant to an investment advisory contract. The Adviser receives a monthly fee from the Portfolio at an annual rate based on average daily net assets (the "Investment Advisory Fee"). The Investment Advisory Fee for all classes is charged at an annual rate of 0.25%.

(b) Supervisory and Administrative Fee PIMCO serves as administrator (the "Administrator") and provides supervisory and administrative services to the Trust for which it receives a monthly supervisory and administrative fee based on each share class's average daily net assets (the "Supervisory and Administrative Fee"). As the Administrator, PIMCO bears the costs of various third-party services, including audit, custodial, portfolio accounting, legal, transfer agency and printing costs. The Supervisory and Administrative Fee for all classes is charged at the annual rate of 0.25%.

(c) Distribution and Servicing Fees PIMCO Investments LLC ("PI"), a wholly-owned subsidiary of PIMCO, serves as the distributor ("Distributor") of the Trust's shares. The Trust has adopted an Administrative Services Plan with respect to the Administrative Class shares of the Portfolio pursuant to Rule 12b-1 under the Act (the "Administrative Plan"). Under the terms of the Administrative Plan, the Trust is permitted to compensate the Distributor, out of the Administrative Class assets of the Portfolio, in an amount up to 0.15% on an annual basis of the average daily net assets of that class, for providing or procuring through financial intermediaries administrative, recordkeeping and investor services for Administrative Class shareholders of the Portfolio.

The Trust has adopted a separate Distribution and Servicing Plan for the Advisor Class shares of the Portfolio (the "Distribution and Servicing Plan"). The Distribution and Servicing Plan has been adopted pursuant to Rule 12b-1 under the Act. The Distribution and Servicing Plan permits the

Portfolio to compensate the Distributor for providing or procuring through financial intermediaries distribution, administrative, recordkeeping, shareholder and/or related services with respect to Advisor Class shares. The Distribution and Servicing Plan permits the Portfolio to make total payments at an annual rate of up to 0.25% of its average daily net assets attributable to its Advisor Class shares.

(d) Portfolio Expenses PIMCO provides or procures supervisory and administrative services for shareholders and also bears the costs of various third-party services required by the Portfolios, including audit, custodial, portfolio accounting, legal, transfer agency and printing costs. The Trust is responsible for the following expenses: (i) taxes and governmental fees; (ii) brokerage fees and commissions and other portfolio transaction expenses; (iii) the costs of borrowing money, including interest expense; (iv) fees and expenses of the Trustees who are not "interested persons" of PIMCO or the Trust, and any counsel retained exclusively for their benefit; (v) extraordinary expense, including costs of litigation and indemnification expenses; (vi) organizational expenses; and (vii) any expenses allocated or allocable to a specific class of shares, which include service fees payable with respect to the Administrative Class Shares, and may include certain other expenses as permitted by the Trust's Multi-Class Plan adopted pursuant to Rule 18f-3 under the Act and subject to review and approval by the Trustees. The ratio of expenses to average net assets per share class, as disclosed on the Financial Highlights, may differ from the annual portfolio operating expenses per share class.

Each Trustee, other than those affiliated with PIMCO or its affiliates, receives an annual retainer of $35,000, plus $3,600 for each Board meeting attended in person, $750 for each committee meeting attended and $750 for each Board meeting attended telephonically, plus reimbursement of related expenses. In addition, the audit committee chair receives an additional annual retainer of $5,000, the valuation oversight committee lead receives an additional annual retainer of $3,250 (to the extent there are co-leads of the valuation oversight committee, the annual retainer will be split evenly between the co-leads) and the governance committee chair receives an additional annual retainer of $1,500.

These expenses are allocated on a pro rata basis to the various portfolios of the Trust according to their respective net assets except PIMCO All Asset Portfolio, which does not bear any Trustee Fees. The Trust pays no compensation directly to any Trustee or any other officer who is affiliated with the Administrator, all of whom receive remuneration for their services to the Trust from the Administrator or its affiliates.

## 9. RELATED PARTY TRANSACTIONS

The Adviser, Administrator, and Distributor are related parties. Fees payable to these parties are disclosed in Note 8 and the accrued related party fee amounts are disclosed on the Statement of Assets and Liabilities.

The Portfolio is permitted to purchase or sell securities from or to certain related affiliated portfolios under specified conditions outlined in procedures adopted by the Board. The procedures have been designed to ensure that any purchase or sale of securities by the Portfolio from or to another fund or portfolio that are, or could be, considered an affiliate by virtue of having a common investment adviser (or affiliated investment advisers), common Trustees and/or common officers complies with Rule 17a-7 under the Act. Further, as defined under the procedures, each transaction is effected at the current market price. During the period ended December 31, 2015, the Portfolio engaged in purchases and sales of securities pursuant to Rule 17a-7 under the Act (amounts in thousands):

| Purchases | Sales |
|---|---|
| $ 112,662 | $ 132,432 |

## 10. GUARANTEES AND INDEMNIFICATIONS

Under the Trust's organizational documents, each Trustee, officer, employee or other agent of the Trust (including the Trust's investment manager) is indemnified, to the extent permitted by the Act, against certain liabilities that may arise out of performance of their duties to the Portfolio. Additionally, in the normal course of business, the Portfolio enters into contracts that contain a variety of indemnification clauses. The Portfolio's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Portfolio that have not yet occurred. However, the Portfolio has not had prior claims or losses pursuant to these contracts.

## 11. PURCHASES AND SALES OF SECURITIES

The length of time the Portfolio has held a particular security is not generally a consideration in investment decisions. A change in the securities held by the Portfolio is known as "portfolio turnover." The Portfolio may engage in frequent and active trading of portfolio securities to achieve its investment objective, particularly during periods of volatile market movements. High portfolio turnover may involve correspondingly greater transaction costs to the Portfolio, including brokerage commissions or dealer mark-ups and other transaction costs on the sale of securities and reinvestments in other securities. Such sales may also result in realization of taxable capital gains, including short-term capital gains (which are generally taxed at ordinary income tax rates). The transaction costs and tax effects associated with portfolio turnover may adversely affect the Portfolio's performance. The portfolio turnover rates are reported in the Financial Highlights.

Purchases and sales of securities (excluding short-term investments) for the period ended December 31, 2015, were as follows (amounts in thousands):

| U.S. Government/Agency | | All Other | |
|---|---|---|---|
| Purchases | Sales | Purchases | Sales |
| $ 3,464,982 | $ 3,091,477 | $ 796,394 | $ 534,545 |

## 12. SHARES OF BENEFICIAL INTEREST

The Portfolio may issue an unlimited number of shares of beneficial interest with a $0.001 par value. Changes in shares of beneficial interest were as follows (shares and amounts in thousands):

| | Year Ended 12/31/2015 | | Year Ended 12/31/2014 | |
|---|---|---|---|---|
| | Shares | Amount | Shares | Amount |
| **Receipts for shares sold** | | | | |
| Institutional Class | 409 | $ 4,303 | 115 | $ 1,217 |
| Administrative Class | 24,857 | 261,154 | 34,121 | 363,560 |
| Advisor Class | 15,590 | 164,276 | 13,683 | 145,639 |
| **Issued as reinvestment of distributions** | | | | |
| Institutional Class | 30 | 308 | 57 | 607 |

As of December 31, 2015, two shareholders each owned 10% or more of the Portfolio's total outstanding shares comprising 44% of the Portfolio.

## 13. REGULATORY AND LITIGATION MATTERS

The Portfolio is not named as a defendant in any material litigation or arbitration proceedings and is not aware of any material litigation or claim pending or threatened against it.

PIMCO has received a Wells Notice from the staff of the U.S. Securities and Exchange Commission ("SEC") that relates to the PIMCO Total Return Active Exchange-Traded Fund ("BOND"), a series of PIMCO ETF Trust. The notice indicates the staff's preliminary determination to recommend that the SEC commence a civil action against PIMCO stemming from a non-public investigation relating to BOND. A Wells Notice is neither a formal allegation of wrongdoing nor a finding that any law was violated.

This matter principally pertains to the valuation of smaller sized positions in non-agency mortgage-backed securities purchased by BOND between its inception on February 29, 2012 and June 30, 2012, BOND's performance disclosures for that period, and PIMCO's compliance policies and procedures related to these matters.

The Wells process provides PIMCO with the opportunity to demonstrate to the SEC staff why it believes its conduct was appropriate, in keeping with industry standards, and that no action should be taken. PIMCO believes that this matter is unlikely to have a material adverse effect on any Portfolio or on PIMCO's ability to provide investment management services to any Portfolio.

The foregoing speaks only as of the date of this report.

## 14. FEDERAL INCOME TAX MATTERS

The Portfolio intends to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code (the "Code") and distribute all of its taxable income and net realized gains, if applicable, to shareholders. Accordingly, no provision for Federal income taxes has been made.

The Portfolio may be subject to local withholding taxes, including those imposed on realized capital gains. Any applicable foreign capital gains tax is accrued daily based upon net unrealized gains, and may be payable following the sale of any applicable investments.

In accordance with U.S. GAAP, the Adviser has reviewed the Portfolio's tax positions for all open tax years. As of December 31, 2015, the Portfolio has recorded no liability for net unrecognized tax benefits relating to uncertain income tax positions it has taken or expects to take in future tax returns.

The Portfolio files U.S. tax returns. While the statute of limitations remains open to examine the Portfolio's U.S. tax returns filed for the fiscal years ending in 2012-2014, no examinations are in progress or anticipated at this time. The Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Shares of the Portfolio currently are sold to segregated asset accounts ("Separate Accounts") of insurance companies that fund variable annuity contracts and variable life insurance policies ("Variable

Contracts"). Please refer to the prospectus for the Separate Account and Variable Contract for information regarding Federal income tax treatment of distributions to the Separate Account.

As of December 31, 2015, the components of distributable taxable earnings are as follows (amounts in thousands):

| | Undistributed Ordinary Income | Undistributed Long-Term Capital Gains | Net Tax Basis Unrealized Appreciation/ (Depreciation) [(1)] | Other Book-to-Tax Accounting Differences [(2)] | Accumulated Capital Losses [(3)] | Qualified Late-Year Loss Deferral — Capital [(4)] | Qualified Late-Year Loss Deferral — Ordinary [(5)] |
|---|---|---|---|---|---|---|---|
| PIMCO Low Duration Portfolio | $ 9,035 | $ — | $ (43,909) | $ — | $ (30,521) | $ — | $ — |

(1) Adjusted for open wash sale loss deferrals and the accelerated recognition of unrealized gain or loss on certain futures and forward contracts for federal income tax purposes. Also adjusted for differences between book and tax realized and unrealized gain (loss) on swap contracts and treasury inflation-protected securities.
(2) Represents differences in income tax regulations and financial accounting principles generally accepted in the United States of America, namely for straddle loss deferrals and distributions payable at fiscal year-end.
(3) Capital losses available to offset future net capital gains expire in varying amounts in the years shown below.
(4) Capital losses realized during the period November 1, 2015 through December 31, 2015 which the Portfolio elected to defer to the following taxable year pursuant to income tax regulations.
(5) Specified losses realized during the period November 1, 2015 through December 31, 2015, which the Portfolio elected to defer to the following taxable year pursuant to income tax regulations.

As of December 31, 2015, the Portfolio had accumulated capital losses expiring in the following years (amounts in thousands). The Portfolio will resume capital gain distributions in the future to the extent gains are realized in excess of accumulated capital losses.

| | Expiration of Accumulated Capital Losses | | |
|---|---|---|---|
| | 12/31/2016 | 12/31/2017 | 12/31/2018 |
| PIMCO Low Duration Portfolio | $ — | $ 8,599 | $ — |

Under the Regulated Investment Company Act of 2010, a Portfolio is permitted to carry forward any new capital losses for an unlimited period. Additionally, such capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term under previous law.

As of December 31, 2015, the Portfolio had the following post-effective capital losses with no expiration (amounts in thousands):

| | Short-Term | Long-Term |
|---|---|---|
| PIMCO Low Duration Portfolio | $ 13,392 | $ 8,530 |

As of December 31, 2015, the aggregate cost and the net unrealized appreciation/(depreciation) of investments for federal income tax purposes are as follows (amounts in thousands):

| | Federal Tax Cost | Unrealized Appreciation | Unrealized (Depreciation) | Net Unrealized Appreciation/ (Depreciation) [(6)] |
|---|---|---|---|---|
| PIMCO Low Duration Portfolio | $ 2,315,662 | $ 8,135 | $ (49,531) | $ (41,396) |

(6) Primary differences, if any, between book and tax net unrealized appreciation/(depreciation) on investments are attributable to open wash sale loss deferrals and treasury inflation-protected securities.

For the years ended December 31, 2015 and December 31, 2014, respectively, the Portfolio made the following tax basis distributions (amounts in thousands):

| | Fiscal Year Ended | Ordinary Income Distributions [(7)] | Long-Term Capital Gain Distributions | Return of Capital [(8)] |
|---|---|---|---|---|
| PIMCO Low Duration Portfolio | 12/31/2015 | $ 68,706 | $ — | $ — |
| | 12/31/2014 | $ 24,882 | $ — | $ — |

(7) Includes short-term capital gains, if any, distributed.
(8) A portion of the distributions made represents a tax return of capital. Return of capital distributions have been reclassified from undistributed net investment income to paid-in capital to more appropriately conform financial accounting to tax accounting.

# Report of Independent Registered Public Accounting Firm

**To the Board of Trustees of PIMCO Variable Insurance Trust and Shareholders of PIMCO Low Duration Portfolio:**

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of PIMCO Low Duration Portfolio (one of the portfolios constituting PIMCO Variable Insurance Trust, hereinafter referred to as the "Portfolio") at December 31, 2015, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Portfolio's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2015 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

# Privacy Policy[1]

The Trust[2] considers customer privacy to be a fundamental aspect of its relationships with shareholders and is committed to maintaining the confidentiality, integrity and security of its current, prospective and former shareholders' non-public personal information. The Trust has developed policies that are designed to protect this confidentiality, while allowing shareholder needs to be served.

### Obtaining Personal Information

In the course of providing shareholders with products and services, the Trust and certain service providers to the Trust, such as the Trust's investment advisers or sub-advisers ("Advisers"), may obtain non-public personal information about shareholders, which may come from sources such as account applications and other forms, from other written, electronic or verbal correspondence, from shareholder transactions, from a shareholder's brokerage or financial advisory firm, financial advisor or consultant, and/or from information captured on applicable websites.

### Respecting Your Privacy

As a matter of policy, the Trust does not disclose any non-public personal information provided by shareholders or gathered by the Trust to non-affiliated third parties, except as required or permitted by law or as necessary for such third parties to perform their agreements with respect to the Trust. As is common in the industry, non-affiliated companies may from time to time be used to provide certain services, such as preparing and mailing prospectuses, reports, account statements and other information, conducting research on shareholder satisfaction and gathering shareholder proxies. The Trust or its affiliates may also retain non-affiliated companies to market the Trust's shares or products which use the Trust's shares and enter into joint marketing arrangements with them and other companies. These companies may have access to a shareholder's personal and account information, but are permitted to use this information solely to provide the specific service or as otherwise permitted by law. In most cases, the shareholders will be clients of a third party, but the Trust may also provide a shareholder's personal and account information to the shareholder's respective brokerage or financial advisory firm and/or financial advisor or consultant.

### Sharing Information with Third Parties

The Trust reserves the right to disclose or report personal or account information to non-affiliated third parties in limited circumstances where the Trust believes in good faith that disclosure is required under law, to cooperate with regulators or law enforcement authorities, to protect its rights or property, or upon reasonable request by any fund advised by PIMCO in which a shareholder has invested. In addition, the Trust may disclose information about a shareholder or a shareholder's accounts to a non-affiliated third party at the shareholder's request or with the consent of the shareholder.

### Sharing Information with Affiliates

The Trust may share shareholder information with its affiliates in connection with servicing shareholders' accounts, and subject to applicable law may provide shareholders with information about products and services that the Trust or its Advisers, distributors or their affiliates ("Service Affiliates") believe may be of interest to such shareholders. The information that the Trust may share may include, for example, a shareholder's participation in the Trust or in other investment programs sponsored by a Service Affiliate, a shareholder's ownership of certain types of accounts (such as IRAs), information about the Trust's experiences or transactions with a shareholder, information captured on applicable websites, or other data about a shareholder's accounts, subject to applicable law. The Trust's Service Affiliates, in turn, are not permitted to share shareholder information with non-affiliated entities, except as required or permitted by law.

### Procedures to Safeguard Private Information

The Trust takes seriously the obligation to safeguard shareholder non-public personal information. In addition to this policy, the Trust has implemented procedures that are designed to restrict access to a shareholder's non-public personal information to internal personnel who need to know that information to perform their jobs, such as servicing shareholder accounts or notifying shareholders of new products or services. Physical, electronic and procedural safeguards are in place to guard a shareholder's non-public personal information.

### Information Collected from Websites

Websites maintained by the Trust or its service providers may use a variety of technologies to collect information that help the Trust and its service providers understand how the website is used. Information collected from your web browser (including small files stored on your device that are commonly referred to as "cookies") allow the websites to recognize your web browser and help to personalize and improve your user experience and enhance navigation of the website. In addition, the Trust or its Service Affiliates may use third parties to place advertisements for the Trust on other websites, including banner advertisements. Such third parties may collect anonymous information through the use of cookies or action tags (such as web beacons). The information these third parties collect is generally limited to technical and web navigation information, such as your IP address, web pages visited and browser type, and does not include personally identifiable information such as name, address, phone number or email address.

You can change your cookie preferences by changing the setting on your web browser to delete or reject cookies. If you delete or reject cookies, some website pages may not function properly.

### Changes to the Privacy Policy

From time to time, the Trust may update or revise this privacy policy. If there are changes to the terms of this privacy policy, documents containing the revised policy on the relevant website will be updated.

[1] Effective as of September 5, 2014.

[2] When distributing this Policy, the Trust may combine the distribution with any similar distribution of its investment adviser's privacy policy. The distributed, combined policy may be written in the first person (i.e., by using "we" instead of "the Trust").

## Approval of Renewal of the Amended and Restated Investment Advisory Contract, Supervision and Administration Agreement and Amended and Restated Asset Allocation Sub-Advisory Agreement

At a meeting held on August 10-11, 2015, the Board of Trustees (the "Board") of PIMCO Variable Insurance Trust (the "Trust"), including all of the Trustees who are not "interested persons" of the Trust under the Investment Company Act of 1940, as amended (the "Independent Trustees"), considered and unanimously approved the Amended and Restated Investment Advisory Contract (the "Investment Advisory Contract") between the Trust, on behalf of each of the Trust's series (the "Portfolios"), and Pacific Investment Management Company LLC ("PIMCO") for an additional one-year term through August 31, 2016. The Board also considered and unanimously approved for an additional one-year term through August 31, 2016, the Supervision and Administration Agreement (together with the Investment Advisory Contract, the "Agreements") between the Trust, on behalf of the Portfolios, and PIMCO. In addition, the Board considered and unanimously approved the renewal of the Amended and Restated Asset Allocation Sub-Advisory Agreement (the "Asset Allocation Agreement") between PIMCO, on behalf of PIMCO All Asset Portfolio and PIMCO All Asset All Authority Portfolio, each a series of the Trust, and Research Affiliates, LLC ("Research Affiliates") for an additional one-year term through August 31, 2016.

The information, material factors and conclusions that formed the basis for the Board's approvals are summarized below.

## 1. INFORMATION RECEIVED

(a) Materials Reviewed: During the course of the past year, the Trustees received a wide variety of materials relating to the services provided by PIMCO and Research Affiliates to the Trust. At each of its quarterly meetings, the Board reviewed the Portfolios' investment performance and a significant amount of information relating to Portfolio operations, including shareholder services, valuation and custody, the Portfolios' compliance program and other information relating to the nature, extent and quality of services provided by PIMCO and Research Affiliates to the Trust. In considering whether to approve the renewal of the Agreements and the Asset Allocation Agreement, the Board also reviewed supplementary information, including, but not limited to, comparative industry data with regard to investment performance, advisory and supervisory and administrative fees and expenses, financial information for PIMCO and, where relevant, Research Affiliates, information regarding the profitability to PIMCO of its relationship with the Portfolios, information about the personnel providing investment management services, other advisory services and supervisory and administrative services to the Portfolios, and information about the fees charged and services provided to other clients with similar investment mandates as the Portfolios (where applicable). In addition, the Board reviewed materials provided by counsel to the Trust and the Independent Trustees, which included, among other things, memoranda outlining legal duties of the Board in considering the continuation of the Agreements and the Asset Allocation Agreement.

(b) Review Process: In connection with the renewal of the Agreements and the Asset Allocation Agreement, the Board reviewed written materials prepared by PIMCO and, where applicable, Research Affiliates in response to requests from counsel to the Trust and the Independent Trustees. The Board requested and received assistance and advice regarding applicable legal standards from counsel to the Trust and the Independent Trustees, and reviewed comparative fee and performance data prepared at the Board's request by Lipper, Inc. ("Lipper"), an independent provider of investment company performance and fee and expense data. The Board heard oral presentations on matters related to the Agreements and the Asset Allocation Agreement and met both as a full Board and in a separate session of the Independent Trustees, without management present, at the August 10-11, 2015 meeting. The Independent Trustees also conducted a telephonic meeting with counsel to the Trust and the Independent Trustees on July 30, 2015 and executive sessions on August 10, 2015 to discuss the materials presented. In addition, the Independent Trustees requested and received from PIMCO additional information including, but not limited to, information related to profitability and comparative performance information.

The approval determinations were made on the basis of each Trustee's business judgment after consideration of all the information presented. Individual Trustees may have given different weights to certain factors and assigned various degrees of materiality to information received in connection with the approval process. In deciding to approve the renewal of the Agreements and the Asset Allocation Agreement, the Board did not identify any single factor or particular information that, in isolation, was controlling. This summary describes the most important, but not all, of the factors considered by the Board.

## 2. NATURE, EXTENT AND QUALITY OF SERVICES

(a) PIMCO, Research Affiliates, their Personnel, and Resources: The Board considered the depth and quality of PIMCO's investment management process, including: the experience, capability and integrity of its senior management and other personnel; the overall financial strength and stability of its organization; and the ability of its organizational structure to address changes in assets under management. The Board also considered the various services in addition to portfolio management that PIMCO provides under the Investment Advisory Contract. The Board noted that PIMCO makes available to its investment professionals a variety of resources and systems relating to investment management, compliance, trading, performance and portfolio accounting. The Board also noted PIMCO's commitment to investing in information technology supporting investment management and compliance, as well as PIMCO's continuing efforts to attract and retain qualified personnel and to maintain and enhance its resources and systems. The Board considered PIMCO's policies, procedures and systems to reasonably assure compliance with applicable laws and regulations and its commitment to these programs, its oversight of matters that may involve conflicts of interest between the Portfolios' investments and those of other accounts managed by PIMCO, and its efforts to keep the Trustees informed about matters relevant to the Portfolios and their shareholders. The Board also considered PIMCO's continuous investment in new disciplines and talented personnel, which has enhanced PIMCO's service to the Funds and has allowed PIMCO to introduce innovative new funds over time. In addition, the Board considered the nature and quality of services provided by PIMCO to the wholly-owned subsidiaries of applicable Portfolios.

The Trustees considered information they had received about the steps that PIMCO has taken in recent years with respect to active management of counterparty risk, such as implementing procedures requiring daily collateral adjustments and frequent communication between credit analysts and the counterparty risk committee, which oversees counterparty risk on a firm-wide basis, continually evaluating requests to add or remove approved counterparties as market needs and conditions warrant. The Trustees also considered that, over the last several years, PIMCO has continued to strengthen the process it uses to assess the financial stability of counterparties with which the Portfolios do business, to manage collateral and to protect portfolios from an unforeseen deterioration in the creditworthiness of trading counterparties. The Trustees noted that, consistent with its fiduciary duty, PIMCO executes transactions through a competitive best execution process and uses only those counterparties that meet its stringent and monitored criteria. The Trustees considered that PIMCO's collateral management team utilizes a counterparty risk system to analyze portfolio level exposure and collateral being exchanged with counterparties.

In addition, the Trustees considered new services and service enhancements that PIMCO has implemented since the Board renewed the Agreements in 2014, including, but not limited to: conducting a targeted review of quality and efficiency in the valuation process; expanding the analytical review of shareholder reports by State Street Bank and Trust Company, the Portfolios' custodian; developing a process for monthly forecasts of taxable and book income to enhance portfolio management of investment income; continuing the expansion of a proprietary performance reconciliation tool, which includes next-day comparison of daily internal performance to custodian bank performance to identify potential errors and guardrail net asset value calculations; developing and implementing the Global Process Monitor application, which includes real-time tracking and escalation protocols for critical activities; and implementing monthly cash flow reporting processes to support client and media demands for information about investor flows and assets under management data. The Trustees also considered the recent outflows from the Portfolios. The Trustees further considered whether the decline in the Portfolios' assets and the reduction in PIMCO's total assets under management materially impacted the service quality or resources available to the Portfolios. The Trustees concluded that there has been no adverse impact to service quality or resources available to the Portfolios.

Similarly, the Board considered the asset allocation services provided by Research Affiliates to the PIMCO All Asset Portfolio and PIMCO All Asset All Authority Portfolio. The Board noted that the PIMCO All Asset All Authority Portfolio recently commenced operations. The Board also considered the depth and quality of Research Affiliates' investment management and research capabilities, the experience and capabilities of its portfolio management personnel and, in particular, the experience and capabilities of Robert Arnott, Research Affiliates' principal, and the overall financial strength of the organization.

Ultimately, the Board concluded that the nature, extent and quality of services proposed to be provided by PIMCO under the Agreements and by Research Affiliates under the Asset Allocation Agreement are likely to benefit the Portfolios and their respective shareholders (as applicable).

(b) Other Services: The Board also considered the nature, extent, quality and cost of supervisory and administrative services provided by PIMCO to the Portfolios under the Supervision and Administration Agreement. The Board noted that the Supervision and Administration Agreement was approved at the August 2008 Board meeting to replace the Trust's previous Administration Agreement. The purpose of the change was to reflect the increased scope and complexity of supervisory and administrative services that PIMCO had been providing to the Trust pursuant to the Administration Agreement.

The Board considered the terms of the Supervision and Administration Agreement, under which the Trust pays for the supervisory and administrative services provided pursuant to that agreement under what is essentially an all-in fee structure (the "unified fee"). In return, PIMCO provides or procures certain supervisory and administrative services and bears the costs of various third party services required by the Portfolios, including audit, custodial, portfolio accounting, legal, transfer agency and printing costs. The Board noted that the scope and complexity of the supervisory and administrative services provided by PIMCO under the Supervision and Administration Agreement continue to increase. The Board considered PIMCO's provision of these services and its supervision of the Trust's third party service providers to assure that these service providers continue to provide a high level of service relative to alternatives available in the market.

Ultimately, the Board concluded that the nature, extent and quality of the services provided by PIMCO has benefited, and will likely continue to benefit, the Portfolios and their shareholders.

## 3. INVESTMENT PERFORMANCE

The Board received and examined information from PIMCO concerning the Portfolios' performance, as available, over short- and long-term periods ended May 31, 2015 and other performance data, as available, over short- and long-term periods ended June 30, 2015 (the "PIMCO Report") and from Lipper concerning the Portfolios' performance, as available, over short- and long-term periods ended May 31, 2015 (the "Lipper Report").

The Board considered information regarding both the short-term and long-term investment performance of each Portfolio relative to its peer group and relevant benchmark index as provided to the Board in advance of each of its quarterly meetings throughout the year, including the PIMCO Report and Lipper Report, which were provided in advance of the August 10-11, 2015 meeting. The Trustees noted that a majority of the Portfolios outperformed their respective Lipper medians over the three-year and longer periods ended May 31, 2015.

The Board also noted that, as of May 31, 2015, the Administrative Class of 44%, 79% and 92% of the Portfolios outperformed its Lipper category median on a net-of-fees basis over the three-year, five-year and ten-year periods, respectively. The Trustees considered that other classes of each Portfolio would have substantially similar performance to that of the Administrative Class of the relevant Portfolio on a relative basis because all of the classes are invested in the same portfolio of investments and that differences in performance among classes could principally be attributed to differences in the supervisory and administrative fees and distribution and servicing expenses of each class. The Board also considered that the investment objectives of certain of the Portfolios may not always be identical to those of the other funds in their respective peer groups and that the Lipper categories do not: separate funds based upon maturity or duration; account for the applicable Portfolios' hedging strategies; distinguish between enhanced index and actively managed equity strategies; include as many subsets as the Portfolios offer (*i.e.*, Portfolios may be placed in a "catch-all" Lipper category to which they do not properly belong); or account for certain fee waivers. The Board noted that, due to these differences, performance comparisons between certain of the Portfolios and their so-called peers may not be particularly relevant to the consideration of Portfolio performance.

The Board noted that 63% or more of the assets of the Trust had outperformed their respective benchmarks on a net-of-fees basis over the three-year, five-year and ten-year periods ending May 31, 2015 (based on the performance of the Administrative Class). The Board also noted that 8 of 14 Portfolios, representing 69% of the total assets of the Trust, had outperformed their respective benchmark indexes on a net-of-fees basis over the five-year period ending May 31, 2015. The Board also noted that, while the Lipper universe comparisons provide a valuable performance comparison reference, there are certain Portfolios that do not fit neatly into their respective Lipper classifications. The Board also discussed actions that have been taken by PIMCO to attempt to improve performance and took note of PIMCO's plans to monitor performance going forward. The Board also considered that the Trust's assets were over $20 billion as of December 31, 2014.

The Board considered PIMCO's discussion of the intensive nature of managing bond funds, noting that it requires the management of a number of factors, including: varying maturities; prepayments; collateral management; counterparty management; pay-downs; credit events; workouts; derivatives; net new issuance in the bond market; and decreased market maker inventory levels. The Board noted that in addition to managing these factors, PIMCO must also balance risk controls and strategic positions in each portfolio it manages, including the Portfolios. Despite these challenges, the Board noted that PIMCO has generated "alpha" (*i.e.*, non-market correlated excess performance) for its clients over time, including the Trust.

The Board ultimately determined, within the context of all of its considerations in connection with the Agreements, that the Trust's overall investment performance was strong, and concluded that PIMCO's performance record and process in managing the Portfolios indicates that its continued management is likely to benefit the Portfolios and their shareholders, and merits the approval of the continuation of the Agreements.

## 4. ADVISORY FEES, SUPERVISORY AND ADMINISTRATIVE FEES AND TOTAL EXPENSES

The Board considered that PIMCO seeks to price funds to scale at the outset with reference to the total expense ratios of the respective Lipper median (if available), while providing a premium for innovative investment offerings. PIMCO reported to the Board that, in proposing fees for any Portfolio or class of shares, it considers a number of factors, including the type and complexity of the services provided, the cost of providing services, the risk assumed by PIMCO in the development of products and the provision of services, the impact on potential returns from different levels of fees, the competitive marketplace for financial products, and the attractiveness of potential Portfolio returns to current and potential investors. Fees charged to or proposed for different Portfolios for advisory services and supervisory and administrative services may vary in light of these various factors. The Board also considered that PIMCO reviews the Portfolios' fee levels and carefully considers reductions where appropriate. Further, the Board noted that PIMCO believes that the growth in the Trust's assets under management over the long-term and long-term positive net flows are important indicators of proper and effective pricing.

The Board reviewed the advisory fees, supervisory and administrative fees and total expenses of the Portfolios (each as a percentage of average net assets) and compared such amounts with the average and median fee and expense levels of other similar funds. The Board also reviewed information relating to the sub-advisory fees paid to Research Affiliates with respect to applicable Portfolios, taking into account that PIMCO compensates Research Affiliates from the advisory fees paid by such Portfolios to PIMCO. With respect to advisory fees, the Board reviewed data from Lipper that compared the average and median advisory fees of other funds in a "Peer Group" of comparable funds, as well as the universe of other similar funds. The Board noted that a number of Portfolios have total expense ratios that fall below the average and median expense ratios in their Peer Group and Lipper universe. In addition, the Board noted the fee waivers in place with respect to the fees that might result from investments by applicable Portfolios in their respective wholly-owned subsidiaries.

The Board also reviewed data comparing the Portfolios' advisory fees to the standard fee rate PIMCO charges to separate accounts and as sub-adviser to other investment companies with a similar investment strategy, including differences in advisory services provided. The Board noted that advisory fees for most Portfolios were similar to the fee rates charged to separate account strategies with the same investment strategies as the Portfolios. In cases where the fees for other clients were lower than those charged to the Portfolios, the Trustees noted that the differences in fees were attributable to various factors, including differences in the advisory and other services provided by PIMCO to the Portfolios, the manner in which similar portfolios may be managed, different requirements with respect to liquidity management and the implementation of other regulatory requirements, and the fact that separate accounts may have other contractual arrangements that justify different levels of fees.

Regarding advisory fees charged by PIMCO in its capacity as sub-adviser to third-party/unaffiliated funds, the Trustees took into account that such fees may be lower than the fees charged by PIMCO to serve as adviser to the Portfolios. The Trustees also took into account that there are various reasons for any such difference in fees, including, but not limited to, the fact that PIMCO may be subject to varying levels of entrepreneurial risk and regulatory requirements, differing legal liabilities on a contract-by-contract basis and different servicing requirements when it does not serve as the sponsor of a fund and is not principally responsible for all aspects of a fund's investment program and operations as compared to when PIMCO serves as investment adviser and sponsor.

The Board considered the Portfolios' supervisory and administrative fees, comparing them to similar funds in the report supplied by Lipper. The Board also considered that as the Portfolios' business has become increasingly complex, PIMCO has provided an increasingly broad array of fund supervisory and administrative functions. In addition, the Board considered the Trust's unified fee structure, under which the Trust pays for the supervisory and administrative services it requires for one set fee and, in return, PIMCO provides or procures supervisory and administrative services and bears the costs of various third party services required by the Portfolios, including audit, custodial, portfolio accounting, legal, transfer agency and printing costs. The Board further considered that many other funds pay for these services separately, and thus it is difficult to directly compare the Trust's unified supervisory and administrative fees with the fees paid by other funds for administrative services alone. The Board also considered that the unified supervisory and administrative fee leads to Portfolio fees that are fixed, rather than variable. The Board noted that, although the unified fee structure does not have breakpoints, it implicitly reflects economies of scale by fixing the absolute level of Portfolio fees at competitive levels even if the Portfolios' operating costs rise when assets remain flat or decrease. The Board also considered that the Portfolios' unified fee structure meant that fees were not impacted by recent outflows in certain Portfolios, unlike funds without a unified fee structure, which may see increased expense ratios when fixed costs are passed through to a smaller asset base. The Board further noted that, with few exceptions, PIMCO has generally maintained Portfolio fees at the same level as implemented when the unified fee was adopted, and has reduced fees for a number of Portfolios in prior years. The Board concluded that the Portfolios' supervisory and administrative fees were reasonable in relation to the value of the services provided, including the services provided to different classes of shareholders, and that the expenses assumed contractually by PIMCO under the Supervision and Administration Agreement represent, in effect, a cap on overall Portfolio fees, which is beneficial to the Portfolios and their shareholders.

The Board considered the Portfolios' total expenses and discussed with PIMCO those Portfolios and/or classes of Portfolios that had above median total expenses. The Board noted that several Portfolios launched in recent years have been unique products that have few peers (if any), and cannot easily be grouped with comparable funds. Upon comparing the Portfolios' total expenses to other funds in the "Peer Groups" provided by Lipper, the Board found total expenses of each Portfolio to be reasonable.

The Trustees also considered the advisory fees charged to the Portfolios that operate as funds of funds (the "Funds of Funds") and the advisory services provided in exchange for such fees. The Trustees determined that such services were in addition to the advisory services provided to the underlying funds in which the Funds of Funds may invest and, therefore, such services were not duplicative of the advisory services provided to the underlying funds. The Board also considered the various fee waiver agreements in place for the Funds of Funds.

Based on the information presented by PIMCO, Research Affiliates and Lipper, members of the Board determined, in the exercise of their business judgment, that the level of the advisory fees and supervisory and administrative fees charged by PIMCO under the Agreements, as well as the total expenses of each Portfolio, are reasonable.

## 5. ADVISER COSTS, LEVEL OF PROFITS AND ECONOMIES OF SCALE

The Board reviewed information regarding PIMCO's costs of providing services to the Portfolios as a whole, as well as the resulting level of profits to PIMCO, noting that those results were lower than in the previous year due to the impact of the Portfolios' overall outflows. To the extent applicable, the Board also reviewed information regarding the portion of a Portfolio's advisory fee retained by PIMCO, following the payment of sub-advisory fees to Research Affiliates, with respect to the Portfolio. Additionally, the Board noted that profit margins with respect to the Portfolios were within the ranges, although above the median, of publicly held investment management companies reported by Lipper and Strategic Insight (an independent provider of fund industry research). The Board noted that the PIMCO's profit margin with respect to the Trust shows that the Trust is profitable, although less so than PIMCO Funds due to payments made by PIMCO to participating insurance companies. The Board also noted that it had received information regarding the structure and manner in which PIMCO's investment professionals were compensated, and PIMCO's view of the relationship of such compensation to the attraction and retention of quality personnel. The Board considered PIMCO's need to invest in technology, cyber security, information security, shareholder privacy, business continuity planning, infrastructure and staff to reinforce and offer new services and to accommodate changing regulatory requirements.

With respect to potential economies of scale, the Board noted that PIMCO shares the benefits of economies of scale with the Portfolios and their shareholders in a number of ways, including through the pricing of Portfolios to scale from inception and the enhancement of services provided to the Portfolios in return for fees paid. The Board reviewed the history of the Portfolios' fee structure. The Board considered that the Portfolios' unified fee rates had been set competitively and/or priced to scale from inception, had been held steady at that scaled competitive rate for most Portfolios as assets grew, or as assets declined in the case of some Portfolios, and continued to be competitive compared with peers. The Board also considered that the unified fee is a transparent means of informing Portfolio shareholders of the fees associated with the Portfolios, and that the Portfolios bear certain expenses that are not covered by the advisory fee or the unified fee.

The Trustees considered that the unified fee has provided inherent economies of scale because a Portfolio maintains competitive fixed unified fees even if the particular Portfolio's assets decline and/or operating costs rise. The Trustees further considered that, in contrast, breakpoints are a proxy for charging higher fees on lower asset levels and that when a fund's assets decline, breakpoints may reverse, which causes expense ratios to increase. The Trustees also considered that, unlike the Portfolios' unified fee structure, funds with "pass through" administrative fee structures may experience increased expense ratios when fixed dollar fees are charged against declining fund assets. The Trustees also considered that the unified fee protects shareholders from a rise in operating costs that may result from, among other things, PIMCO's investments in various business enhancements and infrastructure, including those referenced above. The Trustees noted that PIMCO's investments in these areas are extensive.

The Board concluded that the Portfolios' cost structures were reasonable and that the unified fee structure inherently involves the sharing of economies of scale between PIMCO and each of the Portfolios, to the benefit of their respective shareholders.

## 6. ANCILLARY BENEFITS

The Board considered other benefits received by PIMCO and its affiliates as a result of PIMCO's relationship with the Trust, including possible ancillary benefits to PIMCO's institutional investment management business due to the reputation and market penetration of the Trust. The Board also considered that affiliates of PIMCO provide distribution and shareholder services to the Portfolios and their respective shareholders, for which they may be compensated through distribution and servicing fees paid pursuant to the Portfolios' Rule 12b-1 plans or otherwise. The Board reviewed PIMCO's soft dollar policies and procedures, noting that while PIMCO has the authority to receive the benefit of research provided by broker-dealers executing portfolio transactions on behalf of the Portfolios, it has adopted a policy not to enter into contractual soft dollar arrangements.

## 7. CONCLUSIONS

Based on their review, including their consideration of each of the factors summarized above, the Independent Trustees and the Board as a whole concluded that the nature, extent and quality of the services rendered to the Portfolios by PIMCO and Research Affiliates favored the renewal of the Agreements and the Asset Allocation Agreement. The Independent Trustees and the Board as a whole concluded that the Agreements and the Asset Allocation Agreement continued to be fair and reasonable to the Portfolios and their shareholders, that the Portfolios' shareholders received reasonable value in return for the fees paid to PIMCO by the Portfolios under the Agreements and the fees paid to Research Affiliates by PIMCO under the Asset Allocation Agreement, and that the renewal of the Agreements and the Asset Allocation Agreement was in the best interests of the Portfolios and their shareholders.

# Economic & Financial Market Review

The Federal Reserve (the Fed) raised interest rates by 25 basis points in December, the first rate raise since 2006.[1] This move can be put in perspective when one considers that Facebook, Twitter, and LinkedIn were not yet public companies in 2006, and that Apple had not yet released the iPhone.

The move was based on the belief that the economy had reached full capacity in terms of the Fed's dual mandate to balance economic activity and maintain stability in inflation. The decision was largely based on the unemployment rate, which fell to 5.0 percent in November, as well as the likelihood of inflation rising back toward its 2 percent target. The forecast is a result of the transitory effects of energy prices and other "idiosyncratic" factors including medical care and non-market prices, which account for 24 percent of the Fed's preferred inflation measure.[2]

Looking forward, Chairwoman Janet Yellen stated that the Fed will assess labor market conditions and evaluate the actual pace of inflation. This is an important distinction as the December estimate of future inflation used a reversion to mean method (the theory that prices and returns eventually move back toward the average). It should be noted that the Fed went out of its way to suggest this policy would remain extremely accommodative. Currently, the market is expecting two to four rate hikes over the next year.

Missing from the statement was mention of international implications of a higher U.S. interest rate. The Fed commented previously that higher U.S. rates could lead to a stronger U.S. dollar, potentially hampering economic growth both domestically and abroad. After having appreciated in October and November, the dollar has largely held steady since the December rate rise. The dollar hit a multi-year peak against the euro following the European Central Bank actions to further ease its monetary policy on December 3, but showed little reaction to the Fed move. The bigger concern has been the impact on emerging economies, where a toxic stew of rising inflation and budget deficits created an environment of slow growth with little room for policy measures to manage the situation. Out of the leading emerging economies—the nations of Brazil, Russia, India, and China (BRIC)—only India has managed to successfully manage around a slowdown in economic growth.

A big question that has reemerged is the price of oil. The widespread market nervousness centers on the renewed oil price plunge and its negative ramifications for profits. Toward the end of the quarter, Saudi Arabia stated that it will no longer attempt to restrict the supply of oil, and stands ready to meet any additional demand, putting downward pressure on oil prices.

With this as a backdrop, 2015 will go down as a year to forget for most investors. The Dow Jones Industrial average fell slightly, and interest rates rose slightly. For the year, the S&P 500 returned 1.38 percent, with a small price loss made up for by dividend gains.

## Important Account Information

**The following information applies to all accounts shown in the annual report (unless noted):**

The line graphs on the following pages illustrate the growth of a hypothetical $10,000 investment. For each account, the illustration is based on performance of the Class 1 shares. The performance of the Class 2 shares will differ.

Investment results shown represent historical performance and do not guarantee future results. Your investment's returns and principal values will fluctuate with changes in interest rates and other market conditions so the value, when redeemed, may be worth more or less than original costs. Performance shown does not account for fees, expenses, and charges of any variable insurance contract or retirement plan. If these fees were reflected, performance would be lower. Current performance may be lower or higher than the performance shown. For more information, including the most recent month-end performance, call your financial professional, or call 800-222-5852.

* Performance assumes reinvestment of all dividends and capital gains. Extended performance is calculated based on the historical performance of the Account's oldest share class, adjusted for the fees and expenses of the share class shown. Performance does not reflect the impact of federal, state, or municipal taxes. If it did, performance would be lower.

** Performance shown for the benchmark assumes reinvestment of all dividends and distributions. Indices are unmanaged, and individuals cannot invest directly in an index.

## What contributed to or detracted from Account performance during the fiscal year?

Stock selection in the UK contributed with an overweight in Taylor Wimpey, which continues to benefit from a solid macroeconomic backdrop with rising house prices, favorable mortgage rates, limited competition to purchase land, and supportive government initiatives such as Help to Buy. Stock selection in the consumer discretionary sector contributed, led by an overweight in Pandora, which has benefited from a shift toward selling through branded concept stores and new products. Stock selection in the financials sector contributed, driven by an overweight position in CK Hutchison, due to the well-received Cheung Kong Group restructuring into CK Hutchison Holdings and Cheung Kong Property Holdings. Stock selection in Japan detracted, led by an overweight in OMRON due to weakness from solar panels and smartphone backlights, as well as concerns of weakening industrial production numbers and the Purchasing Managers Index, particularly in China, which weighed on the stock. Stock selection in the consumer discretionary sector detracted from performance, driven by an overweight position in Aryzta, the global leader of par-baked bakery goods, whose third quarter trading results with underlying growth missed expectations. An overweight position in BB Seguridade detracted from performance due in part to concerns over Brazil losing investment grade status, weighing on the stock.

| | 1-Year | 5-Year | 10-Year |
|---|---|---|---|
| **Class 1 Shares** | -3.93% | 10.45% | 6.53% |
| **Class 2 Shares** | -4.15% | 10.17% | 6.27% |

**What contributed to or detracted from Account performance during the fiscal year?**

Allocation to Kroger added to relative returns as the grocery retailer gained market share and improved earnings. Allocation to Digital Realty Trust (DLR) outperformed as a result of top and bottom-line growth and the acquisition of TelX. Allocation to Hasbro added to relative returns as a result of the profitable licensing business, which ties merchandise to box-office hits, driving growth higher than analyst expectations. Lack of allocation to General Electric detracted from relative returns as a result of the stock soaring, driven by strength in the company's core industrial businesses. Allocation to Kinder Morgan, a midstream energy company, detracted as it cut its dividend and underperformed after Moody's issued a negative outlook for its credit rating.   Allocation to integrated oil company Royal Dutch Shell detracted as a result of the fall in oil prices and a poorly received acquisition announcement for BP Group.

| | 1-Year | 5-Year | 10-Year |
|---|---|---|---|
| **Class 1 Shares** | 0.79% | 2.96% | 4.27% |
| **Class 2 Shares** | 0.67% | 2.71% | 4.01% |

**What contributed to or detracted from Account performance during the fiscal year?**

Issue selection in Fannie Mae (FNMA) securities contributed to performance. An out-of-benchmark allocation to non-agency mortgage-backed securities (RMBS) aided performance. Issue selection in Freddie Mac (FHLMC) securities contributed to performance. An out-of-benchmark allocation to agency commercial mortgage-backed securities (CMBS) was the largest detractor from performance. An out-of-benchmark allocation to non-agency commercial mortgage-backed securities (CMBS) hindered performance. An allocation to U.S. Treasury securities detracted from performance.

# Income Account

Investment Advisor: Principal Management Corporation

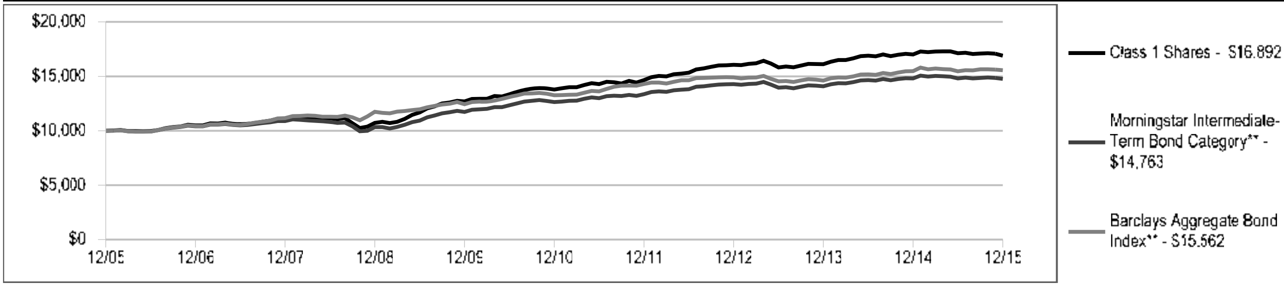
**Value of a $10,000 Investment*** December 31, 2005 - December 31, 2015



**Average Annual Total Returns*** as of December 31, 2015

| | 1-Year | 5-Year | 10-Year |
|---|---|---|---|
| **Class 1 Shares** | -0.71% | 4.14% | 5.38% |
| **Class 2 Shares** | -0.92% | 3.89% | 5.12% |

**What contributed to or detracted from Account performance during the fiscal year?**

An overweight to and issue selection in the consumer non-cyclical sector was a significant contributor to performance. An overweight to and issue selection in the banking sector was a significant contributor to performance. Issue selection in the capital goods sector was a significant contributor to performance. An overweight to and issue selection in the energy sector was the largest detractor from performance due to the impact from lower oil prices. With commodity prices falling, an overweight to and issue selection in the basic industry sector hindered performance. An underweight to and issue selection in U.S. Treasuries was a detractor from performance for the year as treasuries rallied over the year.

# LargeCap Growth Account

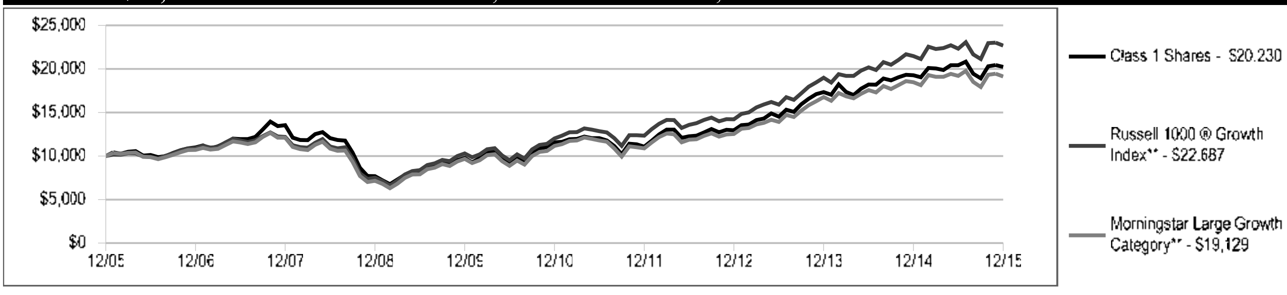
Sub-Advisor: Columbus Circle Investors

**Value of a $10,000 Investment*** December 31, 2005 - December 31, 2015



**Average Annual Total Returns*** as of December 31, 2015

| | Inception Date | 1-Year | 5-Year | 10-Year |
|---|---|---|---|---|
| **Class 1 Shares** | 05/02/1994 | 4.98% | 11.82% | 7.30% |
| **Class 2 Shares** | 01/08/2007 | 4.73% | 11.55% | 7.04% |

**What contributed to or detracted from Account performance during the fiscal year?**

Allocation to Ulta Salon contributed as a result of improved online sales, increased store traffic, expanded customer rewards programs, increased merchandise offerings, and expansion of in store boutiques such as Clinique and Lancome. Allocation to Nike contributed due to improved pricing, more efficient manufacturing, positive trends in footwear spending, market share gains, and increased sponsorship and licensing deals across all geographies. Allocation to Starbucks Corp. contributed due to comparable store sales, strong China and Japan results, and the proliferation of mobile ordering and rewards card membership. Allocation to PPG Industries Inc. detracted due to the impact of a slowing global economy, particularly in emerging markets such as China and Latin America, as well as poor weather hurting the company's paint business. Allocation to Morgan Stanley detracted as it was negatively impacted by capital markets volatility constraining its trading and underwriting businesses and the Federal Reserve's decision to postpone its initial rate increase until late 2015, which hurt net interest margins within the important wealth management franchise. Allocation to United Continental Holdings detracted due to profitability and volatility concerns and the company's CEO taking a temporary leave of absence for health reasons.

| **Class 2 Shares** | 09/09/2009 | 1.37% | 14.45% | 10.26% |

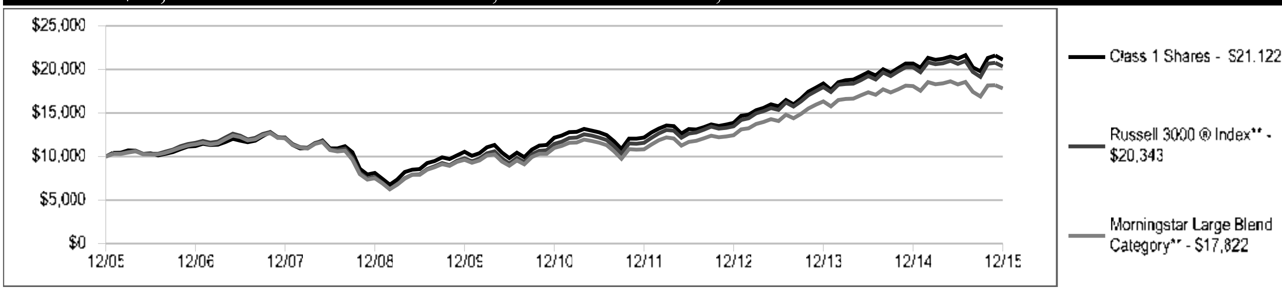
**What contributed to or detracted from Account performance during the fiscal year?**

Allocation to O'Reilly Automotive contributed as it continues to be well positioned as the average age of vehicles on the road increases. Allocation to Markel, a specialty insurance underwriter focusing on non-standard and hard to place risks, contributed. Allocation to VeriSign, which connects internet users to all .COM and .NET websites, contributed as the number of newly registered .COM and .NET domain names was higher than expected. Allocation to Colfax, a diversified industrial manufacturing company providing gas and fluid handling equipment, as well as welding related products, detracted due to weakness within end markets and the headwind of the strong U.S. dollar. Allocation to Platform Specialty detracted, as end markets for the company's products experienced cyclical weakness in the industrials and agricultural categories and the headwind attributed to the strong U.S. dollar. Allocation to CarMax, the largest used car retailer in the U.S. detracted as a result of same store sales coming in lower than forecasted.

# Principal Capital Appreciation Account

Investment Advisor: Principal Management Corporation
Sub-Advisor: Edge Asset Management, Inc.

**Value of a $10,000 Investment*** December 31, 2005 - December 31, 2015



**Average Annual Total Returns*** as of December 31, 2015

| | 1-Year | 5-Year | 10-Year |
|---|---|---|---|
| **Class 1 Shares** | 2.18% | 11.68% | 7.76% |
| **Class 2 Shares** | 1.94% | 11.40% | 7.50% |

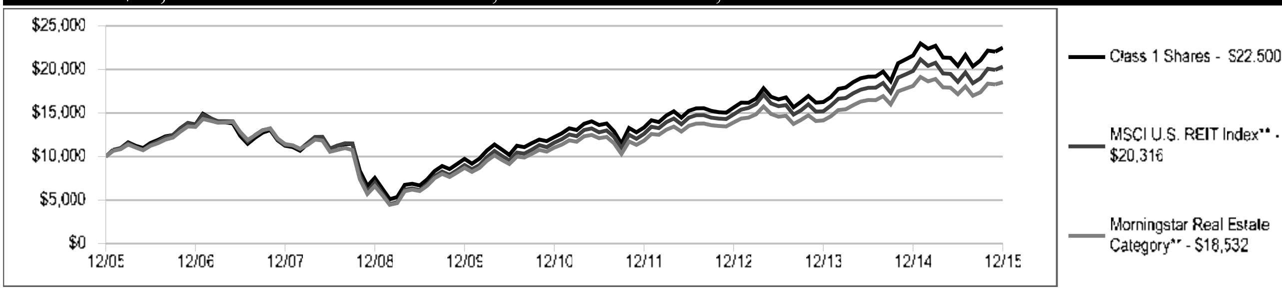
**What contributed to or detracted from Account performance during the fiscal year?**

Allocation to Starbucks contributed as the company continued to execute well operationally and financially. Allocation to NIKE in the consumer discretionary sector contributed due to earnings growth, with strong sales globally. Allocation to Adobe contributed as a result of execution of its strategic transition to the cloud, subscription growth, and an increase in recurring revenue. Allocation to Franklin Resources detracted due to weaker than expected revenues and net outflows as negative headlines and heightened volatility weighed on asset managers. Allocation to Nordstrom detracted as the retailer experienced a slowdown in sales which increased markdowns and resulted in margin compression. Allocation to Devon Energy detracted as the exploration and production (E&P) company suffered from depressed oil and gas prices.

# Real Estate Securities Account

Investment Advisor: Principal Management Corporation
Sub-Advisor: Principal Real Estate Investors, LLC.

**Value of a $10,000 Investment*** December 31, 2005 - December 31, 2015



**Average Annual Total Returns*** as of December 31, 2015

| | Inception Date | 1-Year | 5-Year | 10-Year |
|---|---|---|---|---|
| **Class 1 Shares** | 05/01/1998 | 4.21% | 12.96% | 8.45% |
| **Class 2 Shares** | 01/08/2007 | 4.00% | 12.69% | 8.18% |

**What contributed to or detracted from Account performance during the fiscal year?**

Overweight to Public Storage contributed due to strong self-storage fundamentals driven by improving pricing power, limited new supply, accretive external opportunities, and its ability to handle rising interest rates due to its shorter lease duration. An overweight to CubeSmart contributed due to more room for occupancy gain, better portfolio quality, and more needle-moving external opportunities. Allocation to Essex Property Trust contributed as apartment fundamentals remained solid in 2015, driven by controllable new supply, robust job growth, rising household formations, and tighter credit standards pushing people to rental markets. Overweight to Pebblebrook Hotel Trust detracted due to weakening demand from transient travelers and overseas visitors. Overweight to Host Hotels & Resorts, Inc. was a top detractor as the company is facing the threat of companies like Airbnb pulling demand away from the sector. Lack of allocation to UDR Inc. was a top detractor due to improving market reaction towards special activities including a two year business plan, a west coast joint venture, and pick up in assets in the District of Columbia.

# SAM Balanced Portfolio

Investment Advisor: Principal Management Corporation
Sub-Advisor: Edge Asset Management, Inc.

**Average Annual Total Returns*** as of December 31, 2015

| | 1-Year | 5-Year | 10-Year |
|---|---|---|---|
| **Class 1 Shares** | -0.81% | 7.26% | 5.89% |
| **Class 2 Shares** | -1.08% | 6.98% | 5.63% |

**What contributed to or detracted from Portfolio performance during the fiscal year?**

Principal Strategic Asset Management (SAM) Portfolios invest wholly in the shares of the underlying funds.

Strong security selection in large cap growth equities was the largest contributor to performance. Strong security selection in international emerging market equities aided performance. Strong security selection in mid cap growth equities contributed to performance. Strategic allocation to international emerging market equities was the largest detractor, as those equities lagged U.S. and international developed market equities in part due to global growth concerns and continued pressure on commodity prices. Security selection in large cap value equities detracted from performance. Strategic and tactical underweight to large cap growth equities, which outperformed other equity asset classes, detracted from performance.

| | Inception Date | 1-Year | 5-Year | 10-Year |
|---|---|---|---|---|
| **Class 1 Shares** | 05/01/1998 | -0.10% | 11.85% | 6.78% |
| **Class 2 Shares** | 02/17/2015 | -0.35% | 11.58% | 6.52% |

**What contributed to or detracted from Account performance during the fiscal year?**

Allocation to Manhattan Associates, which provides retailers and wholesalers with software systems for supply-chain management, contributed. Allocation to PRA Health Sciences, a firm that conducts clinical trials for the biotechnology and pharmaceutical industries, contributed due to solid bookings for new business and improving operating margins. Allocation to Prestige Brands Holdings, which markets over-the-counter health and personal care products, contributed as the company continued to produce better-than-expected operating results and made acquisitions of smaller companies that were well received by the market. Allocation to Office Depot, the office product retailer, detracted as a result of the Federal Trade Commission's decision to block a proposed merger with rival Staples. Allocation to DeVry Education Group, a leading provider of for-profit educational services, detracted as a result of decelerating student enrollments. Allocation to TerraForm Global, which owns wind and solar power generation facilities operated under long-term contracts with utilities, detracted as investor sentiment turned sharply negative for the industry amid fears that rising capital costs would diminish growth prospects for all companies.

[(a)] Period from February 17, 2015, date operations commenced, through December 31, 2015 for Class 2 shares.

## 1. Organization

Principal Variable Contracts Funds, Inc. (the "Fund") is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company and operates as a series fund in the mutual fund industry. The financial statements for Diversified International Account, Equity Income Account, Government & High Quality Bond Account, Income Account, LargeCap Growth Account, MidCap Account, Money Market Account, Principal Capital Appreciation Account, Real Estate Securities Account, SAM Balanced Portfolio, SAM Conservative Balanced Portfolio, SAM Conservative Growth Portfolio, SAM Flexible Income Portfolio, SAM Strategic Growth Portfolio, Short-Term Income Account, and SmallCap Blend Account, (known as the “Accounts”), are presented herein.

Each of the Accounts is an investment company and applies specialized accounting and reporting under Accounting Standards Codification Topic 946, *Financial Services - Investment Companies*. Each of the Accounts was an investment company at all times during the year. The Accounts have not provided financial support, and are not contractually required to provide financial support to any investee.

Effective February 17, 2015, the initial purchase of $10,000 of Class 2 shares of SmallCap Blend Account was made by Principal Management Corporation (the “Manager”).

Effective April 17, 2015, Principal Capital Appreciation Account acquired all the assets and assumed all the liabilities of LargeCap Blend Account II pursuant to a plan of acquisition approved by shareholders on April 10, 2015. The purpose of the acquisition was to combine two accounts managed by Principal Management Corporation with similar investment objectives, principal policies, and risks. The acquisition was accomplished by a tax-free exchange of 16,768,000 shares from LargeCap Blend Account II for 6,133,000 shares valued at $140,231,000 of Principal Capital Appreciation Account at an approximate exchange rate of .37 for Class 1 and Class 2 shares. The investment securities of LargeCap Blend Account II, with a fair value of approximately $133,987,000 and a cost of $121,386,000, were the primary asset acquired by Principal Capital Appreciation Account on April 17, 2015. For financial reporting purposes, assets received and shares issued by Principal Capital Appreciation Account were recorded at fair value; however the cost basis of the investments received from LargeCap Blend Account II was carried forward to align ongoing reporting of Principal Capital Appreciation Account. The aggregate net assets of LargeCap Blend Account II and Principal Capital Appreciation Account immediately prior to the acquisition in accordance with U.S. GAAP were approximately $140,231,000 ($1,448,000 of accumulated realized losses and $12,601,000 of unrealized appreciation) and $40,552,000, respectively. The aggregate net assets of Principal Capital Appreciation Account immediately following the acquisition were $180,783,000. In accordance with Sections 381-384 of the Internal Revenue Code, a portion of accumulated realized losses may be subject to limitation.

Assuming the acquisition had been completed on January 1, 2015, the beginning of the fiscal year for Principal Capital Appreciation Account, Principal Capital Appreciation Account’s pro forma results of operations for the year ended December 31, 2015, would have been $2,211,000 of net investment income, $139,000 of net realized and unrealized gain on investments, and $2,350,000 of net increase in net assets resulting from operations. Because the combined investment portfolios have been managed as a single integrated portfolio since the acquisition was completed, it is not practicable to separate the amounts of revenue and earnings of LargeCap Blend Account II that have been included in Principal Capital Appreciation Account’s statement of operations since April 17, 2015.

Effective April 17, 2015, SmallCap Blend Account acquired all the assets and assumed all the liabilities of SmallCap Growth Account II and SmallCap Value Account I pursuant to a plan of acquisition approved by shareholders on April 10, 2015. The purpose of the acquisition was to combine three accounts managed by Principal Management Corporation with similar investment objectives, principal policies, and risks. The acquisition was accomplished by a tax-free exchange of 4,083,000 and 7,295,000 shares from SmallCap Growth Account II and SmallCap Value Account I, respectively for 4,587,000 and 6,909,000 shares valued at $68,471,000 and $103,136,000 of SmallCap Blend Account at an approximate exchange rate of 1.13 and 1.10 for Class 1 and Class 2 shares and .95 and .94 for Class 1 and Class 2 shares, respectively. The investment securities of SmallCap Growth Account II, with a fair value of approximately $65,319,000 and a cost of $64,126,000, and the investment securities of SmallCap Value Account I with a fair value of approximately $98,490,000 and a cost of $95,480,000 were the primary asset acquired by SmallCap Blend Account on April 17, 2015. For financial reporting purposes, assets received and shares issued by SmallCap Blend Account were recorded at fair value; however the cost basis of the investments received from SmallCap Growth Account II and SmallCap Value Account I were carried forward to align ongoing reporting of SmallCap Blend Account. The aggregate net assets of SmallCap Growth Account II, SmallCap Value Account I and SmallCap Blend Account immediately prior to the acquisition in accordance with U.S. GAAP were approximately $68,471,000 ($194,000 of accumulated realized gain and $1,193,000 of unrealized appreciation) $103,136,000 ($665,000 of accumulated realized losses and $3,010,000 of unrealized appreciation) and $68,436,000, respectively. The aggregate net assets of SmallCap Blend Account immediately following the acquisition were $240,043,000. In accordance with Sections 381-384 of the Internal Revenue Code, a portion of accumulated realized losses may be subject to limitation.

**1. Organization (Continued)**

Assuming the acquisition had been completed on January 1, 2015, the beginning of the fiscal year for SmallCap Blend Account, SmallCap Blend Account's pro forma results of operations for the year ended December 31, 2015, would have been $974,000 of net investment income, $4,922,000 of net realized and unrealized loss on investments, and $3,948,000 of net decrease in net assets resulting from operations. Because the combined investment portfolios have been managed as a single integrated portfolio since the acquisition was completed, it is not practicable to separate the amounts of revenue and earnings of SmallCap Growth Account II and SmallCap Value Account I that have been included in SmallCap Blend Account's statement of operations since April 17, 2015.

All classes of shares for each of the Accounts represent interests in the same portfolio of investments, and will vote together as a single class except where otherwise required by law or as determined by the Fund's Board of Directors. In addition, the Board of Directors declares separate dividends on each class of shares.

**2. Significant Accounting Policies**

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The following summarizes the significant accounting policies of the Fund:

**Security Valuation.** SAM Balanced Portfolio, SAM Conservative Balanced Portfolio, SAM Conservative Growth Portfolio, SAM Flexible Income Portfolio, SAM Strategic Growth Portfolio (collectively, the "SAM Portfolios") invest in combinations of other series of Principal Variable Contracts Funds, Inc. and Principal Funds, Inc. (the "Underlying Funds"). Investments in the Underlying Funds are valued at the closing net asset value per share of each Underlying Fund on the day of valuation.

The Accounts (with the exception of Money Market Account and SAM Portfolios) value securities for which market quotations are readily available at fair value, which is determined using the last reported sale price. If no sales are reported, as is regularly the case for some securities traded over-the-counter, securities are valued using the last reported bid price, an evaluated bid price or, in the case of certain credit default swaps, a mean price provided by a pricing service. Pricing services use modeling techniques that incorporate security characteristics such as current quotations by broker/dealers, coupon, maturity, quality, type of issue, trading characteristics, other yield and risk factors, and other market conditions to determine an evaluated bid price. When reliable market quotations are not considered to be readily available, which may be the case, for example, with respect to restricted securities, certain debt securities, preferred stocks and foreign securities, the investments are valued at their fair value as determined in good faith by the Manager under procedures established and periodically reviewed by the Fund's Board of Directors.

The value of foreign securities used in computing the net asset value per share is generally determined as of the close of the foreign exchange where the security is principally traded. Events that occur after the close of the applicable foreign market or exchange but prior to the calculation of the Accounts' net asset values are reflected in the Accounts' net asset values and these securities are valued at fair value as determined in good faith by the Manager under procedures established and periodically reviewed by the Fund's Board of Directors. Many factors are reviewed in the course of making a good faith determination of a security's fair value, including, but not limited to, price movements in ADRs, futures contracts, industry indices, general indices and foreign currencies.

To the extent the Accounts invest in foreign securities listed on foreign exchanges which trade on days on which the Accounts do not determine their net asset values, for example weekends and other customary national U.S. holidays, the Accounts' net asset values could be significantly affected on days when the shareholders cannot purchase or redeem shares.

Certain securities issued by companies in emerging market countries may have more than one quoted valuation at any given point in time, sometimes referred to as a "local" price and a "premium" price. The premium price is often a negotiated price, which may not consistently represent a price at which a specific transaction can be effected. It is the policy of the Accounts to value such securities at prices at which it is expected those shares may be sold, and the Manager or any sub-advisor is authorized to make such determinations subject to such oversight by the Fund's Board of Directors as may occasionally be necessary.

Money Market Account values its securities, other than holdings of other publicly traded investment funds, at amortized cost as permitted under Rule 2a-7 of the Investment Company Act of 1940. Other publicly traded investment funds are valued at the funds' net asset value. Under the amortized cost method, a security is valued by applying a constant yield to maturity of the difference between the principal amount due at maturity and the cost of the security to the Account.

## 2. Significant Accounting Policies (Continued)

**Currency Translation.** Foreign holdings are translated to U.S. dollars using the exchange rate at the daily close of the New York Stock Exchange. The identified cost of the account holdings is translated at approximate rates prevailing when acquired. Income and expense amounts are translated at approximate rates prevailing when received or paid, with daily accruals of such amounts reported at approximate rates prevailing at the date of valuation. Since the carrying amount of the foreign securities is determined based on the exchange rate and market values at the close of the period, it is not practicable to isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of securities during the period.

Net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between trade and settlement dates on security transactions, and the difference between the amount of dividends and foreign withholding taxes recorded on the books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized appreciation (depreciation) on translation of assets and liabilities in foreign currencies arise from changes in the exchange rate relating to assets and liabilities, other than investments in securities, purchased and held in non-U.S. denominated currencies.

The following Account held securities denominated in foreign currencies that exceeded 5% of net assets of the Account:

| Diversified International Account | |
|---|---|
| Euro | 23.3% |
| Japanese Yen | 15.1 |
| British Pound | 13.9 |
| Canadian Dollar | 10.6 |
| Swiss Franc | 6.1 |

**Income and Investment Transactions.** The Accounts record investment transactions on a trade date basis. Trade date for senior floating rate interests purchased in the primary market is considered the date on which the loan allocations are determined. Trade date for senior floating rate interests purchased in the secondary market is the date on which the transaction is entered into. The identified cost basis has been used in determining the net realized gain or loss from investment transactions and unrealized appreciation or depreciation of investments. The Accounts record dividend income on the ex-dividend date, except dividend income from foreign securities whereby the ex-dividend date has passed; such dividends are recorded as soon as the Accounts are informed of the ex-dividend date. Interest income is recognized on an accrual basis. Discounts and premiums on securities are accreted/amortized over the lives of the respective securities. The Accounts allocate daily all income and realized and unrealized gains or losses to each class of shares based upon the relative proportion of the value of shares outstanding (number of settled shares outstanding for Money Market Account) of each class.

**Expenses.** Expenses directly attributed to a particular Account are charged to that Account. Other Account expenses not directly attributed to an Account are apportioned among the registered investment companies managed by the Manager.

Management fees are allocated daily to each class of shares based upon the relative proportion of the value of shares outstanding (number of settled shares outstanding for Money Market Account) of each class. Expenses specifically attributable to a particular class are charged directly to such class and are included separately in the statements of operations.

In addition to the expenses that each of the SAM Portfolios bears directly, each of the SAM Portfolios indirectly bear a pro rata share of the fees and expenses of the Underlying Funds in which they invest. Because the Underlying Funds have varied expense levels and each of the SAM Portfolios may own different proportions of Underlying Funds at different times, the amount of expense incurred indirectly by each of the SAM Portfolios will vary. Expenses included in the statements of operations of the SAM Portfolios reflect the expenses of each SAM Portfolio and do not include any expenses associated with the Underlying Funds.

## 2. Significant Accounting Policies (Continued)

**Dividends and Distributions to Shareholders.** With respect to Money Market Account, all net investment income and any realized gains from investment transactions are declared as dividends daily to shareholders of record as of that day. Dividends and distributions to shareholders of the other accounts are recorded on the ex-dividend date. Dividends and distributions to shareholders from net investment income and net realized gain from investments and foreign currency transactions are determined in accordance with federal tax regulations, which may differ from U.S. generally accepted accounting principles. These differences are primarily due to differing treatments for net operating losses, mortgage-backed securities, certain defaulted securities, expiring capital loss carry forwards, certain preferred securities, redemptions-in-kind, amortization of premiums and discounts, futures contracts, sales of Passive Foreign Investment Companies, losses deferred due to wash sales, swap agreements, and foreign currency transactions. Permanent book and tax basis differences are reclassified within the capital accounts based on federal tax-basis treatment; temporary differences do not require reclassification. Distributions which exceed current and accumulated earnings and profits for federal income tax purposes are reported as return of capital distributions.

Real Estate Securities Account receives distributions from holdings in Real Estate Investment Trusts ("REITs"). Distributions from REITs may be characterized as ordinary income, net capital gain, or a return of capital to the Account. The proper characterization of REIT distributions is generally not known until after the end of each calendar year. As such, estimates must be used in reporting the character of its income and distributions for financial statement purposes.

**Federal Income Taxes.** No provision for federal income taxes is considered necessary because each account is qualified as a "regulated investment company" under the Internal Revenue Code and intends to distribute each year substantially all of its net investment income and realized capital gains to shareholders.

Management evaluates tax positions taken or expected to be taken in the course of preparing the Accounts' tax returns to determine whether it is "more likely than not" that each tax position would be sustained upon examination by a taxing authority based on the technical merits of the position. Tax positions not deemed to meet the more likely than not threshold would be recorded as a tax benefit or expense in the current year. During the year ended December 31, 2015, the Accounts did not record any such tax benefit or expense in the accompanying financial statements. The statute of limitations remains open for the fiscal years from 2012-2015. No examinations are in progress at this time.

**Foreign Taxes.** Certain of the Accounts are subject to foreign income taxes imposed by certain countries in which they invest. Foreign income taxes are accrued by the Accounts as a reduction of income. These amounts are shown as withholding tax on foreign dividends on the statements of operations. In consideration of recent decisions rendered by European courts, the Funds have filed additional tax reclaims for taxes withheld in prior years. Due to the uncertainty and timing of these reclaims, a corresponding receivable will only be recorded when both the amount is known and there are no significant uncertainties regarding collectability.

Gains realized upon disposition of certain foreign securities held by the Accounts may be subject to capital gains tax, payable prior to repatriation of sale proceeds. The tax is computed on certain net realized gains and, if any, is shown on the statement of operations. Realized losses in excess of gains may be carried forward to offset future gains. In addition, the Accounts accrue an estimated deferred tax liability for future gains on certain foreign securities. Any accrued tax liability is shown on the statement of assets and liabilities. At December 31, 2015, Diversified International Account had no foreign tax refund receivable and had a deferred tax liability of $27,000 relating to foreign securities.

## 3. Operating Policies

**Borrowings.** Pursuant to an exemptive order issued by the Securities and Exchange Commission, the Accounts and other registered investment companies managed by the Manager may participate in an interfund lending facility ("Facility"). The Facility allows the Accounts to borrow money from or loan money to the other participants. Loans under the Facility are made to handle unusual and/or unanticipated short-term cash requirements. Interest paid and received on borrowings is the average of the current repurchase agreement rate and the bank loan rate (the higher of (i) the Federal Funds Rate or (ii) the One Month LIBOR rate plus 1.00%). During the year ended December 31, 2015, Diversified International Account, Government & High Quality Bond Account, MidCap Account, Real Estate Securities Account, Short-Term Income Account, and SmallCap Blend Account each borrowed from the Facility. Diversified International Account, Equity Income Account, Government & High Quality Bond Account, Income Account, LargeCap Growth Account, MidCap Account, Real Estate Securities Account, Short-Term Income Account, and SmallCap Blend Account each loaned to the Facility. The interest expense associated with these borrowings is included in other expenses on the statements of operations. The interest received is included in interest on the statements of operations. There were no outstanding borrowings as of December 31, 2015.

**3. Operating Policies (Continued)**

In addition, the Accounts participate with other registered investment companies managed by the Manager in an unsecured joint line of credit with a bank which allows the participants to borrow up to $75 million, collectively. Borrowings are made solely to facilitate the handling of unusual and/or unanticipated short-term cash requirements. Interest is charged to each participant, based on its borrowings, at a rate equal to the higher of the Federal Funds Rate or the One Month LIBOR rate plus 1.00%. Additionally, a commitment fee is charged at an annual rate of .10% on the amount of the line of credit. The Accounts did not borrow against the line of credit during the year ended December 31, 2015.

**Counterparties.** The Accounts may be exposed to counterparty risk, or the risk that another party with which the Accounts have unsettled or open transactions will fail to perform on their commitment. To the extent that unpaid amounts owed to the Accounts exceed a predetermined threshold agreed to with the counterparty, such counterparty shall advance collateral to the Accounts in the form of cash or cash equivalents equal in value to the unpaid amount owed to the Accounts. If the unpaid amount owed to the Accounts subsequently decreases, the Accounts would be required to return all or a portion of the collateral.

Master Agreements may also help limit counterparty risk by specifying collateral posting arrangements at pre-arranged exposure levels. Under the Master Agreements, collateral is routinely transferred if the total net exposure to certain transactions governed under the relevant master agreement with a counterparty exceeds a specified threshold.

The financial instruments that are subject to Master Agreements or similar agreements may include right of setoff provisions. Derivative instruments include provisions to setoff positions covered under the agreements with the same counterparties and provisions to setoff positions outside of the agreements with the same counterparties in the event of default by one of the parties. Derivative instruments also include collateral provisions. Collateral received and pledged are generally settled daily with each counterparty.

**Futures Contracts.** The Accounts are subject to equity price risk, interest rate risk, and foreign currency exchange rate risk in the normal course of pursuing their investment objectives. The Accounts (with the exception of Money Market Account and SAM Portfolios) may enter into futures contracts to hedge against changes in or to gain exposure to, change in the value of equities, interest rates and foreign currencies. Initial margin deposits are made by cash deposits or segregation of specific securities as may be required by the exchange on which the transaction was conducted. Pursuant to the contracts, an account agrees to receive from or pay to the broker, an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as “variation margin” and are recorded by the account as a variation margin receivable or payable on financial derivative instruments. During the period the futures contracts are open, daily changes in the fair value of the contracts are recognized as unrealized gains or losses. These unrealized gains or losses are included as a component of net unrealized appreciation (depreciation) of investments on the statements of assets and liabilities. When the contracts are closed, the account recognizes a realized gain or loss equal to the difference between the proceeds from, or cost of, the closing transaction and the account’s cost basis in the contract. There is minimal counterparty credit risk to the Accounts because futures are exchange traded and the exchange’s clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default.

**Illiquid Securities.** Illiquid securities generally cannot be sold or disposed of in the ordinary course of business (within seven calendar days) at approximately the value at which each of the Accounts has valued the investments. This may have an adverse effect on each of the Accounts’ ability to dispose of particular illiquid securities at fair value and may limit each of the Accounts’ ability to obtain accurate market quotations for purposes of valuing the securities.

**Indemnification.** Under the Fund’s by-laws, present and past officers, directors and employees are indemnified against certain liabilities arising out of the performance of their duties. In addition, in the normal course of business, the Fund may enter into a variety of contracts that may contain representations and warranties which provide general indemnifications. The Fund’s maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund.

**Joint Trading Account.** Certain of the Accounts may, pursuant to an exemptive order issued by the Securities and Exchange Commission, transfer uninvested funds into a joint trading account. The order permits the participating accounts’ cash balances to be deposited into a single joint account along with the cash of other registered investment companies managed by the Manager. These balances may be invested in one or more short-term instruments or repurchase agreements that are collateralized by U.S. government securities. Earnings from the joint trading account are allocated to each of the Accounts based on their pro rata participating ownership interest in the joint trading account.

**3. Operating Policies (Continued)**

**Mortgage Dollar Rolls.** Certain of the Accounts have entered into mortgage-dollar-roll transactions on “to-be-announced” securities (“TBA’s”), in which the Account sells mortgage-backed securities and simultaneously agrees to purchase similar securities in the future at a predetermined price. The proceeds of the securities sold in mortgage-dollar-roll transactions are invested in additional securities. The Account forgoes principal and interest paid on the securities, and is compensated by interest earned on the proceeds of the initial sale and by a lower price on the securities to be repurchased. The Accounts treat mortgage-dollar-roll transactions as purchases and sales; as such, these transactions may increase the Accounts' portfolio turnover ratio. Amounts to be received or paid in connection with open mortgage-dollar-rolls are included in Investment securities sold and Investment securities purchased on the statements of assets and liabilities.

**Rebates.** Subject to best execution, the Accounts may direct certain portfolio transactions to brokerage firms that, in turn, have agreed to rebate a portion of the related brokerage commission to the account in cash. Commission rebates are included as a component of realized gain from investment transactions in the statements of operations.

**Repurchase Agreements.** The Accounts may invest in repurchase agreements that are fully collateralized, typically by U.S. government or U.S. government agency securities. It is the Accounts’ policy that its custodian takes possession of the underlying collateral securities. The fair value of the collateral is at all times at least equal to the total amount of the repurchase obligation. In the event of default on the obligation to repurchase, the Accounts have the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. In the event the seller of a repurchase agreement defaults, the Accounts could experience delays in the realization of the collateral.

**Restricted Securities.** Certain of the Accounts may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult.

**Senior Floating Rate Interests.** The Accounts may invest in senior floating rate interests (bank loans). Senior floating rate interests hold the most senior position in the capital structure of a business entity (the “Borrower”), are typically secured by specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by subordinated debtholders and stockholders of the Borrower. Senior floating rate interests are typically structured and administered by a financial institution that acts as the agent of the lenders participating in the senior floating rate interest. Senior floating rate interests are typically rated below-investment-grade, which means they are more likely to default than investment-grade loans. A default could lead to non-payment of income which would result in a reduction of income to the account and there can be no assurance that the liquidation of any collateral would satisfy the Borrower’s obligation in the event of non-payment of scheduled interest or principal payments, or that such collateral could be readily liquidated.

Senior floating rate interests pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. These base lending rates are generally the prime rate offered by a designated U.S. bank or the London InterBank Offered Rate (LIBOR) or the prime rate offered by one or more major United States banks.

Senior floating rate interests generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for the Borrower to repay, prepayments of senior floating rate interests may occur. As a result, the actual remaining maturity of senior floating rate interests may be substantially less than stated maturities shown in the schedules of investments.

In connection with the Senior floating rate interests, the Accounts may also enter into unfunded loan commitments (“commitments”). All or a portion of the commitments may be unfunded. The Accounts are obligated to fund these commitments at the borrower’s discretion. Therefore, the Accounts must have funds sufficient to cover its contractual obligation. These unfunded loan commitments which are marked to market daily, are footnoted in the schedules of investments, shown as a separate line item called unrealized gain or loss on unfunded loan commitments on the statements of assets and liabilities. As of December 31, 2015, the Accounts had no unfunded loan commitments outstanding.

## 3. Operating Policies (Continued)

**To Be Announced Securities.** The Accounts may trade portfolio securities on a "to-be-announced" ("TBA") or when-issued basis. In a TBA or when-issued transaction, the account commits to purchase or sell securities for which all specific information is not known at the time of the trade. Securities purchased on a TBA or when-issued basis are not settled until they are delivered to the account, normally 15 to 30 days later. These transactions are subject to market fluctuations and their current value is determined in the same manner as for other portfolio securities.

**Underlying Funds.** The performance and risks of each Principal LifeTime Account, SAM Portfolio, Diversified Balanced Account, Diversified Balanced Managed Volatility Account, Diversified Growth Account, Diversified Growth Managed Volatility Account, and Diversified Income Account (singly, "a fund of funds" and collectively, "the funds of funds") directly correspond to the performance and risks of the underlying funds in which the fund of funds invest. By investing in many underlying funds, the funds of funds have partial exposure to the risks of many different areas of the market. The more a fund of funds allocates to stock funds, the greater the expected risk.

An underlying fund to a fund of funds may experience relatively large redemptions or purchases as the fund of funds periodically reallocates or rebalances its assets. These transactions may accelerate the realization of taxable income if sales of portfolio securities result in gains and could increase transaction costs. In addition, when a fund of funds reallocates or redeems significant assets away from an underlying fund, the loss of assets to the underlying fund could result in increased expense ratios for that fund.

The Manager is the advisor to the Principal LifeTime Accounts, SAM Portfolios, Diversified Balanced Account, Diversified Balanced Managed Volatility Account, Diversified Growth Account, Diversified Growth Managed Volatility Account, Diversified Income Account, and each of the underlying funds. Principal Global Investors, LLC ("PGI") is Sub-Advisor to the Principal LifeTime Accounts and Edge Asset Management, Inc. ("Edge") is the Sub-Advisor to the SAM Portfolios. Either PGI or Edge also serves as Sub-Advisor to some or all of the underlying funds. The Manager, PGI, and Edge are committed to minimizing the potential impact of underlying fund risk on underlying funds to the extent consistent with pursuing the investment objectives of the fund of funds which it manages. Each may face conflicts of interest in fulfilling its responsibilities to all such funds.

As of December 31, 2015, the Principal LifeTime Accounts, Multi-Asset Income Account, SAM Portfolios, Diversified Balanced Account, Diversified Balanced Managed Volatility Account, Diversified Growth Account, Diversified Growth Managed Volatility Account, and Diversified Income Account owned the following percentages, in the aggregate, of the outstanding shares of the underlying funds listed below:

| Account | Total Percentage of Outstanding Shares Owned | Account | Total Percentage of Outstanding Shares Owned |
|---|---|---|---|
| Equity Income Account | 34.84% | MidCap Account | 13.47% |
| Government & High Quality Bond Account | 41.03 | Short-Term Income Account | 9.51 |
| Income Account | 96.07 | | |

## 3. Operating Policies (Continued)

**U.S. Government Agencies or Government-Sponsored Enterprises.** Certain of the Accounts may invest in U.S. Government agencies or government-sponsored enterprises. U.S. Government securities are obligations of, and in certain cases, guaranteed by, the U.S. Government or its agencies. The U.S. Government does not guarantee the net asset value of the Accounts' shares. Some U.S. Government securities such as treasury bills, notes and bonds, and securities guaranteed by the Government National Mortgage Association ("GNMA") are supported by the full faith and credit of the U.S. Government. Other securities, such as those of the Federal Home Loan Bank are supported by the right of the issuer to borrow from the U.S. Department of the Treasury. Still other securities, such as those of the Federal National Mortgage Association ("FNMA") are supported by the discretionary authority of the U.S. Government to purchase the agency's obligations.

Government related guarantors (those not backed by the full faith and credit of the United States Government) include FNMA and the Federal Home Loan Mortgage Corporation ("FHLMC"). FNMA is a government sponsored corporation the common stock of which is owned entirely by private stockholders. FNMA purchases conventional residential mortgages from a list of approved seller/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks, credit unions, and mortgage bankers. Pass-through securities issued by FNMA are guaranteed as to the timely payment of principal and interest by FNMA, but are not backed by the full faith and credit of the U.S. Government. FHLMC issues Participation Certificates which are pass-through securities, each representing an undivided interest in a pool of residential mortgages. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but Participation Certificates are not backed by the full faith and credit of the U.S. Government.

**Derivatives.** The following table provides information about where in the statements of operations information about derivatives can be found (amounts shown in thousands):

| Derivatives not accounted for as hedging instruments | Location of Gain or (Loss) on Derivatives Recognized in Statement of Operations | Realized Gain or (Loss) on Derivatives Recognized in Statement of Operations | Change in Unrealized Appreciation/(Depreciation) of Derivatives Recognized in Statement of Operations |
|---|---|---|---|
| **SmallCap Blend Account** | | | |
| Equity contracts | Net realized gain (loss) from Futures contracts/Change in unrealized appreciation/(depreciation) of Futures contracts | $ 49 | $ (38) |

Long equity futures contracts are used to obtain market exposure for the cash balances that are maintained by certain of the Accounts and the notional values of the futures contracts will vary in accordance with the changing cash balances. The level of derivative activity disclosed in the schedules of investments is representative of the level of derivative activity used in the Accounts throughout the year ended December 31, 2015.

## 4. Fair Value

Fair value is defined as the price that the Accounts would receive upon selling a security in a timely transaction to an independent buyer in the principal or most advantageous market of the security at the measurement date. In determining fair value, the Accounts use various valuation approaches, including market, income and/or cost approaches. A hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available.

Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Accounts. Unobservable inputs are inputs that reflect the Accounts own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

●Level 1 – Quoted prices are available in active markets for identical securities as of the reporting date. The type of securities included in Level 1 includes listed equities and listed derivatives.

●Level 2 – Other significant observable inputs (including quoted prices for similar investments, interest rates, prepayments speeds, credit risk, etc.). Investments which are generally included in this category include corporate bonds, senior floating rate interests, and municipal bonds.

●Level 3 – Significant unobservable inputs (including the Accounts' assumptions in determining the fair value of investments). Investments which are generally included in this category include certain corporate bonds and certain mortgage backed securities.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the market place, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Accounts in determining fair value is greatest for instruments categorized in Level 3.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Fair value is a market based measure considered from the perspective of a market participant who holds the asset rather than an entity specific measure. Therefore, even when market assumptions are not readily available, the Account's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. The Accounts use prices and inputs that are current as of the measurement date.

Investments which are generally included in the Level 3 category are primarily valued using quoted prices from brokers and dealers participating in the market for these investments. These investments are classified as Level 3 investments due to the lack of market transparency and market corroboration to support these quoted prices. Valuation models may be used as the pricing source for other investments classified as Level 3. Valuation models rely on one or more significant unobservable inputs such as prepayment rates, probability of default, or loss severity in the event of default. Significant increases in any of those inputs in isolation would result in a significantly lower fair value measurement.

The fair values of these entities are dependent on economic, political and other considerations. The values of the investments may be affected by significant changes in the economic conditions, changes in government policies, and other factors (e.g., natural disasters, accidents, conflicts, etc.).

## 4. Fair Value (Continued)

Fair value of these investments is determined in good faith by the Manager under procedures established and periodically reviewed by the Account's Board of Directors. The Manager has established a Valuation Committee of senior officers and employees, with the responsibility of overseeing the pricing and valuation of all securities, including securities where market quotations are not readily available. The Valuation Committee meets monthly and reports directly to the Board of Directors. The Pricing Group who reports to the Valuation Committee relies on the established Pricing Policies to determine fair valuation. Included in the Pricing Policies is an overview of the approved valuation technique established for each asset class. The Pricing Group will consider all appropriate information available when determining fair valuation.

The Pricing Group relies on externally provided valuation inputs to determine the value of Level 3 securities. Security values are updated as new information becomes available. Valuation data and changes in valuation amounts are reviewed on a daily basis based on specified criteria for the security, asset class, and other factors. In addition, valuation data is periodically compared to actual transactions executed by the Accounts (i.e., purchases/sales) and differences between transaction prices and prior period valuation data are investigated based on specified tolerances.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those instruments. For example, short-term securities held in Money Market Account are valued using amortized cost, as permitted under Rule 2a-7 of the Investment Company Act of 1940. Generally, amortized cost approximates the current fair value of these securities, but because the value is not obtained from a quoted price in an active market, such securities are reflected as Level 2.

The beginning of the period timing recognition has been adopted for the significant transfers between levels of each Account's assets and liabilities. There were no significant purchases, sales, or transfers into or out of Level 3, except as noted in the Level 3 roll forward. There were no transfers between Level 1 and Level 2 as of December 31, 2015.

The following is a summary of the inputs used as of December 31, 2015 in valuing the Accounts' securities carried at value (amounts shown in thousands):

| Account | Level 1 - Quoted Prices | Level 2 - Other Significant Observable Inputs | Level 3 - Significant Unobservable Inputs | Totals (Level 1,2,3) |
|---|---|---|---|---|
| **Diversified International Account** | | | | |
| **Common Stocks** | | | | |
| Basic Materials | $ — | $ 7,505 | $ — | $ 7,505 |
| Communications | 1,009 | 31,604 | — | 32,613 |
| Consumer, Cyclical | 10,638 | 38,576 | — | 49,214 |
| Consumer, Non-cyclical | 7,436 | 39,060 | — | 46,496 |
| Energy | 6,699 | 8,379 | — | 15,078 |
| Financial | 15,243 | 55,838 | — | 71,081 |
| Industrial | 4,057 | 24,128 | — | 28,185 |
| Technology | — | 14,898 | — | 14,898 |
| Utilities | — | 7,328 | — | 7,328 |
| **Investment Companies*** | 895 | — | — | 895 |
| **Preferred Stocks** | | | | |
| Basic Materials | — | 610 | — | 610 |
| **Total investments in securities** | $ 45,977 | $ 227,926 | $ — | $ 273,903 |

*For additional detail regarding sector classifications, please see the Schedules of Investments
**Futures are valued at the unrealized appreciation/(depreciation) of the instrument.

The changes in investments measured at fair value for which Level 3 inputs have been used to determine fair value are as follows (amounts in thousands):

| | Value December 31, 2014 | Realized Gain/ (Loss) | Accrued Discounts/ Premiums and Change in Unrealized Gain/(Loss) | Purchases | Proceeds from Sales | Transfers into Level 3* | Transfers Out of Level 3** | Value December 31, 2015 | Net Change in Unrealized Appreciation/(Depreciation) on Investments Held at December 31, 2015 |
|---|---|---|---|---|---|---|---|---|---|
| **Short-Term Income Account** | | | | | | | | | |
| **Bonds** | $ 2,909 | $ — | $ — | $ — | $ — | $ — | $ (2,909) | $ — | $ — |
| | $ 2,909 | $ — | $ — | $ — | $ — | $ — | $ (2,909) | $ — | $ — |

*Securities are transferred into Level 3 for a variety of reasons including, but not limited to:
1. Securities where trading has been halted,
2. Securities that have certain restrictions on trading,
3. Instances in which a security is not priced by pricing services
**Securities are transferred out of Level 3 for a variety of reasons including, but not limited to:
1. Securities where trading resumes,
2. Securities where trading restrictions have expired,
3. Instances in which a price becomes available from a pricing service

At the end of the period, there were no other Accounts which had a significant Level 3 balance. During the period, there were no significant purchases, sales or transfers into or out of Level 3, except as noted above.

## 5. Management Agreement and Transactions with Affiliates

**Management Services.** The Fund has agreed to pay investment advisory and management fees to the Manager (wholly owned by Principal Financial Services, Inc.) computed at an annual percentage rate of each account's average daily net assets. A portion of the management fee is paid by Principal Management Corporation to the sub-advisor of each of the Accounts, some of which are affiliates of the Manager. The annual rate paid by the SAM Portfolios is based upon the aggregate average daily net assets ("aggregate net assets") of the SAM Portfolios. The investment advisory and management fee schedule for the SAM Portfolios is .25% of aggregate net assets up to the first $1 billion and .20% of aggregate net assets over $1 billion. The annual rates used in this calculation for each of the other Accounts are as follows:

| | Net Assets of Accounts (in millions) | | | | |
|---|---|---|---|---|---|
| | First $100 | Next $100 | Next $100 | Next $100 | Thereafter |
| Equity Income Account | .60% | .55% | .50% | .45% | .40% |
| MidCap Account | .65 | .60 | .55 | .50 | .45 |
| Money Market Account | .50 | .45 | .40 | .35 | .30 |
| Real Estate Securities Account | .90 | .85 | .80 | .75 | .70 |
| SmallCap Blend Account | .85 | .80 | .75 | .70 | .65 |

| | Net Assets of Accounts (in millions) | | | | |
|---|---|---|---|---|---|
| | First $250 | Next $250 | Next $250 | Next $250 | Thereafter |
| Diversified International Account | .85% | .80% | .75% | .70% | .65% |

| | Net Assets of Account (in millions) | | |
|---|---|---|---|
| | First $200 | Next $300 | Over $500 |
| Short-Term Income Account | .50% | .45% | .40% |

| | Net Assets of Account (in millions) | |
|---|---|---|
| | First $500 | Over $500 |
| Principal Capital Appreciation Account | .625% | .50% |

| | Net Assets of Account | | | | |
|---|---|---|---|---|---|
| | First $500 million | Next $500 million | Next $1 billion | Next $1 billion | Over $3 billion |
| LargeCap Growth Account | .68% | .63% | .61% | .56% | .51% |

| | Net Assets of Accounts (in billions) | |
|---|---|---|
| | First $2 | Over $2 |
| Government & High Quality Bond Account | .50% | .45% |
| Income Account | .50 | .45 |

The Manager has contractually agreed to reduce Short-Term Income Account's expenses by .01% through the period ended April 30, 2016.

In addition, the Manager has voluntarily agreed to limit Money Market Account's expenses to the extent necessary to maintain a 0% yield. The voluntary limit may be terminated at any time.

Amounts owed to the Accounts under the terms of the expense limitation agreements are reflected in the statement of assets and liabilities as expense reimbursement from Manager and are settled monthly.

**Distribution and Shareholder Servicing Fees.** Class 2 shares of the Accounts bear distribution fees. The fee is computed at an annual rate of the average daily net assets attributable to Class 2 shares of each of the Accounts. Distribution fees are paid to Principal Funds Distributor, Inc., the principal distributor of the Accounts. A portion of the distribution fees may be paid to other selling dealers for providing certain services. The annual rate for Class 2 shares is .25%.

Effective June 9, 2015, Principal Funds Distributor, Inc. has contractually agreed to limit Money Market Account's distribution fees attributable to Class 2 shares through April 30, 2016. The limit will maintain the level of distribution fees not to exceed 0% for Class 2 shares. Prior to June 9, 2015, the expense limit was voluntary.

## 5. Management Agreement and Transactions with Affiliates (Continued)

**Affiliated Ownership.** At December 31, 2015, Principal Life Insurance Company (an affiliate of the Manager) and/or one or more separate accounts sponsored by Principal Life Insurance Company owned shares of the Accounts as follows (amounts in thousands):

| | Class 1 | Class 2 |
|---|---|---|
| Diversified International Account | 19,777 | 15 |
| Equity Income Account | 11,907 | 47 |
| Government & High Quality Bond Account | 16,090 | 99 |
| Income Account | 57 | 2 |
| LargeCap Growth Account | 4,191 | 17 |
| MidCap Account | 9,471 | — |
| Money Market Account | 280,986 | 1,381 |
| Principal Capital Appreciation Account | 6,003 | 29 |
| Real Estate Securities Account | 7,153 | 78 |
| SAM Balanced Portfolio | 46,024 | 258 |
| SAM Conservative Balanced Portfolio | 16,400 | 263 |
| SAM Conservative Growth Portfolio | 9,238 | 324 |
| SAM Flexible Income Portfolio | 15,491 | 363 |
| SAM Strategic Growth Portfolio | 6,961 | 89 |
| Short-Term Income Account | 56,681 | 306 |
| SmallCap Blend Account | 14,876 | 59 |

## 6. Investment Transactions

For the year ended December 31, 2015, the cost of investment securities purchased and proceeds from investment securities sold (not including short-term investments) by the Accounts were as follows (amounts shown in thousands):

| | Purchases | Sales |
|---|---|---|
| Diversified International Account | $170,500 | $324,370 |
| Equity Income Account | 61,164 | 105,914 |
| Government & High Quality Bond Account | 55,988 | 59,714 |
| Income Account | 26,273 | 38,233 |
| LargeCap Growth Account | 56,742 | 65,464 |
| MidCap Account | 178,887 | 252,768 |
| Principal Capital Appreciation Account | 28,205 | 41,183 |
| Real Estate Securities Account | 36,856 | 45,763 |
| SAM Balanced Portfolio | 232,172 | 284,513 |
| SAM Conservative Balanced Portfolio | 61,869 | 63,219 |
| SAM Conservative Growth Portfolio | 103,081 | 88,320 |
| SAM Flexible Income Portfolio | 58,808 | 60,165 |
| SAM Strategic Growth Portfolio | 109,270 | 90,729 |
| Short-Term Income Account | 119,457 | 215,856 |
| SmallCap Blend Account | 109,283 | 118,458 |

For the year ended December 31, 2015, the cost of U.S. government securities purchased and proceeds from U.S. government securities sold (not including short-term investments) by the Accounts were as follows (amounts shown in thousands):

| | Purchases | Sales |
|---|---|---|
| Government & High Quality Bond Account | $ 10,095 | $ 16,185 |
| Income Account | 6,446 | 18 |
| Short-Term Income Account | — | 1,999 |

## 6. Investment Transactions (Continued)

Diversified International Account and Short-Term Income Account had in-kind-redemptions during the year ended December 31, 2015. The in-kind-redemptions resulted in distributions of securities with a value of $84,478,000 and $77,560,000 and realized gains of $17,143,000 and $106,000, respectively. The realized gain is included in net realized gain (loss) from investment transactions on the statement of operations.

## 7. Federal Tax Information

**Distributions to Shareholders.** The federal income tax character of distributions paid for the years ended December 31, 2015 and December 31, 2014 were as follows (amounts in thousands):

| | Ordinary Income | | Long-Term Capital Gain* | | Section 1250 Gain^ | |
|---|---|---|---|---|---|---|
| | 2015 | 2014 | 2015 | 2014 | 2015 | 2014 |
| Diversified International Account | $ 7,420 | $ 10,568 | $ — | $ — | $ — | $ — |
| Equity Income Account | 14,128 | 15,602 | — | — | — | — |
| Government & High Quality Bond Account | 9,988 | 12,602 | 404 | — | — | — |
| Income Account | 11,813 | 12,657 | — | — | — | — |
| LargeCap Growth Account | 173 | 666 | — | — | — | — |
| MidCap Account | 3,428 | 3,262 | 70,945 | 57,283 | — | — |
| Principal Capital Appreciation Account | 482 | 2,271 | 2,910 | 5,052 | — | — |
| Real Estate Securities Account | 2,450 | 2,399 | 4,755 | — | 239 | — |
| SAM Balanced Portfolio | 26,872 | 29,328 | 64,637 | 130,737 | — | — |
| SAM Conservative Balanced Portfolio | 7,193 | 7,045 | 10,039 | 18,925 | — | — |
| SAM Conservative Growth Portfolio | 6,858 | 5,041 | 19,168 | 35,293 | — | — |
| SAM Flexible Income Portfolio | 8,698 | 9,416 | 5,225 | 12,090 | — | — |
| SAM Strategic Growth Portfolio | 5,459 | 4,097 | 17,641 | 35,588 | — | — |
| Short-Term Income Account | 4,459 | 4,274 | — | — | — | — |
| SmallCap Blend Account | 476 | 224 | 6,648 | 1,866 | — | — |

* The Accounts designate these distributions as long-term capital gain dividends per IRC Sec. 852(b)(3)(C) in the 20-percent group (which may be taxed at a 20-percent rate, a 15-percent rate or a 0-percent rate, depending on the shareholder's taxable income).

^ Unrecaptured Section 1250 gains are gains from the sale of depreciable property that are subject to a maximum tax rate of 25%.

For U.S. federal income tax purposes, short-term capital gain distributions are considered ordinary income distributions.

## 7. Federal Tax Information (Continued)

**Distributable Earnings.** As of December 31, 2015, the components of distributable earnings on a federal tax basis were as follows (amounts in thousands):

| | Undistributed Ordinary Income | Undistributed Long-Term Capital Gains | Accumulated Losses | Net Unrealized Appreciation (Depreciation) | Other Temporary Differences* | Total Accumulated Earnings (Deficit) |
|---|---|---|---|---|---|---|
| Diversified International Account | $ 5,956 | $ — | $(97,737) | $ 24,287 | $ — | $ (67,494) |
| Equity Income Account | 14,477 | 26,547 | — | 178,614 | — | 219,638 |
| Government & High Quality Bond Account | 9,147 | — | (22,657) | (2,887) | (60) | (16,457) |
| Income Account | 10,626 | — | (1,973) | 404 | — | 9,057 |
| LargeCap Growth Account | 284 | — | (12,361) | 27,541 | — | 15,464 |
| MidCap Account | 2,759 | 100,852 | — | 173,434 | — | 277,045 |
| Money Market Account | — | — | (8) | — | — | (8) |
| Principal Capital Appreciation Account | 1,744 | 1,187 | — | 31,117 | — | 34,048 |
| Real Estate Securities Account | 2,560 | 13,725 | — | 44,714 | — | 60,999 |
| SAM Balanced Portfolio | 16,569 | 48,124 | — | 49,469 | — | 114,162 |
| SAM Conservative Balanced Portfolio | 5,225 | 7,819 | — | 5,240 | — | 18,284 |
| SAM Conservative Growth Portfolio | 4,022 | 15,685 | — | 11,878 | — | 31,585 |
| SAM Flexible Income Portfolio | 7,106 | 4,130 | — | 5,901 | — | 17,137 |
| SAM Strategic Growth Portfolio | 3,369 | 12,907 | — | 2,114 | — | 18,390 |
| Short-Term Income Account | 3,579 | — | (16,882) | (1,004) | (24) | (14,331) |
| SmallCap Blend Account | 620 | 8,408 | — | (354) | — | 8,674 |

*Represents book-to-tax accounting differences.

**Capital Loss Carryforwards.** For federal income tax purposes, capital loss carryforwards are losses that can be used to offset future capital gains of an account. At December 31, 2015, the following Accounts had approximate net capital loss carryforwards as follows (amounts in thousands):

| | Net Capital Loss Carryforward Expiring In: | | | No Expiration | | |
|---|---|---|---|---|---|---|
| | 2016 | 2017 | 2018 | Short-Term | Long-Term | Total |
| Diversified International Account | $ — | $ 97,737 | $ — | $ — | $ — | $ 97,737 |
| Government & High Quality Bond Account | 18,770 | 3,887 | — | — | — | 22,657 |
| Income Account | — | 389 | 1,584 | — | — | 1,973 |
| LargeCap Growth Account | — | 12,361 | — | — | — | 12,361 |
| Money Market Account | 4 | 4 | — | — | — | 8 |
| Short-Term Income Account | 8,447 | 8,298 | — | 137 | — | 16,882 |

Capital losses generated in taxable years beginning after the enactment date of the Regulated Investment Company Modernization Act of 2010, December 22, 2010, will be carried forward with no expiration and with the character of the loss retained. These capital losses must be fully utilized before the pre-enactment capital loss carryforwards listed in the table above.

## 7. Federal Tax Information (Continued)

As of December 31, 2015, the following Accounts utilized capital loss carryforwards as follows (amounts in thousands):

| | Utilized |
|---|---|
| Diversified International Account | $ 13,070 |
| Equity Income Account | 3,348 |
| Income Account | 1,409 |
| LargeCap Growth Account | 4,958 |
| Money Market Account | 1 |

**Late-Year Losses.** A regulated investment company may elect to treat any portion of its qualified late-year loss as arising on the first day of the next taxable year. Qualified late-year losses are certain capital and ordinary losses which occur during the portion of the Account's taxable year subsequent to October 31. For the taxable year ended December 31, 2015, the Accounts do not plan to defer any late-year losses.

**Reclassification of Capital Accounts.** The Accounts may record reclassifications in their capital accounts. These reclassifications have no impact on the total net assets of the Accounts. The reclassifications are a result of permanent differences between GAAP and tax accounting. Adjustments are made to reflect the impact these items have on current and future distributions to shareholders. Therefore, the source of the Accounts' distributions may be shown in the accompanying Statement of Changes in Net Assets as from net investment income, from net realized gains on investments or from capital depending on the type of book and tax differences that exist. For the year ended December 31, 2015, the Accounts recorded reclassifications as follows (amounts in thousands):

| | Accumulated Undistributed Net Investment Income | Accumulated Net Realized Gain on Investments | Paid in Capital |
|---|---|---|---|
| Diversified International Account | $ 411 | $ (17,215) | $ 16,804 |
| Equity Income Account | (2,171) | 2,172 | (1) |
| Government & High Quality Bond Account | 1,152 | (1,152) | — |
| Income Account | 1,060 | (1,060) | — |
| MidCap Account | (117) | 117 | — |
| Principal Capital Appreciation Account | — | (1,102) | 1,102 |
| Short-Term Income Account | — | (106) | 106 |
| SmallCap Blend Account | 45 | (150) | 105 |

## 7. Federal Tax Information (Continued)

**Federal Income Tax Basis.** At December 31, 2015, the net federal income tax unrealized appreciation (depreciation) and federal tax cost of investments held by the Accounts were as follows (amounts in thousands):

| | Unrealized Appreciation | Unrealized (Depreciation) | Net Unrealized Appreciation (Depreciation) | Cost for Federal Income Tax Purposes |
|---|---|---|---|---|
| Diversified International Account | $ 40,890 | $ (16,453) | $ 24,437 | $ 249,466 |
| Equity Income Account | 202,458 | (23,844) | 178,614 | 357,968 |

*(a) Non-Income Producing Security*

*(b) Fair value of these investments is determined in good faith by the Manager under procedures established and periodically reviewed by the Board of Directors. At the end of the period, the fair value of these securities totaled $2,524 or 0.98% of net assets.*

*(c) Variable Rate. Rate shown is in effect at December 31, 2015.*

*(d) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At the end of the period, the value of these securities totaled $30,571 or 11.89% of net assets.*

*(e) Perpetual security. Perpetual securities pay an indefinite stream of interest, but they may be called by the issuer at an earlier date.*

*(f) Security is Illiquid. At the end of the period, the value of these securities totaled $2,524 or 0.98% of net assets.*

*(g) Payment in kind; the issuer has the option of paying additional securities in lieu of cash.*

*(a) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At the end of the period, the value of these securities totaled $164,091 or 57.58% of net assets.*
*(b) Variable Rate. Rate shown is in effect at December 31, 2015.*
*(c) Credit support indicates investments that benefit from credit enhancement or liquidity support provided by a third party bank, institution, or government agency.*
*(d) Security issued by foreign bank and denominated in USD.*

(a) Calculated based on average shares outstanding during the period.
(b) Total return does not reflect charges attributable to separate accounts. Inclusion of these charges would reduce the amounts shown.
(c) Reflects Manager's contractual expense limit.
(d) Period from February 17, 2015 date operations commenced, through December 31, 2015
(e) Total return amounts have not been annualized.
(f) Computed on an annualized basis.

The Board of Directors and Shareholders
Principal Variable Contracts Funds, Inc.

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Diversified International Account, Equity Income Account, Government & High Quality Bond Account, Income Account, LargeCap Growth Account, MidCap Account, Money Market Account, Principal Capital Appreciation Account, Real Estate Securities Account, SAM Balanced Portfolio, SAM Conservative Balanced Portfolio, SAM Conservative Growth Portfolio, SAM Flexible Income Portfolio, SAM Strategic Growth Portfolio, Short-Term Income Account, and SmallCap Blend Account (16 of the portfolios constituting Principal Variable Contracts Funds, Inc. (collectively, the "Funds")), as of December 31, 2015, and the related statements of operations for the year then ended, statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the periods indicated therein. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Funds' internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2015, by correspondence with the custodian, agent banks, transfer agent of the affiliated funds, and brokers or by other appropriate auditing procedures where replies from brokers or agent banks were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of each of the funds listed above constituting portfolios within Principal Variable Contracts Funds, Inc. at December 31, 2015, and the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended, and their financial highlights for each of the periods indicated therein in conformity with U.S. generally accepted accounting principles.

Ernst & Young LLP

Minneapolis, Minnesota
February 17, 2016

As a shareholder of Principal Variable Contracts Funds, Inc. you incur ongoing costs, including management fees; distribution fees; and other fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in Principal Variable Contracts Funds, Inc. and to compare these costs with the ongoing costs of investing in other mutual funds. As a shareholder of SAM Balanced Portfolio, SAM Conservative Balanced Portfolio, SAM Conservative Growth Portfolio, SAM Flexible Income Portfolio, or SAM Strategic Growth Portfolio, your fund will indirectly bear its pro rata share of the expenses incurred by the investment companies in which the fund invests. These expenses are not included in the fund's annualized expense ratio used to calculate the expenses paid in this example. If they were, the expenses paid would be higher. Expenses shown below and on the following pages do not account for fees, expenses and charges of any variable insurance contract or retirement plan. If these fees had been reflected, expenses would have been higher.

The example is based on an investment of $1,000 invested at the beginning of the period and held for the period (July 1, 2015 to December 31, 2015).

**Actual Expenses**

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

**Hypothetical Example for Comparison Purposes**

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on each account's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the account's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in Principal Variable Contracts Funds, Inc. and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds.

| | Beginning Account Value July 1, 2015 | Ending Account Value December 31, 2015 | Expenses Paid During Period July 1, 2015 to December 31, 2015[(a)] | Annualized Expense Ratio |

[(a)] Expenses are equal to a fund's annualized expense ratio multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).

## FUND DIRECTORS AND OFFICERS

Under Maryland law, a Board of Directors oversees the Fund. The Directors have financial or other relevant experience and meet several times during the year to review contracts, Fund activities and the quality of services provided to the Fund. Each director also has the same position with Principal Funds, Inc. which is also sponsored by Principal Life Insurance Company. Each director holds office for an indefinite term or until reaching age 72. Directors considered to be "interested persons" as defined in the Investment Company Act of 1940, as amended, as shown below are considered to be interested because of an affiliation with the Manager and Principal Life Insurance Company.

**The following directors are considered not to be "interested persons" as defined in the 1940 Act**

| Name, Position Held with the Fund, Year of Birth | Principal Occupation(s) During past 5 years | Number of Portfolios in Fund Complex Overseen by Director | Other Directorships Held by Director During Past 5 Years |
|---|---|---|---|
| Elizabeth Ballantine<br>Director since 2004<br>Member, Nominating and Governance Committee<br>1948 | Principal, EBA Associates | 120 | Durango Herald, Inc; McClatchy Newspapers, Inc. |

The 15(c) Committee assists the Board in performing the annual review of the Fund's advisory and sub-advisory agreements pursuant to Section 15(c) of the 1940 Act.

The Audit Committee selects the independent auditors for the Fund and oversees the activities of the independent auditors as well as the internal auditors. The committee also receives reports about accounting and financial matters affecting the Fund.

The Executive Committee is selected by the Board. It may exercise all the powers of the Board, with certain exceptions, when the Board is not in session. The Committee must report its actions to the Board.

The Nominating and Governance Committee selects and nominates all candidates who are not "interested persons" of the Fund for election to the Board. The committee also oversees the structure and efficiency of the Board of Directors and the committees the Board establishes.

The Operations Committee oversees the provision of administrative and distribution services to the Funds, communications with the Funds' shareholders, and provides review and oversight of the Funds' operations.

Additional information about the Fund is available in the Prospectuses dated May 1, 2015, and the Statement of Additional Information dated May 1, 2015. These documents may be obtained free of charge by writing or telephoning Principal Funds Distributor, Inc., P.O. Box 10423, Des Moines, IA 50306. Telephone 1-800-222-5852.

**PROXY VOTING POLICIES**

A description of the policies and procedures the Fund uses to determine how to vote proxies relating to portfolio securities and the results of the proxy votes for the most recent twelve months ended June 30 may be obtained free of charge by telephoning Principal Funds Distributor, Inc., at 1-800-222-5852, or at www.sec.gov.

**SCHEDULES OF INVESTMENTS**

The Fund files complete schedules of investments with the Securities and Exchange Commission as of March 31 and September 30 of each year on Form N-Q. The Fund's Form N-Q can be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. or on the Commission's website at www.sec.gov. Information on the operation of the Public Reference Room may be obtained by calling the Commission at 1-800-SEC-0330.

## BOARD CONSIDERATION OF INVESTMENT ADVISORY CONTRACTS

During the period covered by this report, the Board of Directors of Principal Variable Contracts Funds, Inc. ("PVC") approved (1) the renewal of the Management Agreement and various subadvisory agreements for all Funds; and (2) an amended and restated subadvisory agreement with Principal Global Investors, LLC ("PGI") and an amended and restated management agreement with Principal Management Corporation (the "Manager") related to the addition of the Multi-Asset Income Account.

### Annual Review and Renewal of Management Agreement and Subadvisory Agreements

At its September 16, 2015 meeting, the Board performed its annual review and renewal process relating to the Management Agreement and the Subadvisory Agreements for all Funds.

Section 15(c) of the Investment Company Act of 1940 (the "1940 Act") requires the Board, including a majority of the Directors who have no direct or indirect interest in the investment advisory agreements and who are not "interested persons" of PVC, as defined in the 1940 Act (the "Independent Directors"), annually to review and to consider the continuation of: (1) the Management Agreement between the Manager and PVC, on behalf of each of the thirty-six (36) series of PVC (each series is referred to as a "Fund"); and (2) the Subadvisory Agreements between the Manager and each of Brown Advisory, LLC; Columbus Circle Investors ("CCI"); Edge Asset Management, Inc. ("Edge"); Mellon Capital Management Corporation; Principal Global Investors, LLC ("PGI"); Principal Real Estate Investors, LLC ("Principal-REI"); Spectrum Asset Management Inc. ("Spectrum") and T. Rowe Price Associates, Inc. (collectively, the "Subadvisors"). The Management Agreement and the Subadvisory Agreements are collectively referred to as the "Advisory Agreements."

The Board, including the Independent Directors, considered the factors and reached the conclusions described below relating to the continuation of the Advisory Agreements. In evaluating the Advisory Agreements, the Board, including the Independent Directors, reviewed a broad range of information requested for this purpose by the Independent Directors, including, among other information, information regarding performance, advisory fees, total expenses, profitability from the Advisory Agreements to the Manager and information about economies of scale. The Board reviewed the materials provided and concluded that it was provided all information reasonably necessary to evaluate the Advisory Agreements.

*Nature, Extent and Quality of Services*

The Board considered the nature, quality and extent of the services provided under the Management Agreement, including administrative services. The Board considered the experience and skills of senior management leading Fund operations, the experience and skills of the personnel performing the functions under the Management Agreement and the resources made available to such personnel, the ability of the Manager to attract and retain high-quality personnel and the organizational depth and stability of the Manager. The Board concluded that appropriate resources were provided under the Management Agreement. The Board also considered that, during the periods reviewed, other than for the "Core" portions of the Funds implementing the "Core Satellite" structure and the asset allocation funds, the Manager had delegated day-to-day portfolio management responsibility to the Subadvisers. The Board noted that the Manager's process emphasizes the selection of Principal-affiliated subadvisers that are determined to be qualified under the Manager's due diligence process, but that the Manager will select an unaffiliated subadviser to manage all of a portion of a Fund's portfolio when deemed necessary or appropriate based on a consideration of the Fund's investment mandate and available expertise and resources within the Principal organization. With respect to Funds with unaffiliated Subadvisers, the Board considered the due diligence process developed by the Manager for purposes of selecting a highly qualified unaffiliated subadviser for a Fund and for monitoring and replacing unaffiliated Subadvisers. The Board concluded that this due diligence process was working well. The Board also considered the compliance program established by the Manager and the level of compliance attained by the Funds. The Board noted that they had previously reviewed the annual best execution and soft dollar reports and included those findings in their consideration of the renewal of the Advisory Agreements. Based upon all relevant factors, the Board concluded that the nature, quality and extent of the services provided by the Manager to the Funds under each Management Agreement were satisfactory.

The Board considered the nature, quality and extent of services provided under each Subadvisory Agreement. The Board considered the reputation, qualifications and background of the Subadviser, investment approach of the Subadviser, the experience and skills of investment personnel responsible for the day-to-day management of each Fund, and the resources made available to such personnel. The Board also considered the Subadvisers' compliance with investment policies and general legal compliance. In addition, the Board considered the analysis provided under the Manager's due diligence program, which resulted in the Manager recommending that each Subadvisory Agreement be continued. Based upon all relevant factors, the Board concluded that the nature, quality and extent of the services provided by the Subadvisers to the Funds under the Subadvisory Agreements are satisfactory.

### *Investment Performance*

The Board reviewed each Fund's investment performance over longer-term periods, reviewing both the investment return during the three-year period ended May 31, 2015 and the blended investment return (50%/50%) of the three- and five-year periods ended May 31, 2015, and compared those returns to various agreed-upon performance measures, including peer-group data based upon a broad-based, industry category determined by Morningstar. For Funds or Subadvisers that did not have a three-year or five-year performance history, the Board reviewed performance for a one-year or three-year period, respectively, noting that certain Funds had commenced operations recently and, accordingly, no performance information was considered. The Board also considered whether investment results were consistent with a Fund's investment objective(s) and policies. For most Funds, the Board concluded that the Fund's investment returns met acceptable levels of investment performance. There were certain Funds, and certain Subadvisers for multi-manager Funds, that had not attained during the relevant period a level of investment performance considered satisfactory by the Board. For such Funds, the Board also considered other factors, such as the longer-term performance of each such Fund. The Board considered the Manager's due diligence process for evaluating performance applied to all Funds and all Subadvisers, from which they received regular reporting, and, for unaffiliated Subadvisers, concluded that the Manager has in place an effective due diligence process to monitor investment performance, to encourage remedial action and to make changes in the Subadvisers at the appropriate time, if necessary.

### *Investment Management Fees*

The Board considered each Fund's management fee. The Board received information, based on data supplied by Lipper, comparing each Fund's (1) contractual management fee at current asset levels and at theoretical asset levels, (2) actual (after any fee waivers) management fee at average fiscal-year asset levels, (3) actual non-management fees at average fiscal-year asset levels, and (4) actual total expense ratio (including, as applicable, acquired fund fees and expenses) at average fiscal-year asset levels for Class 1 shares where available, to advisory fees and expense ratios of mutual funds in a peer group selected by Lipper ("Expense Group") and a broad-based, industry category defined by Lipper ("Expense Universe"). For Funds that did not offer Class 1 shares, the information provided was based upon Class 2 shares.

In evaluating the management fees, the Board considered a variety of factors, including the amount of the fees, breakpoints, comparison to fees of peer group funds as well as other funds managed by the Manager, subadvisory fees paid, services provided, investment performance, total net expense ratios, profitability and expense caps and fee waivers. For most Funds, actual management fees were within the third quartile or better when compared to their Expense Group. For some Funds, although actual management fees were higher than the third quartile, total net expense ratios were within the third quartile or better.

For each of the SAM Portfolios, the Board considered information from management about the Manager's unique strategic and tactical asset allocation processes employed in the management of the Fund and determined that the strategy and processes justified management fees higher than those paid by the funds in the Fund's Expense Group. For each of the SAM Portfolios, with the exception of the SAM Strategic Growth Portfolio, which is described in further detail below, the Board concluded that the Fund met performance expectations. For each of the SAM Portfolios, the Board concluded that the total expense ratio (including the expenses of the underlying funds), with the continuation of the expense caps suggested by management, was within an acceptable range.

The Board also considered that the Manager contractually agreed to continue to waive a portion of its management fee for one Fund that implemented the "Core Satellite" structure.

With specific regard to the LargeCap S&P 500 Managed Volatility Index Account, although the contractual management fee, the actual management fee and the total net expense ratio of Class 1 shares are higher than third quartile (99%, 99% and 99%, respectively) for the Expense Group, the Board concluded that the Management Agreement should be renewed, based upon all relevant factors, including that the other funds in the Expense Group did not include the additional feature of a volatility mitigation strategy and that the Fund's performance is in the second quartile for the one-year period ended May 31, 2015.

With specific regard to the SAM Strategic Growth Portfolio, although the Fund underperformed its Morningstar peer group ranking in the third quartile for the three-year period ended May 31, 2015 (73%) and the fourth quartile for the blended three- and five-year period ended May 31, 2015 (76%), the Board noted that the same unique processes were employed for all the SAM Portfolios, which over the range of portfolios over an extended period had provided superior results, and that any particular Fund may compare less favorably as to a particular group of peer funds at a point in time, in this particular case because of a higher weighting in foreign securities than the funds in the peer group. Based upon all relevant factors, including the Board's view that these processes provide value to Fund shareholders over the long term, the Board concluded that the Management Agreement should be renewed.

Considering all factors it deemed relevant, the Board concluded that the management fee schedule for each Fund was reasonable and appropriate in light of the nature, quality and extent of the services provided by the Manager and other relevant factors.

***Profitability***

The Board reviewed detailed information regarding revenues the Manager receives under the Management Agreement, as well as the estimated direct and indirect costs the Manager incurs in providing to each Fund the services described in the applicable Advisory Agreements, for the year ended December 31, 2014. The Board also considered the returns on revenue generated in connection with the payment of subadvisory fees to affiliated Subadvisors (PGI, Principal-REI, Edge, CCI, and Spectrum). The Board concluded that the management fee for each Fund was reasonable, taking into account the profitability percentages the Manager provided.

***Economies of Scale***

The Board considered whether there are economies of scale with respect to the management of each Fund and whether the Funds benefit from any such economies of scale through breakpoints in fees. The Board then reviewed the levels at which breakpoints occur and the amount of the reductions. The Board considered whether the effective management fee rate for each Fund under the Management Agreement is reasonable in relation to the asset size of such Fund. The Board concluded that the fee schedule for each Fund reflects an appropriate level of sharing of any economies of scale.

The Board noted that the management fees for the LargeCap S&P 500 Index Account, the LargeCap S&P 500 Managed Volatility Index Account, the Bond Market Index Account, the Diversified Balanced Account, the Diversified Balanced Managed Volatility Account, the Diversified Growth Account, the Diversified Growth Managed Volatility Account, the Diversified Income Account, and the LifeTime Funds do not include breakpoints. Although their management fee schedules do not include breakpoints, the Board noted that each of these Funds, other than the LargeCap S&P 500 Managed Volatility Index Account, has a relatively low basis point fee (25 basis points or less) on all Fund assets. The Board determined that no breakpoints are necessary, at this time, for the LargeCap S&P 500 Managed Volatility Index Account due to its current size.

***Subadvisory Fees, Economies of Scale and Profitability***

For each Fund the Board considered the subadvisory fees, noting that the Manager compensates each Subadviser from its own management fee, so that shareholders pay only the management fee. The Board also received industry data supplied by Lipper. The Board considered whether there are economies of scale with respect to the subadvisory services provided to each Fund and, if so, whether the subadvisory fees reflect such economies of scale through breakpoints in fees. In addition, in evaluating the subadvisory fees and the factor of profitability, with respect to unaffiliated Subadvisers, the Board considered that the subadvisory fee rate was negotiated at arm's-length between the Manager and each Subadviser. The Board considered the profitability of the affiliated Subadvisers in conjunction with its review of the profitability of the Manager.

***Other Benefits to the Manager and Subadvisers***

The Board also considered the character and amount of other incidental benefits received by the Manager and its affiliates and each Subadviser from their relationships with the Funds. The Board also considered as a part of this analysis each Subadvisor's soft dollar practices and brokerage practices. The Board concluded that management and subadvisory fees for each Fund were reasonable in light of these benefits.

***Overall Conclusions***

Based upon all of the information it considered and the conclusions it reached, the Board determined unanimously that the terms of each Advisory Agreement continue to be fair and reasonable and that the continuation of each Advisory Agreement, with the actions proposed by the Manager, is in the best interests of each Fund.

**Management Agreement and Subadvisory Agreement for Multi-Asset Income Account**

On March 10, 2015, the Board met to consider, on behalf of the newly established Multi-Asset Income Account (the "Fund"), the approval of: (1) a management agreement (the "Management Agreement") between PVC, for the Fund, and the Manager; and (2) a subadvisory agreement (the "Subadvisory Agreement") between the Manager and PGI (the "Subadviser"). (The Management Agreement and the Subadvisory Agreement are together referred to as the "Advisory Agreements.")

Based upon its review, the Board concluded that it was in the best interests of the Fund to approve the Advisory Agreements. In reaching this conclusion, no single factor was determinative in the Board's analysis, but rather the Board considered a variety of factors.

With respect to the Management Agreement, the Board considered, among other factors, that the Manager has a long-term relationship with PVC funds and has demonstrated a commitment to support the PVC funds. The Board concluded that a long-term relationship with a capable, conscientious adviser is in the best interests of the Fund. The Board considered various factors, including the following, and made certain findings and conclusions with regard thereto, in approving the Advisory Agreements.

***Nature, Quality and Extent of Services***

The Board considered the nature, quality and extent of services to be provided under the Management Agreement, including administrative services. The Board noted that, in connection with the 2014 annual renewal of the management agreements for the other PVC funds and the funds of Principal Fund, Inc. ("PFI") (collectively, the "Principal Funds"), the Board had: (1) reviewed the services provided by the Manager to the other Principal Funds under the management agreements; (2) considered the experience and skills of senior management leading fund operations, the experience and skills of the personnel performing the functions under the management agreements and the resources made available to such personnel, the ability of the Manager to attract and retain high-quality personnel, and the organizational depth and stability of the Manager and concluded that appropriate resources were provided under the management agreements for the Principal Funds; (3) considered the program developed by the Manager for recommending, monitoring and replacing subadvisers for the Principal Funds and concluded that this due diligence process was working well; and (4) considered the compliance program established by the Manager for the Principal Funds and the level of compliance attained by the Principal Funds. Based upon all relevant factors, the Board concluded that the nature, quality and extent of the services to be provided by the Manager to the Fund under the Management Agreement are expected to be satisfactory.

The Board considered the nature, quality and extent of services to be provided under the Subadvisory Agreement. The Board considered the reputation, qualifications and background of the Subadviser, investment approach of the Subadviser, the experience and skills of the Subadviser's investment personnel who would be responsible for the day-to-day management of the Fund, and the resources made available to such personnel. The Board noted that the Subadviser currently provides subadvisory services for other Principal Funds, including certain underlying PFI funds in which the Fund will invest its assets, and that the Board had reviewed and had approved for renewal those subadvisory agreements at its September 2014 Board meeting. In addition, the Board considered the Manager's program for recommending, monitoring and replacing subadvisers and that the Manager recommended the Subadviser based upon that program. Based upon all relevant factors, the Board concluded that the nature, quality and extent of the services to be provided by the Subadviser to the Fund under the Subadvisory Agreement are expected to be satisfactory.

***Investment Performance***

As the Fund is a newly created series, the Board did not review performance of the Fund since no track record was available. The Fund is a fund-of-funds, so the Board reviewed back-tested one-year, three-year, five-year and since-inception (May 1, 2004) performance returns as of December 31, 2014 of the proposed strategy for the Fund, assuming that the Fund was invested in the underlying PFI funds that were selected at the time of the Board meeting for investment and using the neutral fund allocation model. The Board reviewed these back-tested performance returns as compared to a relevant benchmark index and to a relevant Morningstar category. The historical performance of the underlying PFI funds used as part of the back-tested performance were as follows:

- historical one-year and since-inception (December 28, 2012) performance as of December 31, 2014 of PFI Global Opportunities Fund;
- historical one-year, three-year, five-year and since-inception (October 1, 2007) performance as of December 31, 2014 of PFI Global Real Estate Fund;
- historical one-year, three-year, five-year and since-inception (October 1, 2009) performance as of December 31, 2014 of Principal Real Estate Investors, LLC's Yield Oriented Total Return strategy (the same strategy used by PFI Real Estate Debt Income Fund, which began operations on December 31, 2014);
- historical one-year, three-year, five-year and ten-year performance as of December 31, 2014 of PFI Preferred Securities Fund;
- historical one-year, three-year, five-year and ten-year performance as of December 31, 2014 of PFI High Yield Fund; and
- historical one-year, three-year, five-year and since-inception (December 15, 2008) performance as of December 31, 2014 of PFI Global Diversified Income Fund.

The Board reviewed the performance of each of the underlying PFI funds (or, in one case, a composite with an investment strategy similar to the portfolio strategy of the underlying PFI fund), as compared to the performance of a relevant benchmark and a relevant Morningstar category for each fund.

The Board concluded, based on the information provided, that the Subadviser is well qualified to manage the Account.

***Fees, Economies of Scale and Profitability.***

The Board considered the Fund's proposed management and subadvisory fees. With respect to the proposed management fee, the Board considered the fees proposed to be paid to the Subadviser. The Board also received information from the Manager, based on data supplied by Lipper Inc., comparing the proposed management fee to advisory fees of funds in the same peer group. The Board also considered whether there are economies of scale with respect to the services to be provided to the Fund under the Management Agreement. The Board concluded that, although the proposed management fee schedule does not include breakpoints, the Manager's fee schedule is appropriate at currently anticipated asset levels.

With respect to the subadvisory fees proposed to be paid to the Subadviser, the Board noted that the Manager compensates the Subadviser from its own management fee so that shareholders pay only the management fee. The Board considered whether there are economies of scale with respect to the subadvisory services to be provided under the Subadvisory Agreement. The Board concluded that, although the proposed subadvisory fee schedule does not include breakpoints, the Subadviser's fee schedule is appropriate at currently anticipated asset levels. The Board considered the Subadviser's representation that it does not offer other clients a lower fee for comparable services and the Manager's statement that it found the Subadviser's proposed fee to be competitive.

The Board noted that the Fund, as a fund-of-funds that will invest its assets in underlying PFI funds managed by the Manager and subadvisers affiliated with the Manager (including the Subadviser), will indirectly bear its portion of the management and subadvisory fees paid by such underlying PFI funds. The Board noted that the Board had reviewed and had approved for renewal the management and subadvisory agreements of five of the six underlying PFI funds, and that the Board had reviewed and approved the management and subadvisory agreements of the other underlying PFI fund, at its September 2014 Board meeting.

In addition, in evaluating the management and subadvisory fees, the Board considered the estimated profitability of the Fund to the Manager. The Board reviewed the anticipated expense ratio of each class of the Fund and considered that the Manager proposed to cap the total expense ratios for the classes (excluding acquired fund fees and expenses) at certain levels through April 30, 2017. On the basis of the information provided, the Board concluded that the proposed management and subadvisory fees were reasonable.

***Other Benefits***

The Board also considered the character and amount of other incidental benefits to be received by the Manager and Subadviser. The Board noted that the Subadviser will not use soft dollars given the Fund's fund-of-funds structure. The Board concluded that, on the basis of the information provided, the proposed management and subadvisory fees were reasonable.

***Overall Conclusions***

Based upon all of the information considered and the conclusions reached, the Board determined that the terms of each Advisory Agreement are fair and reasonable and that approval of each of the Advisory Agreements is in the best interests of the Fund.

**Long-Term Capital Gain Dividends.** Certain Accounts distributed long-term capital gain dividends during the fiscal year ended December 31, 2015. Details of designated long-term capital gain dividends for federal income tax purposes are shown in the notes to financial statements.

**Dividends Received Deduction.** For corporate shareholders, the percentages of ordinary income distributions (dividend income and short-term gains, if any) for the year ended December 31, 2015, that qualify for the Dividends Received Deduction are as follows:

| | Deductible Percentage |
|---|---|
| Equity Income Account | 76.17% |
| LargeCap Growth Account | 100.00% |
| MidCap Account | 100.00% |
| Principal Capital Appreciation Account | 100.00% |
| SAM Balanced Portfolio | 24.37% |
| SAM Conservative Balanced Portfolio | 15.32% |
| SAM Conservative Growth Portfolio | 36.95% |
| SAM Flexible Income Portfolio | 11.09% |
| SAM Strategic Growth Portfolio | 46.37% |
| SmallCap Blend Account | 98.07% |

**Foreign Taxes Paid.** The following Accounts elect under the Internal Revenue Code Section 853 to pass through foreign taxes paid to their shareholders. The information below summarizes the portion of ordinary income dividends that was derived from foreign sources and the total amount of foreign taxes passed through to shareholders on a per share basis for the year ended December 31, 2015, are as follows:

| | Foreign Taxes Per Share | Foreign Source Income |
|---|---|---|
| Diversified International Account | $ 0.0643 | 100.00% |
| SAM Balanced Portfolio | $ 0.0049 | 8.70% |
| SAM Conservative Balanced Portfolio | $ 0.0026 | 5.15% |
| SAM Conservative Growth Portfolio | $ 0.0063 | 14.88% |
| SAM Flexible Income Portfolio | $ 0.0015 | 1.62% |
| SAM Strategic Growth Portfolio | $ 0.0122 | 22.45% |

The following information is being provided to you, prompted by the acquisitions of the following Accounts effective April 17, 2015:

| Acquired Fund | Acquiring Fund |
|---|---|
| LargeCap Blend Account II | Principal Capital Appreciation Account |
| SmallCap Growth Account II | SmallCap Blend Account |
| SmallCap Value Account I | SmallCap Blend Account |

**Long-Term Capital Gain Dividends.** Certain Accounts distributed long-term capital gain dividends during the tax year ended April 17, 2015. The Accounts designate these distributions as long-term capital gain dividends per IRC Sec. 852(b)(3)(C) in the 20-percent group (which may be taxed at a 20-percent rate, a 15-percent rate or a 0-percent rate, depending on the shareholder's taxable income).

| | Long-Term Capital Gain |
|---|---|
| LargeCap Blend Account II | $ 32,069,632 |
| SmallCap Value Account I | $ 29,141,380 |

**Dividends Received Deduction.** For corporate shareholders, the percentages of ordinary income distributions (dividend income and short-term gains, if any) for the tax year ended April 17, 2015, that qualify for the Dividends Received Deduction are as follows:

| | Deductible Percentage |
|---|---|
| LargeCap Blend Account II | 58.30% |
| SmallCap Value Account I | 39.33% |

**Reallocation of Capital Redesignation.** A portion of the ordinary income and/or long-term capital gains dividends paid by certain Accounts have been redesignated as non-taxable return of capital (ROC). The non-taxable return of capital for each class listed in the table below reduces your cost basis. The adjustment to your cost basis will impact your gain or loss calculation when you sell your shares of the Accounts below.

| Class of Common Shares | CUSIP | Ordinary Income Per Share ROC Basis Adjustments | Long-Term Capital Gain Per Share ROC Basis Adjustments |
|---|---|---|---|
| LargeCap Blend Account II, Class 1 | 742969686 | $ 0.0035 | $ 0.0258 |
| LargeCap Blend Account II, Class 2 | 742969546 | $ 0.0031 | $ 0.0258 |
| SmallCap Value Account I, Class 1 | 742969785 | $ 0.0106 | $ 0.0538 |
| SmallCap Value Account I, Class 2 | 742969488 | $ 0.0105 | $ 0.0538 |

# Important Notes to Performance Information

Performance data is historical and cannot predict or guarantee future results. Principal value and investment return will fluctuate with market conditions, and you may have a gain or loss when you withdraw your money. Inception dates of the funds may have preceded the effective dates of the subaccounts, contracts or their availability in all states.

When reviewing the index comparisons, please keep in mind that indexes have a number of inherent performance differentials over the funds. First, unlike the funds, which must hold a minimum amount of cash to maintain liquidity, indexes do not have a cash component. Second, the funds are actively managed and, thus, are subject to management fees to cover salaries of securities analysts or portfolio managers in addition to other expenses. Indexes are unmanaged and do not include any commissions or other expenses typically associated with investing in securities. Third, indexes often contain a different mix of securities than the fund to which they are compared. Additionally, please remember that indexes are simply a measure of performance and cannot be invested in directly.

**SUPPLEMENT DATED FEBRUARY 8, 2016**
**TO THE STATEMENT OF ADDITIONAL INFORMATION DATED MAY 1, 2015**
**OF**
**FRANKLIN TEMPLETON VARIABLE INSURANCE PRODUCTS TRUST**

The statement of additional information (SAI) is amended as follows:

The section under the heading "**Dealer Compensation**" beginning on page 99 is replaced with the following:

In addition to the payments above, Distributors and/or its affiliates may make the following payments out of its own assets to certain dealers who sell shares of Franklin Templeton funds, or participate in the offering of variable insurance products that invest directly or indirectly in the Trust (VIP Qualifying Dealers):

*Marketing support payments.* Distributors may make payments to VIP Qualifying Dealers out of its own resources. A VIP Qualifying Dealer's marketing support services may include business planning assistance, marketing and advertising, training and ongoing education and support for dealer personnel about the Franklin Templeton funds (including the Trust) and financial planning needs of shareholders of the Franklin Templeton funds or contract owners that allocate contract value indirectly to one or more Franklin Templeton funds, placement on the VIP Qualifying Dealer's list of offered funds, access to sales meetings, sales representatives and management representatives of the dealer, and contract owner assistance in allocating contract value directly or indirectly to the Trust. Distributors compensates VIP Qualifying Dealers differently depending upon, among other factors, whether the VIP Qualifying Dealer is directly selling Franklin Templeton funds, or participating in the offering of variable insurance products that invest directly or indirectly in the Trust, sales and asset levels, redemption rates and the level and/or type of marketing and educational activities provided by the VIP Qualifying Dealer. Such compensation may include financial assistance to such dealers that enable Distributors to develop, manage or participate in and/or present at conferences or seminars, sales or training programs for invited registered representatives and other employees, client and investor events, and other dealer-sponsored events. These payments may vary depending upon the nature of the event. Distributors will, on an annual basis, determine whether to continue such payments. Currently, Distributors does not make marketing support payments in connection with the Trust except under limited circumstances for certain Funds of the Trust offered through a special product. Marketing support payments will not exceed 0.20% of the relevant Fund's or Funds' average daily net assets attributable to an insurance company, on an annual basis.

*Other payments.* From time to time, Distributors, at its expense, may provide additional compensation to VIP Qualifying Dealers which sell or arrange for the direct or indirect sale of shares of Franklin Templeton funds, including the Trust. Such compensation may include financial assistance to VIP Qualifying Dealers that enable Distributors to participate in and/or present at conferences or seminars, sales or training programs for invited registered representatives and other employees, client and investor events and other dealer-sponsored events. These payments may vary depending upon the nature of the event.

Distributors routinely sponsors due diligence meetings for registered representatives during which they receive updates on various Franklin Templeton funds and are afforded the

opportunity to speak with portfolio managers. Invitation to these meetings is not conditioned on selling a specific number of shares. Those who have shown an interest in Franklin Templeton funds, however, are more likely to be considered. To the extent permitted by their firm's policies and procedures, registered representatives' expenses in attending these meetings may be covered by Distributors.

Other compensation may be offered to the extent not prohibited by federal or state laws or any self-regulatory agency, such as FINRA. Distributors makes payments for events it deems appropriate, subject to Distributors' guidelines and applicable law. Distributors and/or its affiliates may also reimburse VIP Qualifying Dealers and/or their affiliates for certain costs associated with obtaining voting instructions from contract owners and the solicitation process in connection with Trust-sponsored proxy statements.

You can ask your insurance company and VIP Qualifying Dealer for information about any payments they receive from Distributors and any services provided. Additional disclosure may be included in the insurance contract prospectus.

*Please keep this supplement with your statement of additional information for future reference.*

# Templeton Developing Markets VIP Fund

This annual report for Templeton Developing Markets VIP Fund covers the fiscal year ended December 31, 2015.

## Class 2 Performance Summary as of December 31, 2015

Average annual total return of Class 2 shares* represents the average annual change in value, assuming reinvestment of dividends and capital gains. Average returns smooth out variations in returns, which can be significant; they are not the same as year-by-year results.

| Periods ended 12/31/15 | 1-Year | 5-Year | 10-Year |
|---|---|---|---|
| Average Annual Total Return | -19.60% | -7.02% | +0.96% |

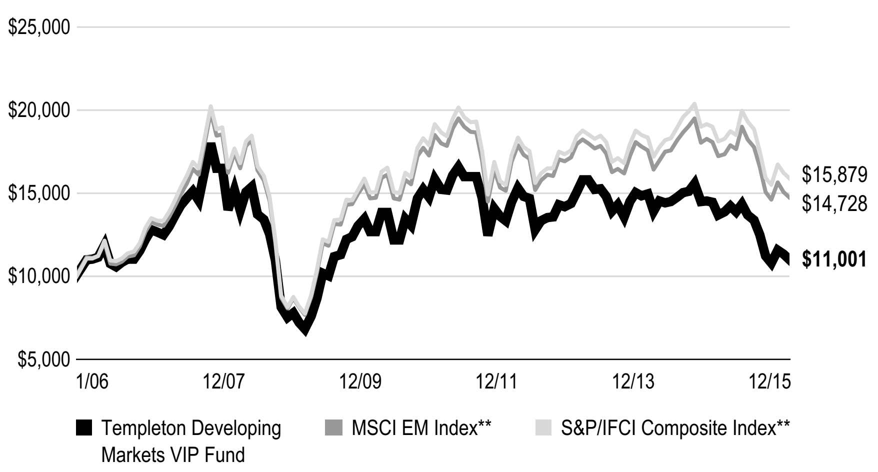
*The Fund has a fee waiver associated with any investment in a Franklin Templeton money fund, contractually guaranteed through at least its current fiscal year-end. Fund investment results reflect the fee waiver, to the extent applicable; without this reduction, the results would have been lower.

*Performance reflects the Fund's Class 2 operating expenses, but does **not** include any contract fees, expenses or sales charges. If they had been included, performance would be lower. These charges and deductions, particularly for variable life policies, can have a significant effect on contract values and insurance benefits. See the contract prospectus for a complete description of these expenses, including sales charges.*

*Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown.*

### Total Return Index Comparison for a Hypothetical $10,000 Investment (1/1/06–12/31/15)

The graph below shows the change in value of a hypothetical $10,000 investment in the Fund over the indicated period and includes reinvestment of any income or distributions. The Fund's performance* is compared to the performance of MSCI Emerging Markets (EM) Index and the Standard & Poor's®/International Finance Corporation Investable (S&P®/IFCI) Composite Index. One cannot invest directly in an index, and an index is not representative of the Fund's portfolio. **Please see Important Notes to Performance Information preceding the Fund Summaries.**



**Source: Morningstar. Please see Index Descriptions following the Fund Summaries.

## Fund Goal and Main Investments

The Fund seeks long-term capital appreciation. Under normal market conditions, the Fund invests at least 80% of its net assets in emerging market investments.

## Fund Risks

All investments involve risks, including possible loss of principal. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments. Investments in developing markets, of which frontier markets are a subset, involve heightened risks related to the same factors, in addition to those associated with these markets' smaller size, lesser liquidity and lack of established legal, political, business and social frameworks to support securities markets. Because these frameworks are typically even less developed in frontier markets, as well as various factors including the increased potential for extreme price volatility, illiquidity, trade barriers and exchange controls, the risks associated with developing markets are magnified in frontier markets. The Fund is designed for the aggressive portion of a well-diversified portfolio. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results. The Fund's prospectus also includes a description of the main investment risks.

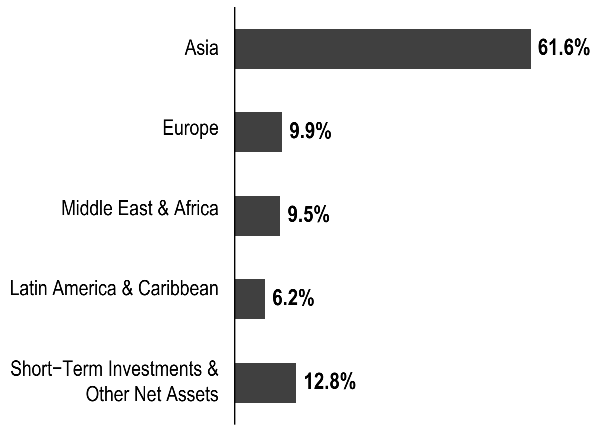
## Performance Overview

You can find the Fund's one-year total return in the Performance Summary. In comparison, the MSCI EM Index had a -14.60% total return, and the S&P/IFCI Composite Index had a -12.38% total return for the same period.[1] Please note index performance numbers are for reference and we do not attempt to track an index but rather undertake investments on the basis of fundamental research.

## Economic and Market Overview

The global economy expanded moderately during the 12 months under review. Although some emerging market countries faced headwinds such as soft domestic demand, weak exports and geopolitical crises, emerging market economies overall continued to grow faster than developed market economies. China's economy grew at a less robust pace in 2015 than in 2014, as strength in services and consumption was offset by weakness in fixed-asset investment, imports and exports, and manufacturing. Domestic demand continued to account for a greater portion of China's gross domestic product (GDP), as per-capita income rose, supported by the government's market-friendly policies for sustainable growth. In the third quarter, Brazil's and Russia's quarterly GDPs continued to contract but at slower rates compared with the second quarter. Despite moderating growth in some emerging market countries, India, the Czech Republic and Mexico showed signs of improvement.

**Geographic Breakdown**
Based on Total Net Assets as of 12/31/15



Many emerging market central banks, including those of Russia and India, lowered benchmark interest rates to promote economic growth. The People's Bank of China (PBOC) cut its benchmark interest rate and reduced the bank's cash reserve requirement several times. Toward period-end, the PBOC lowered short-term borrowing costs for smaller banks as part of its efforts to establish an interest rate corridor intended to help banks access funds in times of a liquidity crunch and to avoid heightened volatility in money market rates. In contrast, Brazil's central bank raised its benchmark interest rate despite an economic downturn, in an effort to control inflation and support the country's currency.

Events in China significantly affected stock performance in all regions during the year. The Chinese government's efforts to promote stable growth supported China's domestic stock market in 2015's first half. However, tight liquidity conditions and uncertainties about the PBOC's monetary policy led China's domestic market to correct from June through August, contributing to a global stock market correction. The PBOC's effective devaluation of the yuan to support export growth led to investor anxiety about China's economy and the possibility of a regional currency war, further pressuring emerging market stocks.

1. Source: Morningstar.
One cannot invest directly in an index, and an index is not representative of the Fund's portfolio. Please see Index Descriptions following the Fund Summaries.

Investor concerns about moderating global economic growth, the future course of U.S. monetary policy, geopolitical tensions in certain regions and the depreciation of many currencies against the U.S. dollar also contributed to stock market volatility. Price declines of many commodities, particularly crude oil, negatively affected certain commodity-producing countries' economies, financial positions and currencies, weighing further on investor sentiment.

However, accommodative monetary policies of many major central banks provided investors with some optimism. China's additional monetary and fiscal stimulus measures to support economic growth aided emerging market stocks in October, but weak commodity prices and terrorist attacks in Beirut and Paris hindered stocks toward period-end. Markets recovered somewhat after the U.S. Federal Reserve increased its federal funds target rate in December, alleviating some uncertainty about the direction of U.S. monetary policy.

For the 12 months ended December 31, 2015, emerging market stocks, as measured by the MSCI EM Index, had a -14.60% total return, as weak emerging market currencies led all major regions to post negative returns in U.S. dollar terms.[1]

## Investment Strategy

We employ a fundamental research, value-oriented, long-term investment approach. We focus on the market price of a company's securities relative to our evaluation of its long-term earnings, asset value and cash flow potential. We also consider a company's profit and loss outlook, balance sheet strength, cash flow trends and asset value in relation to the current price. Our analysis considers the company's corporate governance behavior as well as its position in its sector, the economic framework and political environment. We invest in securities without regard to benchmark comparisons.

## Manager's Discussion

During the year under review, the Fund remained diversified among different emerging market countries. Consistent with our long-term investment strategy, we viewed market corrections in China and other emerging markets in the context of a long-term uptrend. We continued to monitor global economic and market developments while seeking to minimize risk and to establish long-term positions in quality companies at share prices we considered more attractive.

Key detractors from the Fund's absolute performance during the 12-month reporting period included positions in Itau Unibanco Holding, MTN Group and MGM China Holdings.

**Top 10 Countries**
12/31/15

| | % of Total Net Assets |
|---|---|
| China | 19.8% |
| India | 10.8% |
| South Africa | 9.2% |
| South Korea | 8.9% |
| Taiwan | 8.7% |
| Brazil | 5.6% |
| U.K. | 5.0% |
| Thailand | 4.4% |
| Hong Kong | 3.5% |
| Belgium | 3.4% |

Itau Unibanco, one of Brazil's largest financial conglomerates, continued to produce solid operating performance despite the country's difficult economic environment. However, investor concerns about the potential for deteriorating asset quality and higher loan-loss provisions weighed on share price performance. The Brazilian financial market as a whole came under pressure during the reporting period, further hurting Itau Unibanco's shares. Falling prices for energy and other commodities coincided with an economic recession, rising unemployment and political uncertainty, leading to equity weakness and currency depreciation. Standard & Poor's downgrade of the country's long-term foreign currency sovereign credit rating to below investment grade in September heightened market anxiety.

MTN Group is Africa's largest cellular network in subscriber terms. The South Africa-based company's share price declined following an announcement that the Nigerian Communications Commission imposed a US$5.2 billion fine, which was subsequently reduced to US$3.4 billion. MTN allegedly failed to meet a deadline for disconnecting subscribers identified as unregistered. Disappointing first-half 2015 earnings results amid a weak regional economic backdrop and depreciation of regional currencies also hurt share price performance. Although third-quarter corporate results showed some improvement in the company's operations in South Africa, issues in the Nigerian market continued to weigh on overall operations. The resignation of the company's chief executive officer and concerns about potential challenges in the company's cash repatriation from Nigeria further pressured investor sentiment.

MGM China Holdings is a Hong Kong-listed casino gaming and entertainment business based in Macau. Shares of casino gaming companies, including MGM China's, fell during the reporting period due to investor concerns about declining numbers of high-spending customers, a result of China's anti-corruption campaign. Reduced dividend distributions also hurt overall sentiment in the casino gaming sector. However, despite weak revenue trends, MGM China reported slightly better-than-expected second- and third-quarter earnings results as the company achieved greater operating efficiencies.

Amid a challenging market environment, several Fund holdings performed well. Key contributors to absolute performance during the reporting period included NetEase, Tencent Holdings and Anheuser-Busch InBev.

China's Internet sector has been growing rapidly and could benefit further from the government's "Internet Plus" strategy, which is designed to integrate the Internet with traditional businesses to support the country's economic growth. NetEase is one of the largest companies in China's online gaming market. It also has presence in online advertising, email and e-commerce. The company's strong corporate results in 2015, driven by its mobile gaming operations, and plans to release new games in 2016 boosted the company's share price to a record high in December.

Tencent is one of the world's largest and most widely used Internet service portals. Founded in 1998 to provide instant messenger services, the company rapidly grew into a provider of mass media, entertainment, and Internet and mobile phone value-added services in China and internationally. Tencent reported solid earnings in 2015, supported by strong mobile gaming and advertising revenues.

Anheuser-Busch InBev is the world's largest brewer by volume, with operations in 25 countries globally. The Belgium-listed company produces, markets, distributes and sells over 200 beer and other malt beverage brands, as well as produces and distributes soft drinks, notably in Latin America. In November, Anheuser-Busch InBev reached an agreement to acquire SABMiller, the second-largest global brewer, which would substantially extend the group's global footprint. The transaction is expected to be completed in 2016's second half and was positively received by the market, bolstering the company's share price.

It is important to recognize the effect of currency movements on the Fund's performance. In general, if the value of the U.S. dollar goes up compared with a foreign currency, an investment traded in that foreign currency will go down in value because it will be worth fewer U.S. dollars. This can have a negative effect on Fund performance. Conversely, when the U.S. dollar weakens in relation to a foreign currency, an investment traded in that foreign currency will increase in value, which can contribute to Fund performance. The U.S. dollar appreciated against most foreign currencies during the period, and the portfolio benefited from underweighted positions in markets with especially weak currencies, such as Russia, Brazil and Colombia, as well as positions in relatively stable currency markets such as Saudi Arabia and Hong Kong.

The dollar value, number of shares or principal amount, and names of all portfolio holdings are listed in the Fund's Statement of Investments (SOI).

In the past 12 months, we increased the Fund's holdings in South Korea, Taiwan and Hong Kong as we sought to invest in opportunities we considered attractive. Additionally, we initiated investments in certain countries, notably Mexico and Cambodia, and made some purchases in Russia. In sector terms, we increased investments in information technology, consumer discretionary and health care.[2] Key purchases included new positions in Baidu, China's leading Internet search engine; Hon

2. The information technology sector comprises electronic equipment, instruments and components; Internet software and services; IT services; semiconductors and semiconductor equipment; software; and technology hardware, storage and peripherals in the SOI. The consumer discretionary sector comprises auto components; automobiles; distributors; hotels, restaurants and leisure; Internet and catalog retail; media; and textiles, apparel and luxury goods in the SOI. The health care sector comprises biotechnology and pharmaceuticals in the SOI.

Hai Precision Industry, a leading Taiwanese electronics manufacturing services provider; and SK Hynix, one of the world's largest DRAM (dynamic random access memory) makers.

Conversely, we reduced the Fund's investments in Thailand, South Africa, India and China primarily through China H shares to focus on companies we considered to be more attractively valued within our investment universe and to raise funds for share redemptions.[3] We also eliminated exposures to certain countries, notably Turkey. In sector terms, we reduced holdings largely in financials, energy, materials and industrials.[4] Key sales included trimming the Fund's positions in Siam Commercial Bank, a Thai bank; Remgro, a South African conglomerate with interests in finance, health care, food and industrials; and Tata Motors, an Indian automobile manufacturer.

Thank you for your participation in Templeton Developing Markets VIP Fund. We look forward to serving your future investment needs.

*The foregoing information reflects our analysis, opinions and portfolio holdings as of December 31, 2015, the end of the reporting period. The way we implement our main investment strategies and the resulting portfolio holdings may change depending on factors such as market and economic conditions. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. Although historical performance is no guarantee of future results, these insights may help you understand our investment management philosophy.*

3. "China H" denotes shares of China-incorporated, Hong Kong Stock Exchange-listed companies with most businesses in China.

4. The financials sector comprises banks, capital markets, diversified financial services, insurance, and real estate management and development in the SOI. The energy sector comprises oil, gas and consumable fuels in the SOI. The materials sector comprises chemicals and construction materials in the SOI. The industrials sector comprises construction and engineering, trading companies and distributors, and transportation infrastructure in the SOI.

# Class 2 Fund Expenses

As an investor in a variable insurance contract (Contract) that indirectly provides for investment in an underlying mutual fund, you can incur transaction and/or ongoing expenses at both the Fund level and the Contract level.

- Transaction expenses can include sales charges (loads) on purchases, redemption fees, surrender fees, transfer fees and premium taxes.
- Ongoing expenses can include management fees, distribution and service (12b-1) fees, contract fees, annual maintenance fees, mortality and expense risk fees and other fees and expenses. All mutual funds and Contracts have some types of ongoing expenses.

*The expenses shown in the table are meant to highlight ongoing expenses at the Fund level only and do not include ongoing expenses at the Contract level, or transaction expenses at either the Fund or Contract level. While the Fund does not have transaction expenses, if the transaction and ongoing expenses at the Contract level were included, the expenses shown below would be higher. You should consult your Contract prospectus or disclosure document for more information.*

The table shows Fund-level ongoing expenses and can help you understand these expenses and compare them with those of other mutual funds offered through the Contract. The table assumes a $1,000 investment held for the six months indicated. Please refer to the Fund prospectus for additional information on operating expenses.

## Actual Fund Expenses

The first line (Actual) of the table provides actual account values and expenses. The "Ending Account Value" is derived from the Fund's actual return, which includes the effect of ongoing Fund expenses, but does not include the effect of ongoing Contract expenses.

You can estimate the Fund-level expenses you incurred during the period by following these steps. *Of course, your account value and expenses will differ from those in this illustration:*

1. Divide your account value by $1,000.
   *If an account had an $8,600 value, then $8,600 ÷ $1,000 = 8.6.*
2. Multiply the result by the number under the heading "Fund-Level Expenses Incurred During Period."
   *If Fund-Level Expenses Incurred During Period were $7.50, then 8.6 × $7.50 = $64.50.*

In this illustration, the estimated expenses incurred this period at the Fund level are $64.50.

## Hypothetical Example for Comparison with Other Mutual Funds

Information in the second line (Hypothetical) of the table can help you compare ongoing expenses of the Fund with those of other mutual funds offered through the Contract. This information may not be used to estimate the actual ending account balance or expenses you incurred during the period. The hypothetical "Ending Account Value" is based on the Fund's actual expense ratio and an assumed 5% annual rate of return before expenses, which does not represent the Fund's actual return. The figure under the heading "Fund-Level Expenses Incurred During Period" shows the hypothetical expenses your account would have incurred under this scenario. You can compare this figure with the 5% hypothetical examples that appear in shareholder reports of other funds offered through a Contract.

| Class 2 | Beginning Account Value 7/1/15 | Ending Account Value 12/31/15 | Fund-Level Expenses Incurred During Period* 7/1/15–12/31/15 |
|---|---|---|---|
| Actual | $1,000 | $ 821.20 | $7.02 |
| Hypothetical (5% return before expenses) | $1,000 | $1,017.49 | $7.78 |

*Expenses are calculated using the most recent six-month annualized expense ratio, net of expense waivers, for the Fund's Class 2 shares (1.53%), which does not include any ongoing expenses of the Contract for which the Fund is an investment option, multiplied by the average account value over the period, multiplied by 184/365 to reflect the one-half year period.

# Financial Highlights

# Notes to Financial Statements

## Templeton Developing Markets VIP Fund

### 1. Organization and Significant Accounting Policies

Franklin Templeton Variable Insurance Products Trust (Trust) is registered under the Investment Company Act of 1940 (1940 Act) as an open-end management investment company, consisting of nineteen separate funds and applies the specialized accounting and reporting guidance in U.S. Generally Accepted Accounting Principles (U.S. GAAP). Templeton Developing Markets VIP Fund (Fund) is included in this report. The financial statements of the remaining funds in the Trust are presented separately. Shares of the Fund are generally sold only to insurance company separate accounts to fund the benefits of variable life insurance policies or variable annuity contracts. The Fund offers three classes of shares: Class 1, Class 2 and Class 4. Effective May 1, 2014, all Class 3 shares were converted to Class 2. Each class of shares differs by its distribution fees, voting rights on matters affecting a single class and its exchange privilege.

The following summarizes the Fund's significant accounting policies.

**a. Financial Instrument Valuation**

The Fund's investments in financial instruments are carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. The Fund calculates the net asset value (NAV) per share as of 4 p.m. Eastern time each day the New York Stock Exchange (NYSE) is open for trading. Under compliance policies and procedures approved by the Trust's Board of Trustees (the Board), the Fund's administrator has responsibility for oversight of valuation, including leading the cross-functional Valuation and Liquidity Oversight Committee (VLOC). The VLOC provides administration and oversight of the Fund's valuation policies and procedures, which are approved annually by the Board. Among other things, these procedures allow the Fund to utilize independent pricing services, quotations from securities and financial instrument dealers, and other market sources to determine fair value.

Equity securities listed on an exchange or on the NASDAQ National Market System are valued at the last quoted sale price or the official closing price of the day, respectively. Foreign equity securities are valued as of the close of trading on the foreign stock exchange on which the security is primarily traded or as of 4 p.m. Eastern time whichever is earlier. The value is then converted into its U.S. dollar equivalent at the foreign exchange rate in effect at 4 p.m. Eastern time on the day that the value of the security is determined. Over-the-counter (OTC) securities are valued within the range of the most recent quoted bid and ask prices. Securities that trade in multiple markets or on multiple exchanges are valued according to the broadest and most representative market. Certain equity securities are valued based upon fundamental characteristics or relationships to similar securities.

Investments in open-end mutual funds are valued at the closing NAV.

The Fund has procedures to determine the fair value of financial instruments for which market prices are not reliable or readily available. Under these procedures, the VLOC convenes on a regular basis to review such financial instruments and considers a number of factors, including significant unobservable valuation inputs, when arriving at fair value. The VLOC primarily employs a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, book values, and other relevant information for the investment to determine the fair value of the investment. An income-based valuation approach may also be used in which the anticipated future cash flows of the investment are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Due to the inherent uncertainty of valuations of such investments, the fair values may differ significantly from the values that would have been used had an active market existed. The VLOC employs various methods for calibrating these valuation approaches including a regular review of key inputs and assumptions, transactional back-testing or disposition analysis, and reviews of any related market activity.

Trading in securities on foreign securities stock exchanges and OTC markets may be completed before 4 p.m. Eastern time. In addition, trading in certain foreign markets may not take place on every NYSE business day. Occasionally, events occur between the time at which trading in a foreign security is completed and the close of the NYSE that might call into question the reliability of the value of a portfolio security held by the Fund. As a result, differences may arise between the value of the Fund's portfolio securities as determined at the foreign market close and the latest indications of value at the close of the NYSE. In order to minimize the potential for these differences, the VLOC monitors price movements following the close

## Templeton Developing Markets VIP Fund (continued)

### 1. Organization and Significant Accounting Policies (continued)

**a. Financial Instrument Valuation** *(continued)*

of trading in foreign stock markets through a series of country specific market proxies (such as baskets of American Depositary Receipts, futures contracts and exchange traded funds). These price movements are measured against established trigger thresholds for each specific market proxy to assist in determining if an event has occurred that may call into question the reliability of the values of the foreign securities held by the Fund. If such an event occurs, the securities may be valued using fair value procedures, which may include the use of independent pricing services.

When the last day of the reporting period is a non-business day, certain foreign markets may be open on those days that the NYSE is closed, which could result in differences between the value of the Fund's portfolio securities on the last business day and the last calendar day of the reporting period. Any significant security valuation changes due to an open foreign market are adjusted and reflected by the Fund for financial reporting purposes.

**b. Foreign Currency Translation**

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. The Fund may enter into foreign currency exchange contracts to facilitate transactions denominated in a foreign currency. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Portfolio securities and assets and liabilities denominated in foreign currencies contain risks that those currencies will decline in value relative to the U.S. dollar. Occasionally, events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Board.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments in the Statement of Operations.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

**c. Participatory Notes**

The Fund invests in Participatory Notes (P-Notes). P-notes are promissory notes that are designed to offer a return linked to the performance of a particular underlying equity security or market. P-Notes are issued by banks or broker-dealers and allow the Fund to gain exposure to common stocks in markets where direct investment is not allowed. Income received from P-Notes is recorded as dividend income in the Statement of Operations. P-Notes may contain various risks including the potential inability of the counterparty to fulfill their obligations under the terms of the contract. These securities may be more volatile and less liquid than other investments held by the Fund.

**d. Securities Lending**

The Fund participates in an agency based securities lending program to earn additional income. The Fund receives cash collateral against the loaned securities in an amount equal to at least 102% of the fair value of the loaned securities. Collateral is maintained over the life of the loan in an amount not less than 100% of the fair value of loaned securities, as determined at the close of Fund business each day; any additional collateral required due to changes in security values is delivered to the Fund on the next business day. The collateral is deposited into a joint cash account with other funds and is used to invest in a money market fund managed by Franklin Advisers, Inc., an affiliate of the Fund. The Fund may receive income from the investment of cash collateral, in addition to lending fees and rebates paid by the borrower. Income from securities loaned is reported separately in the Statement of Operations. The Fund bears the market risk with respect to the collateral investment, securities loaned, and the risk that the agent may default on its obligations to the Fund. If the borrower defaults on its obligation to return the securities loaned, the Fund has the right to repurchase the securities in the open market using the collateral received. The securities lending agent has agreed to indemnify

## Templeton Developing Markets VIP Fund (continued)

the Fund in the event of default by a third party borrower. At December 31, 2015, the Fund had no securities on loan.

It is the Fund's policy to qualify as a regulated investment company under the Internal Revenue Code. The Fund intends to distribute to shareholders substantially all of its taxable income and net realized gains to relieve it from federal income and if applicable, excise taxes. As a result, no provision for U.S. federal income taxes is required.

The Fund may be subject to foreign taxation related to income received, capital gains on the sale of securities and certain foreign currency transactions in the foreign jurisdictions in which it invests. Foreign taxes, if any, are recorded based on the tax regulations and rates that exist in the foreign markets in which the Fund invests. When a capital gain tax is determined to apply, the Fund records an estimated deferred tax liability in an amount that would be payable if the securities were disposed of on the valuation date.

The Fund may recognize an income tax liability related to its uncertain tax positions under U.S. GAAP when the uncertain tax position has a less than 50% probability that it will be sustained upon examination by the tax authorities based on its technical merits. As of December 31, 2015, the Fund has determined that no tax liability is required in its financial statements related to uncertain tax positions for any open tax years (or expected to be taken on future tax returns). Open tax years are those that remain subject to examination and are based on each tax jurisdiction's statute of limitation.

**f. Security Transactions, Investment Income, Expenses and Distributions**

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Estimated expenses are accrued daily. Dividend income is recorded on the ex-dividend date except for certain dividends from foreign securities where the dividend rate is not available. In such cases, the dividend is recorded as soon as the information is received by the Fund. Distributions to shareholders are recorded on the ex-dividend date and are determined according to income tax regulations (tax basis). Distributable earnings determined on a tax basis may differ from earnings recorded in accordance with U.S. GAAP. These differences may be permanent or temporary. Permanent differences are reclassified among capital accounts to reflect their tax character. These reclassifications have no impact on net assets or the results of operations. Temporary differences are not reclassified, as they may reverse in subsequent periods.

Common expenses incurred by the Trust are allocated among the Funds based on the ratio of net assets of each Fund to the combined net assets of the Trust. Fund specific expenses are charged directly to the fund that incurred the expense.

Realized and unrealized gains and losses and net investment income, not including class specific expenses, are allocated daily to each class of shares based upon the relative proportion of net assets of each class. Differences in per share distributions, by class, are generally due to differences in class specific expenses.

**g. Accounting Estimates**

The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

**h. Redemption Fees**

Redemptions and exchanges of interests in an insurance company subaccount that invested in Class 3 shares of the Fund were subject to a 1.0% short term trading fee if the interest in the subaccount had been held for less than 60 days. Such fees were retained by the Fund and accounted for as an addition to paid-in capital, allocated to each class of shares based upon the relative proportion of net assets of each class. There were no redemption fees for the year.

**i. Guarantees and Indemnifications**

Under the Trust's organizational documents, its officers and trustees are indemnified by the Trust against certain liabilities arising out of the performance of their duties to the Trust. Additionally, in the normal course of business, the Trust, on behalf of the Fund, enters into contracts with service providers that contain general indemnification clauses. The Trust's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Trust that have not yet occurred. Currently, the Trust expects the risk of loss to be remote.

## Templeton Developing Markets VIP Fund (continued)

### 2. Shares of Beneficial Interest

At December 31, 2015, there were an unlimited number of shares authorized (without par value). Transactions in the Fund's shares were as follows:

| | Year Ended December 31, | | | |
|---|---|---|---|---|
| | 2015 | | 2014 | |
| | Shares | Amount | Shares | Amount |
| **Class 1 Shares:** | | | | |
| Shares sold | 1,121,738 | $ 9,288,141 | 1,624,952 | $ 16,226,245 |
| Shares issued in reinvestment of distributions | 1,921,727 | 14,835,735 | 229,681 | 2,319,775 |
| Shares redeemed | (3,309,863) | (27,352,757) | (3,701,849) | (37,106,215) |
| Net increase (decrease) | (266,398) | $ (3,228,881) | (1,847,216) | $(18,560,195) |
| **Class 2 Shares:** | | | | |
| Shares sold | 4,635,193 | $ 35,599,642 | 7,755,421 | $ 76,467,757 |
| Shares issued in reinvestment of distributions | 4,430,114 | 33,934,677 | 434,143 | 4,358,800 |
| Shares redeemed | (5,930,164) | (47,986,302) | (7,896,683) | (78,546,164) |
| Net increase (decrease) | 3,135,143 | $ 21,548,017 | 292,881 | $ 2,280,393 |
| **Class 3 Shares**[a]: | | | | |
| Shares sold | | | 171,371 | $ 1,697,483 |
| Shares redeemed | | | (3,593,907) | (35,371,525) |
| Net increase (decrease) | | | (3,422,536) | $(33,674,042) |
| **Class 4 Shares:** | | | | |
| Shares sold | 96,241 | $ 723,497 | 89,395 | $ 875,146 |
| Shares issued in reinvestment of distributions | 184,886 | 1,421,771 | 17,219 | 173,399 |
| Shares redeemed | (364,639) | (2,894,227) | (395,412) | (3,957,884) |
| Net increase (decrease) | (83,512) | $ (748,959) | (288,798) | $ (2,909,339) |

[a]Effective May 1, 2014, all Class 3 shares were converted to Class 2.

### 3. Transactions With Affiliates

Franklin Resources, Inc. is the holding company for various subsidiaries that together are referred to as Franklin Templeton Investments. Certain officers and trustees of the Fund are also officers and/or trustees of the following subsidiaries:

| Subsidiary | Affiliation |
|---|---|
| Templeton Asset Management Ltd. (TAML) | Investment manager |
| Franklin Templeton Services, LLC (FT Services) | Administrative manager |
| Franklin Templeton Distributors, Inc. (Distributors) | Principal underwriter |
| Franklin Templeton Investor Services, LLC (Investor Services) | Transfer agent |

## Templeton Developing Markets VIP Fund (continued)

### a. Management Fees

The Fund pays an investment management fee to TAML based on the average daily net assets of the Fund as follows:

| Annualized Fee Rate | Net Assets |
|---|---|
| 1.250% | Up to and including $200 million |
| 1.235% | Over $200 million, up to and including $700 million |
| 1.200% | Over $700 million, up to and including $1 billion |
| 1.150% | Over $1 billion, up to and including $1.2 billion |
| 1.125% | Over $1.2 billion, up to and including $5 billion |
| 1.075% | Over $5 billion, up to and including $10 billion |
| 1.025% | Over $10 billion, up to and including $15 billion |
| 0.975% | Over $15 billion, up to and including $20 billion |
| 0.925% | In excess of $20 billion |

### b. Administrative Fees

Under an agreement with TAML, FT Services provides administrative services to the Fund. The fee is paid by TAML based on the Fund's average daily net assets, and is not an additional expense of the Fund.

### c. Distribution Fees

The Board has adopted distribution plans for Class 2 and Class 4 shares pursuant to Rule 12b-1 under the 1940 Act. Under the Fund's compensation distribution plans, the Fund pays Distributors for costs incurred in connection with the servicing, sale and distribution of the Fund's shares up to 0.25% and 0.35% per year of its average daily net assets of Class 2 and Class 4, respectively. The plan year, for purposes of monitoring compliance with the maximum annual plan rates, is February 1 through January 31.

### d. Transfer Agent Fees

Investor Services, under terms of an agreement, performs shareholder servicing for the Fund and is not paid by the Fund for the services.

### e. Investments in Affiliated Management Investment Companies

The Fund invests in an affiliated management investment company for purposes other than exercising a controlling influence over the management or policies. Management fees paid by the Fund are waived on assets invested in the affiliated management investment company, as noted in the Statement of Operations, in an amount not to exceed the management and administrative fees paid directly or indirectly by each affiliate. Prior to January 1, 2014, the waiver was accounted for as a reduction to management fees.

| | Number of Shares Held at Beginning of Year | Gross Additions | Gross Reductions | Number of Shares Held at End of Year | Value at End of Year | Investment Income | Realized Gain (Loss) | % of Affiliated Fund Shares Outstanding Held at End of Year |
|---|---|---|---|---|---|---|---|---|
| **Non-Controlled Affiliates** | | | | | | | | |
| Institutional Fiduciary Trust Money Market Portfolio . . . | 29,018,398 | 147,819,607 | (140,729,704) | 36,108,301 | $36,108,301 | $ — | $ — | 0.18% |

### f. Interfund Transactions

The Fund engaged in purchases and sales of investments with funds or other accounts that have a common investment manager (or affiliated investment managers), directors, trustees, or officers. These transactions complied with Rule 17a-7 under the 1940 Act. During the year ended December 31, 2015, the purchase and sale transactions aggregated $15,932,431 and $4,791,642, respectively.

## Templeton Developing Markets VIP Fund (continued)

### 4. Expense Offset Arrangement

The Fund has entered into an arrangement with its custodian whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the Fund's custodian expenses. During the year ended December 31, 2015, there were no credits earned.

### 5. Income Taxes

For tax purposes, capital losses may be carried over to offset future capital gains, if any.

At December 31, 2015, capital loss carryforwards were as follows:

| | |
|---|---|
| Capital loss carryforwards not subject to expiration: | |
| Short term | $22,864,241 |
| Long term | 18,453,194 |
| Total capital loss carryforwards | $41,317,435 |

The tax character of distributions paid during the years ended December 31, 2015 and 2014, was as follows:

| | 2015 | 2014 |
|---|---|---|
| Distributions paid from: | | |
| Ordinary income | $ 7,065,009 | $6,851,974 |
| Long term capital gain | 43,127,174 | — |
| | $50,192,183 | $6,851,974 |

At December 31, 2015, the cost of investments, net unrealized appreciation (depreciation) and undistributed ordinary income for income tax purposes were as follows:

| | |
|---|---|
| Cost of investments | $290,270,246 |
| Unrealized appreciation | $ 26,814,133 |
| Unrealized depreciation | (40,228,051) |
| Net unrealized appreciation (depreciation) | $ (13,413,918) |
| Distributable earnings – undistributed ordinary income | $ 2,531,599 |

Differences between income and/or capital gains as determined on a book basis and a tax basis are primarily due to differing treatments of corporate actions and wash sales.

### 6. Investment Transactions

Purchases and sales of investments (excluding short term securities) for the year ended December 31, 2015, aggregated $212,828,608 and $250,489,203, respectively.

### 7. Concentration of Risk

Investing in foreign securities may include certain risks and considerations not typically associated with investing in U.S. securities, such as fluctuating currency values and changing local and regional economic, political and social conditions, which may result in greater market volatility. In addition, certain foreign securities may not be as liquid as U.S. securities.

## Templeton Developing Markets VIP Fund (continued)

### 8. Credit Facility

The Fund, together with other U.S. registered and foreign investment funds (collectively, Borrowers), managed by Franklin Templeton Investments, are borrowers in a joint syndicated senior unsecured credit facility totaling $2 billion (Global Credit Facility) which matured on February 12, 2016. This Global Credit Facility provides a source of funds to the Borrowers for temporary and emergency purposes, including the ability to meet future unanticipated or unusually large redemption requests. Effective February 12, 2016, the Borrowers renewed the Global Credit Facility for a one year term, maturing February 10, 2017, for a total of $2 billion.

Under the terms of the Global Credit Facility, the Fund shall, in addition to interest charged on any borrowings made by the Fund and other costs incurred by the Fund, pay its share of fees and expenses incurred in connection with the implementation and maintenance of the Global Credit Facility, based upon its relative share of the aggregate net assets of all of the Borrowers, including an annual commitment fee of 0.07% based upon the unused portion of the Global Credit Facility. Effective February 12, 2016, the annual commitment fee is 0.15%. These fees are reflected in other expenses in the Statement of Operations. During the year ended December 31, 2015, the Fund did not use the Global Credit Facility.

### 9. Fair Value Measurements

The Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's financial instruments and are summarized in the following fair value hierarchy:

- Level 1 – quoted prices in active markets for identical financial instruments
- Level 2 – other significant observable inputs (including quoted prices for similar financial instruments, interest rates, prepayment speed, credit risk, etc.)
- Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of financial instruments)

The input levels are not necessarily an indication of the risk or liquidity associated with financial instruments at that level.

For movements between the levels within the fair value hierarchy, the Fund has adopted a policy of recognizing the transfers as of the date of the underlying event which caused the movement.

A summary of inputs used as of December 31, 2015, in valuing the Fund's assets carried at fair value, is as follows:

| | Level 1 | Level 2 | Level 3 | Total |
|---|---|---|---|---|
| **Assets:** | | | | |
| Investments in Securities: | | | | |
| Equity Investments[a,b] | $239,857,853 | $ — | $ — | $239,857,853 |
| Participatory Notes | — | 890,174 | — | 890,174 |
| Short Term Investments | 36,108,301 | — | — | 36,108,301 |
| Total Investments in Securities | $275,966,154 | $890,174 | $ — | $276,856,328 |

[a]Includes common and preferred stocks.
[b]For detailed categories, see the accompanying Statement of Investments.

### 10. Subsequent Events

The Fund has evaluated subsequent events through the issuance of the financial statements and determined that no events have occurred that require disclosure other than those already disclosed in the financial statements.

# Report of Independent Registered Public Accounting Firm

## Templeton Developing Markets VIP Fund

### To the Board of Trustees and Shareholders of Franklin Templeton Variable Insurance Products Trust

In our opinion, the accompanying statement of assets and liabilities, including the statement of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Templeton Developing Markets VIP Fund (the "Fund") at December 31, 2015, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit, which included confirmation of securities at December 31, 2015 by correspondence with the custodian, transfer agent and brokers, provides a reasonable basis for our opinion.

PricewaterhouseCoopers LLP

San Francisco, California
February 16, 2016

# Tax Information (unaudited)

## Templeton Developing Markets VIP Fund

Under Section 852(b)(3)(C) of the Internal Revenue Code (Code), the Fund hereby reports the maximum amount allowable but no less than $43,127,174 as long term capital gain dividends for the fiscal year ended December 31, 2015.

At December 31, 2015, more than 50% of the Fund's total assets were invested in securities of foreign issuers. In most instances, foreign taxes were withheld from income paid to the Fund on these investments. The Fund elects to treat foreign taxes paid as allowed under Section 853 of the Code. This election will allow shareholders of record as of the 2016 distribution date, to treat their proportionate share of foreign taxes paid by the Fund as having been paid directly by them. The shareholder shall consider these amounts as foreign taxes paid in the tax year in which they receive the Fund distribution.

# Index Descriptions

The indexes are unmanaged and include reinvestment of any income or distributions.

For Russell Indexes: Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.

See www.franklintempletondatasources.com for additional data provider information.

**Barclays 1-3 Month U.S. Treasury Bill Index** includes all publicly issued zero-coupon U.S. Treasury bills that have a remaining maturity between one month and three months and are investment-grade rated, U.S. dollar denominated, fixed rate and nonconvertible.

**Barclays U.S. Aggregate Bond Index** is a market capitalization-weighted index representing the U.S. investment-grade, fixed-rate, taxable bond market with index components for government and corporate, mortgage pass-through and asset-backed securities. All issues included are SEC registered, taxable, dollar denominated and nonconvertible, must have at least one year to final maturity and must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, Standard & Poor's and Fitch, respectively.

**Barclays U.S. Government Index: Intermediate Component** is the intermediate component of the Barclays U.S. Government Index, which includes public obligations of the U.S. Treasury with at least one year to final maturity and publicly issued debt of U.S. government agencies, quasi-federal corporations, and corporate or foreign debt guaranteed by the U.S. government.

**Bloomberg Commodity Index** comprises exchange-traded futures on physical commodities, which are weighted to account for economic significance and market liquidity.

**Citigroup World Government Bond Index** is a market capitalization-weighted index consisting of investment-grade world government bond markets.

**Consumer Price Index (CPI)** is a commonly used measure of the inflation rate.

**Credit Suisse (CS) High Yield Index** is designed to mirror the investable universe of the U.S. dollar-denominated high yield debt market.

**FTSE® EPRA®/NAREIT® Developed Index** is a free float-adjusted index designed to measure the performance of publicly traded real estate securities in the North American, European and Asian real estate markets.

**J.P. Morgan (JPM) Global Government Bond Index (GGBI)** tracks total returns for liquid, fixed-rate, domestic government bonds with maturities greater than one year issued by developed countries globally.

**Lipper Multi-Sector Income Funds Classification Average** is calculated by averaging the total returns of all funds within the Lipper Multi-Sector Income Funds classification in the Lipper Open-End underlying funds universe. Lipper Multi-Sector Income Funds are defined as funds that seek current income by allocating assets among different fixed income securities sectors (not primarily in one sector except for defensive purposes), including U.S. and foreign governments, with a significant portion rated below investment grade. For the 12-month period ended 12/31/15, there were 286 funds in this category. Lipper calculations do not include contract fees, expenses or sales charges, and may have been different if such charges had been considered.

**Lipper VIP Equity Income Funds Classification Average** is an equally weighted average calculation of performance figures for all funds within the Lipper Equity Income Funds classification in the Lipper VIP underlying funds universe. Lipper Equity Income Funds seek relatively high current income and growth of income through investing 60% or more of their portfolios in equities. For the 12-month period ended 12/31/15, there were 71 funds in this category. Lipper calculations do not include contract fees, expenses or sales charges, and may have been different if such charges had been considered.

**Lipper VIP General U.S. Government Funds Classification Average** is an equally weighted average calculation of performance figures for all funds within the Lipper General U.S. Government Funds classification in the Lipper VIP underlying funds universe. Lipper General U.S. Government Funds invest primarily in U.S. government and agency issues. For the 12-month period ended 12/31/15, there were 55 funds in this category. Lipper calculations do not include contract fees, expenses or sales charges, and may have been different if such charges had been considered.

**Lipper VIP High Yield Funds Classification Average** is an equally weighted average calculation of performance figures for all funds within the Lipper High Yield Funds Classification in the Lipper VIP underlying funds universe. Lipper High Yield Funds aim at high (relative) current yield from fixed income securities, have no quality or maturity restrictions, and tend to invest in lower grade debt issues. For the 12-month period ended 12/31/15, there were 111 funds in this category. Lipper calculations do not include contract fees, expenses or sales charges, and may have been different if such charges had been considered.

**MSCI All Country World Index (ACWI)** is a free float-adjusted, market capitalization-weighted index designed to measure equity market performance in global developed and emerging markets.

**MSCI Emerging Markets (EM) Index** is a free float-adjusted, market capitalization-weighted index designed to measure equity market performance in global emerging markets.

**MSCI Europe, Australasia, Far East (EAFE) Index** is a free float-adjusted, market capitalization-weighted index designed to measure equity market performance in global developed markets excluding the U.S. and Canada.

**MSCI World Index** is a free float-adjusted, market capitalization-weighted index designed to measure equity market performance in global developed markets.

**Russell 1000® Growth Index** is market capitalization weighted and measures performance of those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values.

**Russell 1000® Index** is market capitalization weighted and measures performance of the largest companies in the Russell 3000® Index, which represents the majority of the U.S. market's total capitalization.

**Russell 2500™ Index** is market capitalization weighted and measures performance of the smallest companies in the Russell 3000® Index, which represent a modest amount of the Russell 3000® Index's total market capitalization.

**Russell 2500 ™ Value Index** is market capitalization weighted and measures performance of those Russell 2500 ™ Index companies with lower price-to-book ratios and lower forecasted growth values.

**Russell 3000® Growth Index** is market capitalization weighted and measures performance of those Russell 3000® Index companies with higher price-to-book ratios and higher forecasted growth values.

**Russell 3000® Index** is market capitalization weighted and measures performance of the largest U.S. companies based on total market capitalization and represents the majority of the investable U.S. equity market.

**Russell Midcap® Growth Index** is market capitalization weighted and measures performance of those Russell Midcap® Index companies with higher price-to-book ratios and higher forecasted growth values.

**Russell Midcap® Index** is market capitalization weighted and measures performance of the smallest companies in the Russell 1000® Index, which represent a modest amount of the Russell 1000® Index's total market capitalization.

**Standard & Poor's® 500 Index (S&P 500®)** is a market capitalization-weighted index of 500 stocks designed to measure total U.S. equity market performance.

**Standard & Poor's®/International Finance Corporation Investable (S&P/IFCI) Composite Index** is a free float-adjusted, market capitalization-weighted index designed to measure equity performance in global emerging markets.

# Board Members and Officers

The name, year of birth and address of the officers and board members, as well as their affiliations, positions held with the Trust, principal occupation during at least the past five years and number of portfolios overseen in the Franklin Templeton Investments fund complex, are shown below. Generally, each board member serves until that person's successor is elected and qualified.

## Independent Board Members

| Name, Year of Birth and Address | Position | Length of Time Served | Number of Portfolios in Fund Complex Overseen by Board Member* | Other Directorships Held During at Least the Past 5 Years |
|---|---|---|---|---|
| **Harris J. Ashton (1932)**<br>One Franklin Parkway<br>San Mateo, CA 94403-1906 | Trustee | Since 1988 | 147 | Bar-S Foods (meat packing company) (1981-2010). |
| **Principal Occupation During at Least the Past 5 Years:**<br>Director of various companies; and **formerly**, Director, RBC Holdings, Inc. (bank holding company) (until 2002); and President, Chief Executive Officer and Chairman of the Board, General Host Corporation (nursery and craft centers) (until 1998). | | | | |

| **Lori A. Weber (1964)**<br>300 S.E. 2nd Street<br>Fort Lauderdale, FL 33301-1923 | Vice President | Since 2011 | Not Applicable | Not Applicable |

**Principal Occupation During at Least the Past 5 Years:**
Senior Associate General Counsel, Franklin Templeton Investments; Assistant Secretary, Franklin Resources, Inc.; Vice President and Secretary, Templeton Investment Counsel, LLC; and officer of 44 of the investment companies in Franklin Templeton Investments.

*We base the number of portfolios on each separate series of the U.S. registered investment companies within the Franklin Templeton Investments fund complex. These portfolios have a common investment manager or affiliated investment managers.

**Gregory E. Johnson is considered to be an interested person of the Fund under the federal securities laws due to his position as an officer and director of Franklin Resources, Inc. (Resources), which is the parent company of the Fund's investment manager and distributor. Rupert H. Johnson, Jr. is considered to be an interested person of the Fund under the federal securities laws due to his position as officer and director and major shareholder of Resources.

Note 1: Rupert H. Johnson, Jr. is the uncle of Gregory E. Johnson.

Note 2: Officer information is current as of the date of this report. It is possible that after this date, information about officers may change.

Note 3: Effective April 30, 2015, Sam Ginn ceased to be a trustee of the Trust.

**The Sarbanes-Oxley Act of 2002 and Rules adopted by the Securities and Exchange Commission require the Fund to disclose whether the Fund's Audit Committee includes at least one member who is an audit committee financial expert within the meaning of such Act and Rules. The Fund's Board has determined that there is at least one such financial expert on the Audit Committee and has designated John B. Wilson as its audit committee financial expert. The Board believes that Mr. Wilson qualifies as such an expert in view of his extensive business background and experience, including service as chief financial officer of Staples, Inc. from 1992 to 1996. Mr. Wilson has been a Member and Chairman of the Fund's Audit Committee since 2007. As a result of such background and experience, the Board believes that Mr. Wilson has acquired an understanding of generally accepted accounting principles and financial statements, the general application of such principles in connection with the accounting estimates, accruals and reserves, and analyzing and evaluating financial statements that present a breadth and level of complexity of accounting issues generally comparable to those of the Fund, as well as an understanding of internal controls and procedures for financial reporting and an understanding of audit committee functions. Mr. Wilson is an independent Board member as that term is defined under the relevant Securities and Exchange Commission Rules and Releases.**

**The Statement of Additional Information (SAI) includes additional information about the board members and is available, without charge, upon request. Shareholders may call (800) 321-8563 or their insurance companies to request the SAI.**

# Shareholder Information

### Proxy Voting Policies and Procedures

The Trust's investment manager has established Proxy Voting Policies and Procedures (Policies) that the Trust uses to determine how to vote proxies relating to portfolio securities. Shareholders may view the Trust's complete Policies online at franklintempleton.com. Alternatively, shareholders may request copies of the Policies free of charge by calling the Proxy Group collect at (954) 527-7678 or by sending a written request to: Franklin Templeton Companies, LLC, 300 S.E. 2nd Street, Fort Lauderdale, FL 33301, Attention: Proxy Group. Copies of the Trust's proxy voting records are also made available online at franklintempleton.com and posted on the U.S. Securities and Exchange Commission's website at sec.gov and reflect the most recent 12-month period ended June 30.

### Quarterly Statement of Investments

The Trust files a complete statement of investments with the U.S. Securities and Exchange Commission for the first and third quarters for each fiscal year on Form N-Q. Shareholders may view the filed Form N-Q by visiting the Commission's website at sec.gov. The filed form may also be viewed and copied at the Commission's Public Reference Room in Washington, DC. Information regarding the operations of the Public Reference Room may be obtained by calling (800) SEC-0330.
